Dr. Basant Goel, widely known as the “King of Medicines,” is a distinguished pharmacist, entrepreneur, and philanthropist whose life embodies service, compassion, and dedication to humanity. He began his journey in the world of pharmacy at just eight years old, assisting his grandfather in a small medical shop. He earned his Bachelor of Pharmacy (B. Pharma) and went on to complete his Doctorate in Pharmacy from the prestigious East Coast University, USA. He later established Goel Medicos, which soon became one of the most recognized pharmacies in India, known for its ability to provide life-saving medicines that were often unavailable elsewhere.

He offers free medical consultations to thousands of patients and provides medicines free of cost to those who cannot afford them. During the COVID-19 pandemic, he stood at the frontline of service, delivering treatment, medicines, food, and essential supplies to nearly 20,000 patients—a humanitarian effort that earned him recognition and a certificate of appreciation from the World Book of Records (London).

Dr. Basant Goel also runs an NGO, Mission Sarvarth Seva Foundation, which achieved a remarkable milestone on 22nd January by being recognized in the India Book of Records and Asia Book of Records for organizing the “Maximum People Donating Blood at a Single Camp in 16 Hours. He has been honored with multiple awards and accolades from national leaders, organizations, and the Indian Pharmaceutical Association.

PREFACE

This Coffee Table , Narendra Modi: Voice of Bharat, brings together the Independence Day speeches delivered by Prime Minister Shri Narendra Modi from the Red Fort Ramparts between 2014 and 2025. These speeches are the record of India's growth, struggles, and aspirations during a historic period of transformation. The idea of this book was born out of the need to preserve these speeches in one place so that readers, researchers, students, and common citizens can revisit them whenever they want. While newspapers and television capture the moment, this collection allows us to see the larger picture. Through this book, we can trace the journey of India year by year and understand how the vision of one leader has been woven into the progress of a whole nation.

The speeches in this book show a wide range of concerns and hopes—cleanliness, women's empowerment, education, farmers' welfare, technology, digitalization, defence, and the dream of making India self-reliant and developed by 2047. They remind us that leadership is about the ability to communicate with people in a way that touches their lives.

The structure of this book is simple. Each chapter presents the speech from a particular Independence Day, starting with 2014 and moving year by year up to 2025. Short introductions have been added to highlight the background, the challenges of that year, and the main themes of the address. The book has been designed with care so that the layout, images, and visual presentation make reading a pleasant and inspiring experience. This project has required patience and attention to detail. Collecting the speeches, editing them with accuracy, and presenting them in a reader-friendly manner was a task that demanded dedication.

The purpose of this book is to open a window into the vision of India's future. It is a reference for today and a guide for tomorrow. For students, it will serve as a source of learning. For policymakers and researchers, it will be a valuable document. For ordinary readers, it will be an inspiring keepsake. For future generations, it will be a record of how India dreamed and moved forward during these years.

It is our hope that every reader of this book will feel inspired to take part in nation-building in their own way. Prime Minister Narendra Modi's words encourage us to look beyond challenges and believe in our strengths. They remind us that India's journey is about the collective contribution of every citizen. Each one of us has a role in shaping the future, and together we can build the India of our dreams.

Dr Basant Goel

DR. BASANT GOEL

A Life of Compassion in Medicine and Social Work

Dr. Basant Goel is known as the “King of Medicines.” His story is full of hard work, kindness, and service. His connection with medicines started when he was just eight years old. While most children played games, he would sit in his grandfather's medical shop. There he learned about different medicines and how they could help people. This childhood habit became the start of a lifelong journey that made him one of the most respected names in pharmacy.

To follow his interest, Dr. Basant Goel studied pharmacy and completed his B. Pharma degree. Later, he went to the United States and earned a Doctorate in Pharmacy from East Coast University. With this strong education, he returned and opened Goel Medicos. Soon, his pharmacy became famous all over India because it was known for having even those medicines that were not available anywhere else. For him, selling medicines was never just about business—it was about helping people live better lives.

Dr. Basant Goel is a successful businessman and also a true social worker. Every year, he gives free medical advice to thousands of patients. He also provides medicines free of cost to poor people who cannot afford them. During the COVID-19 pandemic, when people were scared and struggling, he served about 20,000 patients with free medicines, food, and even simple things like coconut water to help them recover. For this selfless work, the World Book of Records (London) honored him with a certificate of appreciation. His love and care are not only for

people but also for animals. Dr. Basant Goel works with gaushalas to take care of cows. He also looks after street dogs and cats by giving them food and shelter. His kindness shows that his heart is open for every living being, and he believes that service should reach both humans and animals.

On his birthday, 6th July 2024, Dr. Basant Goel chose to dedicate the day to the service of the nation in a unique way. Instead of personal celebrations, he organized a historic Blood Donation Camp, which brought together thousands of people with the spirit of giving. The event became a symbol of compassion and collective effort, showing how one person's vision can inspire many others to join in the cause of humanity. The scale of the camp was so remarkable that it was honored and recognized by the Guinness World Records for achieving the highest number of

blood donations in a single day. This achievement not only reflected Dr. Goel's commitment to social service but also highlighted the strength of community participation when guided by a noble purpose. Knowing that many people die every year because of lack of blood, he organizes blood donation camps. During the pandemic, when blood banks in Delhi were facing a shortage, his efforts helped save many lives. Through his NGO, Mission Sarvarth Seva Foundation, he achieved a record on 22nd January for organizing the "Maximum People Donating Blood at a Single Camp in 16 Hours," which was recognized by both the India Book of Records and the Asia Book of Records.

Dr. Basant Goel also spends time with people who are often forgotten by society. On festivals like Holi and Diwali, he goes to meet children suffering from leprosy and celebrates with them. He has also organized weddings for poor couples, giving them all the support they need, including food, gifts, and household

items as part of kanyadaan. These acts of kindness show his belief that festivals and celebrations should bring happiness to everyone, especially the less fortunate.

For his great work, he has received many awards. He has been honored by more than 20 cabinet ministers and 50 Members of Parliament. He was given the title of Best Pharmacy in the World by famous actress and MP Hema Malini. The Indian Pharmaceutical Association has also praised him for his work in pharmacy management and social service. Yet, even after so much recognition, Dr. Goel stays humble and continues his work with the same energy.

From a small boy in his grandfather's shop to a well-known pharmacist, businessman, and social worker, Dr. Basant Goel's journey is inspiring. His life teaches us that with knowledge, dedication, and compassion, one person can touch thousands of lives. Whether it is giving medicines, helping animals, donating blood, or supporting poor families, he always works for the good of society. His story shows the power of selfless service and the difference it can make in the world.

FOREWORD

It gives me great joy and pride to write the foreword to this beautiful coffee table, Narendra Modi: Voice of Bharat. This Coffee Table is a collection of Prime Minister Narendra Modi's Independence Day addresses delivered from the ramparts of the Red Fort between 2014 and 2025. It is the story of how India has moved forward with courage, faith, and new ideas under the leadership of Prime Minister Narendra Modi. Each Independence Day speech included here is like a mirror that shows us what India was, what it has become, and what it is dreaming to be.

Independence Day has always been special for every Indian. The Red Fort, from where the Prime Minister addresses the nation, is a monument of history and a symbol of freedom and strength. When Shri Narendra Modi began his first address from the Red Fort in 2014, his words carried freshness, energy, and hope. From that day onwards, every year on the 15th of August, the entire country listened to a leader who spoke directly to their hearts and minds. These speeches are guiding lights that tell us about our journey as a nation. This book brings together all the Independence Day speeches from 2014 to 2025 in one place. Reading them together, we can see how India has grown step by step. We find the story of how cleanliness became a movement with Swachh Bharat Abhiyan, how financial inclusion touched every poor family through Jan Dhan Yojana, how young girls found new hope with Beti Bachao Beti Padhao, and how the dream of a strong, self-reliant India took shape with Atmanirbhar Bharat. We can see it rising into a digital India, thrust into green energy, bold during the COVID-19 pandemic time, and hitting out for a developed India by 2047.

The speeches of Prime Minister Narendra Modi stand out for a unique reason: their simplicity. These are words easily understood by any citizen-whether a villager or someone who learned at a distinguished higher institution, a child or an elder. At the same time, those words carry the gravitas of a very important viewpoint. This interplay makes the speeches powerful and ever unforgettable. He does not speak as a distant leader; he speaks amongst the people, in full belief in their strengths. Every year, every speech weaves into the tapestry of India's journey one more chapter, but when all these speeches are taken in one swoop, they mark the juxtaposition of the vision of one leader and the progress of a whole nation. We see challenges confronted, achievements celebrated, and with hope and determination, new targets are set. And we see how Prime Minister Narendra Modi constantly reminds us of the demands of the nation, pride in culture, and obligations to the succeeding generations.

This coffee table book is therefore more than a collection of words. It is a living document of India's transformation. It speaks of the struggle of the poor, the dreams of the youth, the achievements of women, the pain of the farmers, the courage of soldiers, and the innovations of the creators. It reminds us that India is not merely an ancient land but also the nation of tomorrow—it is a nation ready to lead the world. The name "Voice of Bharat" is most appropriate, because these speeches are the voice of Shri Narendra Modi and in a sense, are a collective voice of the Indian people. They carry the hopes of farmers sowing their fields, the songs of children in classrooms, the strength of our defence forces, the determination of our scientists, and the prayers of every Indian for a better tomorrow. Readers will definitely enjoy going through the speeches and will also feel motivated to reflect upon them and connect with their spirit.

A coffee table book is always meant to be a keepsake, something to display proudly and share with others. This particular volume is even more valuable because it combines inspiring words with beautiful presentation. It will be a treasure for homes, offices, institutions, and libraries. It will remind every reader of the path that India has taken and the dreams that still lie ahead. Future generations will look at these speeches to understand what India was aiming for during this important period of history. They will read about the struggles against poverty and corruption, the call for innovation and startups, the efforts for clean rivers and clean energy, and the dream of a confident India standing tall in the world. This book will help them see how a leader's words shaped the future of an entire nation.

Reading through the pages of this book, one is struck by the steady and clear vision of Prime Minister Narendra Modi. Times have changed, challenges have come and gone, but the key themes of his speeches have remained strong—unity, self-reliance, pride in India's culture, respect for women, dignity of labour, and belief in the power of youth. This steady vision has given India strength and direction at every step. Words have power. They can inspire, they can unite, and they can move a nation forward. The Independence Day speeches of Prime Minister Narendra Modi are examples of such words. They make us feel that we are all part of something greater than ourselves—the journey of Bharat.

This book is a gift to the nation, a source of knowledge and inspiration, and a reminder of what India can achieve when it believes in itself. It will encourage every reader to do their part in building the India of our dreams.

‘An Opportunity to Build National Character’ - Narendra Modi

My dear countrymen,

Today, all Indians in the country and also abroad are celebrating the festival of independence. On this day of sacred festival of independence, the prime servant of India extends greetings to all dear countrymen.

I am present amidst you not as the Prime Minister, but as the Prime Servant. The freedom struggle was fought for so many years, so many generations laid down their lives, innumerable people sacrificed their lives and youth, spent their entire lives behind bars. Today, I pay my respect, greetings and homage to all those who laid their lives for the country's independence.

I also pay my respects to the crores of citizens of this country on the pious occasion of India's independence, and recall all those martyrs who had laid down their lives in India's struggle for freedom. The day of independence is a festival when

we take a solemn pledge of working for the welfare of mother India, and also for the welfare of the poor, oppressed, dalits, the exploited & the backward people of our country.

My dear countrymen, a national festival is an occasion to refine and rebuild the national character. This National festival inspires us to resolve ourselves to lead a life where our character gets refined further, to dedicate ourselves to the nation and our every activity is linked to the interest of the nation and only then this festival of freedom can be a festival of inspiration to take India to newer heights.

My dear countrymen, this nation has neither been built by political leaders nor by rulers nor by governments. This nation has been built by our farmers, our workers, our mothers and sisters, our youth. The country has reached here today because of generation to generation rigours undertaken by our sages, our

saints, our maestros, our teachers, our scientists and social workers. These great people and these great generations, who had worked for the country throughout their lives, deserve our deepest respect. This is the beauty of India's Constitution, this is its capability which has made it possible that today a boy from small town, a poor family has got the opportunity to pay homage to the tri-colour of India at the ramparts of *Lal Quila* (Red Fort). This is the strength of India's democracy. This is an invaluable legacy which we have inherited from our architects of the constitution. I pay my respects to those architects of the constitution of India today.

Brothers and sisters, today if we have reached here after independence, it is because of the contribution of all the Prime Ministers, all the governments and even the governments of all the States. I want to express my feelings of respect and gratitude to all those previous governments and ex-Prime Ministers who have endeavoured to take our present day India to such heights and who have added to the country's glory.

This country has been built on such foundation of ancient cultural heritage, where we were told of only one *mantra* during *Vedic* period, which is indicative of our work culture, which we have learnt, we have memorized – “*Sangachchdhvam Samvadadhvam sam wo manansi jaanataam.*” We walk together, we move together, we think together, we resolve together and together we take this country forward. Having imbibed this basic mantra, 125 crores of countrymen have taken the nation forward. Yesterday only the first Parliamentary Session of the new Government had concluded. Today, I can proudly say that the Session of Parliament reflects our thinking and it is a reflection of

our intentions. We are not for moving forward on the basis of majority, we are not interested to move forward by virtue of majority. We want to move ahead on the basis of strong consensus. “*Sangachchdhvam*” and, therefore, the nation has witnessed the entire Session of Parliament. Having taken all the Parties and Opposition along while working shoulder to shoulder, we achieved an unprecedented success and the credit for this does not go to the Prime Minister alone, the credit does not go to the people sitting in the Government, the credit for this goes to the Opposition also, the credit goes to all the leaders of Opposition too and also all the Members from Opposition. From the ramparts of Red Fort, quite proudly I salute all the Members of Parliament, I also salute all the Political Parties and by virtue of their strong support, we could take some important decisions intended to take the nation forward and yesterday the Session of Parliament had concluded.

Brothers and sisters, I am an outsider for Delhi, I am not a native of Delhi. I have no idea about the

administration and working of this place. I have been quite isolated from the elite class of this place but during the last two months while being an outsider, I had an insider view and I was astonished. It is not a political platform, rather it is a platform of a national policy and, therefore, my views should not be evaluated from a political perspective. I have already said, I salute all the ex-Prime Ministers and earlier governments who have brought the country thus far. But I am going to say something else and it may not be seen from political point of view. When I came to Delhi and noticed an insider view, I felt what it was and I was surprised to see it. It seemed as if dozens of separate governments are running at the same time

same country! How come we can take the country forward? And that is why I have started making efforts for razing those walls; I have started making efforts at making the Government, not an assembled entity, but an organic unity, an organic entity, a harmonious whole- with one aim, one mind, one direction, one energy. Let's resolve to steer the country to one destination. We have it in us to move in that direction. A few days back... Nowadays newspapers are full of news that Modiji's Government has come, officers are reaching office on time, offices open in time, and people get there in time. I observed that India's National newspapers, TV media were carrying these news items prominently. As the

in one main government. It appeared that everyone has its own fiefdom. I could observe disunity and conflict among them. One department is taking on the other department and taking on to the extent that two departments of the same government are fighting against each other by approaching Supreme Court. This disunity, this conflict among people of the

Head of the Government I could have derived pleasure in the fact that everything started going on time, cleanliness got the attention, but I was not taking pleasure, I was feeling pained. That thing, I want to tell today in public. And why, because if government officers arrive office in time, does that make a news? And if that makes news, it shows how low we have fallen. It

becomes a proof of that, and that's how, brothers and sisters, the governments have run? Today in the face of global competition, when we have to realize the dreams of millions of Indians, the country cannot run on the lines of "it happens", "it goes". In order to fulfil the aspirations of masses, we have to sharpen the tool called the Government machinery, we have to make it keen, more dynamic, and it is in this direction that we are working. My countrymen, it's not long since I have come from outside Delhi, but I give you an assurance that the people in the Government are very capable - from the peon to the Cabinet Secretary, everybody is capable, everybody has a power, they have experience. I want to awaken that power, I want to unite that power and want to accelerate the pace of the welfare of nation through that power and I shall definitely do it. I want to assure the countrymen that we will achieve that, we will definitely do that. I could not say this on 16th May, but today after my experience of two-two and half months, keeping the tricolor as witness, I am saying on 15th of August that it is possible, it will be achieved.

Brothers and sisters, time has come to give a serious thought to the fact that whether we have a duty to create India of the dreams of those great people who gave us freedom, whether we have a national

character?

Brothers and sisters, can someone please tell me as to whether he or she has ever introspected in the evening after a full day's work as to whether his or her acts have helped the poor of the country or not, whether his or her actions have resulted in safeguarding the interest of the country or not, whether the actions have been directed in country's welfare or not? Whether it should not be the motto of one and a quarter billion countrymen that every step in life should be in the country's interests? Unfortunately, we have an environment today wherein if you approach anyone with some work, he begins by saying "what does it mean for me?" He begins by saying "what does it involve for me?" and when he come to know that it does not entail any benefit for him, immediately he says "why should I bother?" we have to rise above the feelings of "what does it mean for me" and "why should I bother". Everything is not for self interest only. There are certain things which are meant for the country and we have to refine this national character. We have to rise above the feelings of "why should I bother" and "what does it mean for me" and instead we have to think that "I am for nation's interest and in this field, I am going to lead". We have to inculcate this sentiment.

Brothers and sisters, when we hear about the incidents of rape, we hang our heads in shame. People come out with different arguments, someone indulges in psycho analysis, but brothers and sisters, today from this platform, I want to ask those parents, I want to ask every parent

that you have a daughter of 10 or 12 years age, you are always on the alert, every now and then you keep on asking where are you going, when would you come back, inform immediately after you reach. Parents ask their daughters hundreds of questions, but have any parents ever dared to ask their son as to where he is going, why he is going out, who his friends are. After all, a rapist is also somebody's son. He also has parents. As parents, have we ever asked our son as to what he is doing and where he is going. If every parent decides to impose as many restrictions on the sons as have been

children as to why they were taking a wrong path. Every parent must take this responsibility, he must know that his misguided son is bent on killing innocent people. He is not able to serve himself nor his family nor the country. I want to say to those youngsters who have chosen the path of violence that whatever they are and wherever they are, it is all because of mother India only that they have got it. Whoever you are it is all because of your parents. I want to ask you to think how green, how beautiful and how beneficial this earth can become if you shoulder the

imposed on our daughters, try to do this with your sons, try to ask such questions of them.

My dear brothers and sisters, the law will take its own course, strict action will be taken, but as a member of the society, as parents, we also have some responsibilities. If somebody tells me that those who have taken guns on their shoulders and kill innocent people are maoists, are terrorists, but they are also somebody's children. I would like to ask of such parents if they had ever asked their

plough instead of the gun which spills blood on this land. How long shall we have bloodshed on this land, how long shall we take the lives of the innocent people and what have we got after all this? The path of violence has not yielded anything to us.

Brothers and sisters, I had gone to Nepal recently. There I said something publicly to draw the attention of the whole world. There was a time when the Emperor Ashoka who had chosen the path of wars, got converted to the path of Buddha at the sight of violence. There was a time in Nepal

when their youngsters had opted for the path of violence but today I witness that the same youngsters are waiting for their constitution. The same people associated with them are framing the constitution. And I further said that if Nepal could present the best example of moving from the weapons to the books then it could provide inspiration to the youngsters in the world to abandon the path of violence.

Brothers and sisters, If Nepal, land of Budha, can give message to the world then why can't India too do the same? So it's the call of the hour that we renounce the path of violence and take the path of brotherhood.

Brothers and sisters, for one reason or the other, we have had communal tensions for ages. This led to the division of the country. Even after Independence, we have had to face the poison of casteism and communalism. How long these evils will continue? Whom does it benefit? We have had enough of fights, many have been

killed. Friends, look behind and you will find that nobody has benefited from it. Except casting a slur on Mother India, we have done nothing. Therefore, I appeal to all those people that whether it is the poison of casteism, communalism, regionalism, discrimination on social and economic basis, all these are obstacles in our way forward. Let's resolve for once in our hearts, let's put a moratorium on all such activities for ten years, we shall march ahead to a society which will be free from all such tensions. And you will see that how much strength we get from peace, unity, goodwill and brotherhood. Let's experiment it for once.

My dear countrymen, believe in my words, I do assure you. Shun all the sins committed so far, give up that way, follow the way of goodwill and brotherhood, and let's resolve to take the country forward. I believe we can do that.

With advancement of science, brothers and sisters, we have a rising

feeling of modernity in our mind, but what do we do? Have we ever thought what the sex ratio in the country is like? 940 girls are born against per thousand boys. Who is causing this imbalance in the society? Certainly not God. I request the doctors not to kill the girl growing in the womb of a mother just to line their own pockets. I advise mothers and sisters not to sacrifice daughters in the hope of son. Sometimes mother-father feel tempted to have son in the hope of supporting them in old age. I am a person who has worked in public life. I have come across families with five sons, each having bungalows, access to fleet of cars, but parents are forced to live in old-age homes, Vriddhashrams. I have seen such families. I have also seen families with only daughter as progeny, that daughter sacrifices her dreams, doesn't get married, and spends entire life in taking care of old parents. This disparity points to female foeticide and the polluted and tainted mind the 21st century has. We will have to liberate from it, and that is message to us of this Freedom festival.

Recently Commonwealth Games were organized. Indian sportspersons brought glory to the country. Nearly 64 of our sportspersons won. Our sportspersons brought 64 medals. But of them 29 are girls. Let's feel proud and clap for them. Girls also contribute to India's fame and glory. Let's recognise it. Let's take them along, shoulder to shoulder. This way we can get over the evils that have crept in social life. Therefore, brothers and sisters, we have to proceed in that direction as a social and national character. Brothers and Sisters, Development is the only way forward for the country. Good governance is the only way. There are only these two tracks to take the country forward - good governance and development, we can

move forward only by taking them with us. We wish to move forward with the intent of taking them with us. When I talk of good governance, you tell me, when I ask a person in private job, he tells that he does the job; when you ask the same from a person in government job, he says that I do the service. Both earn, but for one it is job while for the other it is service. I ask a question from all brothers and sisters in government service, whether the word "Service" has not lost its strength, its identity? Persons in government service are not doing "job", they are doing "service". We have to revive this feeling, we have to take this feeling forward as a national character, we have to move forward in this direction.

Brothers and Sisters, whether the citizens of the country should take steps for the welfare of the nation or not? You imagine, if this 125 crores of countrymen move one step forward, then the country moves 125 crore steps forward. The meaning of democracy is not just limited to electing a government, but its meaning is that 125 crore of citizens work together joining shoulder with the government to fulfill hopes and aspirations of the country, this is the meaning of democracy. We have to create partnership with the people. We have to proceed under Public-Private Partnership. We have to proceed along with the participation of the people. But, please tell me why our farmers commit suicide? A farmer takes loan from the moneylender, but fails to repay his loans. He takes loan for the wedding of his daughter, but fails to repay. He will have to suffer hardships during his whole life. He chooses to commit suicide. Who will save the poor families of such farmers?

Brothers and sisters, I have come

here with a pledge to launch a scheme on this festival of Freedom. It will be called '*Pradhanmantri Jan-Dhan Yojana*'. I wish to connect the poorest citizens of the country with the facility of bank accounts through this *yojana*. There are millions of families who have mobile phones but no bank accounts. We have to change this scenario. Economic resources of the country should be utilized for the well-being of the poor. The change will commence from this point. This *yojana* will open the window. Therefore, an account holder under '*Pradhanmantri Jan-Dhan Yojana*' will be given a debit card. An insurance of One Lakh Rupees will be guaranteed with that debit card for each poor family, so that such families are covered with the insurance of One Lakh Rupees in case of any crisis in their lives.

My brothers and sisters, it is a country of young people. The 65 percent population of the country happens to be under the age of 35 years. Our country has the largest number of youths in the world. Have we ever thought of deriving an advantage out of it? Today, the world needs a skilled workforce. Today, India also needs a skilled workforce. At times, we look for a good driver but he is not available, we look for a plumber, but he is not available. If we need a good cook, he is not available. We have young people, they are unemployed but the kind of young people we seek for are not available. If we have to promote the development of our country then our mission has to be 'skill development' and 'skilled India'. Millions and Millions of Indian youth should go for acquisition of skills and there should be a network across the country for this and not the archaic systems. They should acquire the skills which could contribute towards making India a modern country.

Whenever they go to any country in the world, their skills must be appreciated and we want to go for a two pronged development. I also want to create a pool of young people who are able to create jobs and the ones who are not capable of creating jobs and do not have the opportunities, they must be in a position to face their counterparts in any corner of the world while keeping their heads high by virtue of their hard work and their dexterity of hands and win the hearts of people around the world through their skills. We want to go for the capacity building of such young people. My brothers and sisters, having taken a resolve to enhance the skill development at a highly rapid pace, I want to accomplish this.

Brothers and sisters, the world has undergone a change. My dear countrymen, the world has changed. Now India can not decide its future by remaining isolated and sitting alone in a corner. The economics of the world have changed and, therefore, we will have to act accordingly. Government have taken many decisions recently, made some announcements in the budget and I call upon the world and call upon the Indians spread world over that if we have to provide more and more employment to the youth, we will have to promote manufacturing sector. If we have to develop a balance between imports and exports, we will have to strengthen manufacturing sector. If we have to put in use the education, the capability of the youth, we will have to go for manufacturing sector and for this Hindustan also will have to lend its full strength, but we also invite world powers. Therefore I want to appeal all the people world over, from the ramparts of the Red

Fort, "Come, make in India", "Come, manufacture in India". Sell in any country of the world but manufacture here. We have got skill, talent, discipline, and determination to do something. We want to give the world an favourable opportunity that come here, "Come, Make in India" and we will say to the world, from electrical to electronics, "Come, Make in India", from automobiles to agro value addition "Come, Make in India", paper or plastic, "Come, Make in India", satellite or submarine "Come, Make in India". Our country is powerful. Come, I am giving you an invitation.

Brothers and sisters, I want to call upon the youth of the country, particularly the small people engaged in the industrial sector. I want to call upon the youth working in the field of technical education in the country. As I say to the world "Come, Make in India", I say to the youth of the country - it should be our dream that this message reaches every corner of the world, "Made in India". This should be our dream. Whether, to serve the country, is it necessary for the youth of the country to be hanged like Bhagat Singh? Brothers and sisters, Lal Bahadur Shastri had given the slogan "Jai Jawan, Jai Kisan". A soldier sacrifices himself at the border and protects Mother India. Similarly, a farmer serves Mother India by filling the godowns with grains. This is also nation's service. Filling the granary is the biggest nation's service that a farmer provides. That is why Lal Bahadur Shastri had given the slogan of "Jai Jawan, Jai Kisan".

Brothers and Sisters, I would like to pose a question to my youngsters as to why despite them, we are forced to import even the smallest of things? My country's youth can resolve it, they should conduct

research, try to find out as to what type of items are imported by India and then each one should resolve that, through may be micro or small industries only, he would manufacture atleast one such item so that we need not import the same in future. We should even advance to a situation wherein we are able to export such items. If each one of our millions of youngsters resolves to manufacture atleast one such item, India can become a net exporter of goods. I, therefore, urge upon the youth, in particular our small entrepreneurs that they would never compromise, atleast on two counts. First, zero defect and, second again zero effect. We should manufacture goods in such a way that they carry zero defect, that our exported goods are never returned to us. We should manufacture goods with zero effect that they should not have a negative impact on the environment. If we march ahead with the dream of zero defect in the manufacturing sector then, my brothers and sisters, I am confident that we would be able to achieve our goals.

Brothers and sisters, the youth of India has completely transformed the identity of India in the world. Earlier, in what manner did the world know our country? Till only 25-30 years back, if not more, there were many people in the world who thought that India was a country of snake charmers, it was a country which practiced in black magic. The real identity of India had not reached the world, but my dear brothers and sisters, our youngsters, 20-22-23 years old youngsters have mesmerized the whole world with their skills in computers. Our young I.T. professionals have given a new path of making a new identity of India. If our country has this strength, can we think something about the country? Our dream

is, therefore, of "Digital India". When I talk of "Digital India", I don't speak of the elite, it is for the poor people. You can imagine what a quality education the children in villages will get, if all the villages of India are connected with Broadband Connectivity and if we are able to give long distance education to the schools in every remote corner of the villages. If we create a network of telemedicine in the places where there is a shortage of doctors, we can have a clear guideline of the way in which health facilities have to be provided to the poor people living in those areas. The citizens of India have mobile phones in their hands, they have mobile connectivity, but can we walk in the direction of mobile governance? We have to move in a direction where every poor person is able to operate his bank account from his mobile, is able to demand various things from the government, can submit applications, can conduct all his business, while on the move, through mobile governance and if this has to be done, we have to move towards 'digital India' and if we have to move towards 'digital India' then we have a dream. Today we are importing electronic goods on a large scale. Friends, you will be surprised that we are bringing in these televisions, mobile phones, i-pads and all these electronic goods. It is a necessity to import petroleum products, oil, diesel and petrol. Second to this is the import of our electronic goods. If we move ahead with the dream of 'digital India' to manufacture electronic goods and become self reliant at least there, how big can be the benefit for the treasury! Therefore, e-governance is what we need to take this idea of 'digital India' forward. E-governance is easy governance, effective governance and also economic governance. E-governance paves the way

for good governance. There was a time when we used to say that the railways provided connectivity to the country. That was it. I say that today it is IT that has the potential to connect each and every citizen of the country and that is why we want to realise the mantra of unity with the help of 'digital India'.

Brothers and sisters, if we move ahead with all this then I believe that a 'digital India' will have the potential to stand with the world on equal footing. Our youth have that capability, it is an opportunity for them.

Brothers and sisters, we want to promote tourism. Tourism provides employment to the poorest of the poor. Gram seller earns something, auto-rickshaw driver earns something, pakoda seller earns something and tea seller also earns something. When there is talk of tea seller, I feel a sense of belongingness. Tourism provide employment to the poorest of the poor. But there is a big obstacle in promoting tourism and in our national character and that is - the filthiness all around us. Whether after independence, after so many years of independence, when we stand at the threshold of one and half decade of 21st century, we still want to live in filthiness? The first work I started here after formation of Government is of cleanliness. People wondered whether it is a work of a Prime Minister? People may feel that it is a trivial work for a Prime Minister but for me this a big work. Cleanliness is very big work. Whether our country can not be clean? If one hundred and twenty five crore countrymen decide that they will never spread filthiness, which power in the world has ability to spread filthiness in our cities and villages? Can't we resolve this

much?

Brothers and sisters it will be 150th birth anniversary of Mahatma Gandhi in 2019. How do we celebrate 150th birth anniversary of Mahatma Gandhi? Mahatma Gandhi, who gave us freedom, who brought so much honour to such a big country in the world, what do we give to Mahatma Gandhi? Brothers and Sisters, Mahatma Gandhi had cleanliness and sanitation closest to his heart. Whether we resolve not to leave a speck of dirt in our village, city, street, area, school, temple, hospital, and what have you, by 2019 when we celebrate 150th anniversary of Mahatma Gandhi? This happens not just with the Government, but with public participation. That's why we have to do it together.

Brother and Sisters, we are living in 21st century. Has it ever pained us that our mothers and sisters have to defecate in open? Whether dignity of women is not our collective responsibility? The poor womenfolk of the village wait for the night; until darkness descends, they can't go out to defecate. What bodily torture they must be feeling, how many diseases that act might engender. Can't we just make arrangements for toilets for the dignity of our mothers and sisters? Brothers and Sisters, somebody might feel that a big festival like 15th August is an occasion to talk big. Brothers and Sisters, talking big has its importance, making announcements too has importance, but sometimes announcements raise hopes and when the hopes are not fulfilled, the society sinks into a state of despondency. That's why are in favour of telling those things, which we can fulfil just within our sight. Brothers and sisters, you must be getting shocked to hear the Prime Minister

speaking of cleanliness and the need to build toilets from the ramparts of the Red Fort. Brothers and sisters, I do not know how my speech is going to be criticised and how will people take it. But this is my heartfelt conviction. I come from a poor family, I have seen poverty. The poor need respect and it begins with cleanliness. I, therefore, have to launch a 'clean India' campaign from 2nd October this year and carry it forward in 4 years. I want to make a beginning today itself and that is - all schools in the country should have toilets with separate toilets for girls. Only then our daughters will not be compelled to leave schools midway. Our parliamentarians utilizing MPLAD fund are there. I appeal to them to spend it for constructing toilets in schools for a year. The government should utilise its budget on providing toilets. I call upon the corporate sector also to give priority to the provision of toilets in schools with your expenditure under Corporate Social Responsibility. This target should be finished within one year with the help of state governments and on the next 15th August, we should be in a firm position to announce that there is no school in India without separate toilets for boys and girls.

Brothers and sisters, if we proceed with the dreams, we are in a position to realise them. Today, I wish to tell one more specific thing. It has its own importance to discuss the matters and express the views of nation's interest. However, our Members of Parliament do not get opportunity though they are willing to do something. They can express themselves, write to the government, agitate, give memoranda. Still they do not get opportunity to do something on their own. Today I have come to you with a new idea. We are running so many schemes in the

name of the Prime Minister in our country, there are numerous schemes in the name of various leaders. However, today I am going to announce a scheme on behalf of the Member of Parliament- '*Sansad Adarsh Gram Yojana*'. We shall fix some parameters. I urge upon the Members of Parliament to select any one of the villages having population of three to five thousand in your constituency. The parameters will be according to the time, space and situation of that locality. It will include the conditions of health, cleanliness, atmosphere, greenery, cordiality etc. On the basis of those parameters, each of our MPs should make one village of his or her constituency a Model Village by 2016. Can't we do at least this? Shouldn't we do this? If we have to build a nation, we should start from the village. Make a Model Village. The reason of fixing this target for 2016 is that it is a new scheme. It takes time to formulate a scheme and then to implement it. After 2016, select two more villages for this purpose, before we go for the General Elections in 2019. And after 2019, each Member of Parliament, during his/her tenure of 5 years must establish at-least five model villages in his/her area. I also call upon the Members of Parliament from urban areas to adopt one village of their choice. I also urge upon the Members of Parliament from Rajya Sabha to adopt one of the villages. If we provide one model village in each district of India then the surrounding villages shall be automatically inspired to follow that model. Let us establish a model village, let us establish a village well equipped with all systems and facilities. The birth anniversary of Jai Prakash Narayan Ji happens to be on 11th October. On 11th October, the occasion of birth anniversary

of Jai Prakash Narayan Ji, I will present a complete blueprint of "*Sansad Adarsh Gram Yojana*" (Members of Parliament Model Village Scheme) before all Members of Parliament and State Governments, and I urge upon State Governments also that as per the feasibility in their respective states, all the Members of Legislative Assembly resolve to establish a model village. You can imagine all the Members of Legislative Assembly and all the Members of Parliament in the country establishing a model village. All of a sudden, there would be a model village in each block of India which could inspire us to transform the amenities in rural areas and could give us a new direction and, therefore, we want to move ahead under this "*Sansad Adarsh Gram Yojana*".

My dear brothers and sisters, ever since our government has taken charge, there has been a discussion in the newspapers, on T.V. channels as to what would happen to Planning Commission. I believe that when Planning Commission was constituted, it was done on the basis of the circumstances and the needs of those times. In recent years, Planning Commission has contributed to the growth of the country in its own way. I respect that, I am proud of that, but the prevalent situation in the country is different, global scenario has also changed, governments are no longer the centre of economic activities, the scope of such activities has broadened. State governments have been at the center of development and I consider this a good indication. If we have to take India forward, it can happen only by taking the states forward. India's federal structure is more important today than in the last 60 years. To strengthen our federal structure, to make our federal structure vibrant, to take our federal structure as a

heritage of development, a team of Chief Minister and Prime Minister should be there, a joint team of the Centre and the states should move forward, then to do this job, we will have to think about giving the Planning Commission a look. So, I am saying from the rampart of the Red Fort that it is a very old system and it will have to be rejuvenated, it will have to be changed a lot. Sometimes it costs more to repair the old house, but, it gives us no satisfaction. Thereafter, we have a feeling that it would be better to construct a new house altogether and therefore within a short period, we will replace the planning commission with a new institution having a new design and structure, a new body, a new soul, a new thinking, a new direction, a new faith towards forging a new direction to lead the country based on creative thinking, public-private partnership, optimum utilization of resources, utilization of youth power of the nation, to promote the aspirations of state governments seeking development, to empower the state governments and to empower the federal structure. Very shortly, we are about to move in a direction when this institute would be functioning in place of Planning Commission.

Brothers and sisters, today, on 15th August, we also have the birth anniversary of Maharishi Aurobindo. Maharishi Aurobindo, being a rebel, moved on to achieve the status of a Yoga Guru. With regard to the destiny of India, he remarked, "I have a faith that the divine power and spiritual heritage of India will play an important role towards the welfare of the world." Such sentiments were echoed by Maharishi Arvind. I strongly believe in the words of legends. I have great faith in the statements made by ascetics, sages & saints and that's why today at the ramparts of Lal

Quila I am reminded of the words of Swami Viveknanda. He had said - "I can see before my eyes Mother India awakening once again. My Mother India would be seated as the World Guru. Every Indian would render service towards welfare of humanity. This legacy of India would be useful for the welfare of the world". These words were spoken by Swami Viveknanda ji in his own style. Friends, the words of Viveknanda ji can never be untrue. The words of Viveknanda ji, his dream of seeing India ensconced as World Guru, his vision, it is incumbent upon us to realize that dream. This capable country, blessed with natural bounty, this country of youth can do much for the world in the coming days.

Brothers and sisters, our foreign policy is a much talked about issue. I clearly believe that India's foreign policy can be multi-dimensional. But there is an important issue to which I want to draw your attention that the way we fought for freedom, we fought together, we were not separate at that time. We were together. Which was the government with us? What were the weapons available to us? There was a Gandhi, a Sardar and lakhs of freedom fighters and such a huge empire. Didn't we win in the struggle of freedom against that empire? Did we not defeat the foreign powers? Did we not force them to leave India? We were the ones, they were our ancestors only who showed this might. If the people of India could remove such a big empire without the power of the government, without weapons and even without resources, then friends, it is the need of the hour to eradicate poverty, can we not overcome poverty? Can we not defeat poverty? My 125 crore dear countrymen, let us resolve to eradicate poverty, to win against it. Let us move with

the dream of poverty eradication from India. Our neighbouring countries are also faced with the same problem. Why not get together with all the SAARC nations to plan out the fight against poverty? Let's fight together and defeat poverty. Let us see at-least for once as to how wonderful is the feeling of being alive instead of killing and getting killed. This is the land where incidents from Siddharth's life happened. One bird was shot with an arrow by one brother and the other took out that arrow to save it. They went to mother- whose bird, whose swan? Whether killer's or saviour's, they asked of mother. The mother replied, saviour's. The saviour has more power than the killer and that makes him Buddha in future. And that's why I seek cooperation from neighbouring countries for fighting against poverty in concert and cooperate with them, so that together with SAARC countries we can create our importance and emerge as a power in the world. It is imperative that we work together with a dream to win a fight against poverty, shoulder to shoulder. I went to Bhutan, Nepal, all the dignitaries from SAARC countries took part in oath-taking ceremony; this marked a good beginning. This will definitely yield good results, it is my belief and this thinking of India, in the country and the world, that we want to do well to the countrymen and be useful for the welfare of the world, India wants such a hand to be extended. We are trying to move forward with these dreams to achieve them.

Brothers and Sisters, today on 15th August we will resolve to do something for

the country. Let's be useful for the country, we will move ahead with a resolve to take the country forward, and I assure you, Brothers and Sisters, as well as my colleagues in the Government, that if you work for 12 hours, I will do so for 13 hours. If you work for 14 hours, I will do for 15 hours. Why? Because I'm amidst you not as a Prime Minister, but as the first servant. I have formed the Government not as a ruler, but as a servant. Brothers and sisters, I assure that this country has a destiny. It is destined to work for the welfare of the world, it was said by Vivekanand ji. India is born, this Hindustan is born in order to achieve this destiny. One hundred and twenty five crore countrymen have to move forward wholeheartedly for the welfare of the nation.

Once again I feel proud of the devotion, the sacrifices of the security forces of the country, para-military forces of the country, all the security forces of the country to protect Mother India. I say to the countrymen, [^]t k x ; k e o ; e ** , "Eternal vigilance is the price of liberty". The army is vigilant, we should also be vigilant and the country scales new heights, we have to move forward with this resolution. Speak loudly with me with full force -

Bharat mata ki jai, bharat mata ki jai, bharat mata ki jai.

Jai Hind, Jai Hind, Jai Hind.

Vande Mataram, Vande Mataram, Vande Mataram!

'Team India' will eliminate the termites of corruption: Narendra Modi

Prime Minister: My Beloved 125 Crore countrymen of India, My best wishes and heartiest greetings on the occasion of this sacred festival of our Freedom. This morning of the 15th of August is not a usual morning. This is the dawn of the freedom-festival of the greatest democracy of the world. This dawn is also the dawn of the dreams of the one hundred twenty five Crore Indian Citizens. This dawn also heralds the resolve of 125 Crore people of India. On this pious occasion I also extend my many many salutations to all those great persons of India who sacrificed their lives and led a life of penance while making persistent efforts to fight for the honour of the country. They even spent their youth in the prison, went through all kinds of sufferings; but never gave up their dreams and resolve to see India free.

Recently many distinguished citizens of India, youths, literary artists and social workers- sons and daughters of Mother India- have achieved many great feats to make our country proud. They are

countless in number and from the ramparts of Red fort I extend my best wishes and greetings to all of them from the core of my heart.

The vastness and the diversity of India is always talked about, but Our India has many other great characteristics as well, there is a lot of diversity in India. India is a large country. And there is simplicity among the people of India. There is unity running through all the parts of the country and that is what is our strength; the strength of our nation. Strength of our country has been sustained over centuries together. Every era has seen the attempts to boost it further. They have been moulded according to the requirements of realising the dreams for the future, they have been nurtured and it is due to that only that this country has reached this far with our age old traditions and ever new resolves. Our unity, simplicity, fraternity, harmony are our biggest strength. This strength should never be blemished, it should never be hit.

If the unity of the country gets disturbed, the dreams also get shattered, therefore, whether it is the poison of casteism, communal fanaticism, we don't have to allow it in any form whatsoever, not allow it to take root, and then we have to cure the poison of casteism, the fanaticism of communalism with the nectar of development, distribute the flow of the nectar of development and through the flow of this nectar attempt bringing about a new awareness.

Dear brothers and sisters, this country is moving ahead because of the "Team India" and this "Team India" is a big team of our one twenty five crore countrymen. The world might never have thought about the team of one twenty five crore citizens working as a team together as to how they take the nation to new heights, build the nation and also protect it! So, whatever we are doing and wherever we are trying to reach, it is all because of the "Team India" and we are grateful to this "Team India". People's participation is the biggest strength of democracy. If we run the country through the participation of One Hundred and twenty five crore Indians, our country will be moving ahead one hundred and twenty five crore steps

every moment. That is why we have encouraged this people's participation as "Team India". We have given priority to "Team India". Through electronic platform mygov.in, through lacs of letters of the countrymen, through my Mann Ki Baat, through dialogues with citizens, this people's participation is on the rise day by day. About every affair of the Government we receive a number of suggestions from the far flung villages of our country and this is the real strength of our "Team India".

My dear fellow citizens, this is a fact that there is only one mandate of this "Team India" and that is all our schemes, all our systems should benefit the poor of the country. We should support the poor in their fight against poverty and empower them in this arduous effort of theirs because no one wants to remain poor and they also wish to get rid of poverty. Hence the meaningfulness of our resources, our schemes and our programmes is in their usefulness to the cause of welfare of the poor.

Brothers and sisters, last year on the occasion of 15th of August, I had expressed some of my views before you. At that time I was new, whatever I saw in the government, I expressed them with an open mind before one hundred and twenty five crore citizens. Today after one year, standing under the Tricolor from the same ramparts of the Red Fort, I assure the countrymen that in this period of one year our "Team India", consisting of one hundred and twenty five crore people, is committed to realize our dreams within the timeframe with new hope, new energy and utmost hard work. An atmosphere of

trust has emerged. I had announced 'Pradhan Mantri Jan Dhan Yojna' on the last 15th of August. Even after sixty years of independence; even when the banks were nationalized for the poor, 40% people of the country were without a bank account till the last 15th of August; the doors of the banks were not open for the poor. We resolved that we would erase this blot and would provide a solid base to the financial inclusion which is talked about the world over, by integrating the poorest of the poor to the mainstream economic activities; and this is only the beginning. We had decided that unlike the previous work culture of talking in terms of uncertain time frames, we will complete the work by the 26th of January as the country celebrates the next Republic Day.

My countrymen, today I can proudly say that we achieved that target within the time frame. 17 Crore people opened their bank accounts under 'Pradhan Mantri Jan Dhan Yojna'. With a view to extend opportunities to the poor, we had said that these bank accounts could be opened with zero balance. We had even said that we would bear the operational costs of the bank. After all, what for the banks exist? They should be for the poor and that's why we had decided to open

accounts with zero balance. We have seen the rich of our country; however, this time around we have also seen our poor and seen their wealth. From the ramparts of the Red Fort, let me salute and bow to the large-heartedness of these poor; because even if there was a provision of opening the account with zero balance, these poor people have deposited twenty thousand crore rupees in their bank accounts. It could be possible only due to richness of our poor citizens. And hence, today my conviction bears proof that it is all because of the spirit of these poor that this "Team India" will march ahead.

Brothers and sisters, if the branch of a bank is opened or a building of the bank is constructed in a certain part of our country, it becomes the hot topic of discussion, people rejoice, it is hailed as a mark of great development and remarkable progress. This is so because in the past 60 years, we have measured the development of the country only on the basis of these parameters. This has been the yardstick that if any branch of a bank is opened somewhere, it elicits lots of accolades and praises, the Government receives much adulation, but my dear fellow citizens, it is not a challenging task to open a branch of a bank. This task can

easily be accomplished through the Government exchequer, but to bring 17 crore countrymen to the doorstep of the bank is an arduous task, it takes a lot of hard work, you have to give your heart and soul to accomplish this task, you are required to be ever vigilant. And here I would extend my heartfelt congratulations to various Banks and their employees who

development so as to ensure that these people are empowered through financial inclusion and this pyramid of development remains unshakable. It would stand firm amid any crisis and if this pyramid of development is based on economic strength, it would increase the purchasing power of these people to a great extent. And when the purchasing

have been a very significant part of "Team India". I congratulate them for making banks so easily accessible to the poor and this fact will bring a major change in the coming days.

Among the global economic schools of thought, there is also the one which maintains that financial inclusion doesn't always bring positive results and due to that the system has to bear the pressure of poverty. I disagree with this thought. In a country like India, if we look at the pyramid of development, its base is the broadest. If it be firm, the entire pyramid of development tends to be strong. Today the downtrodden, the exploited, oppressed, deprived, and the ignored ones of our country form the base of the pyramid of development. We have to strengthen the foundation of this pyramid of

power of the poorest of the poor in the society increases, nobody can stop that economy to flourish and move ahead. It takes the country swiftly to the newer heights of development and therefore it is our intention to give impetus to that. We have laid great stress upon social security and also the welfare of the poor - and thus Prime Minister's Suraksha Bima Yojana, Atal Pension Yojana and Prime Minister's Jeevan Jyoti Bima yojana have been launched. Crores of the people of our country have no social security cover. Leave the poor aside, benefit of insurance has not reached even the lower middle class. So we made a plan - just pay one rupee per month, not more, that is just Rs. 12 per annum and be entitled to the benefits of Pradhan Mantri Suraksha Bima Yojana. If your family faces any calamity

then they will receive 2 lac rupees. We know how to manage an economy ! That's why we launched Prime Minister's Jeevan Jyoti Bima Yojana for 90 paisa a day, even less than 1 rupee. So it is Rs. 330 annually for the health of one's family - and for the security of one's family- insurance of 2 lac rupees. This is what we have done.

Brothers and sisters, schemes have been made in the past also. There is no Government which doesn't make schemes. Every Government does that. There is no government which doesn't make announcements. Every Government does that. There is no government which doesn't light the inauguration lamps, doesn't cut ribbons--every Government does that. But the touchstone is whether we walk the talk or not. We have laid a great stress upon a new work culture. Dear Countrymen, our nation has many schemes which are 40 years old or 50years old but these schemes could not reach more than 5 or 7 crore people. This scheme has just completed a hundred days, 100 days! I mean it, and in these hundred days ten crore citizens have been benefited 10 crore people! Ten crore citizens of this country means ten crore families. And this means that out of total 30-35 crore families of our country, ten

crore families have joined this scheme within a span of hundred days.

Brothers and sisters, the uniqueness of our government, of "Team India", during last one year, especially the great strength and the biggest achievement of "Team India", consisting of one hundred and twenty five crore people has been to fulfill the tasks within the set time frame.

Last year I referred to toilet facilities for all from this Red Fort, I also referred to cleanliness. It sounded strange to the whole country for a few hours as to what sort of Prime Minister is this! But today in all the surveys that has been carried out in the entire country, this point has come out in all of them that if there is something that is the most important factor of "Team India" and that has touched every person, is the movement towards cleanliness.

Brothers and sisters, we used to invoke the people of the society and marked the names of various people to promote the "cleanliness drive". That was such a period, but today I have to congratulate this "Team India". People from all walks of life whether they are Celebrities, Diplomats, Social Workers, Educationists, community leaders or

spiritual leaders or our friends from media, all of them have taken a major responsibility to train the common man without criticising anybody and without pointing towards the lacunas. Today I greet them all from the core of my heart who have done this job but I only wish to stress upon a point- from whom this "Swachh Bharat" drive has gained maximum strength? Who are its biggest brand ambassador? You may not have paid heed to it, but try to remember what happened in your family? There are crores of such families in India, whose children are in the age group of five, ten and fifteen and they have become the greatest ambassador of "Swachh Bharat Abhiyaan". These children prevent their parents from littering in their homes and ask them to avoid spreading filth and rubbish here and there. In case, any father is addicted to consuming gutka and whenever the father opens the windows of the car to spit, his son prevents him to do so on the plea of keeping India clean. The success of this programme is due to those little children. I wish to bow my head towards the future of my country, I wish to bow my head and greet those children. The fact which is not realized even by the elite people has been easily understood by the innocent children and it is my belief that such a country where a child is so much aware, so committed towards cleanliness, such country is bound to become clean; Abhorrence against filth and dirt is bound to arise there.

In 2019 we are about to celebrate the 150th anniversary of Mahatma Gandhi and on 150th anniversary of Gandhiji we have to handover him "Swachh Bharat" as a tribute. There cannot be a greater tribute to Mahatma Gandhi on his 150th birth anniversary. The task has just started, but I

have to take it forward, not to stop it, not to get satisfied. I had announced such a programme from here, just for a trial, so that I could ascertain whether "Team India" is able to do it or not. I had announced it without consulting anybody. It was not announced after collecting relevant information from districts and villages. It just came into my heart and I had announced that we would build separate toilets for boys and girls in all of our schools till the next 15th August. But later on, when we started work, the "Team India" figured out its responsibilities, we realised that there were 2 lakh and 62 thousand such schools, where more than 4.25 lakh toilets were required to be built. This figure was so big that any government could rethink to extend the deadline, but it certainly was the resolve of the "Team India" that no one sought any extension. Today, on this 15th August, I salute the "Team India", who, keeping the honour of our tricolour National Flag, left no stone unturned to realise that dream, and the "Team India" has now nearly achieved the target of building all the toilets. I compliment all the state governments, government officers of the districts, policy framers and implementers of educational institutions, who were involved in

realising this achievement. This is not just an issue of building more than 4.25 lakh toilets. This is an issue of creating an atmosphere of self-confidence at a time, when we were so engulfed with the negativity that it was being told that nothing could happen, there was no hope, it was not possible. But now, the "Team India" has demonstrated that we are ready to accept challenges, we would not withdraw, and we are committed for our success. The nation runs on this self-confidence, the nation runs by realising newer resolutions. We cannot stop anywhere, we have to continuously move

five crore citizens of the country have to remove this deficiency of the nation by their resolution of mind. The persons due to whom we look good, who serve us good, no one is our better well wisher than them and therefor, dignity of labourers, honour of labourers, pride of labourers- this should be our national duty, this should be our national character, this should be the tendency of everyone, nature of everyone. Recently, we started a campaign of issuing special identity card to the unorganized labour falling under certain schemes. They are to get the benefits of many schemes of security through that identity card. These

forward. Therefore, Brothers and Sisters, we have prepared a plan for the labourers of our country, and it has been named as "SHRAMEVA JAYATE". Our attitude towards the poor labourers is not good.

If we meet a person wearing coat, pants, tie or we meet a great person wearing long kurta, jacket we salute him by standing in his honour. But if an auto rickshaw driver, pedal rickshaw puller, newspaper vendor or a milkman come to us, our feelings towards these poor men are not proper. One hundred and twenty

unorganized labourers were never taken care of. Similarly, labourers of our country had deposited their share of hard earned money in Government coffers. Slowly, this amount grew to Rs. 27 thousand crores, but when that poor labourer moves to some another place after 6-8 months of employment there, moves to another place after a year or two from there, no account of the money he deposited there is maintained. The amount is also so low that he does not wish to bring back the same by spending two hundred rupees on fare.

That is why Rs. 27 thousand crores of poor people of my country, labourers of my country, money earned by them by the sweat of their brow was lying idle in the coffers of the Government. We found a solution to it. We provided a special identity card number to these labourers and told them wherever you are transferred now, even if you move to another place by quitting the job or if you move from one factory to another, from one state to another, you will always retain this number and you will retain your money, no one will be able to misappropriate your single rupee. So, we have tried to return the Rs. 27 thousand crores to the poor.

It has become a fashion in our country- make law for everything and keep our courts busy. One law may contradict the other but the law should be on the same subject. Confusion was being created here always. This is not a good sign for good governance and therefor, law should be explicit, law should be correct, law should not be out of sync with time, only then society progresses.

Where will a poor labourer look for his thing of interest in the pile-up of different types of 44 legislations meant for

our labourers? We have brought about a change therein. By incorporating these 44 legislations into four codes of conduct, the poorest of the poor and even an illiterate labourer can know about his or her interest, we have emphasized this scheme.

Brothers and Sisters, corruption is a much discussed topic in our country. We must have seen an ailing person, habitually, giving tips to others on how to be healthy. He does not care for himself, but it is the nature of every human being to advise others that you do it and you will become healthy and you do that and you will become healthy. Corruption is also like this. The person involved in it, also advise, the person who is suffering due to it, also advise and thus they advise each other, and this goes on and on.

Brothers and Sisters, I have never made this announcement, but today I wish to state, I want to assure my fellow countrymen, I want to tell the "Team India" comprising 1.25 billion people that this country can become corruption-free. On the basis of experience I am saying this. This job has to be started from the top. Corruption is stuck with our country like a termite and the termite keeps on spreading, initially it is not visible, but when it spreads

in our bedroom and reaches the cupboard where clothes are hung, we find that and when we want to get rid of it, insecticides have to be injected per square meter of land. After so many of years of efforts, we get rid of termite. Countless efforts of several types have to be made to wipe out the corruption in such a vast country, and that can be done. If I had said that I would cut subsidy worth Rs. 15 thousand cores on LPG gas, then I can say that hundreds of articles would have been written to glorify my Government. They can say that this man has the power and strength to discontinue the subsidy worth Rs. 15 thousand cores on LPG gas. It is this man who can take tough decision and if it is not done so, then nothing happens my dear friends and nothing is visible. Sometimes people are fond of sinking into despair. Until they talk of despair amongst people they can not sleep at night.

They have this habit. There are some ailing people, who do not like to disclose about their illness and they also do not like to someone inquiring about their ailment. While there are some others who wait for a particular person to enquire about their health and if he does not visit, they talk about this for hours together. I can see that there are some people who always search for negativism, propagate negativism and they enjoy it as much as they can. Such

people neither have any schemes nor activities, yet "Team India" consisting of 1.25 billion Indians is ready to invest time for them, but how does that happen? We have put in place a scheme of Direct Benefit Transfer of LPG subsidy. Taking advantage of Jan Dhan Accounts and Aadhaar Card we have transferred the subsidy directly into the accounts. As a result of this the brokers, the middlemen and the blackmarketeers have disappeared. Only the real beneficiary got the benefit. Our Government have neither slashed a penny from anyone's benefit nor we have made announcements to earn praise. We have improved the system and today I wish to inform the 'Team India' of 1.25 billion Indians that as a result of this an amount of Rs.15,000 crore, which was being siphoned off annually in the name of gas cylinders has been stopped. My countrymen, the corruption has stopped.

My brothers and sisters, you can see how work is done? We have done it. Rupees 15,000 crore is not a small amount for a country like India. We have launched an open website, displayed a board of delivery there, even then if someone has a complaint, he would get a cylinder even at midnight but we cannot permit those who loot the country and poors as well. Tell me whether this is not a fight against corruption?

My brothers and sisters, I had made a request to my countrymen that if you are economically sound, then why do you avail subsidy on L.P.G? Why do you need this paltry amount of rupees five to seven hundred which you usually spend on petty snacks. I had just started giving message about this, I didn't launch any campaign as yet, because I have faith in "Team India". As the message spreads the result would come, but to-day I can tell with pride that ever-

since I had launched movement of "give it up" subsidy of LPG gas cylinder, till date 20 lakh consumers have already given it up.

This is not a small figure. Even if we are in the queue before a temple for the blessings (Prasad), we sometimes wish that we should get some of the prasad for our younger brother also. This is in our nature. These 20 lakh people are not from rich or wealthy families. They are all from the common middle class. Some teacher may have been a pensioner, but when he learnt that this LPG cylinder may go to some poor person, he gave up his subsidy. My dear brothers and sisters, when these 20 lakh LPG cylinders will reach the poor families whose kitchens are smoke choked, just think of the happiness of the mothers working in those kitchens! Just think of the relief and happiness of the little children who had been crying due to the smoke! Whenever our efforts are in the right direction, we get great results.

My brothers and sisters, if I talk about coal, some of the political pundits or experts will judge me on a political angle. This is not a place for politicking, so I would like to urge upon all the political pundits that in this case, the kind of coal issue that I am going to raise, may please not be judged through the political angle. This is the requirement of our nation's

resolve. CAG said that when coal blocks were allocated through lottery, the nation lost Rs.1 lakh and 74 thousand crores. We also used this statistics in the election-speeches. Nevertheless, we sometimes thought that this much of loss may not have been there. But we went on saying like that. Later we decided that whether it be coal, or spectrum or any other mineral, all will be auctioned henceforth. Lo and behold ! the great strength of the Team India of 125 crore Indians and their resolve ! within a certain time limit the coal was auctioned and now almost Rs. 3 lakh crore would be accruing to the national exchequer.

Brothers and sisters, just ask yourselves whether corruption was rooted out or not? Whether the middlemen were ousted or not? Whether the door was shut on the face of the wealth-stealers of India or not? I did not make any speech in this regard. I just did it. The same thing happened in the case of spectrum. Right now FM radio auction is going on. A lot of pressure was put on me. People said 'Modi ji, FM is operated by the common men, there is no great profit in this business. Why are you putting even FM on auction? A lot of pressure was put on me. All attempts were made to dissuade me from this. But I said that the team India consisting of 125 crore of Indians wanted transparency.

Right now the auction is on for FM Radio in some 80-85 cities. The day before when I enquired, the auction amount had crossed Rs. one thousand crores. This money is going to be used for the poor people.

Brothers and sisters, what a run the country had at the hands of its leadership, how it was looted, what impact was put on the policies! What kind of an activity it was that continued in the country? Imported coal from the foreign countries was not given to the power plants near the coasts. It was transported to the factories of nearby areas of coal mines and the coal from those mines instead was taken to the factories in the coastal region. Now, even a small child in this country can understand as to how the goods can be utilized for the place where they are situated instead of going for their transport from that place to the other.

Brothers and sisters, we changed that decision. Nearby factories should be the first beneficiaries. And let me say that this small decision closed down the shops of the middlemen and the exchequer has got Rs. 1100 crores. My dear citizens, it will happen every year now.

Corruption in a way has become part of the system. Until it is stamped out from the system, dear brothers and sisters, I'll keep suffering every atrocity, facing every obstacle but with your blessings I shall fulfill the dream of a corruption free India. I say this to you from the ramparts of the Red Fort with the tricolour as my witness and the understanding of the dreams of the 125 crore people. It's been 15 months since you put our Government in Centre and gave me the mandate. This Government does not have any allegation of corruption against it for even a single penny. But I had said alongside that it was like the pests, the termite. Corruption free Government in Delhi only is not going to

solve the whole problem. There are problems at the small places right now and the poor are getting troubled. We need to bring in a national level awareness for this. We need to comprehend this menace of corruption properly and get everyone on board to eradicate it. Then only can we get rid of the menace.

Brothers and sisters, let me say further that we have taken some very important steps one after the other to check black money, and that too in a very short span of time.

The day we formed the Government, we constituted an SIT under the supervision of the Supreme Court. We did what was pending for three years. The SIT is doing its job. I attended the G-20 summit. These are the countries whose support we need for bringing black money back. On India's insistence a resolution was passed against black money. All G-20 countries resolved to cooperate with each other and send back the black money to the country where it belonged. We adopted FATCA along with the United States. We have signed agreements with many countries for receiving real time information regarding Indian's black money. We have taken several measures to check black money.

Brothers and sisters, we have passed a strict law for this. After this enactment every week people call us and complain that we have passed a very stringent law. They call it a draconian law and a black law and say that officers would harass them. Dear fellow citizens, we need injections if the disease is serious. Doctors also warn us about the side effects of such injections. Similarly, this disease is so serious that if we want a treatment, we will have to bear the side effects also. I know that people are upset with the law which we have passed.

They find it troublesome. We have received many messages for diluting the provisions and relaxing it. Today I would like to tell Team India of 125 crore countrymen that even while bearing the side effects, we are moving forward against black money. This much has been done. It's a fact that the process of bringing back the black money is long but now no one can dare to send the black money out of the country. This much has been achieved, whether someone believes it or not. Not only this, we have given some grace period for declaring undisclosed income and today I can say that people have come forward and declared their undisclosed income amounting to Rs. 6500 crores. This amount will accrue to our exchequer. It will benefit the poor of India. Friends, I assure you all that we will move forward with all the resolve to fulfill the commitments we have made.

Brothers and sisters, CBI had registered only eight hundred cases in the entire one year before formation of our government. We are still new in power but we have already registered eighteen hundred cases since we took charge; we have taken action against government employees. You can easily imagine and compare the figures. In the entire one year before we came to power, only eight hundred cases were registered and in the ten months of our government the corresponding number is eighteen hundred. It shows our ability to fight corruption.

In 2005, a law namely 'PMLA' was framed in our country. In ten years, an amount of ten thousand crore rupees has been recovered under that law. But you would be surprised to know that out of the total recovered amount of ten thousand crore rupees, four thousand five hundred

crore rupees have been recovered in the last ten months. This is another example of our commitment to fight corruption about which we are not talking in press conferences on TV; rather we have taken steps on the ground and reaped success. We have endeavored to change systems. We have taken steps to ensure that the 'MGNREGA' wages go directly to the Jan Dhan account; that the scholarship for students goes directly into their bank accounts; and that there is least brokerage. And I believe that because of these steps the country can fulfill those objectives.

My farmer brothers and sisters, last year we had deficient rainfall. It was less than required. It affected the economy as well as our farmers. We were still able to curb the price rise. One will have to admit the fact that before us, the inflation was in double digits. Since we came to power, although there has been less rain and the farmers were distressed; we have been successful in bringing down the inflation from double digits to 3-4 percent. We will continue to strive to bring it further down because our dream is to provide wholesome meals to the poorest of the poor. However, we need drastic changes in the agriculture sector. The cultivable land is shrinking; it is getting divided between families and pieces of land are getting smaller. The fertility and productivity of our agricultural land must increase. The farmers need water and electricity and we are working towards their availability.

Bharat Mata Ki Jai, Bharat Mata Ki Jai, Bharat Mata Ki Jai.

Vande Mataram, Vande Mataram, Vande Mataram.

Jai Hind, Jai Hind, Jai Hind!

One society, one dream, one resolution, one direction, One Floor - Narendra Modi

My beloved countrymen, on this auspicious occasion of our festival of freedom; I extend lots of greetings to the one hundred and twenty five crores fellow nationals and also to entire Indian diaspora spread all over the world, from this rampart of the Red Fort. This festival of our freedom, this 70 years of our Independence, is the festival for our resolution to take the nation to new heights with a new resolve and a new fervour and new energy. We are able to breathe in a free air as the result of the sacrifices, renunciation and penance of our millions of great forefathers. We are also reminded of the youths who kissed the gallows. We also remember Mahatma Gandhi, Sardar Patel, Pandit Nehru and countless great persons, who fought ceaselessly for the freedom of our nation. It is the result of their struggles that we are now fortunate enough to breathe as a free citizen. India is a very ancient nation. We have a history of thousands of years and our cultural

heritage is also millennia old. Right from the Vedas to Vivekananda, from the Upanishads to the satellites, the Sudarshan Chakradhari Mohan to Charkhadhari Mohan, from the Bhim of Mahabharat to the Bhimrao; we have a long historical journey and heritage. Our land has seen many historical ups and downs and our generations have waged many struggles and observed penance to bequeath great values to the humanity. India's age is not just seventy years. But having won freedom after a period of subjugation; we have made efforts to take the nation forward in this journey of seventy years. Sardar Vallabh Bhai Patel united the nation. Now, it is the responsibility of all of us to make this nation better. We all have to work ceaselessly for the realization of the dream of 'One India, great India'. (Ek Bharat, Shreshtha Bharat).

Brothers and Sisters, We have not attained freedom for free of cost. Innumerable were the atrocities, but

undeterred were our resolves also. Every Indian was a soldier in the battle for freedom. Each one of them dreamt of an independent India. May be every one of them was not fortunate enough to sacrifice, may be each of them was not fortunate enough to go to prison; but every Indian had a resolve and the leadership of Mahatma ji and also the inspiration of countless revolutionaries who had sacrificed every thing. All these movements contributed to our attainment of Independence. But, now we have to convert this freedom into 'the real freedom'. Now, this is the resolve of the one hundred and twenty five crores of Indians. So, just as we did not attain our freedom without sacrifices; we would not be able to attain 'the real freedom' without renunciation, without human endeavour (Purusharth), without bravery, without dedication and discipline. So, in order to take ahead this resolution of one hundred and twenty five crore Indians; all of us will have to move ahead with our specific responsibilities in a most committed manner. Be it a

Panchayat or the Parliament, be it a village headman or the Prime minister; every one of us as well as every democratic institution will have to shoulder their responsibilities completely and perfectly. Only then we will be able to realize the dream of our the real freedom as soon as possible. This is correct to say that our nation is beset with

many problems now- a- days. But, we should never forget that if we have the problems, then we also have all the capacities to solve them. So, if we move ahead with all our capabilities, we will find the ways and mean to solve all these problems. So, brothers and Sisters, if we have lakhs of problems, then we also have one hundred and twenty five crore brains also which are all capable to solve these problems.

Dear Brothers & Sisters, there was a time when Government used to be surrounded by aspersions. But now time has changed. At present, no aspersions are being leveled on the Government. Rather, people have great expectations from it. When the Government is engulfed in expectations then it signifies hope and trust, which in turn generates those expectations. Expectations give pace

towards good governance, invigorates and so the pledges are implemented ad continuum. My Brothers & Sisters, today when I am addressing you from the rampart of the Red Fort, it is, therefore, but natural that we should discuss the journey of good governance, the work done by the Government and work being done and should be done for the country. I can present before you a very detailed account of work done and also multiple issues regarding the performance of the Government. During the tenure of two years, the Government has taken innumerable initiatives and multiple tasks have been done. If I start giving details

about them, I am afraid I will have to talk about it for a week from this very rampart of the Red Fort. So instead of that temptation, I would like to draw your attention towards the work culture of the Government. Sometimes, it is easier to present the account of work done. But, it is not easy for a common man to comprehend, understand and identify the work culture without dwelling deep into the work culture. My Brothers & Sisters, My Countrymen, I would not talk solely about the policy, but also the intention and decisions of the Government.

Dear Brothers & Sisters, it is just not an issue of direction and outline, rather it is about holistic approach and a resolve for transformation. It is confluence of trinity of expectation of people, democracy and support of people. It is both wisdom and consent. It is also pace and realisation of progress. Therefore, My Countrymen, when I talk about the Good Governance, it does implies bringing in transformation in the life of common man of my country. Good governance means that the government should be sensitive, responsive and dedicated to the common man. Then only good governance gets the emphasis. Responsibility and

accountability should be at the root of it and it should draw its vital energy from there only for the government to be sensitive, dear Brothers and Sisters. We remember the days when there used to be a very long wait to go to any big hospital. People used to come to AIIMS, spend two three days and then only it would be decided what diagnostic tests were to be done. Now we have been able to change this system. Registration is done online and the doctor's appointment is also given online. The processes start on arrival of the patient at the appointed hour itself. Not

only this but all his medical records are also available online. And we wish to develop it as a countywide culture in the field of medical treatment. Today this system has been put in place in 40 big hospitals of the country. Its basic premise is that the government has to be sensitive.

Dear Brothers and Sisters, the government should be accountable. If it be not so then the problems of the common man are kept pending for solutions. How does the change come? Now technology is there, but there was a time when the railway ticket in the railways, concerning the common man and the poor was available only two thousand tickets per minute. Those who might have seen it, would know how the buffering used to be there, nobody knew when the website would be operational again, but today I have to say with satisfaction that now it is possible to have fifteen thousand tickets per minute. The government should be accountable, it should take steps according to the necessities and expectations of the people. There is a class across the country, particularly the middle class, higher middle class whom you see troubled more at the hands of the income tax officials rather than the police at times. I have to change the situation and I am trying and I will certainly change it.

There was a time when a common and honest citizen used to give two rupees extra as a measure of caution at the time of paying his income tax. He used to think that he might not be harassed, but once the money was deposited to the government exchequer, he had to run from pillar to post and seek recommendations for getting the refund. It took months together before the rightful money of the citizen was returned to him from the government exchequer. Today, we have made a system of issuing online refund. Today, refunds are given in one, two say or three weeks. Those who are hearing me today on TV, they would also be realising that they had not given any application, yet they had got refund directly into their account. So, this responsibility and accountability are the results of these efforts.

It is equally important to lay emphasis on the transparency for good governance. You know that a global relationship has already started to become a common thing in the society today. A middle class man wants to have his passport- there was a time when about 40 lakh, 50lakh applications were received for getting passport. Today, approximately 2 crore people apply for the passport. Brothers and Sisters, earlier 4-6 months were taken for scrutiny of applications if one did not have recommendations. We

changed that situation and today, I can say with pride that passports are issued to the citizens with all genuine details, in about one or two weeks and there is transparency no recommendation is required and there is no dilly-dallying. Today, I can say, we have issued 1.75 crores passports (in 2015-16 itself.)

In Surajya there must be efficiency in governance and therefore, earlier, if a company had to set up a factory or desiring to do business in our country, applications were submitted. There was a task of registration only, one wanted to do something for the country, but almost 6 months passed in normal course. Brothers and Sisters, if efficiency is brought, then the same government, same rules, same officials have got geared up to perform the same task of company registration within 24 hours and they are virtually doing it. In the last July itself, they performed the task of more than 900 such registrations.

Brothers and Sisters, good governance is also necessary for Surajya and the steps we have taken towards this good governance are that, as I had said last year from the Red Fort that we would exempt group 'C' and group 'D' posts from interviews, they might get job on the basis of merit. We have detected almost 9,000 posts for which thousands and lakhs of people need to be recruited. Now, there would not be any interview process for these 9,000 posts, my young men would not need to spend any money for interviews. Recommendations would not be needed, roads for corruption and agents will

be shut and this work has been implemented.

Brothers and Sisters, there was a time when a common man got satisfied if the government announced any plan or merely announced that this would be done, he used to think that something concrete would happen now. Then, a time came when people asked for the plan unless the drawing of the plan came. Then, there was a time when people asked for the budget. Today, the mood of the country has changed in 70 years. It does not get satisfied with the announcement, it is not satisfied by seeing the plan, if a budget provision is made, it is not ready to accept this. It is accepted when things get implemented on ground and we cannot bring things on ground with the old pace. We have to speed up our work, increase the pace further and then we can say that we have done something.

Rural roads are a perpetual issue in our country. Each rural citizen craves for pakka roads. Its a huge task. Atal Bihari Vajpayee Ji took this task specifically. Even succeeding governments continued this and the work continued. We have made efforts to fast track it. Earlier 70-75 Km of

rural roads were completed in a day. Now we have increased that pace up to 100KM a day. This pace will fulfil the aspirations of common man in the days to come.

We have aid emphasis on energy, specifically renewable energy in our country. That was a time, when after so many years of independence, we started working on wind energy. Within a period of last one year we have increased it up to 40%. So this is the scale of up acceleration. Whole world is focussing on Solar energy. We have increased it approximately 116%-118%. This is not only a substantial incremental change, it's a huge leap

forward. We intend to enhance the things in quantum way.

In our country, even before forming of our government, we had the power production. But to reach the power, you need transmission lines and the good transmission infrastructure. Two years preceding the formation of our government, 30-35 thousand kilometres of transmission lines were being laid annually. Today I wish to submit this with satisfaction that we have raised this to 50,000 Kilometres. So we have increased the pace here. If we take the

commissioning of railway lines in previous 10 years, where commissioning means capacity to ply the trains and to finish all the trials, so earlier it was at the rate of 1500 kilometre in 10 years . But we have made it up to 3500 kilometre in last 2 years. We are to increase this pace even further.

Brothers and Sisters, Now we are connecting government schemes to AAadhaar Card, focussing on stopping the leakages through direct benefit transfer. Previous government had connected four crore people to government schemes via Aadhaar Card. Today I can say this with satisfaction that in place of that work of four crore, we have completed the task of connecting 70 crore people to government schemes via Aadhaar card . The remaining will also be taken into the fold.

Today, for middle class or for common people the ownership of a car is a matter of pride. There was a time when gas stove at home was deemed as a standard and as a symbol of social status. During the last 60 years of independence, 14 crore LPG gas connections were given. Brothers and Sisters, it is a great satisfaction to me that on one side, 14 crore gas connections were given in 60 years, while on the other side, we have given 4 crore gas connections in just 60 weeks. Please compare the two figures - 14 crore in 60 years and 4 crore in 60 weeks. This is the speed, by which a change has become possible in the quality of life of common men. We have also started the task of eradicating obsolete laws. The burden of unnecessary laws has been creating hindrance in the functioning

of the government, the judiciary and the public. We have identified 1700 such laws, out of which 1175 laws have already been repealed by the Parliament and several other such laws are in the process of repealing.

Brothers and Sisters, it had become a tendency among the people to say that certain work can be done and certain other work cannot be done, certain work cannot be done now and certain work cannot be done ever. A kind of negativity was prevalent in the minds of people. Now, a clear break through is visible in the mindset, a new synergy is seen in the functioning of the government. When an accomplishment is achieved, it stimulates dynamism, which sharpens our determination and then, the end result is not far away.

Brothers and Sisters, when we had launched "Prime Minister Jan-Dhan Yojana", it was almost an impossible task. There were banks and the governments, nationalisation had already taken place, but the common man of the country was not able to be a part of the mainstream of national economy.

Brothers and Sisters, we have attained this impossible task through inclusion of 21 crore persons under "Jan-Dhan Yojana". This is not a matter of taking credit by the Government, it is really an achievement of 125 crore countrymen of the country, for which I salute them. The campaign for women pride in villages of the country is an important issue of today. The practice of open defecation should be stopped; toilets should be built in villages. When I had got the first opportunity to address from the ramparts of the Red Fort, I had expressed my feelings about it. Now, I can claim that more than 2 crore toilets

have already been built in villages of the country within such a short period. More than 70 thousand villages are now free from the practice of open defecation. We are working towards bringing change in the lives of common man.

I had earlier announced from the ramparts of the Red Fort that we would electrify those 18 thousand villages, which are still without electricity. We are going to complete 70 years of independence, but they had not seen electricity. They were forced to live in the 18th century. We undertook this task of making possible the impossible and today I am glad to say that, though we have not been able to complete even half the task within a thousand days, we are still away from the half-mark, out of the 18 thousand, electricity has reached ten thousand villages. I have been told that there are many among those villages who are watching Independence Day celebrations for the first time today on television in their homes. Today, from here I extend special greetings to those villages.

Brothers and Sisters, you will be surprised to know that at merely three hours journey from Delhi, there is a village called Nagla Fatela in Hathras region. It takes only three hours to reach this Nagla Fatela. But it took 70 years for electricity to reach there. 70 years, my brothers and Sisters! And therefore, I am introducing you to the work culture that we are following.

Brothers and Sisters, the LED bulbs were developed by the science and the researchers for welfare of every citizen. But in India it used to cost 350 Rupees. Who would buy it? And even the government would think, "It's alright. The work is done. Someone must be using it." But this should not be the attitude. If LED bulbs can

bring about a change in the life of a common man, if it can ameliorate the environment, if it can improve India's economy, then the government must make efforts in this direction. It is the nature of the government that it intervenes where it is not required and shies away from intervening where it is needed. We tried to change this situation, this work culture. And therefore, the bulb which used to be sold at 350 Rupees, it is now being sold at 50 Rupees because of governmental intervention. See the difference! 350 Rupees on one hand and 50 Rupees on the other. I do not want to ask where all this money used to go, however, thirteen crore bulbs have been distributed till date.

The politics of our country has become populist; the economic policies have become populist. If three hundred Rupees subsidy for each bulb had been given from public exchequer, the Prime Minister would have been applauded for doling out five hundred crore to the people. But we have ensured that they save thousands of crores by providing bulbs at only fifty Rupees. We have already distributed thirteen crore bulbs and we have resolved to distribute 77 crores and I would like to appeal to my countrymen to use LED bulbs in their homes and save 200, 300, 500 Rupees in a year and save energy and save our environment. The day we achieve the target of 77 crore bulbs, we would be saving 20 thousand Mega Watt of electricity. When we save 20000 Megawatt electricity, it means we save around 125000 crores rupees. Brothers and Sisters, you can save 125000 crore rupees of the country

by using a LED bulb at your home. We can fight against global warming by saving 20000 Megawatt electricity and contribute a lot towards the efforts aimed at the protection of environment and a common man can also contribute to it. So, brothers and Sisters, we have worked in that direction-making the impossible possible.

You know that we depend on other countries of the world for energy and petroleum products and for that we have signed long term agreements with them so that we could get these products at fixed prices for a long period. We have entered

into an agreement with Qatar for buying gas till 2024 but the prices are so high that it is costly for our economy. It was a result of our foreign policy relationship that we were able to renegotiate with Qatar, and the agreement which was the right of Qatar, and we were bound to buy gas from it till 2024, we negotiated with them and today, I can say with satisfaction that we made an impossible task possible, they renegotiated their prices and it will save 2000 crore rupees of the exchequer of India. They were entitled to get these 20000 crore rupees but the nature of relationship that we have with them and our policies have

made it possible. The negotiations have been going on during the tenure of all the Governments and efforts were also made for Chabahar Port, which is an important link for connecting us with Central Asia, but today I feel satisfied to see an impossible task becoming possible. When Iran, Afghanistan and India collectively march ahead in a planned way for the construction of Chabahar Port, an impossible task becomes possible.

My brothers and Sisters, one thing, I want to talk about and which concerns the common man is inflation. It is true that the inflation rate had crossed 10% mark during the tenure of previous government. Due to our sustained efforts we were able to keep it below 6 percent. Not only this, we have, recently, made an agreement with the Reserve Bank of India that the RBI should take steps to control the inflation at the level of 4 percent with allowance of plus minus 2. We should leave behind the talks of balance between inflation and growth and work for moving ahead. But the country witnessed drought during last two

years and the effect of drought are readily seen on the prices of vegetables and the outcomes of sluggishness of market have resulted in some problems. The decline in the production of pulses due to drought during last two years was also a cause of concern. But, Brothers and Sisters, if the inflation would have increased at the same pace as it had previously increased, I don't know how the poor of my country would have survived? We have tried our best to keep it under check, but still people have lot of expectations from this government and dear countrymen your expectations are natural and I will not leave no stone unturned in achieving them. Whatever best I can do, I shall do that and keep the price of poor man's meal under check.

My dear Brothers and Sisters, country is going to celebrate the 350th anniversary of Guru Gobind Singhji. How can the country forget the saga of sacrifice which has been the tradition of Sikh Gurus? Today, when we are celebrating the 350th anniversary of Guru Gobind Singhji, I recall one best thought expressed

by Guruji. Guru Gobind Singhji use to say, how can I consider those hands pure which have not done any service, hands which have not strengthened by labour and have not developed any blisters by toiling hard? Guru Gobind Singhji use to say this. Today, when we are celebrating the 350th anniversary of Guru Gobind Singhji I remember our farmers. Whose hands are more pure than theirs? Whose hearts are more pious than their? Whose intentions can be more pure than theirs? I thanks our farmers that despite two years of drought, they consistently endeavored to fill our granaries, I greet them for this. Drought situation has changed and this time we are witnessing good monsoon. Heavy rains have also created problems at some places. Government of India stood with those states and citizen who suffered due to heavy rains. Today, I specially want to thank our farmers, because, when we are facing shortage of pulses and our farmers have shifted to other crops, and rise in demand of pulses by common man, I have to say this with content that this time our farmers have increased the sowing by one and half times. I want to thank our farmers because they have come forward to solve the problem of the crisis of pulses and find its solution. We have decided the MSP for pulses and declared a bonus on it. We have streamlined the process of purchase of pulses and promoting the farmers for cultivation of pulses. This will benefit us in a big way.

Brothers and Sisters, when I was talking about work culture, one thing was clear that I do not look at the issues in isolation but as a whole. Let us see it as integrated and just take agriculture under integrated things, we have developed such work culture with lot of hard work, the complete chain of which can produce a

great result. First of all we focussed upon- the wellness of this soil, wellness of this land, soil health card, macro-nutrition, concern for micro-nutrition and made the farmers understand that this is lacuna in your soil, these are the good qualities, your soil is good for this crop, this is not suitable for this crop and gradually the farmers started their planning according to this soil health card. The people, who have planned, tell me, sir our expenditure has been reduced up to 25 percent and 30 percent increase is being visible our production. This number is less at present, but in future as soon as this may pass on, this concept will gain momentum. The farmers have land and if they get water, then the farmer of my country has the power to produce gold out of the soil. The farmer of my country has this power and that is why we have emphasized upon water-management, emphasized upon water-irrigation, emphasized upon water-conservation. We are emphasizing upon how every drop of water may be utilised by the farmer, how to increase the importance of water, and get per drop more crop, micro irrigation. More than 90 percent irrigation projects were lying incomplete and stalled. We have taken up the responsibility to complete those projects first of all and will work in the direction that lakh of hectares of land may get the benefit of irrigation. We have taken a big leap towards solar pump so that the input cost of the farmers may be lessened because nowadays the farmers require electricity also, they require water, they need electricity, and electricity costs dearer. On account of it, the input cost of the farmer is going to be less, the recurring expenditure is going to be less and due to owning solar pump at home will result in owning electricity, owning the sun,

owning the field, owing the barn and thus our farmer would be happy. We have succeeded in distributing 77 thousands solar pumps till now.

Brothers and Sisters, I would like to congratulate the scientists of our country. Good quality seeds are also required along with soil, water and solar pumps. The scientists of our country have developed more than 131 new farmable seeds compatible to the climate and nature of India, which have the capacity to enhance our per hectare production. The values they retain are also being increased. I heartily congratulate these scientists also. The farmers require urea as well as fertilisers. There was time when black marketing was in practice to get the fertilisers, there was time when the police had to lathi-charge for fertilisers. There was time when the farmer used to watch his crop being damaged in the absence of fertilisers before his very eyes. Brothers and Sisters, the lack of fertilisers has become a matter of past, it has become history now. Today, we have succeeded in utmost production of fertiliser by overcoming the shortage of the fertiliser.

Brothers and Sisters, because of this production, the fertilizers are now available to the farmers in time as per their needs. Similarly, We conceptualized “Pradhan Mantri Fasal Bima Yojana”. Its insurance cover includes maximum protection to farmer's land and his agro-produce at a comparatively much lower premium, and that too with a guaranteed cover. We have constructed new warehouses to preserve 15 lakhs tons of food grains. Our country's farmers will benefit only when we move towards value addition, and for this We have laid special emphasis on food processing for the first time. We have encouraged cent percent

Foreign Direct Investment which would augment agro-based industries, and Consequentially, my brothers and Sisters, I believe it would help me and our farmers realize our dream of doubling latter's income by 2022. These efforts would make it possible and for realizing the same, We have taken steps one after another.

Brothers and Sisters, Our country has a fancy for a trend. And the Governments, with an aim to leave an impression, have done a lot, and to fill the bill in this country, People go for some populist things and empty the exchequer. Governments have a trend of establishing an identity. Brothers and Sisters, I have tried my best to stay away from this allurements, and While doing so, I have tried to do several things in every range with the mantra of Total transformation, Transformation with transparency, Reform, Perform and Transform.

Brothers and Sisters, We are far more committed to build the image of Hindustan than that of our Government. Regardless of party's identity, the Country's identity holds primacy. For, If the Country moves on, it will yield dividends for the coming generations, for centuries, and exactly, for this reason, We have accorded primacy to the country's identity and not to our party. Now a days, You must have observed the scope of our work in Railways. While we are talking about having Bio-toilets in train, we also cherish the dream of Bullet train. While We talk about “Soil Health Card” for farmers, we also want to march ahead in the direction of satellite and space technology. While talking about “Stand-Up India”, we are also taking steps towards “Start-Up India”. We are laying emphasis on Substance than on Symbolism. We are stressing on integrated development than

on isolated development. Leaving aside entitlement, we are focused and emphatic on Empowerment because an empowering country, my brothers and Sisters, provides an identity to the Government through the prism of the newly declared schemes. But sometimes the old schemes just tumble down. Nevertheless, the Govts. is a continuity. If the earlier Govts. have done some work; then it is in the national interest that the next Government rectifies their shortcomings and gives a go ahead to these schemes. The arrogance that this was the work of your Government and this is my Govt; hence we would not do this work; is not in the fitness of the things in a democracy. This is why, with all humility, we have given similar importance to the schemes of the previous governments. This is the hallmark of our work culture as our nation is a continuous and a ceaseless system and we wish to retain that system. This is why, I have a project called PRAGATI. Under this project, every month, I myself sit and review all the on going projects. You would be amazed to know that almost 119 projects worth Rs. seven and a half lakh crores started by various previous Govts. were lying pending. I got all of them going. I said, so much of money have been spent on them, so, all these projects should be completed. Now they are all on the way to completion. We created a project monitoring group. I asked them to look into all such projects

and find out as to when were they started. I came to know that some of them were started 20 years ago, the other were started somewhere between twenty five to thirty to fifteen years earlier. The people living in the areas of these projects know all. We identified such two hundred and seventy projects worth Rs. 10 Lakhs crores which were inaugurated by some earlier govts. and some crores of rupees were spent on all of them; but all that money was going down the drain. We started all such stuck up projects once again. Brothers and Sisters, such holding up and delaying of the schemes after having spent crores of rupees on them is a criminal negligence and we have tried to tide over such things.

Brothers and Sisters, earlier railway projects took at least two years in getting sanctions. A train is passing from somewhere, road have also been made on the both side; a rail over bridge is to be constructed. But the approval took two years. We have speeded up the approval process

Bharat Mata Ki Jay! Bharat Mata Ki Jay! Bharat Mata Ki Jay!

Vandematram! Vandematram! Vandematram!

Jay Hind! Jay Hind! Jay Hind!

Thank you.

Tantra will not work for the people, but the system will run from the people - Narendra Modi

My dear fellow citizens,

Greetings from the ramparts of the Red Fort on the auspicious occasion of Independence Day.

Nation is celebrating the Independence Day with the festival of Janamashtmi today. I can see a number of Bal Kanahiyas here. We are fortunate to have in our cultural and historical heritage from a Sudarshan Chakradhari Mohan to Charkhadhari Mohan.

From the ramparts of Red Fort, on behalf of our 125 crore countrymen, I bow and pay respects to all those men and women who have sacrificed their lives, who have undergone immense sufferings and made sacrifices for the independence, glory and pride of the country.

Sometimes, natural calamities are a big challenge for us. A good monsoon contributes immensely to the prosperity of the country. However, due to climate change, sometimes it turns into a natural calamity. Several parts of the country

faced natural calamities recently. Besides our innocent children lost their lives in a hospital. Our 125 crore countrymen stand shoulder to shoulder with them in this hour of crisis and grief. I assure the countrymen that in this hour of crisis we shall leave no stone unturned to ensure the wellbeing of all.

My dear countrymen, this year is a special year for independent India. We commemorated 75 years of Quit India Movement last week. This year we are also commemorating the centenary of Champaran Satyagrah and the Sabarmati Ashram. The centenary of Lokmanya Tilak's call "Swaraj is my birth right" falls this year as well. The year marks the 125th Anniversary of the Ganesh Utsav which led to the rise of community awakening through the celebrations. It inspires us to dedicate ourselves to a cause for the country. A collective resolve of the citizens was visible during 1942 to 1947 across the country which forced the British to Quit India within a span of five years. We will

have to exhibit the same resolve from now on in the 70th year of independence to 2022, the 75th year of independence.

We now have five years before we reach the 75th year of our independence. Our united resolve, strength and determination to work hard remembering the memory of our great patriots will help us to build an India of their dreams by 2022. Therefore, we have to take the country forward with a pledge to build a New India.

We are aware of the power of the collective resolve, hard work, sacrifice and devotion of our 125 crore citizens. Lord Krishna was immensely powerful, but it is only when the milkmen came out with sticks in his support that they could lift the Govardhan parvat. When Lord Rama had to go to Lanka, the monkeys of vanar sena came to his help, Ramsetu was built and Lord Rama could reach Lanka. Then there was Mohandas Karamchand Gandhi, who empowered his countrymen to weave the fabric of independence with cotton and spinning wheel.

The collective resolve and strength of the people got freedom for our country. No one is small or big. We have in our memory the story of squirrel which became an agent of change. That's why we must remember that no one among the 125

billion people is either small or big – everyone is equal.

If each one of us, irrespective of where he belongs to, strives with a new resolve, a new energy, a new strength, we can change the face of the country with our combined strength in the 75th year of our independence in 2022. It will be the New India – a secure, prosperous and strong nation. A New India where there is equal opportunity for all; where modern science and technology play an important role in bringing glory for the nation in the global arena.

Our freedom movement is linked to our sentiments. We know it well that at the time of the freedom movement, the teacher who was engaged in teaching, the farmer who was tilling his land, the laborer who was working – all of them knew in their hearts that whatever they were doing, was contributing towards the independence of the country. This idea is a great source of strength. In the family, food is prepared everyday but it becomes 'prasad' only when it is offered to the deity.

We are working, but if we do so in the spirit of working for the glory of mother India, for the divinity of mother India, if we do it to rid our countrymen of poverty, if we do it to properly weave our social fabric, if we discharge our duties with feelings towards the country, if we do it with a sense of devotion to country, if we do our work by dedicating it to the country, then the achievements will be much more. That is why we should move forward with this spirit.

January 1, 2018 will not be an ordinary day – those born in this century

will start turning 18. For these people, this is a decisive year of their lives. They are going to be the creator of the destiny (Bhagya Vidhata) of our nation in the 21st century. I heartily welcome all these youth, honour them and offer my respects to them. You have an opportunity to shape the destiny of our country. A proud nation invites you to become a part of its developmental journey.

My dear countrymen,

When Arjuna was posing a lot of queries to Lord Krishna in the battlefield of Kurukshetra, then Krishna told Arjuna that you achieve goals as per your thinking and beliefs. We have a strong determination, we are committed for a brighter India. We, who have grown up with a state of hopelessness, have to reject the feeling of despair and must now march ahead with confidence.

We have to leave this 'Chalta Hai' attitude. We have to think of 'Badal Sakta Hai'- this attitude will help us as a nation. We should have this confidence that with sacrifice and hard work and a resolve to do something, we will get necessary resources and the ability to do it and then a big

transformation will happen, and our resolve will convert into accomplishment.

Brothers and sisters,

It is natural for our countrymen to think of our safety and security. Our country, our military, our brave-hearts, our uniformed forces, be it any force, not just the army, air force or navy, all the uniformed forces, whenever they were called upon to do so, they showed their valour, their strength; our brave-hearts never turned their back in making the supreme sacrifice. Be it Left-Wing-Extremism, be it terrorism, be it infiltrators, be it the elements fomenting trouble inside our country- the uniformed forces of our country have made extreme sacrifices. And when the surgical strike was carried out, then the world had to acknowledge India's capability and strength.

My dear countrymen,

India's security is our priority. Be it our coast line or our borders, the space or the cyberspace, India is capable of ensuring its own security and strong enough to ward off any threats against the country.

My beloved countrymen,

Those who have looted the nation and looted the poor are not able to sleep peacefully today. Due to this, the confidence of the hardworking and honest person is increasing. An honest man now feels that his honesty matters. Today, we are celebrating a festival of honesty and there is no place for dishonesty. This gives us new hope.

The law against Benami property was lying in limbo for years. Now, we have come up with a law against Benami Property. In such a short time, the government has confiscated Benami properties worth over Rs.800 crores. When these things happen, the common man develops faith that the country is for the honest persons.

The 'One Rank - One Pension' policy for our defence forces was stuck up for 30-40 years. Our government implemented it. When we fulfill the aspirations of our soldiers, then their morale goes high and their resolve to protect the nation grows manifold.

The country has many states and a Central Government. GST has shown the

spirit of cooperative federalism and has given competitive cooperative federalism a new strength. The success of GST can be attributed to the hard work that has been put in to make it a success. Technology has made it look like a miracle. The global community is surprised how we were able to roll out GST in such a short time. It is a reflection of our capability and helps in building the confidence and faith of the future generations.

New systems are emerging. Today roads are being built at twice the speed. The railway tracks are being laid at double the speed. More than 14 thousand villages that were hitherto shrouded in darkness even after Independence, have been provided with electricity. Bank accounts of 29 crore people have been opened, more than 9 crore farmers have got Soil Health Card. More than 2 crore poor mothers and sisters are no longer using the fuel wood and using LPG gas stove NOW. The poor tribals have gained faith in the system. The person at the last mile of development now joins the mainstream and the nation is marching ahead.

Loans worth more than 8 crore have been sanctioned without guarantee to the

youth for self-employment. The interest on bank loans have been lowered. Inflation is under control. If a person belonging to the middle-class wants to build his house, then he gets a loan at a lower rate of interest. In this way, the country is moving forward and people are joining the movement.

The times have changed. The government is determined to do all it says, like doing away with the interview process.

In the labour sector alone, even a small businessman had to fill up to 50-60 forms, but we have now made it more convenient by reducing it to just 5-6 forms. I can provide many such instances of Good

Governance, simplifying the process of Governance. By reiterating this we have enforced faster decision making. And that is why 125 crore countrymen have been able to repose faith in our governance.

Dear Countrymen,

India today has gained in stature across the globe. You will be happy to know that we are not alone in our fight against terrorism. Many nations are proactively supporting us.

Be it Hawala, or any inputs related to terrorism, the global community is supporting us with critical information.

We have joined hands with other nations in the combined fight against terrorism. I extend my heartfelt greetings to all those countries who are standing in solidarity with us and acknowledge our prowess.

For the development and progress of Jammu & Kashmir, its prosperity, and fulfilment of the aspirations of the citizens, not only the J&K government, but we as responsible citizens also have a responsibility. We are committed to restore the state to its former glory so as to experience the paradise that it was, once again.

On Kashmir there is rhetoric and politics. But I am clear in my belief on how to win the war against separatism, which is spread by a handful of people. The problem will be solved neither by abuse or bullets - it will be solved by embracing all Kashmiris. Such is the legacy of 125 crore Indians. Hence, neither by abuse nor by bullets, change will come by embracing all. And we are moving forward with this resolve.

We shall take strict steps against terrorism. There is no question of being soft on terrorism or terrorists. We have been asking the extremists to join the mainstream. Democracy provides an equal opportunity and rights to be heard for all. The process of engagement can take place only by their joining the mainstream.

I deeply appreciate the efforts of security forces in curbing the Left Wing extremism which mobilized a lot of youth from these regions to surrender and joined the mainstream.

Security forces are keeping a tight vigil on our borders. I am delighted to announce that today the Indian Government is launching a website which will give an account of the valour of the

Gallantry Award winners. A portal is also being launched which aims to provide the entire details of these brave hearts who have brought pride to the nation. The story of sacrifices made will certainly inspire the younger generations.

With the help of technology, we are trying to promote honesty and transparency in the country. Our fight against black money will continue; our fight against corruption will continue. With the intervention of technology, slowly we are trying to link Aadhaar with the system. We have been successful in infusing transparency in the system. People from around the world have appreciated this model and have been studying it.

A common man living thousands of kilometres away can now supply his products to the Government. He doesn't need any middle man. We have launched a portal called "GEM". The Government is making procurement through this portal. We have been successful in bringing transparency at various levels.

Brothers and Sisters,

Implementation of Government schemes are gaining momentum. When a work is delayed, it is not only the project that is delayed. It is not a matter of expenditure of money. When a work is stalled, the poor families are the ones who suffer the most.

We can reach the planet Mars within 9 months; we are capable of achieving that.

I review Government Projects every month. A specific project came to my notice. It was a 42-year old project. 70-72 kilometres of Railway lines were to be laid, but the project was lying in limbo for the last 42 years.

My brothers and sisters,

When a country that is capable of reaching Mars within 9 months, how is it possible that it is not able to lay 70-72 Kilometres railway lines for 42 long years. It sets in doubts in the minds of the poor. We have taken care of all these things. We have been striving to bring in the changes through technology. Whether it is Geo-Technology or Space-Technology, we have tried to link all these technologies to bring in transformation.

You must have seen that there was a time when tension prevailed between the Centre and the States for Urea and Kerosene. The Centre was like an elder brother while the State was treated like a younger brother. I have been a Chief Minister for a long time and I know the importance of states in the development of the country. I know the importance of the Chief Ministers and the State Governments. Hence, we laid emphasis on Co-operative Federalism. Now we are

moving towards a Competitive Co-operative Federalism. You must have seen that we are taking all the decisions together.

You may recall that one of our Prime Ministers in his address from the ramparts of Red Fort had talked about the poor state of affairs of the power supply companies of the country. He expressed his concerns over the issue. Today with the “UDAY” Yojana, we have worked together to resolve the issues with these power companies. It is a concrete example of federalism in its real sense.

Whether it is GST or Smart City Project, whether it is Swachh Bharat Abhiyan, or construction of toilets, or ease of doing business, all these are being accomplished by working together shoulder to shoulder with the States.

My dear fellow countrymen,

In the New India, the biggest strength is democracy. But we have reduced our democracy to mere ballot boxes. However, democracy cannot be confined only to ballot boxes. Hence our resolve is to see to it that we have a democracy in New India, where people are not driven by the system, rather the system is driven by the people. Such a democracy should become the identity of New India

and we want to move towards that direction.

Lokmanya Tilak Ji had said “Swaraj is my birthright”. In Independent India our Mantra should be “Good Governance is my birthright”. ‘Suraja’ or Good Governance should be our collective responsibility. The citizens should fulfil their duties and the Government too should discharge its responsibilities.

When we move from “Swaraj” to “Suraja”, the citizens do not lag behind. For example, when I called upon the countrymen to give up gas subsidy, the nation responded as a whole. I have spoken about cleanliness. Now people are joining hands from every part of the country to take up this cleanliness drive forward.

When demonetization was announced, the world was surprised. People thought that this was the end of Modi. But the way our 125 crore countrymen had shown patience and faith, we were able to take one after another step in our drive against corruption.

With this new practice of people's participation, our effort to take the country forward with people's involvement will help us to reach our goal.

My dear fellow countrymen,

Lal Bahadur Shastri had given the slogan “Jai Jawan Jai Kisan.” Our farmers have not looked back since then. They are now producing record harvests and scaling new heights despite facing natural adversities. There has been a record production of pulses this year.

My dear brothers and sisters,

India never had the tradition to import pulses and if it had to import on rare occasions, it was only a few thousand tons. This year when they produced 16 lakh tons of pulses to provide nutrition to the poor, the government took the historic step of encouraging them by buying their produce.

Pradhan Mantri Fasal Bima Yojna has provided a security cover to our farmers. Three years back, this scheme which was running under a different name earlier, covered only 3.25 crore farmers. Now over a short span of three years more farmers have been brought under its ambit. The number is soon going to touch the 5.75 crore mark.

Pradhan Mantri Krishi Sinchai Yojna aims to meet the demand of water of the farmers. If my farmers get water, they can produce rich harvests from their fields. That is why I had made some

announcements from the ramparts of Red Fort on the last Independence Day. Out of those, we have completed 21 projects and remaining 50 would be completed soon. I have resolved to complete 99 big projects. By completing those 99 big projects before 2019, we shall fulfill our commitment. We cannot change the lot of our farmers until we hand hold him from procuring seeds to ensure that his produce reaches the market. For this we need infrastructure and supply chain. Every year vegetables, fruits and grains worth lakhs of crores of rupees are wasted. In order to change the situation, the government has encouraged Foreign Direct Investment in food processing sector. Government of India has launched 'Pradhan Mantri Kisan Sampada Yojna' to encourage infrastructure building. Due to this, systems shall be put in place that will ensure hand-holding of the farmers from supplying seeds to marketing his produce. Such arrangements will usher in a new change in the lives of crores of our farmers.

With the changes in demand and technology, the nature of jobs in our country has been changing. The Government has launched several new initiatives in the employment related schemes and also in the manner in which the training is imparted for the development of human resource

according to the needs of the 21st century. We have launched a massive program to provide collateral free loans to the youth. Our youth should become independent, he should get the employment, he should become the provider of employment. Over the past three years, 'Pradhanmantri Mudra Yojana' has led to millions and millions of youth becoming self-dependent. It's not just that, one youth is providing employment to one, two or three more people.

In the education sector, we have taken an important step to grant the universities freedom from restrictions to make them the world class universities. We have asked 20 universities to decide their own destiny. The government will not interfere in their functioning. Besides, the government is willing to provide funds up to Rs. 1,000 crores. We have appealed to them and I am confident that the education institutions of our country will certainly come forward and make it a

success.

Over the last three years, we have set up 6 IITs, 7 new IIMs and 8 new IIITs and we have also done the groundwork for linking the education with job opportunities.

My mothers and sisters, the women in the families seek employment in large numbers. And therefore we have taken a very important step to reform the labour laws to provide them the employment opportunities in the night also.

Our mothers and sisters are an integral unit of our families. Their contribution in making our future is extremely important. And that is why we have decided to increase the paid maternity leave to 26 weeks from the earlier 12 weeks.

In the context of women empowerment, I'd like to honour those sisters who have been forced to lead a very difficult life due to 'Triple Talaq'. There is no recourse for them, and such victims of 'Triple Talaq' have launched a massive movement in the country. They shook the conscience of the intellectual class of the country, the media of the country also helped them and a movement against 'Triple Talaq' was started in the country. I heartily commend those sisters who have launched this movement, who have been fighting against the 'Triple Talaq' and I'm confident that the country will help them in this struggle. The country will help these mothers and sisters in securing this right. India will fully support them and they will ultimately achieve success in this very important step in the direction of women empowerment; I am fully confident about this.

My dear countrymen,

Sometimes in the name of faith, some people due to lack of patience end up destroying the social fabric. The country is governed by peace, harmony and unity. The poison of casteism and communalism can never benefit the country. This is the land of Gandhi and Buddha, we have to move forward taking everyone along. This is a part of our country's culture and tradition. We have to successfully carry it forward, and that is why in the name of faith, violence cannot be allowed.

If something happens to a patient in a hospital and the hospital is burnt down; some accident happens and the vehicles are burnt down; people launch a movement and the public property is burnt down; is it for a free India? It is the property of 125 crore Indians. Whose cultural legacy is this? This is our cultural legacy, the legacy of 125 crore people. Whose faith is this? This is our faith, the faith of 125 crore people; and that is why the path of violence in the name of faith can never succeed in this country. The country will never accept this. And that is why I'd like to appeal to all the countrymen that at that time our motto was 'Bharat Chodo' and today's slogan is 'Bharat Jodo'. We have to take everyone and every section of the society along to take the country forward.

In order to build a prosperous India, we need a strong economy, balanced development and next generation infrastructure. Only then, we can realise the India of our dreams.

Brothers and sisters,

We have taken innumerable decisions over the past three years. Some have been noticed, while the rest may not have been noticed. But one thing is

important - when you move towards big changes, you will face hurdles. But look at the working style of this government; when a train crosses a railway station and changes the track, the speed needs to be reduced from 60 to 30. The speed of the train decreases while changing the track. We are trying to put the whole country on a new track without decreasing the speed. We have maintained the speed.

We may have brought a number of new laws and systems such as the GST, but we have successfully accomplished the task and the work goes on.

We have laid emphasis on infrastructure. We have invested lot of funds for building the infrastructure – from modernization of the railway station in a small town, to build an Airport, to expand water-ways or roadways, to form a gas-grid or a water-grid or to lay down an optical fibre network. We are emphasising on all types of modern infrastructure.

My dear countrymen,

The prosperity of Eastern India is required for India's forward movement into the 21st century. It has tremendous potential, rich human resources, immense natural wealth, work force and it has the power to change lives. We are devoting

significant attention to eastern India-Bihar, Assam, West Bengal, Odisha, and the Northeast. These parts have to grow further. These are abundant in natural resources and are striving hard to take the country to new heights.

Brothers and sisters,

Making India corruption-free is an important task and we are trying to provide impetus to it. After forming the government, our first task was to constitute an SIT. Today, after three years, I want to tell the countrymen proudly that we have confiscated black money worth Rs. 1.25 lakh crores, the culprits would be brought to book and forced to surrender.

Demonetization followed this move. We have achieved several milestones through demonetization. The hidden black money has been brought into the formal economy. You must have seen that we used to extend the days from 7 days to 10 days to 15 days; sometimes we allowed the old notes at the petrol pump, at the chemist shops, and sometimes at the railway stations, because our intention was to bring all money into the formal banking system and we achieved success in completing the task. According to the research conducted by outside experts, about Rs.3 lakh crores that had never come into the banking system before, has been brought into the system after the demonetization.

More than Rs. 1.75 lakh crores deposited in the banks is under the scanner. Black money worth Rs. 2 lakh crore had to be deposited in the banks and this system has forced them to be accountable. It has also stopped the flow of black money. The number of new taxpayers filing income tax returns from April 01 to August 05 is 56 lakhs while in

the same period last year only 22 lakh filed the returns.. In a way it has more than doubled. This is the result of our fight against black money.

Over 18 lakh people have been identified, whose income is much higher than what their declared income and therefore they have to clarify this. Around 4.5 lakh people have now come forward and are trying to trade the right path after accepting their mistakes. One lakh people, who had neither heard of Income Tax nor paid Income Tax, have now been forced to do so.

Brothers and sisters,

In our country, we tend to indulge in endless debates and discussions following the shutdown of companies. People start speculating about economic meltdown and what not.

You will be surprised to know that black marketers used to own shell companies. Post demonetization, the reports from data mining astonishingly revealed that there are 3 lakh shell companies dealing in Hawala transactions. Can anyone imagine? Out of these 3 lakh shell companies, registration of 1.75 lakh companies were cancelled.

Even if five companies shut shop in India, there is huge public outcry. And here, we have closed one lakh Seventy five thousand companies. The looters of nation's wealth will have to answer. We have accomplished this task.

You will be surprised to know that there are some shell companies operating from a single address. As many as 400 companies have been found to be operating from one address. There was no one to question them. There was a total collusion.

Therefore, Brothers and sisters, I have waged a big war against corruption and black money. We are fighting corruption - for the bright future of India and the wellbeing of our people.

Brothers and sisters,

We have taken several steps and I am sure that post GST, it will increase further and bring in transparency. Today a truck driver on an average is able to save 30% of his travel time from one point to another after GST was introduced. Hundreds of crores of rupees have been saved due to removal of check posts. This amounts to 30% increase in his efficiency. Can you imagine what it means to accomplish 30% more efficiency in the Indian transportation sector? GST has brought this revolutionary change.

My dear countrymen,

Today due to demonetization, banks have enough liquidity. Banks are reducing their interest rates. Even a common man is able to access inflow of funds through Mudra. He is getting opportunities to stand on his feet. The middle class and the underprivileged who aspire to have their own homes someday, are getting loans from the banks at low interest rates. Such moves are giving a fillip to the economic growth of the country.

My dear countrymen,

Time has changed. We are in the 21st Century. Our country boasts of the world's largest youth population.

India is known in the world for its prowess in IT and Digital World. Should we still remain in the old mind-set? There was a time when leather coins were in vogue, but gradually they ceased to exist. Today we have paper-currency. Slowly this paper-currency will be replaced by the

digital currency. We should lead from the front to make a move towards Digital transactions. We should adopt BHIM App for transactions and make it a part of our economic activities. We should also work through prepaid systems. I am happy that there has been an increase in Digital transactions. It has increased by 34% compared to last year while the prepaid transactions have gone up by 44%. We should move towards a less-cash economy.

My Dear Countrymen, some schemes of the Government are meant for ensuring savings for the common man. If you use LED bulbs, you can save Rs.2000 to Rs. 5000 per year. If we succeed in Swachh Bharat, poor will be able to save Rs. 7000 on medicines that they would otherwise have spent. Curbing inflation has helped people in saving money in a way.

Cheap medicines through Jan Aushadhi Kendras are a boon to the poor. There used to be a lot of expenditure on operations and stents. We are striving to make it possible for knee operations as well. We are striving to minimize this expenditure for the poor and the middle class.

Earlier there used to be Dialysis only at the State capitals. Now we have decided to open Dialysis Centres at district level. We have already opened this facility in 350 to 400 districts where free Dialysis services are available for the poor.

We can take pride in the fact that we have developed various systems to showcase to the world. We have been able to develop the 'NAVIC Navigation System' through GPS. We have helped the neighbouring countries by successfully launching SAARC Satellite.

We asserted our supremacy in the

world by introducing Tejas aircraft. BHIM Aadhaar App for digital transaction has come as a surprise to the world. Crores of RuPay Cards are now available in the country. When all the cards will be operational, it will be the largest number of cards in the world.

My dear countrymen, I shall urge you to take up the New India Pledge and move ahead. It implies that, if we don't accomplish a work within the stipulated time then we shall not be able to get the desired results. So for the 'Team India', for the 125 crore countrymen, we have to take the pledge to achieve the goal by 2022.

We will do it with dedication to see a great, majestic India by 2022.

So we will together build such an India where the poor will have Pucca House with electricity and water.

Together we will build such an India where the farmers can sleep without worry. They will earn double by 2022 of what they are earning today.

Together we will build such an India where the youth, the women will have enough opportunities to fulfil their dreams.

Together we will build such an India which will be free from terrorism, communalism and casteism.

Together we will build such an India where nobody will compromise with

corruption and nepotism.

Together we will build such an India which will be clean and healthy, and where the dream of Su-Raj will be fulfilled.

And that is why my dear fellow countrymen, we will together strive to move ahead in this march towards development.

Let all of us march together with the dream of a building an India of grandeur and majesty as we wait for the 75th year of independence after completing 70 years of Independence in the next five years.

With this thought in mind I once again bow my head before the heroes of our freedom movement. I bow my head before the new confidence and passion of my 125 crore countrymen and I call upon Team India to march on with this new pledge.

With this thought I convey my hearty congratulations to all of you.

Bharat Mata Ki Jai, Vande Matram,
Jai Hind

Jai Hind, Jai Hind, Jai Hind, Jai Hind

Bharat Mata Ki Jai, Bharat Mata Ki
Jai, Bharat Mata Ki Jai,

Vande Matram, Vande Matram,
Vande Matram, Vande Matram,

Thanking you all.

The country will not stop, it will not bow down,
this country will not get tired: Narendra Modi

My dear countrymen, I convey my best wishes to all of you on this auspicious occasion of Independence Day. Today, the country is brimming with self-confidence. The country is scaling new heights by working extremely hard, with a resolve to realize its dreams. Today's dawn has brought a new spirit, a new enthusiasm, a new zeal and a new energy with it.

My dear countrymen, in our country, there is a Neelakurinji flower which blooms once every 12 years. This year, Neelakurinji is in full bloom on the hills of Southern Nilgiri like the Ashok Chakra (the wheel of Ashoka) in the Tricolour on our Independence Day.

My dear countrymen, we are celebrating this festival of independence at a time when our daughters from the states of Uttarakhand, Himachal Pradesh, Manipur, Telangana and Andhra Pradesh, have come back after circumnavigating the seven seas. They have returned after unfurling the Tricolour in the seven seas, colouring their waters with the hues of our

Tricolor.

My dear countrymen, we are celebrating this festival of independence at a time when the Mount Everest has been conquered many times; several brave-hearts and many of our daughters have unfurled the Tricolour atop the Mount Everest. However, during this festival of independence, I will remember our young tribal children from remote forest areas, who have unfurled the Tricolour on the Mount Everest, further enhancing its glory.

My dear countrymen, the sessions of the Lok Sabha and the Rajya Sabha have concluded recently, and you would have seen that the proceedings were conducted in a very orderly manner, and in a way, they were entirely dedicated to the cause of social justice.

Displaying utmost sensitivity and alertness, our Parliament has made the social justice framework stronger to protect the interests of the weaker sections of society – be it a Dalit, a deprived or

exploited person or women.

The demand to confer constitutional status on the OBC Commission had existed for years. This time, our Parliament has accorded Constitutional status to this Commission, and in doing so, has made an efforts to protect the interests of the Backward and the Most Backward classes.

Today, we are celebrating the festival of independence at a time when news reports have brought in a new consciousness in the country. Today, every Indian, living in any nook and corner of the world, takes pride in the fact that India has become the sixth largest economy of the world. We are celebrating this Independence Day in a positive atmosphere amidst such positive chain of events.

Under the leadership of respected Bapu, lakhs of people sacrificed their lives and spent their youth in prisons to win freedom for our country. Many great revolutionaries embraced the gallows bravely. Today on behalf of my countrymen, I pay homage to those brave freedom fighters and salute them from the bottom of my heart. Our soldiers and Paramilitary forces lay down their lives to uphold the dignity of the tricolour that

inspires us to hold our heads high through life and death. Our Police forces serve the country day and night to provide safety and security to the people.

From the ramparts of the Red Fort with the Tricolour as witness, I salute all the soldiers of the army, the para-military forces and the police for their dedicated service, valour and hard work. My best wishes are always with them.

These days, we are receiving the news of good rainfall as well as floods from different parts of the country. I want to reassure the people who have lost their loved ones and are in distress, that the country is with them in their hour of crisis to help them overcome this difficult situation. I share the grief of those who have lost their near and dear ones in this natural calamity.

My dear countrymen,

The next year will mark 100 years of the Jallianwallah Bagh massacre. Our masses had sacrificed their lives for the country's freedom at a time when atrocities had crossed all limits. The Jallianwallah Bagh incident reminds us of the sacrifices made by the brave hearts and is an inspiration to us. I salute all the brave

people from the depths of my heart.

My dear countrymen,

Our freedom has come at a price. Under the leadership of Bapu and the revolutionaries, many heroes, many satyagrahis, brave men and women and youth participated in the freedom struggle of the country. While striving for the country's freedom, they suffered imprisonment and spent the prime of their youth in jails, yet they nurtured the dreams of a glorious India even through all the suffering.

Many years ago, the national poet

from Tamil Nadu, Subramaniam Bharti translated his vision of the country into words

“????????????????????
??????? ?????? ?????????????
?????????”.

–(“Ellarum amarnillai aedumnaan
muraiai India ulagirakku
allikkum”).

What was the dream that he envisioned after Independence? Subramania Bharti said that India will show the way for the entire world to break

free from every form of bondage.

My dear countrymen,

After Independence, in order to realize the dreams of such great personalities, to meet the aspirations of freedom fighters and to fulfill the hopes and expectations of the citizens of the country, India drafted an inclusive Constitution under the leadership of respected Baba Saheb Ambedkar ji. This inclusive Constitution is the harbinger of a resolve to build a New India. It has brought with it some responsibilities for us and has also set a few boundaries on us.

Our Constitution has been guiding us in realizing our dreams by stating that every section of the society and every geographical part of India must get an equal opportunity in the quest to forge ahead.

Dear brothers
and sisters,

The Constitution also guides us to draw inspiration from our Tricolor. It indicates that we should ensure justice for the poor, equal opportunity for all to move ahead, our lower middle class, middle class and higher middle class should not face any obstacle in their growth, the Government should not come in the way, social systems should not curb their dreams. We should create an enabling environment that provides them maximum opportunities to grow and blossom, and they should be allowed to flourish without limitation.

Be it our elderly, differently-abled, our women, marginalized or deprived

people, or our Adivasi brethren living in the forests, everyone must get an opportunity to grow, as per their hopes and aspirations. We aspire for an India that is strong and self-reliant, a nation that maintains a steady pace of progress, an India that keeps scaling new heights; an India that enjoys goodwill in the world. Not only this, we want that India should also shine in the world – we want to build such an India.

My dear countrymen, I have shared my vision for TEAM INDIA earlier too. When 125 crore countrymen become partners, then each and every citizen joins us in the progress of the country. When 125 crore dreams, 125 crore resolves, 125 crore efforts, move in the right direction to attain desired goals then nothing is unattainable.

Dear brothers and sisters, with utmost humility and respect, I would like to share that in 2014, 125 crore citizens did not rest after voting for the Government. The citizens did not stop at government formation, but worked to build the nation. They have come together, were together and will continue to be together. I feel that this synergy of 125 crore active citizens from more than 6 lakhs villages is the real strength of our nation. Today, we celebrate the birth anniversary of Shri Aurobindo.

He said something very pertinent – What is Nation? What is our Motherland? It is not a mere piece of land, not just an identity, nor is it a figment of imagination. The Nation is a repository of a great force manifested through many organized units to give it a concrete shape. It is this thought of Sri Aurobindo which is uniting the country and taking it ahead. That we

are actually moving ahead is difficult to comprehend unless we know from where we started. If we don't look at from where we began our journey, it will not be possible to assess how far we have come. Precisely for this reason, if we consider 2013 as the base year and take into consideration the work that has been done in the last four years, you will be surprised to see the speed at which the country is moving and the pace at which the progress is being made. Take the case of toilets. If we had continued with the same speed of constructing toilets as in 2013, then to achieve 100% target would have taken decades.

If we talk about providing electricity to villages on the basis of work done in 2013, it would have taken a couple of more decades to accomplish this work. If we talk about providing smoke free LPG gas connection to the poor and to the poor mothers, at the rate in which it was done in 2013, it could not have been completed even in a 100 years. If we had maintained the speed of 2013 in laying optical fibre network in villages, then we would not have been able to accomplish the task for generations together. We will strive to maintain the same pace of development.

Brothers and sisters, the country has

huge expectations, the country has a lot of requirements and to fulfill those, it is imperative for the central government and the state governments to work together steadily and continuously. Today, we can see a sea change in the country although the country is same, the soil is same, the wind is same, the sky is same, the sea is same, the government offices are same, the files are same and the decision making process remains the same. However, the country has been experiencing change for the last four years. A new spirit, new energy, new resolve, new determination and new inspiration is taking the country forward. This is why the country has doubled the pace of construction of the highways. The construction of new houses has gone up four times in the villages. The food production in the country today has reached an all-time high; there has been a record production of mobile phones; the

sale of tractors has touched a new high. On the one hand, a record number of tractors are being bought by our farmers today, at the same time, the country has witnessed a record number of aeroplane purchases since independence. Toilets are being built in schools; new IIMs, new IITs and new AIIMS are being established.

Giving momentum to Skill Development Missions, the country is setting up new centers in small towns. At the same time, our tier-2 and tier-3 cities are being flooded with start-up enterprises, bringing regeneration.

Brothers and Sisters, Digital India is now making inroads into our villages. As a government sensitive to the needs of people, efforts are being made to turn Digital India into a reality. At the same time, work is also progressing with the same dedication to compile dictionary and common signs for my differently-abled brothers and sisters. While on the one hand, our farmers are working on modern agricultural techniques like micro irrigation, drip irrigation and sprinklers, on the other hand, 99 big closed irrigation projects have also been revived. Our soldiers reach out to provide relief and rescue operations during natural

calamities. While our soldiers display exemplary courage in reaching out to rescue the people in difficulties, they have also shown a steely resolve to carry out surgical strikes and vanquish our enemies.

Take a glance at the vast canvass of the development in our country- from one end to the other, one can witness the progress of the country that is moving ahead with new energy and enthusiasm. I hail from Gujarat. There is a saying in Gujarati 'Nishan Chuk Maaf Lekin Nahi Maaf Nichu Nishan' which means one should have big aims and dreams. However, for that, one has to strive hard and be answerable. But if the aims are not big, targets are not far-sighted, decisions are also not taken. Development comes to a halt. That is why my dear brothers and sisters, it is necessary for us to move ahead with big aims and resolve. When targets are vague, when the spirit is not strong, then important decisions in our social life also get held up for years. Take for instance the case of MSP - economists, farmer organizations, farmers as well as

politi

cal parties had been demanding, that farmers should get an MSP which is one and a half times of their investment. The matter was debated for years, files moved to and fro, and but was stuck. Finally, we took the decision. We took a bold decision of giving the farmers the MSP which is one and half times their investment.

There was unanimity on GST. Everyone wanted GST but they could not arrive at a decision because while on the subject, they were thinking in terms of their vested interests and whether this will translate into electoral gains. Today, with the help of small traders, their open mindedness and their attitude of accepting the new, the country has implemented GST. A new found confidence has been generated in the business community. The small entrepreneurs, small businessmen who faced teething difficulties in adopting GST, accepted the challenge and the country is now moving ahead.

Today, we have enacted laws on Insolvency and Bankruptcy to strengthen

the banking sector. Who opposed them earlier? Taking decisions requires conviction, force, confidence and complete dedication to the good of the common man. Why was the Benami property law not enforced earlier? The Benami property laws are implemented only when there is courage and a determination to do something for the country. The Jawans of our defence forces were demanding one-rank one-pension for several decades. They were not resorting to agitation because they are disciplined, but nobody was paying heed to their voices. Somebody needed to take a decision in this regard. You gave us the responsibility of taking this decision and we fulfilled it positively.

My dear brothers and sisters,

We are not the kind of people who work in the interest of the party. We are capable of taking tough decisions because national interest is topmost in our priority.

My dear brothers and sisters,

In this era of global economy, the entire world is looking at every development in India - big or small, with deep interest and hope and expectations. You may recall the comments made about India prior to 2014, by eminent international institutions, top economists

of the world, and by those considered authorities on the subject. There was a time when the Indian economy was considered risky by experts. But now the same experts and the institutions have expressed confidence that our reform momentum has strengthened our economic fundamentals. How have things changed? There was a time when the world used to comment about red tape in India but now they talk about Red Carpet. We have reached the 100th spot in Ease of Doing Business ranking. Today, the entire world is looking at this achievement with pride. There was a time when the world perceived India as a country with 'policy paralysis' and 'delayed reforms'. Old newspaper clippings confirm this view. However, today the world opinion about India has changed and they talk about our focus on reform, perform and transform. This follows from a series of time bound policy decisions. There was a time when the world counted India among the 'fragile five'. They were concerned that India was pulling down the world economy but now their tone has changed as India has become a multi-trillion dollar investment destination.

My dear brothers and sisters,

While engaging with India, the

investors used to bemoan the lack of infrastructure, the blackouts due to power shortage and the bottlenecks. The same set of experts who had earlier dubbed India as a 'sleeping elephant' are now saying that 'sleeping elephant' has woken up and started running. Economists and international institutions are saying that India will provide momentum to the world economy for the next three decades and will spur the growth of the world.

Today, India's stature at International fora has risen greatly. India's voice is being heard in every organization of which she is a member. India is playing a crucial role in shaping up the discourse and providing leadership to these organizations. We are raising our voice at international fora.

My dear countrymen, for years, we waited seeking membership to some international organizations, but today, our country has become a member of innumerable organizations. Today, India offers a ray of hope for those who are concerned with environmental issues and global warming. Today India has become the flag bearer of International Solar Alliance in the world. Today, every

country of the world is keen to welcome any Indian stepping on its soil. A new consciousness is visible in their eyes, when they look at an Indian. The strength of the Indian passport has multiplied manifold. This has instilled a new self-confidence, fresh energy and a resolve in every Indian to move ahead with new hope.

My dear countrymen, if an Indian is in trouble or distress in any part of the world, he can rest assured that his country is with him at every step. Several recent incidents bear testimony to this fact.

My dear countrymen, just as the perspective of the world towards India has transformed, similarly, there was a time when the news from India's North-Eastern part used to be dominated with content that one wished were not there. However, today my dear brothers and sisters, North-East is coming up with positive and inspiring stories. North-East today is shining in the field of sports.

My dear brothers and sisters, today we are receiving news from North-East that the last village has been electrified and the entire village danced the whole night. We are hearing more such news from the

North East about highways, railways, airways, waterways and information ways (i-ways) coming to the region. The work of installing electric transmission lines across the North-East is progressing at a rapid pace. Today youth from the North-East are establishing BPOs in the region.

Today, new educational institutions are being set up and the North-East India is becoming the new hub for organic farming. North-East is going to host the Sports University.

Brothers and sisters, there was a time when the North-East used to feel that Delhi is very distant. Within four years, we have brought Delhi to the doorsteps of North-East.

Brothers and sisters, today, about 65% of the population in the country is

youngsters of the country are taking the nation to greater heights by exploring and engaging in new fields such as Start-ups, BPOs, E-commerce, mobility etc.

My dear countrymen, 13 crore Mudra Loans has been a major achievement. More so, if it includes 4 crore youth who have taken the loan for the first time with the aspiration to become self-reliant and are promoting self-employment. This in itself is a great example of the changing ecosystem. In an endeavor to realize the dream of Digital

below 35 years of age. We are proud of our country's youth. Our country's youngsters have completely transformed the meaning of all standards of the economy. They have infused new colours to the country's standard of progress. There was a time when only big cities used to hog all the limelight. Today, our country is talking about Tier 2 and Tier 3 cities and paying attention to the youngsters engaged in modern agriculture in the rural areas. The youth of our country has completely transformed the nature of jobs. Today the

India, several Common Service Centres are being managed by young girls and boys in more than 3 lakhs villages today. These centres are rendering “on-the-click global connect” / “anytime-anywhere connectivity” services to every citizen in the villages with the optimal utilization of Information Technology.

Talking about infrastructure, whether it be speed of rails, roads, I-ways, highways or a new airport, our nation is witnessing fast paced development.

Brothers and Sisters, scientists of our nation have also left no stone unturned in bringing immense glory to our country. In the global context, as well as fulfilling the requirements of the country, it is a matter of great pride that our scientists launched more than 100 satellites in one go leaving the world astonished. That's the capability of Indian scientists which has made the world stand up and applaud. Successful launch of Mangalyaan in the very first attempt itself stands as testimony to the expertise and endeavors of our scientists. This feat of successful in orbit launch of Mangalyaan speaks volumes about the capabilities of our scientists. In days to come, thanks to the futuristic vision, innovativeness and creativity of our scientists we are confident of launching NavIC, the first indigenous Indian Regional Navigation Satellite System (IRNSS). This navigation system will guide fishermen and other citizens through Satellite signals.

My dear countrymen, today from the ramparts of the Red Fort, I am delighted to share a good news. Our country is undoubtedly progressing fast in its space missions. However, we have a dream; our scientists have a dream. We

have resolved that by 2022, when India celebrates 75 years of Independence or maybe even before that, certainly some of our young boys and girls will unfurl the Tricolour in space. With Mangalyaan our scientists have proved their capabilities. I feel proud to announce that very soon as a part of our Manned-Space mission, we shall be sending an Indian into space. This will be done through the pursuit of our esteemed scientists, and we will proudly find ourselves as the fourth such nation to have launched a successful Man Space Mission.

Dear brothers and sisters, I would like to congratulate our scientists and technicians for such a great accomplishment. Today our warehouses are filled with food grains. I sincerely acknowledge the role of our agricultural scientists, cultivators and farmers in successfully steering the green revolution across decades.

But my brothers and sisters, times have changed now. Our farmers and the agricultural markets have to face global challenges and competition. As the population increases, land falls short. Hence, the changing times demand that our agricultural methods should also be

modern and more scientific; we have to take the process forward with technology. Precisely for this reason we are focusing on change and bringing in modern methods in the agricultural sector.

We have a vision to double the farmers' income by the 75th year of Independence. Some people have doubts,

which is quite natural, but we are determined. Hum makkhan par lakeer nahi, patthar par lakeer kheenchne waale hain (We don't promise things lightly, we mean to keep our word). To keep our promises, we have to work hard, we have to plan and we have to put our heart and soul into fulfilling it. So in order to realize this promise by 75th year of Independence, we want to move along with the farmers in that direction by bringing modernity and diversity in agricultural sector. We want to bring value addition right from seeds to marketing. We want to modernize. Some new crops are giving record yields. For the first time we are moving towards agriculture export policy so that our farmers can also face global competition with confidence. Today we can see a new agricultural revolution. Organic farming, Blue revolution, sweet revolution and solar farming have opened up new vistas.

It is a matter of great satisfaction that today our country is the second highest fish producer in the world and is on the verge of reaching the top position soon. The export of honey has doubled. The sugarcane farmers are happy that ethanol production has tripled. It means, in rural economy other businesses allied to agriculture are also as important as agriculture. We are developing village resources by spending crores of rupees through women self help groups.

Khadi is associated with the name of respected Bapu. I want to humbly submit that the sale of khadi products since independence has doubled. This has generated employment for the poor.

My brothers and sisters, the farmers of my country are emphasizing on solar farming now. Apart from farming, they can earn money by selling power

generated through solar farming. The people who spin charkha, the people who are associated with handloom are also earning their livelihood.

My dear brothers and sisters, economic development in our country is important, but more than anything else, human dignity is supreme. Without human dignity, no country can move forward in a balanced way. So to protect human dignity, we have to move ahead with those schemes which will ensure respectable lives for people. The policies, traditions and intentions should be such that ordinary people, including the poorest of the poor can get a chance to live with equal dignity.

So we have provided gas connection to the poor through Ujjawala Yojana. We have provided electricity to the poor through Saubhagya Yojana. We are emphasizing on moving ahead with the concept of 'Shrameva Jayate'.

Only yesterday, we heard the President's address to the nation. He described in great detail the Gram Swaraj Abhiyan. Whenever, there is talk about Government, it is said that policies are framed but there is no last mile delivery. The President described well how this campaign that was launched in Delhi has now spread to 65000 villages in aspirational districts, to the huts of the poor; how it is working in the backward villages.

My dear countrymen, when I talked about cleanliness from the Ramparts of Red Fort in 2014, some people made fun. Some of them even said the Government had many things to do, why is it wasting its energy on an issue like cleanliness. But my dear brothers and sisters, in a recent report the WHO has said that because of the

cleanliness campaign three lakh children were saved. The credit for saving lives of three lakh children goes to every Indian who was a part of this campaign. Saving the lives of three lakh children of the poor is surely a great humanitarian act and the world bodies are recognizing it.

Brothers and Sisters, Mahatma Gandhi's 150th Birth Anniversary falls next year. Bapu during his lifetime attached greater importance to cleanliness than even to freedom. He used to say we got our freedom because of Satyagrahis and Swachhata (cleanliness) will come from Swachhagrahis. Gandhiji trained Satyagrahis and this inspired us to prepare Swachhagrahis. In the coming days, when we will be celebrating his 150th Birth Anniversary, crores of Swachhagrahis will offer Karyanjali (offerings of work) in the memory of Bapu. In a way, they will fulfil his dreams which we are realizing now.

My Brothers and Sisters, it is true that because of cleanliness, lives of three lakh children have been saved. But no matter how happy a middle class family is and how well-to-do it is or how poor it is, once a family member falls sick, the whole family suffers. On occasions generations are afflicted with illnesses.

The Government of India has decided to launch Pradhanmantri Jan Arogya Abhiyan so that the poor man, the common man gets free treatment for serious diseases and he can be admitted to big hospitals free of cost. The Pradhanmantri Jan Arogya Abhiyan and Ayushman Bharat Yojana will cover 10 crore families of the country. In the coming days, the people from lower middle class, middle class and upper middle class income groups can also access health care

services from these two programs. There is a provision of giving five lakh rupees per annum health assurance for each family. It means about fifty crore citizens belonging to ten crore families will benefit. We are going to give this benefit to our countrymen. This is a technology driven system which is transparent. As such, an ordinary citizen will not face any difficulty as technology technological tools have been built for this purpose.

Over the next four, five, six weeks from today, this technology will be tested across the country to make it fool proof. On the 25th of September, the birth anniversary of Pandit Deen Dayal Upadhyaya, the Pradhanmantri Jan Arogya Abhiyan will be launched throughout the country. No poor person of the country will have to face difficulty in dealing with diseases. Nor he would have to borrow money from a moneylender paying interest. His family will not be destroyed. And it will also open new avenues of employment for the youth, for the middle class families in the health sector. New hospitals will be built in the tier-2 and tier-3 cities. They will require medical staff in large numbers. A lot of employment opportunities will also be generated.

Brothers and sisters, no poor person wants to lead a life of penury. No poor person wants to die poor. No poor person wants to pass on his poverty as a legacy to his children. Throughout his life, he struggles to come out of poverty. There is only one way to end this problem- through the empowerment of poor people.

In the last four years, we have laid emphasis on empowerment of poor people. It has been our endeavour to empower the poor people. An

international organization has released a very good report in the recent past. According to the report, five crore poor people in India have crossed the Poverty Line in the last two years.

Brothers and sisters, when we carry out the work for the empowerment of poor people; and when I talked about Ayushman Bharat Program, then very few people realized the massive size of the scheme, – 10 crore families or a population of 50 crore people, very few people were able to grasp what it means. If I combine the population of America (USA), Canada and Mexico, then the number of beneficiaries of Ayushman Bharat Program will be nearly the same. If I take into account the population of entire Europe, then nearly the same number of people are going to get the benefits of this Ayushman Bharat scheme in India.

Brothers and sisters, we have formulated several schemes for empowerment of the poor. Although many schemes have been formulated in the past, middlemen, the people who take cuts, used to take away the cream of the scheme. The poor people didn't get what rightfully belonged to them. Money was being paid from the exchequer, the schemes existed on paper, and the country continued to be robbed. The Government cannot keep its eyes shut. And, at least I can never keep my eyes shut to this kind of thing.

Brothers and sisters, therefore it is extremely essential to create confidence in the minds of the common man by eliminating the deformities in our system. And whether it is the state governments or the centre or whether these are the local bodies of self-rule, we all have to work together. And we will have to take it

forward. You will be surprised to know that since the time we have been engaged in this campaign for cleansing the system, and plugging leakages; there were six crore bogus beneficiaries who had never been born, who never existed on the earth but the money was being sent in their names - somebody was the beneficiary of Ujjwala Scheme, some beneficiary of the gas connection scheme with a duplicate gas connection; somebody was taking benefits through bogus ration cards; somebody was the beneficiary of scholarship scheme; someone else was the beneficiary of pension scheme. How difficult it would have been to remove these six crore names! How many people would have faced problems because of this ! The person who was never born, the person who doesn't exist anywhere on the earth, but the money was pilfered on his name by using bogus names.

This government has put an end to it. We have taken steps in the direction of curbing corruption and putting an end to the entire system of black money.

Brothers and sisters, what are the consequences of it? Rs.90,000 crores is not a small amount. Almost Rs.90,000 crores, which used to go into the hands of wrong people for wrong activities, is now in the nation's treasury, now being used for the welfare of common man.

Brothers and sisters, why does it happen? Our country works for the pride and honour of the poor people, but what do these middlemen do? You must be aware of the fact that wheat is sold at Rs. 24-25 (per kilo) in the market, but the government provides it to the poor at only Rs.2 on ration card after buying it at Rs.24-25. Similarly, rice which is sold at Rs.30-32 in the market is purchased by the

Government at this rate and provided to the poor at Rs.3 on ration cards. This means if anyone steals 1 kg of wheat on a bogus ration card, he automatically gains Rs.20-25. If gets rice in this manner, he will get Rs 30-35. That's why this entire business of bogus names and IDs had been going on. When a poor person used to approach the shop with his ration card and request grain, the shopkeeper would say that the stock was over. That grain then used to be diverted to another shop and the poor had to purchase the grain of Rs.2 from the other shop at Rs.20-25. The right of the poor used to be snatched away. Therefore, this bogus system has now been uprooted.

Brothers and sisters, crores of poor people in our country get food at Rs.2 and Rs.3. The government is spending generously for the same but the credit does not go to the government. Today I want to specifically tell the honest taxpayers that when you have your food with your family, for a moment kindly ponder over what I am about to say. I want to touch the hearts of the honest taxpayers. I want to salute them. I want to reassure the honest taxpayers that all the schemes that are in operation are run by your money. The honest tax payers gain good fortune because the poor get to eat from the taxpayers' money. Therefore, it is the result of your honest paying of taxes when you have your meal with your family, 3 poor families are also able to have their meals at the same time.

Friends, an atmosphere of non-payment of taxes was being created. However, when a person, even if he is in an AC room, comes to know that 3 poor families are being served with his tax money, it is highly satisfying for his soul. This is the most virtuous task for a person. Brothers and sisters, today, the country is

moving ahead celebrating the festival of honesty. Till 2013, i.e. for the last 70 years, there were 4 crore people who were paying direct taxes. However brothers and sisters, today this figure has increased to almost 6.75 crore. Look how far we have come from 3, 3.5 or 3.75 crore to 6.75 crore. Are not these glaring figures a true reflection of honesty? This is an example that nation is treading the path of honesty. In the past 70 years, 70 lakh enterprises were included in the Indirect tax net. However, in the last one year alone, after the introduction of GST, the figure has catapulted to one crore and 16 lakh. Brothers and sisters, today everyone in the country is participating in celebrating the festival of honesty. I salute all those who are embracing transparency and honesty. I wish to reassure those who want to step forward. You are making a contribution in the nation's progress. Your problems are our concerns. We stand with you, for we have to take the nation forward through everyone's contribution. Therefore, we will not tolerate black money and corruption. Come what may, we shall not retract from the path of honesty, as we all have seen how they have corroded and ruined the nation. Thus, you would have seen that power-brokers are not to be seen in the power corridors of Delhi.

Dear countrymen, times have changed. Some people sitting in their drawing rooms used to claim that they will change the policies of the government, or influence in them in a negative way have been silenced. Our doors are closed to them.

Dear countrymen, we have rooted out nepotism and affiliations. We have strongly condemned favoritism and bias. Strong action is being taken against corrupt officers. More than three lakh

dubious companies have been closed down, and restrictions have been imposed on their directors. Today, we have introduced IT interventions for online transactions to ensure transparency. There was a time when seeking an environmental clearance meant facing rampant corruption. We have made the process transparent and online. Any person can access it. We can work in a way that the nation's resources are utilized judiciously. It is also a matter of immense pride for women of the country that today we have three women judges in the Supreme Court providing justice to the nation. This is the first time after independence that the Union Cabinet has the maximum representation of women ministers.

Dear Countrymen, today I wish to share some wonderful news with my brave daughters. On this occasion, I declare with pride the grant of Permanent Commission for the appointment of women officers in Short Service Commission of Indian Armed Forces. The process will be transparent and similar to the selection process of male officers. This is a gift from my side from the ramparts of the Red Fort, to the daughters who are in uniformed services and have dedicated their lives to the nation. The nation salutes the patriotic fervor and national commitment displayed by young girls who are our national pride. Women are equally contributing in building a strong India. The nation is experiencing the pride, contribution and potential of our mothers and sisters.

From agricultural fields to the sports arena, our women are holding the Indian Tricolor high. From Sarpanch to the Parliament, our women are contributing to the development of the country. From schools to armed forces everywhere the

women of our country are marching ahead. But while our women are valiantly moving ahead in such large numbers, we also come across gruesome ugliness. We sometimes see demonic forces posing challenges to women's power. Rape is painful, and we, the countrymen, the people should feel many times more pain than the pain borne by the victim. Brothers and sisters, we have to free this society from this demonic mentality. The law is taking its own course. Recently, rapists in a case from Katni in Madhya Pradesh were sentenced to death after just five days of trial. Similarly, in Rajasthan, rapists were sentenced to death after a few days of trial. More such news gets published, the more such people with demonic mentality will get scared. We have to publicize such news. People should know that rapists are being sent to the gallows. There is a need to beat this mentality; there is a need to curb this thinking, and there is a need to stop this aberration. Brothers and sisters, this mentality breeds unpardonable crimes. Rule of law is supreme for us and there cannot be any compromise on that. Nobody can be allowed to take law into their own hands. In the family, in schools, colleges, our children of the new generation, our small innocent children should be nurtured in such an environment that they learn appropriate values. They should learn to respect women. They should know that this is the right way to live. We have to instill this feeling and values in our families.

Brothers and sisters, I want to reassure my Muslim sisters. Triple Talaq has spoiled the lives of Muslim daughters of our country. Those who have not faced the Talaq are spending their lives under pressure. We wanted to bring a legislation in this session of Parliament itself to free

Muslim women from this evil system. But there are some people who are obstructing the passage of this Bill. But I want to assure my Muslim mothers, sisters and daughters that I will not stop till they get justice. I will fulfill your aspirations.

My beloved countrymen, our army, paramilitary forces, police, intelligence agencies are the source of strength for our country's internal security. They have created a sense of security in us. They have ensured a peaceful environment. A new confidence has been generated because of their sacrifices, dedication and hard work.

Brothers and Sisters, we used to hear about incidents of violence every now and then from the North East, there were reports of insurgency. We used to hear about the incidents of bomb blasts and firing. But today the two states of Meghalaya and Tripura have seen withdrawal of the Armed Forces Special Power Act (AFSPA) which was in force for three or four decades. This was possible because of efforts of our security forces, because of actions taken by the state Governments, because of development projects executed by the Centre and the state Governments and the efforts to connect people there with the national mainstream. Tripura and Meghalaya are now out of the purview of the Armed Forces Special Power Act. Several districts of Arunachal Pradesh have also been brought out of the purview of the Armed Forces Special Power Act. Now, it is in force only in a few districts.

Left Wing Extremism, Maoism have been bleeding the country. Violent incidents, people fleeing from homes and hiding in forests were a matter of daily occurrence. However, today because of continuous efforts by our security forces,

launching of development projects and efforts to connect the people with national mainstream, left-wing extremism which affected 126 districts has now been reduced to 90 districts. The work on finding a solution to put an end to left wing extremism from those districts is progressing rapidly.

Brothers and Sisters, regarding Jammu & Kashmir, the path shown by Atal Bihari Vajpayeeji is the right one. We want to move ahead on that road. Vajpayeeji said Insaniyat, Jamhuriyat, Kashmiriyat (humanism, democracy, Kashmiriyat)—with these three basic elements we want to develop Jammu & Kashmir. Whether it is Ladakh or Jammu or Srinagar valley. We want balanced development where an ordinary person's aspirations are fulfilled, infrastructure is strengthened; we want to move ahead with brotherhood in our hearts. We do not want to move on the road of bullets and abuses, we want to move ahead with love and affection with the Kashmiri people who have stood with us in patriotic fervor.

Brothers and Sisters, irrigation schemes are progressing. The work of building IIT, IIM and AIIMS is speedily going on. The work of reclamation of Dal Lake is also going on. The biggest thing is that during the past one year village headmen from Jammu and Kashmir in large numbers have been meeting me with the request to hold Panchayat elections there. The elections could not be held for some reason or the other. I am happy that the villagers of Jammu and Kashmir will have this opportunity in the coming months. A system in which villagers will be able to look after their villages will be in place soon. Now, the Government of India gives huge funds which go directly to the villages and this will help the village

headmen to take their villages on the path of development. That is why we are moving forward in the direction of holding Panchayat elections and election to City Councils.

Brothers and Sisters, we have to take the country to new heights. Our motto is "Sab Ka Saath Sab Ka Vikaas". There is no discrimination based on yours or mine and no nepotism. And that is why we are going ahead with this aim and today standing under this tricolour, once again I want to reiterate the resolve for which we are ready to sacrifice ourselves.

Let every Indian have a house of his own - Housing for All. Every house should have electricity connection, power for all. Every Indian should be free from smoke in kitchen and that is why there is the scheme for Cooking Gas for All. Every Indian should have enough water to meet his needs and that is why there is the scheme for Water for All. Every Indian should have toilets and therefore Sanitation for All. Every Indian should be skilled, so Skill for All. Every Indian should get good and affordable health services, so Health for All. Every Indian should feel safe, every Indian should be insured, hence 'Insurance for All'. Every Indian should get internet services so, Connectivity for All; we want to take the country forward by following this mantra.

My dear brothers and sisters, people tell many things about me too and whatever may be said, I would like to publicly admit certain things today. I am impatient as several countries have gone ahead of us, I am restless and impatient to take my country ahead of all these countries.

My dear countrymen, I am worked up and I am restless because malnutrition

has been a major hurdle in the development of the children of our country. It remains a huge bottleneck. I am restless to rid my country of malnutrition.

My countrymen, I am agitated so that a poor person can get an appropriate health cover. I am restless so that an ordinary citizen of my country can combat diseases and remain healthy.

Brothers and sisters, I am restless, I am restless to ensure that our citizens can have a quality life, so that they can have the opportunity to live with ease and so that there may be an all-round improvement.

My dear countrymen, I am restless, I am agitated and I am also impatient for my country to lead the fourth industrial revolution, the revolution that is based on knowledge, the revolution which will be led by those who have IT skills. I am impatient for my country to lead it.

My dear countrymen, I am restless because I want that my country should take maximum advantage of its capabilities and resources and we can move forward in the world with a sense of pride.

My dear countrymen, we want to move ahead. We cannot accept stagnation, we cannot be standstill and it is not in our nature to bend before anybody. This country will neither come to a standstill, neither will it bend and nor will it get tired. We have to achieve greater heights, we have to keep moving ahead.

Brothers and sisters, we are the inheritors of the rich heritage of our ancient legacy of Vedas. And that legacy is due to our self-confidence, and we want to carry forward the legacy.

My dear countrymen, we don't want to only dream about the future, but aspire

to scale new heights in the future. We want to move forward with the dream of being at the top. And that is why my dear countrymen, I want to instill a new hope, a new zeal and a new belief (in you) because the country can achieve its dreams with it. And that is why my dear countrymen...

 My dear brothers and sisters,

Once again on the sacred occasion of independence, I offer my best wishes. Come, let's say aloud the Mantra of 'Jai Hind'!

Jai Hind! Jai Hind! Jai Hind!

Bharat Mata ki Jai!

Bharat Mata ki Jai!

Bharat Mata ki Jai!

Vande Mataram! Vande Mataram!
 Vande Mataram!

I say this with pride that today every Indian
can say 'one nation, one constitution'

My dear countrymen,

On this solemn day of Independence,
many greetings to all countrymen.

Today is also the festival of Raksha Bandhan. This centuries-old tradition expresses the love of brother and sister. I extend my best wishes to all the countrymen and all the brothers and sisters on this auspicious festival of Raksha Bandhan. May this festival filled with affection fulfil the hopes, aspirations and dreams of all our brothers and sisters, and bring affection in their lives.

Today, while the country is celebrating the festival of independence, people in several parts of the country are facing difficulties due to floods and heavy rainfall. Many have lost their dear ones. I express my condolences to them. The State Governments, the Central Government and other organizations like NDRF are striving day and night to ease the

hardships and bring the situation under control.

Today, when we are celebrating this auspicious day of Independence, I pay my respects to all those who gave up their lives, who spent their youth in prisons, who embraced the gallows, who instilled the spirit of non-violence through Satyagraha for the freedom of the country. The country gained independence under the leadership of Bapu. Similarly, in the years since independence numerous people have contributed for the peace, prosperity and security of the country. Today, I also salute the people who have contributed to fulfil the hopes and aspirations of the people, for the development, peace and prosperity of Independent India.

After the formation of the new government, I am humbled once again with the opportunity to interact with you.

It has not even been 10 weeks since the formation of this new Government. But even in a short ten-week period, efforts have been made in all fields and in every direction, new dimensions have been added. People have entrusted us to serve them so that they can achieve their hopes, expectations and aspirations. We are dedicated to your service with complete devotion, without wasting even a single moment.

To revoke Article 370 and 35A within 10 weeks is a significant step towards fulfilling the dream of Sardar Vallabh Bhai Patel.

In just ten weeks, we made big ticket decisions like bringing about a law against Triple Talaq to protect the rights of our Muslim women, making major

amendments in laws to counter terrorism and to make it more stringent and powerful; transfer of approximately 90,000 crores of rupees to the bank accounts of farmers who are beneficiaries of PM Kisan Samman Nidhi Yojana.

Our brothers and sisters from the farming community, our small entrepreneurs could never believe that they will ever be able to avail of pension schemes and live a dignified life even after they attain 60 Years, when they are physically weak and need some support. We have implemented a Pension Scheme to meet these needs.

Water crisis is a big concern these days. It is being predicted that an impending water crisis is staring us in the face. Anticipating such a situation, we

have announced the formation of a new dedicated Ministry of Jal Shakti where the Centre and States will together develop schemes and policies to address issues of water crisis.

Our country needs doctors in huge numbers along with robust health facilities. To fulfil this requirement we need new laws, upgraded infrastructure, new thinking and create new

stringent law to protect child rights was needed and has been enacted.

Brothers and sisters, you gave me an opportunity to serve you all for five years from 2014-2019. We took cognizance of the struggles faced by the common man to avail the basic facilities. Over the past five years, our government has been striving to provide the facilities to meet the daily needs of the common man. Special efforts

opportunities to motivate the youth to take up the medical profession. In view of this, we have formulated laws and taken important steps to bring transparency in Medical Education.

Now a days we come across incidents of child rights violation all over the world and India will not leave her children vulnerable. A much warranted

have been made to facilitate those living in villages, and those who are poor, marginalized, victimized, exploited, deprived and tribals. We are working relentlessly in this direction to bring the nation back on track towards development. But times change. While 2014-2019 was a period of fulfilling your basic needs, the years from 2019 and

beyond will see your aspirations and dreams getting fulfilled.

What should 21st Century India look like? How fast should it move? How extensively, should it work, what heights should it strive for- we are taking steps one after the other by preparing a roadmap for the next five years, keeping all these things in mind. In 2014, It was a new beginning for me. Prior to the election in 2013-2014, I travelled across the country and tried to understand the feelings of our

countrymen. But everyone had disappointment written on their face, everyone had apprehensions. People used to wonder if the country could change at all. Can the country change with the change of Government? A sense of hopelessness had percolated into the minds of the common man. This was the result of their experience over a long period- hopes did not last long, they sank into the depths of despair very fast. But when in 2019, after five years of hard work, with only dedication to the common

people, only my country in my heart, only my millions of countrymen in my heart - with this feeling we kept on moving, dedicated every moment for that. When we ran for the office again in 2019, I was surprised. The Mood of the country changed. Despair had changed into hope, dreams got linked to resolutions, accomplishment was visible and the common man had only one determination

years, the countrymen have painted the entire mood of the nation with the color of Sabka Vishwas. The Trust and confidence that everyone reposed in us over the last five years will inspire us to serve the nation with more vigour.

I have seen in the recent elections and I had felt then that this is an election in which no politician was contesting, no political party was contesting, neither

that he can change his country. Yes it was the feeling that We too can change our country and that we cannot stay behind.

This feeling of the 130 crore citizens, this echoing of emotions gives us new the strength, new faith.

We had started with the mantra Sabka Saath- Sabka Vikas , but within five

Modi was contesting nor were friends of Modi contesting the election. It was the people of India who were contesting the election, 130 Crore countrymen were contesting the election. They were contesting for their own dreams. The real nature of Democracy could be seen in this election.

My dear countrymen, the solution to

the problems - along with the period of dreams, determination and accomplishment - we have to walk together now. It is evident that sense of self-reliance develops when problems get solved. Solution to problems encourages speed of self-reliance. When self-reliance occurs, self-esteem develops automatically and self-esteem has very strong potential. The power of self-respect is greater than anything and when there is a solution, resolution, capability, self-respect, then nothing can come in the way of success.

And today, with that self-respect we are determined to move forward to touch new heights of success. When we are trying to solve problems we should not think in isolation. There will be difficulties. Half-hearted efforts made with the aim of earning applause will not help in fulfilling the dreams of the country. We have to strive to remove problems from their roots.

You would have seen how our Muslim daughters and sisters used to live in fear with the sword of Triple Talaq dangling over their heads. Even if they were not victims of Triple Talaq, they were constantly haunted by the fear that they could be subjected to it anytime. Many Islamic countries abolished this evil practice long time back. But for some reason we were hesitant to give our Muslim mothers and sisters their due rights. If, we can abolish Sati Pratha, if we can enact laws to end female foeticide, if we can raise our voice against child marriage, if we can take strong steps against dowry system in this country, then

why can't we raise our voice against Triple Talaq? We have taken this important decision in the spirit of India's democracy and constitution, to respect the thinking of Baba Saheb Ambedkar so that our Muslim sisters get equal rights; so that new confidence is generated in them; so that they also become active participants in the India's development journey. Such decisions are not for political gains. They guarantee a lasting protection to our mothers and sisters.

Similarly, I will give another example. What was the reason behind revocation of Article 370 and 35A? This is the hallmark of this government. We do not avoid problems, nor do we let them fester. There is no time to delay or neglect problems. The work that was not done in

the last 70 years has been accomplished within 70 days after this new government came to power. The abrogation of Article 370 and 35A has been carried out in both Rajya Sabha and Lok Sabha by two-thirds majority. This means that everyone wanted this decision, but perhaps they were waiting for somebody to initiate the same and carry it forward. I have come to accomplish the task assigned to me by my countrymen. I work selflessly.

We are moving forward with re-organization of Jammu and Kashmir. For 70 years every government made efforts to do something.

But the desired results were not achieved, and when desired results are not achieved, there is a need to think afresh and take new steps. It is our responsibility to see that the aspirations of the people of Jammu, Kashmir and Ladakh get fulfilled. It is our collective responsibility to give new wings to their dreams. This responsibility has to be shouldered by all 130 crore of my countrymen. To meet this commitment we have made endeavours to

remove whatever hurdles were there in the way.

The system that prevailed over the past seventy years had aggravated separatism and given birth to terrorism. It had encouraged dynastic rule and in a way strengthened the foundations of corruption and discrimination. We have to make efforts so that the women of Jammu & Kashmir and Ladakh get their rights. We have to make efforts so that my dalit brothers and sisters living there, get the rights which they have been deprived of so far. The rights enjoyed by the tribal people of India must also be available to my tribal brothers and sisters of Jammu & Kashmir and Ladakh. There are several such communities, like Gujjars, Bakarwals, Gaddis, Sippies or Balties- all such communities must be empowered with political rights. It is surprising that in Jammu & Kashmir there were legal restrictions on Safai Karamchari brothers and sisters. Their dreams were trampled upon. Now, we have freed them from such shackles.

When India was partitioned, crores of people had to leave behind their ancestral homes for no fault of theirs. Those who settled down in Jammu & Kashmir got neither human rights, nor citizenship rights. There are people from hill regions living in Jammu & Kashmir. We intend to take steps for their welfare as well.

My dear countrymen, peace and prosperity of Jammu & Kashmir and Ladakh can be an inspiration for India. They can greatly contribute to India's

development. We need to make efforts to bring back their glorious past. The new system that has come into being after the recent step will create facilities that will directly benefit the people of the State. Now, anybody in Jammu and Kashmir, like the rest of Indians, can reach out to the Government in Delhi. There will be no hurdles in between. We have put in place such a system. Our recent action to strike down Article 370 and 35 A has been welcomed by the entire country and also by people from all political parties of the country, without exception. Some have openly supported us while others give their tacit support. But some in the corridors of power, in a bid to take mileage from vote-bank politics, have been talking in favour of Article 370. The country demands an answer from those speaking in favour of Article 370, that if Article 370 and 35-A were so important.

If Article 370 was so crucial then why did ruling parties not make it permanent in the last 70 years despite having a majority? Why was it kept temporary? If there was so much of conviction, you should have moved ahead and made it permanent. This means that you knew all along that the decision taken was not right. But you did not have the courage and the will to amend it. Concerns about political future kept coming up. For me, the country's future is everything, political future has no meaning.

Our constitution makers and great personalities like Sardar Vallabh Bhai Patel took these bold and important decisions even during those difficult times, keeping

the goals of national integration and political unification in mind. The exercise towards national integration was a successful one, but some difficulties have been faced because of Article 370 and 35A.

Today, as I address the nation from the Red Fort, I can proudly say that every Indian today can speak of One Nation, One Constitution and we are trying to fulfil Sardar Sahibs dream of *Ék Bharat Shreshtha Bharat*. So we must develop such systems which strengthen the country's unity and serve as a cementing force, and this process must go on continuously. It should not be merely an interim measure but a continuous process.

Through GST we have fulfilled the dream of One Nation One Tax. Similarly, we successfully achieved the dream of One Nation, One Grid in the energy sector recently.

Likewise, we have developed the system of One Nation, One Mobility card and currently there is a nationwide debate about holding simultaneous elections in the country. This discussion should be taken up in a democratic manner. We will have to add many such new ideas to realize our dreams of Ek Bharat, Shreshtha Bharat.

My dear countrymen, the country has to achieve newer heights, the country has to make its mark globally. For this we have to change the attitude towards poverty alleviation in the country. It should not be treated as a favour, but as our dutiful contribution towards building a bright future for the country because we have to free ourselves from the clutches of poverty at any cost. A number

of successful efforts have been made during the last 5 years to reduce poverty. We have achieved more success than before and at a faster pace. A little respect and support to the poor can boost their self-esteem and pull them out from the grips of poverty without any government help.

He will be able to defeat poverty with his own strength. It is my poor brethren who have the might to fight against any adversity. He fights against extreme cold with his clenched fists. We need to bow before his innate strength to face adversities and help in eliminating the challenges of his daily life.

Why should poor people not have toilets, no electricity in the house, no house to live in, no water supply and no bank account. Why should they be compelled to go to the moneylender to take loans through mortgage? Come, let us make efforts to boost the self-respect, self-confidence and self-esteem of the poor.

Brothers and sisters, it is over 70 years since Independence. All governments have done a lot of work in their own way. Every government, irrespective of the party, be it the central or the state, has tried in its own way. But still it is a fact that today almost half of the houses in India do not have drinking water. People have to struggle to get drinking water. Mothers and sisters have to travel 2, 3, 5 km carrying the load of water on their heads. A large part of their lives is spent in struggling for water. Therefore, this government has decided to

emphasize upon a special task and that is - how to ensure availability of water in every house. How does every house get water, pure drinking water? And so I declare from the Red Fort today that in the days to come, we will take forward the 'Jal-Jeevan' Mission. The central and the state governments will jointly work on this 'Jal-Jeevan' Mission. We have promised to spend more than Rs. 3.5 lakh crores on this mission in the coming years. Work should be done on water conservation, irrigation, rain-water harvesting, seawater or waste

water treatment, and 'Per Drop, More Crop Micro Irrigation for the farmers. Water conservation campaigns should be launched, creating awareness in the common citizens about water, arousing their sensitivity so that they understand the importance of water; even the children should be taught about water conservation as part of their curriculum in their childhood. We must move forward with the belief that in the next five years we have

to do more than four times the work that has been done in the last 70 years for water conservation and to revive the sources of water. We cannot wait any longer. The great Saint Thiruvalluvar ji had professed hundreds of years ago when perhaps no one would have thought of the water crisis and the importance of water.

And then Saint Thiruvalluvar ji had said NeerIndri Amiyadhu Ulganein meaning that if water starts disappearing, then nature's processes get disrupted and eventually come to an end. This initiates the process of total destruction.

I was born in Gujarat. In North Gujarat, there is a Jain pilgrim city called Mahudi. Approximately 100 years ago there lived a Jain saint who was born in a farmer's family. He used to work in the fields but under the influence of Jainism. He became a Jain saint called Budhi Sagar ji

Maharaj. He left behind some scriptures 100 years ago in which he shared a premonition that there will be a time when water will be sold in grocery shops. Can you imagine that the words of the saint written hundred years ago have actually become a reality now. What was predicted a century ago is now a ground reality, and today, we all are actually buying water from grocery shops.

Dear countrymen, we are not to get tired in our efforts, nor shall we halt or hesitate in moving ahead.

This campaign on Water conservation should not just remain a government initiative. It should become a people's movement like our Swacchh Bharat Abhiyan. We have to carry forward this movement with the help the common man's ideals, aspirations and efforts.

Dear Countrymen, our nation has

reached a phase when we should be transparent about everything.

Time has now come that we should take challenges head-on. Sometimes decisions are taken keeping in mind political advantage but they come at the cost of growth of future generation of our country. I would like to highlight the issue of population explosion in one Country from the aegis of the Red Fort today.

This rapidly increasing population poses various new challenges for us and our future generations.

In our society, there is a section which is very well aware of the consequences of the uncontrolled population growth. They all deserve accolades and respect. This is also their expression for their love for the nation. Before having a baby, they take a well considered decision whether they will be able to take care of the child's needs and fulfill his/her dreams by playing the role of a responsible parent.

Keeping these parameters in mind, this small sections of responsible citizens is self motivated to keep their family small. Not only do they contribute to the welfare of their family but also to the good of the nation.

They express patriotism. I would like all the people of our society to watch their lives closely and see how much they have served their families by limiting increase in family size. It is about how the family has moved forward in just a generation or two, how the children have got education, how the family is free from

disease, how well the family fulfils their primary needs.

We should learn from them. Before a child arrives into our family we should think - have I prepared myself to fulfil the needs of the child ? Or will I leave it dependent on the society? Will I leave the child un-nurtured? No parents can continue to give birth to children who are forced to live this type of life and therefore a social awareness is needed.

The people who have played this huge role need to be honoured, and by setting them as examples we need to inspire the segment of the society who are still not thinking on these lines. We need to worry about population explosion.

Governments also have to come forward through different schemes. Be it the State Government or the Central Government - everyone has to walk together to shoulder this responsibility. We cannot think of an unhealthy society, we cannot think of an uneducated society. In 21st century India, the ability to fulfill dreams starts with a person, starts with a family. If the population is not educated, not healthy, then neither the home nor the country can be happy. If the population is educated, empowered, and skilled and has adequate means available to achieve the right ambience to fulfill their wishes and needs, then I think the country can fulfill these things.

My dear countrymen, you are well aware that corruption and nepotism have damaged our country beyond imagination and entered into our lives like termites. We are continuously trying to weed them out.

There have been successes also, but the disease is so deeply entrenched, the disease is so wide spread that we will have to keep putting in more efforts and that too at every level, not just at the government level, and we need to keep doing it continuously.

All work cannot be done at one go, bad habits are like chronic disease. Sometimes it gets cured, but sometimes it relapses. This too is a disease for which we have taken many steps, eliminating it by continuous use of technology. Every effort has been made to strengthen honesty and transparency at all levels.

You must have seen that immediately after formation of the Government, and also in the last five years the Government has removed many top officials. All such people creating obstacles were told that the country does not need their services anymore and they have been removed.

I believe that there should be change in the system, but at the same time there should be a change in the social fabric. Along with the change in the social fabric, a change in the mindset and beliefs of the people running the systems is also very essential. Then only the desired results can be achieved.

Brothers and sisters, the country has, in a way, matured after so many years of independence.

We are going to celebrate the 75th anniversary of Independence. This Freedom is as precious to us as our ethical values, attitudes and sensitivities.

Whenever I hold meetings with officials I'd always mention, I do not talk about it publicly but today I feel like speaking out, I repeatedly exhort the officials that after so many years of Independence can we not do something about cutting down red tape and reduce the involvement of the Government in the daily life of the common man.

The meaning of an Independent India for me is to create an ecosystem that gradually reduces the involvement of govt. in the lives of its peoples. This will give people the choice to decide about their own destiny and embark upon whichever direction they wish in the national interest, for betterment of their families and in the pursuit of their dreams.

Citizens should not feel pressure of the government but at the same time during a crisis the government must not be found wanting. The government should neither be exerting nor wanting, but let us all move forward with our dreams. The government should be always standing by us, as a companion. In case the need arises, the people should be assured that Govt. is always there to back them up. Can we create such a system?

We have done away with several unnecessary laws and rules which had been rendered redundant. In the last five years I have abolished, practically, one redundant law every day. Perhaps the common man is not aware of it, - abolishing one obsolete law each day means almost 1,450 laws have been done away with an aim to reduce the burden from the common man's life. The (new)

government has only completed ten weeks into office, and already (another) 60 laws have been repealed with an aim to bring about 'Ease of Living'. 'Ease of Living' is imperative for an Independent India and we are committed to focus on 'Ease of Living' and want to take it ahead.

Today, we have made much progress towards 'Ease of doing business.' We aim to reach the Top Five in the global ranking and for this there will be a need for several reforms; anybody wanting to set up a small business or industry, faces several small and big issues, - such as filling up several forms, going from pillar to post, he has to make visits to scores of offices, but he still doesn't get the requisite sanction. In attempts to unshackle this intricate web, bringing reforms after reform, taking the Centre and States together, taking along the city and metropolitan municipalities, we have been able to achieve a fair degree of success towards 'Ease of doing business.'

Across the globe there is a growing realization that such a large country as India, a developing nation, can dream big and make such a big leap. 'Ease of doing business' seems just a milestone; my ultimate objective is to achieve is 'Ease of living', - where a common man does not have to exercise himself to get Govt./Officials clearances, he gets his due rights easily and thus there is a need for us to proceed in that direction.

My dear countrymen, our nation must march forward, but the country cannot now wait much longer for incremental progress, we will have to take

a big leap, we will have to change our thinking. To make India reach the Global Standards we need to build modern infrastructure.

Notwithstanding despondent attitudes, ordinary people always dream of a good system. They like good things; they have developed a taste for it. So we have decided to invest 100 lakh crore rupees for modern infrastructure in this time period. This will generate employment; will develop new systems and various aspirations will be met. Be it Sagarmala Project or Bharat Mala Project, modern railway stations, bus stations or airports, be it modern hospitals or world class educational institutions, we want to develop the entire infrastructure. Now the country also requires seaports. The ordinary people have changed and we have to understand that.

Earlier, if a decision was taken on paper that a railway station was going to be constructed in a particular area, there used to be a positive feeling for years together that a new railway station would be available somewhere nearby. Times have changed now. The ordinary citizens are no longer satisfied with just a railway station. They will immediately ask, "When will Vande Bharat Express come to our area?" Their thinking has changed. If we construct a very good bus station or five star Railway station, the people will not say "well done". They will forthwith ask, "When will the airport be ready"? That means their thinking has changed. The people who were happy with just getting a railway stoppage are now asking, "It is ok,

but when is the airport going to open here?”

Earlier people used to ask, “When will a metaled road be constructed in our area?” Now people ask, “Will the road be of 4-lane or 6-lane one?” They are not satisfied to metaled roads any longer. I think this is a very significant change for aspiring India.

Earlier, even on seeing the electricity poles lying on the ground people used to be happy, thinking that the electricity had reached them even if the pole had not been erected. But now even after the installation of transmission wires and electric meters, people ask “When will we get 24-hour electric supply?” They are no longer happy with just poles and wires.

Earlier, when mobile phones were just in vogue, people were content that mobile phone had finally arrived. But now they discuss about data speed. We have to understand this transformation of psychology and changing times. We have to move forward in many fields, with the Global Benchmark like modern infrastructure, clean energy, gas based economy, gas grid, e-mobility etc.

My dear Countrymen, generally the governments of our country are identified with what they have done in a particular area or for a particular community or group. Generally, the government and the people went by the yardstick as to how much a government has given or to whom it has been given. This was considered as good enough. May be it was the need of the hour and a compulsion.

But despite whatever, however, whenever or whoever may have received in the past, we now need to unitedly think about what dreams we want to achieve as a nation. Time demands that we live fight and move ahead in unison to fulfil these dreams. Keeping this in mind we have set a dream target of building a five trillion dollar economy. 130 crore countrymen can move together even with small contributions. The target of 5 trillion dollar economy may appear difficult to some people. They may not be wrong but if we don't accomplish difficult tasks, how will the country moved ahead? If we don't take up difficult challenges how will we develop a mind set to move forward? Psychologically also we must always aim high and that is what we have done. This is not just in the air. We had reached a 2 trillion dollar economy after 70 years of independence, after 70 years' journey on the path of development we could achieve just a 2 trillion dollar economy. But within five years from 2014 to 2019 we reached a 3 trillion dollar economy i.e we added one trillion dollars. If we succeeded in taking such a big jump in just 5 years, then we can become a 5 trillion dollar economy in the next five years. This must be a dream of every Indian.

When the economy grows, it brings better standard of living for the people. Opportunities get created to fulfil the dreams of even of those at bottom. In order to create these opportunities we have to develop this mind set about the economic sector of the country.

When we dream to double the

income of our farmers, when we dream that after 75 years of independence each family, including the poorest of the poor, should own a house, when we dream that on completing 75 years of independence each family must get electricity in their house, when we dream that on completing 75 years of independence each village of India must have optical fibre network, broad band connectivity and long distance education, these should no longer be seem to be dreams.

We must focus upon developing our maritime resources and blue economy. We should empower our fishermen community. Our farmers, who provide us food, may become energy givers. Why should they not become exporters as well, why should the produce of our farmers not dominate the international market? We want to move ahead with these dreams. Our country will have to boost its export. Let us make every effort to reach the global market.

Each district of our country has a potential equal to that of one country, each of our districts has the capacity equal to a small country in the world. We need to understand this power and channelize this potential. And why should each district not think of becoming an export hub? Each district has its own handicraft and each district has its unique specialities. If some district is known for its perfumes then some other district may have saris as its distinct identity whereas some other district is known for utensils and the other district is famous for its sweets. Each of our districts has a diverse identity and

potential for global market.

We are trying to see how can we use zero defect zero effect in manufacturing for global markets. If we focus on exports by making the world aware of this diversity, and work towards capturing the world market, then the youth of the country will get employment. This will give great strength to our small scale and micro level industries. We have to increase that strength.

Our country can be a fascinating tourist destination for the world, but for some reason, we have not been able to do it as fast as we need to. Come, let all of us, the countrymen, take the decision to boost tourism in the country. As tourism grows, capital investment provides more employment opportunities. The country's economy also gets a boost. People all over the world are ready to see India in a new way today. Let us think how we can attract tourists to our country from the world over, how we can strengthen the tourism sector and what arrangements should be made at tourist destinations. We should also talk about increasing the income of ordinary citizens, better education for them, new employment opportunities. There should be launching pads for the middle class people so that they can realize their dreams. Our scientists should have the best facilities and resources, our forces should have the best weapons and equipment that too indigenously made. I believe that there are many areas which can give India a new strength to become a five trillion dollar economy.

My dear brothers and sisters, today

the country has a very favourable environment for achieving economic success. When there is a stable government, the policies are predictable and systems are stable, then the world also starts having confidence in you. The people of the country have shown this. The world is also watching India's political stability with great pride and respect. We should not let this opportunity go. Today the world is keen to do business with us. It wants to connect with us. Today, it is a matter of great pride for us that while controlling inflation, we are moving forward with an important equation to increase the growth rate. Sometimes the growth rate may increase, but inflation is not under control. Sometimes when the inflation is under control, the growth rate gets affected. But our government has not only controlled inflation but has also increased the growth rate.

The fundamentals of our economy are very strong. And this strength gives us confidence to move ahead. In the same way, by developing a system like GST, and bringing reforms like Insolvency and Bankruptcy Code, we want to develop an environment of confidence. There should be increased production in our country, increased processing of our natural wealth, value addition, export of the value added products to the world. Why can't we have a dream wherein every country in the world imports some or the other Indian product, wherein every district of India exports some product? If we take these two things into consideration, then we can also increase the income. Our companies and

entrepreneurs also dream of getting access to the world market. By getting access to the world market, our investors will be able to enhance the status of India; our investors will be able to earn more; our investors will be able to invest more; our investors will be able to generate more employment. We are completely ready to encourage our investors to come forward for generating employment.

In our country, certain wrong beliefs have come into existence. We have to come out of those mindset. Those who create wealth for the country, those who contribute in the nation's wealth creation are all serving the country. We should not doubt our wealth creators.

The need of the hour is to recognise and encourage the wealth creators of our nation. They should receive more honour. If wealth is not created, wealth cannot be distributed. Further, if wealth is not distributed we cannot uplift the poor sector of our society. Such is the importance of wealth creation for our country which we need to facilitate further.

Those who are making efforts to create wealth, according to me they themselves are an asset to the nation and must be empowered.

My dear Countrymen, today we are emphasising on peace and security along with development. Globally, countries are gripped with several insecurities. Death seems hovering in some or the other part of the world.

India has to play a vital role in reinstating world peace. We cannot remain

silent spectators in the global environment. We are putting up a tough fight against terrorist organisations. In any part of the world, an act of terrorism should be regarded as an attack on humanity. Therefore, I urge all forces to unite against those who promote and give shelter to terrorist outfits. India should contribute in exposing these anti-humanitarian activities and is resolute to unite all world forces to end terrorism.

We want that India should play a crucial role in the war against terrorism. India should unite all forces to expose those who give shelter to terrorists, those who encourage terrorism and those who export terrorism.

Some terrorist organisations have not only targeted India, but are also damaging our neighbouring countries. Bangladesh and Afghanistan are also grappling with terrorist activities. In Sri Lanka, sadly, innocent people have been killed en-masse inside a church. This is such a heart wrenching event. Hence, we all have to unite and act proactively to bring security, peace and harmony in this sub-continent.

Our friendly neighbour Afghanistan is also going to celebrate its 100th year of independence, four days from now. I would like to extend my heartiest greetings to them on this auspicious occasion.

It is our clear policy that those who are spreading fear and fostering violence must be razed to the ground. We have made this clear through our policies and strategies to curb all such malafide

intentions. We have no inhibitions. Our army, border security forces and security agencies have done a commendable job. They always stand tall in their uniforms and guard us from all adversities. They have martyred their lives to ensure a bright future for us. I salute and I pay my homage to them. It is important that we take timely steps towards reforms.

You must have noticed that deliberations are on since a long time to bring reforms in military infrastructure, armed forces and military resources. Previous governments have also discussed the same. Several commissions have been formed and all the reports have brought to light the same issues.

There is hardly any difference, but this has been stated repeatedly. There indeed is coordination between our Navy, Army and Air Force. We can be proud of the arrangement of our armed forces. Any Hindustani can be proud of Indian Military. They also strive for modernity in their own way.

But the world is changing today, the scope of war is changing, the nature of war is changing. It is becoming technology driven; in the circumstances India too should not have a fragmented approach. Our entire military power will have to work in unison and move forward. Things cannot move smoothly if anyone from the Navy, Army and Air Force is a step ahead from the other two forces, while the other two are lagging behind. All the three should move simultaneously at the same pace. There should be good coordination and it should be relevant with the hope and

aspirations of our people. It should be in line with the changing war and security environment in the world and today I want to announce an important decision from Red Fort. The subject experts on the issue have been demanding this for a long time. Today we have decided that we will now have a Chief of Defence Staff- CDS and after formation of this post all the three forces will get effective leadership at the top level. The CDS System is a very important and compelling task in our dream to reform the strategic pace of Hindustan in the world.

My dear countrymen, we are lucky that we are born in such a period, we are living in such a period, when we have the ability to do something. Sometimes it comes to my mind that when we were fighting for freedom, great men like Bhagat Singh, Sukhdev, Rajguru were competing for their sacrifice. Under the leadership of Mahatma Gandhi, freedom fighters were going door-to-door, to awaken the country to realize their dreams of independence. We were not born at that time. We did not get a chance to sacrifice for the country, but we have definitely got a chance to live for the country now. And it is a privilege that this period is like this, this year is very important for us. This is the festival of 150th birth anniversary of Bapu Mahatma Gandhi.

We feel blessed to have such opportunity. 75 years of our Independence and the remembrance of those who sacrificed for the country, inspires us to do something. We should capitalise on this opportunity. We, 130 crore of countrymen,

have to move further, to achieve the dreams of Mahatma Gandhi, the dreams of freedom fighters of the country. We should make the 75 years of independence and 150 years of Gandhi into a festival. This is a great opportunity for our inspiration.

I had spoken about Swachhata in 2014 from this Red Fort. I am confident that within next few weeks of 2019 itself India will declare itself Open Defecation Free. States, Villages, Municipalities, Media, everyone has started Mass-Movement regarding ODF. The government was nowhere to be seen, people participated in the mass movement and the results are quite evident.

My dear countrymen, I would like to put forward a small request to you. On this 2 October can we make India free from single-use plastic? Let us move around, form teams and move out from home, school, college.

Remembering revered Bapu, we should move out of home collecting single-use plastic from homes, streets, chowks, and drains. Municipalities, Municipal corporations, Gram Panchayat should make arrangements to collect single-use plastic. Can we take first big step on 2nd October, towards making India free from single-use plastic?

Come my countrymen, let us take this forward.

I will request start-up organizations, technicians and entrepreneurs to see what we can do to recycle this plastic? Plastic is being used in making highways. Many such remedies can be there. But to get rid of

such problems we have to initiate mass movement but at the same time we have to think of the alternate systems. I will request all shopkeepers along with many sign boards in your shop please also put another one exhorting customers not to use plastic bags; that they should instead bring their own cloth bags or buy cloth bags for carrying their goods. Let us create an environment. We generally give gifts to people on Diwali. Why not pack those gifts in cloth bags this year and every time? If people go to market with cloth bags, that will be an advertisement for your company too. If you give a diary or calendar nothing will happen. But if you give a bag, that will be a medium of your advertisement. It should be a jute bag. It will help farmers. The cloth bag will help farmers. These are all small things. It will help poor widows who are into sewing. Our small steps can change the lives of ordinary people and we have to work towards that.

My dear countrymen, whether it is a five trillion economy dream or the dream of a self-reliant India, we are following the principles of Mahatma Gandhi. Mahatma Gandhi's ideals are relevant even today. So we have to take forward our 'Make in India' mission. Shouldn't made in India products be our priority? Let us decide whatever is produced and available in our country should be our priority. We have to give stress on local products for lucky tomorrow; we have to go for local for bright future. Whatever is produced in the village should be given priority. If it is not available in the village we have to go beyond that- to Tehsil, to the district and

then to the state level. I don't think that one has to go outside the state to meet one's requirements. Our rural economy will get a boost; our small entrepreneurs will get a boost; our traditional things will get a fillip.

Brothers and sisters we like mobile phones, we like to send whatsapp messages, we like to be on Facebook-twitter. But we can help country's economy through these means. Technology is useful for the people who know its usefulness. Technology is helpful for the development of a modern India. Why shouldn't we move towards Digital payment? Today we are proud that our RuPay card is accepted in Singapore. In the near future RuPay card will be accepted in more countries. Our digital platform is spreading steadily. Shouldn't we stress on digital payment in villages, small shops and small shopping malls? For the sake of honesty, transparency and to make our country's economy strong let us move towards digital payment. If you go to villages you will generally see boards put up by traders saying "only cash, no credit please". I will urge the businessmen to display another board: "say yes to digital payment and no to cash". We should create an atmosphere like this. I will urge the banking sector and the people from the business world to give emphasis on these things.

In our country the bulk of middle class and higher middle class are increasing. This is a good thing. People go to various countries as a tourist with their family once or twice in a year. It is good that our children get exposure. But today I want to urge all such families to think over

whether they will want their children to know their country as well, when it celebrates the 75th Year of its Independence, which could be achieved after many great men and women had sacrificed their lives? Are there any parents who do not want their children to be emotionally connected with the country's soil, its history, its air and water? Do they not want their children to gather new energy from all these? We have to move ahead in right earnest. No matter how advanced we become, if we get cut off from our roots, we can never survive. Today from the ramparts of Red Fort, I am asking you one thing. This is to generate employment of the youth, to build an image of India in the world and to tell the world what India is capable of. It is time you decide that before 2022, when India will be celebrating the 75th Year of its Independence, we take our families to at least 15 tourist destinations in the country. We may face some difficulties in those places but still, you should go. There may not be good hotels. But, sometimes such difficulties also bring opportunities along. Our children will learn what their country is, when they visit such tourist destinations. The people who can build facilities will also reach there and that will generate employment. Why don't we develop 100 good tourist destinations, why shouldn't there be target of developing 2, 5 or 7 top class tourist destinations in every state? North-East of India has huge natural resources but how many universities make that part of the country as their tourist destination? You do not have to spend much, neither do have you need to spend a

lot of time; in 7 to 10 days you can visit within the country.

A new world will come into being in the places you visit. You will get bliss in the life once we Indians visit the tourist spots of North-East, foreigners will also follow suit. But, think over when we go out of the country and the people there ask, whether you have seen that temple in Tamil Nadu and we say "No"; then how does it feel. They would be surprised and say that they being foreigners, have visited that temple but you being an Indian have not seen it so far. So, before we go abroad we must know our country well.

Now, I want to ask something from my farmer brothers. For farmers, for my countrymen this country is their motherland. As we chant 'Bharat Mata Ki Jai' our hearts are filled with new energy.

The word "Vande Mataram" enthuses our hearts with a wish to sacrifice for the country. A long history beckons us. But have we ever cared to think about our motherland's health? The way we are using chemical fertilizers and pesticides, it is damaging the health of its soil. As a farmer, as a child of this soil, I have no right to damage its health. I have no right to make my mother India sad nor do have I right to make her sick.

We would soon complete 75 years since our Independence.

Revered Bapu showed us the way. Should we not cut down the use of chemical fertilizer in our fields by 10% or 20% or 25% and if possible should we not launch a Muktiyar Abhiyan (campaign)?.

This would be a great service to the nation. This would be a great step in saving our Mother Earth. Your endeavour in saving our mother earth will also get blessings of those who dedicated their lives chanting Vande Mataram in order to fulfil the dream of achieving freedom for our motherland. Therefore I appeal to you as I am fully confident that my countrymen will definitely be able to achieve this. My farmers will fulfil this request of mine because I have full trust in them.

My dear brothers and sisters, professionals of our country are at a commanding position globally. Their potential is very well recognised. People respect them. Be it space, be it technology, we have achieved new heights. It's a matter of happiness of us that our Chandrayaan is moving speedily towards that part of the moon where no one has ever reached. Such is the mastery of our scientists.

Similarly, our presence was much less in the field of sports. Today young sons and daughters of my country in the age group of 18 to 22 are making India's tricolor fly in various sports stadia. How proud that feels! Our sportspersons are earning laurels for the country.

Dear countrymen, we have to take our country forward. We have to transform our country. We have to make our country reach newer heights and we have to do this collectively. The government and the people have to achieve this collectively and jointly. Our 130 crore countrymen have to do this. Prime Minister of the country is also a child of this country like you and he also is a

citizen of the country. We all have to work unitedly for this.

In the coming days about 1.5 lakh wellness centres and health centres will have to be set up in rural areas. Setting up one medical college for every three Lok Sabha constituencies will make us realize the dream of our youth becoming doctors. Houses for more than 2 crore poor people have to be built. We have to supply potable drinking water to 15 crore houses in rural areas, construct 1.25 km roads in rural areas. Each village has to be provided with Broad Band connectivity and connected with optical fibre network, also a network of more than 50000 new start-ups has to be raised. We need to move forward with so many dreams.

And, therefore, brothers and sisters, we the countrymen have to collectively take our country forward with these dreams in mind and for this 75 years of independence is a very big motivation.

130 crore countrymen have their dreams, their challenges. Each dream and each challenge has its own importance. It is not that some is more important and the other is less important. It may not be possible for me to delve at all the topics during this speech. So, whatever I could speak today and whatever I could not speak are equally important. If we move forward, we should keep in mind that we have to take our country forward.

75 years of Independence, 150 years of Gandhi and 70 years of India's Constitution has been completed for realising the dream of Baba Saheb Ambedkar. We are also celebrating 550th

Parv of Guru Nanak Dev ji this year. Let us move ahead following the teachings of Baba Saheb Ambedker and Guru Nanak Dev ji as we have to build a better society and a better country as per the expectations of the whole world.

My dear brothers and sisters, we know that our targets are as high as the Himalayas, our dreams are even more than the innumerable stars. But we also know that even skies cannot check the flight of our courage.

This is our resolve, our potential is beyond measure just like the Indian Ocean. Our efforts are holy like the flowing Ganges and are ever continuing. Above all these things our values draw inspiration from our ancient culture and the penance of our sages and saints. The sacrifice and

hard work of our countrymen is our motivation.

Come on, let us move ahead to build a new India keeping these ideals and resolves in mind. Fulfilling our responsibilities with a new confidence and a new resolve to build a new India should be our mantra. Let us together take our country forward with this single expectation, I once again bow to everyone who lived, fought, died for the country.

Jai Hind.

Jai Hind.

Bharat Mata ki Jai.

Bharat Mata ki Jai.

Vande Mataram

Vande Mataram

Thank you very very much.

'Ek Bharat Shrestha Bharat' - PM Narendra Modi

My dear countrymen,

Congratulations and many best wishes to all the countrymen on this auspicious occasion of independence.

Today, we are able to live in an independent India because of the sacrifices of millions of sons and daughters of Mother India. This is an occasion to pay tribute to the freedom fighters, martyrs and brave souls and their spirit and dedication to free Mother India.

The valiant soldiers of our armed forces, our paramilitary forces, our police personnel and our security forces- everyone is engaged in protecting Mother India. They are engaged in safeguarding the common man. Today is the day to remember their sacrifices and penance sincerely and wholeheartedly.

There is another name: Aurobindo Ghose. Today is the birth anniversary of Aurobindo Ghose, who tread the path from being a revolutionary to spirituality.

Let us seek his blessings so that we can fulfil his as well as our vision.

We are passing through an extraordinary situation. Today, children- the bright future of India- are not in front of me. Why? It is because Corona has stopped everyone. In this period of corona, I salute millions of corona warriors- doctors, nurses, sanitation workers, ambulance drivers and so on- who all should I count.

I salute all the corona warriors, who for a long time have adhered to the mantra of i.e. service is the best religion and have served the children of Mother India with complete dedication.

In the period of corona, many of our brothers and sisters have been affected by this pandemic; many families have been affected; many have also lost their lives. I express my condolences to all such families, and I believe the indomitable will power and determination of 130 crore countrymen will make us win over Corona

and we shall definitely win.

I know that recently we have been passing through a number of crises. Floods, especially in the north-east, eastern India, south India and some parts of western India; landslides in many areas; people have had to face many problems. Many people have lost their lives. I also express my condolences to those families.

And the nation stands in solidarity with the state governments in these days of crisis. No stone is being left unturned by either the state or central government to provide relief measures to the needy.

My dear Countrymen, Independence Day is a festival to celebrate freedom. It is an occasion to enthuse new energy by remembering our freedom fighters. This day is a harbinger of new inspirations. It reignites new fervour, exuberance and enthusiasm. And in times like now, it becomes even more imperative for us to be determined. It is an auspicious day because when we meet again next year to celebrate, we shall be entering into the 75

years of our free existence. This is a momentous occasion. Today, all of us 130 crores Indians have to make significant pledges for the coming two years. And when we complete the 75 years of our freedom, we will be able celebrate the redemption of those pledges.

My dear countrymen, our forefathers fought for this freedom with extreme commitment, utmost integrity, sincere penance, renunciation and sacrifice; we should never forget the way they laid their lives for Mother India. We should never forget that during this long and dark ages of slavery, not even a moment was lost when they were not moved by the desire for freedom. There isn't a countryman who did not put his best foot forward aspiring to break free the nation from the shackles of slavery, by waging a war and making any sacrifice possible to bring this day. Many sacrificed their youth in jails. Many left behind their life's dreams and embraced the gallows. I salute these revered martyrs who offered themselves

as an oblation. Indeed amazing! On the one side, the country witnessed a phase of mass movements and on the other side the resounding voice of armed revolt.

Under the leadership of Pujya Bapu, the great national awakening accompanied by mass movements, gave new impetus to the struggle for freedom. And so today we are blessed to be able to celebrate our Independence Day with such fervour.

During this freedom struggle, several efforts were made to douse the fire of revolt and throttle the soul and spirit of our motherland. Many attempts were made to ruin the Indian culture, tradition, customs and heritage. Running across centuries, that was the period of SAAM DAAM DAND BHED (either by hook or crook) – and all this was at its peak. Many came here with the innate belief that they have come to reign the world for eternity (yaavat chandra diwakaro-till sun and moon

exist). But the strong determination to be freed beat such ambitions to dust. They believed that India was a divided lot due to the existence of multiple identities, nobilities, languages and dialects, cuisines, costumes and culture. They labored under the misunderstanding that a country of so many diversities can never stand up as one against any force. But they

could not recognize the soul and pulse of the country, that life force, that chord which binds us together. And when this force came out with full vigour in the fight for freedom, India succeeded in throwing away the shackles of slavery.

We are aware of the fact that that was the regime when propagators of expansionism spread across geographies and attained supremacy and power, but the freedom movement of India inspired many across the globe to stand against these forces. India became a pillar and ignited the fire of freedom struggle all over the world.

And those, who were involved in the blind race of expansionism, threw the World into two World wars, destroyed humanity, ruined lives and wrecked the globe to achieve their designs.

But even during such a period, even in the midst of the destructive war, India did

not abandon its urge for freedom; neither was it found lacking, nor did it lower its guard.

Whenever there was a need, the country has been making sacrifices, enduring sufferings and leading people's movements. India's battle created an atmosphere for freedom in the world. And the change that the power of India brought in the world, it became a challenge for expansionism. History can never deny it.

My dear countrymen,

In the entire World, in its war for independence, India kept marching with its head high with its strength of unity, collectivity, the resolve for its bright future, its commitment and inspiration.

My dear countrymen,

In the midst of the Corona pandemic, 130 crore Indians pledged themselves to become self-reliant. Today self-reliance is etched in the mind of every Indian. We are also witnessing the realization of that dream of Self-Reliant India (“AatmaNirbharBharat”). “Self-reliant India” is not just a word, it has become a mantra for 130 crore countrymen.

When I talk of self-reliance, all of us who are now above the age group of 25-30 years surely recall how we were goaded by our

parents and elders to become self-reliant as we attained an age of 20 - 21. Every family expects its children of 20-21 years to be self-reliant. As we are just one step away from the 75th Anniversary of Independence, it is essential for a country like India to stand on its own, and to become self-reliant. What is necessary for a family is also essential for a country. I have full faith that India will realize this dream. And the reason for this is the strength of my country's citizens in which I have full faith, I am proud of their talent, I have confidence in our youth and the country's unparalleled women power. I have faith in the thinking, in the approach of India. And history is witness that whenever India resolves to do something, it does it.

Therefore, when we talk about self-reliance, it arouses not only curiosity all over the World but also expectations from India. Therefore, it is imperative that we

make ourselves capable for realization of that expectation. It is very essential to prepare ourselves.

A large country like India is full of energy of youth power. The first condition for a self-reliant India is self-confidence which is the foundation of self-reliance.

And this has the power to give a new vision and a new energy to development.

India has always followed the adage - 'Whole world is one family' and Vinoba ji used to say "i.e. hail the world. Therefore, the world is one family for us. So, alongside financial development, mankind and humanity should also get importance. And we follow this dictum.

Today the world is interconnected and inter-dependent. So, it is the need of the hour that a vast country like India should increase its contribution to the world economy. It is also India's duty towards world welfare. If India wants to increase its contribution then she herself will have to

be empowered; she will have to be self-reliant or 'AatmaNirbhar'. We must make ourselves capable of contributing towards world welfare. If our roots are strong and we are capable enough, we will be able to take steps towards world welfare.

Our country has plenty of natural resources. It is the need of the hour that we start the value addition of these natural resources and human resources; and to take the country to new heights. How long shall we continue to export raw material to the world? How long will the process of exporting raw material and importing finished goods continue? So, we will have to be self-reliant. We will have to resort to value addition of our capabilities as per the world's requirements. It is our responsibility. We want to move ahead in the field of value addition to contribute to world welfare. Similarly, there was a time when we used to import wheat from abroad; but our farmers have done a wonderful job. And now India is self-

reliant in the agricultural sector. Today India's farmers not only supply the food grains for the citizens of India but India is also in such a position that it provides food grains to the other countries in need.

Though this is our strength- the strength of self-reliance in agriculture- value addition is also necessary in this sector. Our farm sector needs to evolve in line with requirements of world; Value addition is required for our farm sector

Today, the country is taking several new initiatives. You see, we have opened up the space sector. The youth of the country is getting opportunities. We have liberated the agriculture sector from the shackles of laws and have tried to make it self-reliant. When India becomes powerful in the space sector, neighbouring countries also get its benefits. If we become powerful in the energy sector, India can help those countries that want to dispel their darkness. When the country's health infrastructure becomes self-reliant, then India becomes a preferred country as a destination for health tourism. Therefore, it is necessary to see to it that 'Make in India' products get appreciated in the

world. History is a witness to the fact that there was a time when the products made in our country by our skilled manpower were used to get appreciated all over the world.

When we talk about becoming self-reliant, then we do not merely refer to decreasing the import demands. When we talk of self-reliance, it is about our skills, our human resources. When we start sourcing things from abroad, then our capabilities start depleting and consequently, it gets completely destroyed over generations. We need to preserve it and enhance that caliber of ours. We need to accentuate our skills, our creativity and with that we need to touch new heights. We need to strengthen skill development for a self-reliant India, for improving our competency.

My dear citizens, I know that when I talk about becoming self-reliant then people raise several doubts. I do accept that there are millions of challenges while we travel on the path of becoming self-reliant and these challenges increase further in a competitive world. We should realise that for the millions of challenges

we face, our nation has the capability to provide billions of solutions. My countrymen are there with the capability to resolve the issues.

You can see that in the challenging times of Corona, we were in need of many items which we needed to import but the world was unable to provide them. The youth of our nation, our entrepreneurs, the industry accepted the challenge. The nation that never manufactured N-95, started doing so. We started production of PPE which was not being produced before, similarly we started producing ventilators in India, which were not being made here before. We are not only able to meet our own requirements, but now also become strong enough to export to the world. We can very well see how a self-reliant India can help the world. Therefore it is also the duty of India to work for the welfare of the world.

Enough is enough. What should be the mind-set of independent India? The mind-set of independent India should be 'Vocal for Local'. We should take pride in our local products. If we do not praise and support our indigenous products, then how will they get an opportunity to flourish and improve, how will they gain strength? Come, let's pledge that as we move towards the 75th year of our independence, we shall adopt the talisman of 'Vocal for Local' and together let's strengthen ourselves.

My dear Countrymen, we have clearly seen how our nation can do wonders, how it progresses. Who could have imagined that lakhs and crores of money would be

directly transferred to the Jan-Dhan accounts of the poor? Who could have imagined that so many changes would be made in the APMC Act for the welfare of farmers? Who could have thought that the farmers who were living under the Damocles' sword of the Essential Commodities Act, would be freed of it after so many years? Could we have imagined that the space sector would be laid open for the youth of our nation? Today we are witnessing that National Education Policy, One Nation-One Ration Card, One Nation-One Grid, One Nation-One Tax, Insolvency and Bank Bankruptcy Code and the effort for merger of banks- all these things have become the reality of nation, fact for our nation.

The world is looking at the outcomes of the reforms that are taking place in India in these times. The world is closely observing the reforms we are bringing one after another, one linked to another. As a result of this Foreign Direct Investment (FDI) in India has broken all its previous records last year.

Last year, there has been an 18% increase in FDI in India. So, even during the corona pandemic, top companies of the world are turning to India. This confidence hasn't been created just like that. The world didn't get fascinated with India without a reason. This confidence has grown because of the hard work put in by India in the field of its policies, democracy and strengthening the foundation of its economy.

Today many businesses of the world are viewing India as the hub of the supply

chain. So now, we have to move ahead with the mantra of 'Make for World' alongside 'Make in India'.

Try to recall what happened recently and take pride in the capabilities of 130 crore countrymen. During this corona pandemic, there were cyclones in the east and the west coasts of India, umpteen number of people died because of lightning & landslides, and earthquakes of small intensity were felt time and again. As if these were not enough, swarms of locust created havoc for our farmers. A series of adversities struck one after another. Yet, the country didn't lose confidence and continued to move forward with self-confidence.

Today, it is our priority to pull the people and the economy of our country out of this corona pandemic. The National Infrastructure Pipeline Project will play an important role in this endeavour. Rs 110 lakh crore will be spent on this project. For this, about seven thousand projects have been identified in different sectors. This will also give a new direction and a fresh momentum to the overall infrastructure development of the country. It is often said that during crises, the emphasis should be given on infrastructure so that economic activity is speeded up and people get employment and it generates a cascading effect. Both small and large enterprises, farmers and the middle class benefit to a great extent.

And I want to recall one incident today. When Atal Bihari Vajpayee was the Prime Minister, he had started a programme with far-reaching impact

called the Golden Quadrilateral. He had taken the road network infrastructure to the next generation level. Even today, the country looks at the 'golden quadrilateral' with pride and feels yes, our country is transforming.

My dear countrymen,

Atal ji had done this work in his time but now we have to carry it forward. We must give it a new thrust. We cannot work in silos. We do not need a situation where in the infrastructure sector, road sector will work only for roads and the rail sector will work only for rail. There is no coordination between the railways and the roadways, between the airport and the port, between the railway station and the bus station—this sort of situation is not desirable. We must ensure that the infrastructure is a comprehensive and an integrated one. It should be complementary to each other. The rail should be complementary to the road, the road to sea port and the sea port to the airport. We are moving towards a multi-modal connectivity infrastructure for the new century. And this will give a new dimension. We have started the work with a great dream. And I believe that by eliminating silos, we will give a new strength to all these systems.

Along with this, our coastline has a very important significance in the world trade. While moving on with Port led development, in the coming days, we will focus on working towards building a modern state-of-art infrastructure towards the construction of four lane road across the entire coastline.

My dear countrymen,

Our scriptures said something very profound. It is said in our scriptures that- 'Samarthya mulam Swatantryam, Shram mulam Vaibhavam' means 'Capability is the source of freedom, and labour force is the source of grandeur, prosperity and progress of any nation.

Therefore, nothing can match the hard work of the common man, be it cities or villages. When a toiling society gets amenities, the struggles of life ease, everyday troubles are reduced and this helps in boosting their energy paying rich dividends.

In the last six years, several campaigns have been launched to improve the lives of the toiling citizens of the country be it about their own bank accounts, owning a *pucca* house, construction of such a large number of toilets, providing electricity connection in every house, providing a gas connection to free our mothers and sisters from the smoke, making efforts to provide insurance protection to the poorest of the poor, Ayushman Bharat Yojna to provide free treatment of upto five lakh rupees in the best of hospitals, connecting Ration shops through digital technology. A significant progress was made in the last six years to reinstate transparency and remove discriminatory practices so that facilities reach every poor person.

These instruments have also helped a lot in delivering the services seamlessly during the Corona crisis. During this period, we continued to provide free gas cylinders to crores of poor families, irrespective of whether they had ration

card or not the kitchen flames of more than 80 crores of my countrymen were kept alighted by supplying free food grains to the 80 crores countrymen; approximately 90 thousand crore rupees were transferred directly into the bank accounts. Just a few years ago, this would have been unimaginable that all hundred paise of a rupee disbursed from Delhi would reach the account of the poor. It was indeed beyond one's imagination hitherto.

Garib Kalyan Rojgar Abhiyan has been launched to generate employment in their own villages. We trust that our worker friends will be re-skilling and upskilling themselves. Having full faith in their efforts, relying on the skilled manpower, relying on rural and indigenous resources, we gave a clarion call “vocal for local” and “re-skill and up-skill” in an endeavor to empower our poor and our country's labour force.

Since the center of economic activity is the city, a scheme is being implemented for workers like street vendors etc who come from off villages to the cities for their livelihood, for providing finances directly by the banks. Lakhs of people have taken advantage of this in such a short span of time even during the period of the Corona crisis. Now they do not need to borrow money at high interest. The workers can now get their money with dignity and authority.

In the same way, when our workers migrate to the city, if they get good accommodation then their efficiency also increases. And keeping this in mind, we have formulated a major scheme for

arranging affordable housing for them inside the city, so that when the workers come to the city, they can focus, deliver and progress with full faith and commitment.

My dear countrymen,

This is also true and we have seen that there are some segments of the society which get left behind, are not able to come out of poverty in the country's march towards development, Similarly, there are some areas, places, terrains which get left behind. Balanced development is very much necessary to make India self-reliant. We have identified more than 110 aspiring districts which are lagging behind compared to an average district. We have to bring each and every parameter of those districts at par with the country's average. We are making every effort so that people of these 110 districts, which are lagging behind, have access to better education, better health facilities and have

opportunities for local employment.

My dear countrymen,

The priority of a self-reliant India is a self-reliant farming sector and self-reliant farmers. And we cannot ignore them. We have seen the condition of farmers. Various reforms have been undertaken since independence. We have to free them of all the shackles and we have done that.

You can't even imagine this. If you make soap, fabric or sugar in one corner you can sell it in any part of the country. But not many people know that our farmers could not sell their produce anywhere in the country and according to their will. He had to sell his produce at a notified area. We have eliminated all those restrictions.

Now India's farmer will be able to breathe free by selling his produce in any part of the country or the world according

to his own terms. We have emphasized on several alternative measures to increase the income of the farmer. We are constantly working to reduce the input cost of the farming. How can he be provided a solar pump instead of a diesel pump, how can the producer of food become an energy producer? We are working in a direction so that avenues like bee farming, fisheries, poultry, etc should be made available to him so that his income gets doubled.

Time demands that our agriculture sector becomes modern and there should be value addition, there should be food processing, food packaging. And it needs better infrastructure.

You must have seen that the Indian government has sanctioned 1,00,000 crore rupees for agriculture infrastructure even during the Corona pandemic. This infrastructure will be for the welfare of the farmers and they will be able to get better prices of their produce, and will be able to sell their produce in foreign markets. They will have greater reach to foreign markets.

There is a need to strengthen rural industries. Special economic zones will be created in the rural areas. A web of agriculture and non-agriculture industries will be created. We have tried to create FPO (Farmer Product Association) which will go a long way in their economic empowerment.

Brothers and sisters,

Last time, I had made an announcement for the Jal Jeevan Mission. It is completing one year. I am very proud

to tell you that our dream of making available pure drinking water to all the people is getting realized. The solution to several health problems is directly linked to the pure drinking water. It also contributes to that nation's economy. That's why we have started the Jal Jeevan Mission.

Today, I am happy to say that everyday we are able to supply piped-water to over one lakh houses. And in the last one year, we have been able to provide water to 2 crore families, especially to the tribals living in the forests and far-flung areas. A huge campaign has been run. And I am glad that today 'Jal-Jeevan Mission' has created an environment of healthy competition in the country. There is a healthy competition among the districts, among the cities and also among the states. Everyone is hoping that the Prime Minister's dream of 'Jal-Jeevan Mission' is accomplished at the earliest in their respective areas. The new strength of Cooperative and Competitive Federalism has been associated with the 'Jal Jeevan Mission' and we are moving forward with it.

My dear countrymen,

Whether it is the agriculture sector, the small scale industries sector or the people in services sector, almost all these people, in a way constitute a huge middle class of India. The professionals from the middle class have made a name for themselves in the world today. Our doctors, engineers, lawyers, scientists, from the middle class have made a mark in the world. Therefore, it is true that

whatever opportunities that the middle class gets, they make the most out of it and therefore the middle class needs freedom from government interference. The middle class must get more new opportunities and an open environment, and our government is constantly working to fulfil these dreams of the middle class. The middle class has the power to do miracles. So the middle class families get the greatest benefits of Ease of living. Cheap internet, affordable smartphones or cheap flight tickets under UDAN scheme or our highways or Information ways - all these things are going to increase the strength of the middle class. Today you must have seen that the prime dream of the middle class person who has come out of poverty, is to have a home; he wants an equal life. We have done a lot of work in the field of EMI in the country and as a result, the Home Loan rates have become cheaper. When someone takes a home loan, one can get a rebate of about 6 lakh rupees, by the time the loan is repaid. Recently, it was noticed that a lot of affected middle-class families have invested their money (to buy a house), but could not get the possession of the house due to lack of completion of the schemes and they were still living in a rented house. The Government of India has set up a special fund of 25 thousand crores rupees to complete the incomplete houses to ensure that middle class families get homes.

The rates of GST and the income tax have come down. Today, with these minimum establishment facilities, we are trying to take the country forward.

Bringing co-operative banks under the ambit of RBI, in itself is a guarantee for safety of the money of middle class families.

The reforms undertaken in the MSME sector and the agriculture sector, will directly benefit these hard-working middle class families. Consequently, our businessmen and small entrepreneurs will get the benefits of the special fund of thousands of crores of rupees. The strength and energy of the common Indian is the big foundation of the Atmanirbhar Bharat Abhiyan. Relentless work is going on at every level to maintain this strength.

My dear countrymen,

Education of the country is of great importance in building a self-reliant, modern, New India, an India which will be prosperous and happy. With this thought, we have become successful today in providing the country with a new National Education Policy after three decades.

Every nook and corner of India is welcoming it with renewed enthusiasm and a new vigour.. And this is the National Education Policy, which will connect our students with the roots. Alongside, it will help them become global citizens. The students will be well-rooted and still touching new heights.

You must have noticed that a special stress has been laid in National Education Policy on National Research Foundation because in order to progress, the nation needs to innovate. Higher the stress that will be laid on innovation and research, greater would be the strength to take India

forward in this competitive world.

Who would have thought that there would be online classes in rural areas and such a momentum would be created so fast? Sometimes, in the times of adversity, new revolutionary initiatives emerge with force. That's the reason we have witnessed how in this pandemic situation, a culture of online classes has emerged.

You can see how fast the online digital transactions are increasing. Look at BHIM UPI app.... Anyone would be immensely proud to know that we could make transactions of Rs 3 Lakh Crore in the last month alone through BHIM UPI.. This is an excellent example of how we have accepted the changing scenarios.

If you see, prior to 2014, only 5 dozen panchayats had the optical fiber network. However in the last 5 years, 1.5 lakh panchayats are connected with the optical fiber network which is helping us today, immensely. We are working on the goal of taking it to every panchayat and this work is in progress in the remaining one lakh panchayats. In these changing times it is essential that Rural India is also brought under the ambit of Digital India. There is a surge in the demand of online facilities among the rural population. Keeping this in view, we had earlier proposed the extension of connectivity to every panchayat and today I would like to assure you that we have decided that we will connect all our six lakh villages, with the optical fiber network. As the requirements have changed, so have our priorities. In over six lakh villages, thousands and lakhs of kilometers of optical fiber would be laid

down. We have decided that within 1000 days, we will complete the work of connecting over six lakhs villages with optical fiber.

In this era of technology, our dependence on cyberspace is going to increase multifold. However, cyberspace offers its own risks and threats. The world is very well aware of these. It can be a threat to the social fabric of our country, our economy and can even threaten the development of our nation; we are very well-aware of that. India is very cautious and is planning to take steps to combat these risks. Not only this, new systems are continuously being developed. In a short span of time, a draft of new cyber security policy would be presented to the nation. In the coming times, we will have to integrate everything and then work within the framework of this cyber security. We will formulate strategies to move forth.

My dear countrymen,

Whenever opportunities were given to women power in India, they have brought glory to the country and have strengthened the country. Today the country is committed to providing equal opportunities for employment and self-employment to women. Today women in India are working in underground coal mines. Today, the daughters of my country are also flying the fighter planes and touching the skies. Today India is among those countries of the world where women are being included in the combat role in the Navy and the Air Force. We have taken the decision of providing 6 months paid leave to pregnant women, liberating our Muslim

sisters and women of our country from the suffering of triple talaq and the economic empowerment of women.

Out of the 40 crore Jan Dhan accounts, 22 crore accounts belong to our sisters. During the Corona period, about 30 thousand crore rupees have been deposited into the accounts of these sisters. Around 25 crore MUDRA loans have been given, in which 70% of the loans have been given to our mothers and sisters. Under the Pradhan Mantri Awas Yojana, maximum registration is also being done in the names of women.

My dear countrymen,

This government has also been persistently concerned about the better healthcare for poor sisters and daughters. We have done a huge job to providing sanitary pads at one rupee each in Janaushadhi Kendra. In a short span of time, more than 5 crore sanitary pads have been delivered to these poor women from 6000 Janaushadhi Kendras.

We have formed a committee to ensure that the daughters are no longer suffering from malnutrition and they are married off at the right age. As soon as the report is submitted, appropriate decisions will be taken about the age of marriage of daughters.

My dear countrymen,

It is very natural that health sector draws attention in this period of Corona pandemic. As such, the biggest lesson of self-reliance has been taught to us by the Health Sector during this crisis. And to achieve that goal we also have to move

forward.

You see, earlier there was only one Lab for testing in our country. Today there is a network of 1400 Labs, spread in every corner of the country. In the initial stage of the Corona crisis, only 300 tests could be conducted in one day, but in such a short span of time, our people have shown that today we can conduct more than 7 lakh tests per day. We started with 300 and reached 7 lakhs!

We are making continuous efforts towards modernization, construction of new AIIMS and new Medical Colleges in the country. In five years, the MBBS and MD seats have been increased for more than 45 thousand students. There are more than 1.5 lakh wellness centers in the villages and about one-third of them are already functional, which have helped a lot during this Corona pandemic. The Wellness Centers in the Corona times have helped the villages immensely.

A massive campaign is going to start in the health sector from today and technology will also play a major role in it.

The National Digital Health Mission is also being launched from today. It will bring a new revolution in India's Health Sector. Technology will be used prudently to reduce the challenges in treatment.

Every Indian will be given a Health ID. This Health ID will work like a Health Account of every Indian. This account will contain your details of every test, every disease, the doctors you visited, the medicines you took and the diagnosis. When and what was the report, all such

information will be incorporated in the Health ID.

The National Digital Health Mission will eliminate all these difficulties related to appointment with a doctor, depositing money, making a slip in the hospital, etc. We are devising a system which will help each and every citizen to make a better and informed decision.

My dear countrymen, there is a curiosity among everybody when the Corona vaccine will be ready. This is natural. This anxiety is there in everybody and everywhere in the world.

I would like to tell my countrymen that our scientists are dutifully engaged in the laboratories. They are putting in great efforts. At present, testing for three vaccines is in different stages in the country. Once we get a green signal from our scientists, we will launch massive production of the vaccine. We have made all the preparations. We have drawn an outline to ramp up the production of the vaccines and to make it available to each and every person in the shortest possible time.

My dear countrymen, there are different scenes of development in different regions in our country. There are some regions which are well developed, whereas there are others which are left behind. I think this imbalance is an important challenge to make India self-reliant. As I said earlier, we are emphasizing on 110 ambitious districts. We want these districts to be at par with the developed ones. Our priority is to create an ecosystem for development and improve

connectivity.

Now you see. The western, central and eastern parts of the country -- be it eastern Uttar Pradesh, Bihar, Northeast, or Odisha -- have abundant reserves of natural wealth. The people of these regions are very capable, strong and talented, but there has been an imbalance in these regions due to the absence of opportunities. Therefore, we have taken several measures. We are developing Eastern Dedicated Freight Corridor, connecting the eastern region with the gas pipe line, developing new rail infrastructure and new ports. We are developing the entire infrastructure for the development in a very holistic way.

Similarly, Leh-Ladakh, Jammu-Kashmir have been freed from Article 370. It has been one year now. This one year is a major milestone in the new development journey of Jammu-Kashmir. This has been a year of providing basic rights to the women and to the Dalits. It has also been a year for our refugees to live a life of dignity. We have launched several campaigns like Back to Villages so that the villages get benefited. Today, the Ayushman Scheme is being used in the best possible way in the region of Jammu-Kashmir and Ladakh.

My dear countrymen, the true strength of our democracy lies in the elected local bodies. It is a matter of pride for us that the peoples' representatives of the local units in Jammu and Kashmir are actively pursuing a new era of development with activism and sensitivity. I congratulate their "panch, sarpanch"(village headmen) for their

active participation in this development journey.

The delimitation exercise is going on in Jammu-Kashmir under the leadership of a retired chief justice of the Supreme Court. We want early completion of the delimitation exercise so that there are early elections, there should be Jammu-Kashmir MLAs, its own cabinet, its Chief Minister so that it can march towards development with a new vigour. India is committed to it and is making all efforts in this regard.

We have taken a bold step to meet the aspirations of the people of Ladakh by making it the Union Territory which has been their demand for the last several years. Nestled in the heights of the Himalayas, Ladakh is progressing towards new heights. Work is going on for a central university, setting up new research centres, new courses for hotel and management. Plan is also under way for the creation of 7,500 MW Solar Park. But, my dear countrymen, Ladakh has several specialties. Not only do we have to preserve them, we have to nurture them as well. As Sikkim has made its mark as an Organic State in the northeast, Ladakh, Leh and Kargil can also create their own niche as a Carbon Neutral unit. Indian government has joined hands with the locals of the region to create a new model of development as per their own requirements.

My dear countrymen, India has shown that the march towards development is possible by balancing the environment. Today India is inspiring the entire world with its vision of one world,

one sun and one grid, particularly in the field of solar energy.

India has established itself as one of the five countries in the world in the generation of renewable energy. India is both aware as well as involved in finding solutions to pollution. We are leaving no stone unturned whether it is the Swachh India campaign, smoke-less cooking gas, LED campaign, CNG-based transportation, or electric mobility. We are emphasizing on increasing the use of ethanol to reduce pollution caused due to petrol. What was the condition of ethanol in our country five years ago? Five years ago, there used to be only 40 crore litre production of ethanol. It has risen to five times in the last five years. Today, we are producing 200 crore litres of ethanol which is proving to be very helpful towards our environment.

My dear countrymen, we are working on a holistic approach to reduce pollution in the select 100 cities through an integrated approach and modern technology with people's participation.

My dear countrymen,

India can say this proudly that it is one of the very few countries where its area under forests is expanding. India is committed towards the promotion and conservation of its Biodiversity. We have successfully carried forward Project Tiger and Project Elephant. The Tiger population has increased in India. In the coming days, we are starting 'Project Lion' for the Asiatic Lions. And under Project Lion the work on the required infrastructure for the protection and security of Indian lions and

in particular, the special type of health infrastructure required will be undertaken. And emphasis will be laid on Project Lion.

Also, one more work we want to promote and that is - Project Dolphin. We will focus on both types of dolphins living in the rivers and in the seas. This will also give a boost to Biodiversity and also create employment opportunities. This is also a center of attraction for tourism. So, we are going to move forward in this direction too.

My dear countrymen,

When we embark on an extraordinary journey with an extraordinary goal, the path will also be full of challenges and these challenges too are extraordinary. Notwithstanding the recent adversities, there have been misadventures along the border which threw a challenge to the country. But whoever tried to threaten the sovereignty of our country right from the LOC to the LAC, the army of the country, our brave soldiers have given a befitting reply.

The whole country is full of zeal, driven by conviction and moving forward with unwavering devotion to protect India's sovereignty. The world has seen what our brave Jawans can do in Ladakh,, what the country can do to defend its resolve. Today, I pay obeisance to all the brave men and soldiers who sacrificed their lives for the motherland from the ramparts of the Red Fort.

Be it terrorism or expansionism, India is fighting against it valiantly. Today, the

world's faith in India has become stronger. Recently, as a non-Permanent member of the United Nations Security Council, 184 countries out of 192 supported India. This is a matter of great pride for every Indian. This is an example of how we have made our place in the world. And this is possible only when India itself is strong, India is powerful and safe. With this thinking, work is being carried out on many fronts today.

My dear countrymen,

We are establishing deep relations based on security, development and trust with our neighbouring countries whether connected by sea or land. India has been making continuous efforts to deepen its decades-old cultural, economic and social ties with its neighbouring countries.

The world's one-fourth population lives in South Asia. We can create countless opportunities for the welfare of such a large population through cooperation and partnership. There is a huge and significant responsibility on the part of all the leaders of the countries in this region for the progress and development of such a vast population. I call upon all the people, political leaders, parliamentarians and intellectuals of South Asia to fulfil their responsibility. The peace and harmony in this entire region will be of immense help to the welfare of humanity. The interests of the entire world are intertwined with it.

Today, neighbours are not the only ones with whom we share geographical boundaries, but also those with whom we have close and harmonious relations. It is my pleasure that India has strengthened its

relationship with all the countries in its extended neighbourhood in the last few years. The political, economic and human relations with the countries in West Asia have progressed manifold. Trust has increased manifold. The economic ties, particularly in the field of energy sector, are very important with these countries. There are a large number of people from India who are working in many of these countries. India is indebted to all these countries for their help to the Indian community during the Corona crisis by honouring India's request. I want to personally thank them.

Similarly, our ASEAN countries in the east, who are our maritime neighbours, also hold special importance. India has thousands of years old religious and cultural ties with these countries. The traditions of Buddhism connect us with them. Today, India is strengthening its cooperation not only in the field of security but also in the areas of marine wealth with these countries.

My dear citizens, India has as much commitment to make its security apparatus & armies strong as it has for establishing peace & harmony. Mammoth steps have been taken in the field of defence production, to make self-reliant India. Recently, we have put a stop on the import of more than 100 military equipment. From missiles to light military helicopters, from assault rifles to transport aircraft - all will be made in India. Our Tejas is getting ready to equip itself as per the modern requirements, for putting up a show of its majesty, speed and strength.

Our borders and coastal infrastructure play a pivotal role in national security. Today emphasis is being laid on connectivity in every direction, be it at Himalayan peaks, or the islands of Indian Ocean. New roads are being constructed everywhere, from Ladakh to Arunachal Pradesh, keeping in mind national security.

Dear citizens, we have such a vast coastline. Alongside, we have over 1300 islands. Keeping the importance of a few identified islands in mind, we are developing them very fast. You must have seen, last week, five days back, a submarine optical fiber cable project in Andaman and Nicobar Islands was dedicated to the nation. Andaman and Nicobar islands will now have the internet facility just like Delhi and Chennai. Soon we will move forth in connecting Lakshadweep islands in the similar manner.

We are aiming at providing high speed internet connectivity to Lakshadweep islands in the next 1000 days. Alongwith the security and development, the youth residing in the coastal area and near borders mind, we are working on developmental projects and taking steps, starting a big campaign.

About 173 districts in our border areas, our coastal areas share their boundaries with some or the other nation's border or coastline. In the coming days, NCC would be extended in those border districts for the youth there. We will train around one lakh new NCC cadets from bordering areas, and we will work towards

the idea that amongst those, one-third of them are our daughters. The Army will train these border area cadets. The cadets for coastal areas would be trained by the navy and wherever there is an air base, the air force will train those cadets. The border and coastal areas would get trained manpower for disaster management, and the youth would also get skill training for making their career in the armed forces.

Dear citizens, last year in my address from the Red Fort, I had said that the previous five years were for meeting the prerequisites, and next five years would be for fulfillment of aspirations. In last year itself, the nation has achieved many big and important milestones. On the 150th year of Gandhi's birth anniversary, India freed its villages from open defecation. Be it the Citizenship Amendment Act for the refugees suffering due to their beliefs, reservation rights for Dalits/Backwards/Scs/STs/OBCs, historic peace agreement in Assam and Tripura, appointment of Chief of Defence staff for making the collective power of armies more effective, or the construction of Kartarpur Sahib Corridor in a record period, India has created history, it saw history being created, extraordinary feats were achieved.

Ten days ago, the construction of Lord Rama's magnificent temple in Ayodhya began. A peaceful culmination has been achieved to the age-old issue of Ram Janmbhoomi. The citizens of India have shown an exemplary restraint and wisdom, and acted responsibly. It is simply unprecedented and a motivating

factor for the future. Peace, unity and harmony- these are going to be the strengths of self-reliant India. This harmony, goodwill- this is the guarantee of prosperous future of India. We need to advance with this harmony. Each Indian must sacrifice something or the other in the magnanimous yajna for development.

India will move forward with new policy, new customs in this decade. Now banal won't work. The time has gone when casual attitude used to suffice. We are no less than anyone in the world. We will thrive to be the best. For this, we need to work towards being best in manufacturing, best in human resources, finest in governance, and aim to make a headway while achieving the best in every field by the 75th anniversary of our Independence.

Our policies, processes, products- everything must be par excellence, the best, and then only the idea of 'Ek Bharat Shreshtha Bharat' can be achieved. Today, again we need to take a resolve that we will fulfill the dreams of those who sacrificed their lives for our freedom. This pledge must be for 1.3 billion citizens, for our future generations, for their bright future, for the self-reliant India. We must take a pledge, we must take an oath, that we will contribute towards reducing the import dependence, we will empower our small-scale industries, we all will be vocal for local. we will innovate more, empower our youth, women, scheduled tribes, scheduled castes, specially differently-abled, economically weaker sections, villages, backward classes, and everyone.

Today India has made impossible possible at an extraordinary pace. With the same willpower, similar dedication, same passion, each Indian must move forward.

Soon we will be celebrating the festival of the 75th year of our Independence in the year 2022. We are just one step away. We must burn the midnight oil. This third decade of the 21st century should be the decade when we fulfill our dreams. Corona is a big hurdle, but not that huge that it can stop us from moving ahead on the victorious path of self-reliant India.

I can see the dawn of a new era for

India, rise of new self-confidence, a bugle of echo of self-reliant India. Once again, I extend my heartiest best wishes of Independence Day to all. Let's all come together, and raise our hands, and say with all the power at our command: -

Bharat mata ki Jai, Bharat mata ki Jai,
Bharat mata ki Jai

Vande Mataram, Vande Mataram,
Vande Mataram

Jai Hind, Jai Hind!

Everyone's support, everyone's development, everyone's faith,
everyone's effort - PM Narendra Modi

My dear countrymen!

Best wishes to all of you and those who love India and democracy from all over the world on the occasion of the Amrit Mahotsav of freedom, the 75th Independence Day.

Today, on the pious festival of the Amrit Mahotsav of freedom, the country is bowing to all its freedom fighters and brave heroes who continue to sacrifice themselves day and night in the defense of the nation. The country is remembering every personality, including the revered Bapu, who made freedom a mass movement, Netaji Subhash Chandra Bose, who sacrificed everything for the freedom, or great revolutionaries like Bhagat Singh, Chandrasekhar Azad, Bismil and Ashfaqulla Khan; Rani of Jhansi Lakshmibai, Queen Chennamma of Kittur or Rani Gaidinliu or the valour of Matangini Hazra in Assam; the country's

first Prime Minister Pandit Nehru ji, Sardar Vallabhbhai Patel, who integrated the country into a united nation, and Baba Saheb Ambedkar, who determined and paved the way for the future direction of India. The country is indebted to all these great personalities.

India is a land endowed with gems. I salute countless people from every corner of India whose names don't even figure in history, but who have built this nation and have also taken it forward in every period.

India has fought for the motherland, culture and freedom for centuries. This country never gave up the pain of slavery and the longing for freedom for centuries. In the midst of victories and defeats, the aspiration of freedom engraved in the mind was never diminished. Today is the time to bow down to the leaders of all these struggles, the warriors of centuries of struggle and they also deserve our

reverence.

Our doctors, nurses, paramedical staff, sanitation staff, scientists engaged in developing vaccines, millions of countrymen engaged with the spirit of service during this Corona global pandemic also deserve praise from all of us.

Today there are floods in some areas of the country, landslides have also occurred. Some sad news also keeps coming. The hardships of the people have increased in many areas. At such a time, both the Central and State Governments are with them in complete readiness. Today, the young athletes and our players who have brought laurels to India are also present in this event.

Some are present and sitting here. Today, I appeal to all the countrymen, those who are present here and all those who are present in this ceremony from

every corner of India, that in the honour of our players, for a few moments let's salute them with resounding clapping applause and show respect for their huge accomplishments.

Let us show our respect to the sports of India, youth of India and honour the young Indians who bring laurels to the nation. Crores of countrymen are showing respect to the youth of India, especially the athletes who brought honour to India with a thunderous applause. I can be proud that they have not only won our hearts today, but also inspired the youth of India and future generations with their huge achievements.

My dear countrymen,

While we celebrate our freedom today, we cannot forget the pain of partition that still pierces through the heart of all Indians. This has been one of the biggest tragedies of the last century. After

attaining freedom, these people were forgotten too soon. Just yesterday India has taken an emotional decision in their memory. We will henceforth commemorate August 14 as “Partition Horrors Remembrance Day” in the memory of all the victims of partition. Those who were subjected to inhuman circumstances, suffered torturous treatment, they could not even receive a dignified cremation. They must all remain alive and never get erased from our memories. The decision of celebrating “Partition Horrors Remembrance Day” on the 75th Independence Day is a befitting tribute from every Indian to them.

My dear countrymen,

For the country moving on the path of progress and humanity in the entire world, the Corona period came as a major challenge. Indians fought this fight with great grit and patience. We had many challenges. Countrymen performed extraordinarily in every field. It is due to the power of our entrepreneurs and scientists that the country is not dependent on anyone or any country for vaccines. Imagine for a moment, if we did not have the vaccine. How long did it take to get polio vaccine?

It was extremely difficult to get vaccines during such a major crisis, with pandemic plaguing the entire world. India might or might not have received it and even if it had received the vaccine there was no certainty of getting that in time. But today we can proudly say that the world's largest vaccination programme is being run in our country. More than 54 crore people have received the vaccine dose. Online systems like Cowin and digital certificates are attracting the world today. The way India has kept the stoves burning in the poor households by providing free food grains to 80 crore countrymen continuously for months during the pandemic is not only astonishing to the world but also a matter of discussion. It is true that fewer people have been infected in India as compared to other countries; it is also true that in comparison to the population of other countries of the world, we managed to save more citizens in India but it is not something to be proud of! We cannot rest

on these laurels. To say that there was no challenge, will become a restrictive thought in the path of our own development.

Our systems are insufficient compared to that of the rich countries of the world, we do not have what the rich countries have. Moreover, we also have a greater population compared to the other countries of the world. And our lifestyle is also different. Despite all our efforts, we could not save many people. So many children have been orphaned. This unbearable pain is going to remain forever.

My dear countrymen,

There comes a time in the

development journey of every country when the country redefines itself afresh and pushes forward with new resolutions. Today that time has arrived in the development journey of India. We should not limit the occasion of 75 years of Indian independence to just one ceremony. We must lay the groundwork for new resolutions and move forward with new resolutions. Starting from here, the entire journey of the next 25 years, when we celebrate the centenary of Indian independence, marks the Amrit period of creation of a new India. The fulfillment of our resolutions in this Amrit period will take us to the hundredth anniversary of Indian independence with pride.

The goal of 'Amrit Kaal' is to ascend to new heights of prosperity for India and the citizens of India. The goal of 'Amrit Kaal' is to create an India where the level of facilities is not dividing the village and the city. The goal of 'Amrit Kaal' is to build an India where the government does not interfere unnecessarily in the lives of citizens. The goal of 'Amrit Kaal' is to build an India where there is world's every modern infrastructure.

We should not be lesser than anyone. This is the resolve of the crores of countrymen. But the resolve remains incomplete until it is not accompanied by the extreme hard work and courage. Therefore, we have to realize all our resolutions with hard work and courage,

and these dreams and resolutions are also for effective contribution to a safe and prosperous world beyond our borders.

Amrit Kaal is of 25 years. But we don't have to wait for long to achieve our goals. We have to start now. We don't have a moment to lose. This is the right time. Our country also has to change and we as citizens have to change ourselves too. We also have to adapt ourselves to the changing era. We have started with the spirit of 'Sabka Saath, Sabka Vikas, Sabka Vishwas'. Today I am requesting from the ramparts of the Red Fort that 'Sabka Saath, Sabka Vikas, Sabka Vishwas' and now 'Sabka Prayas' are very important for the achievement of our goals. Crores of people are getting the benefits of many schemes

started in the last seven years. Every poor of the country knows the importance of Ujjwala to Ayushman Bharat. Today the speed of government schemes has increased and they are achieving the desired goals. We have progressed much faster than before. But it does not end here. We have to achieve saturation. All the villages should have roads, all the households should have bank accounts, all the beneficiaries should have Ayushman Bharat cards and all the eligible persons should get the benefit of Ujjwala Yojana and should have gas connections. We have to connect every entitled person with the government's insurance, pension and housing schemes. We have to move ahead with a mindset of cent percent achievement. Till now, no thought was given for our street vendors, who sell their goods on tracks, footpaths and carts. All these colleagues are now being linked to the banking system through the SVANidhi scheme.

Just as we have made electricity accessible to 100% households, and have made authentic efforts to construct toilets in 100% households, similarly, we now have to move ahead with the goal of achieving saturation of schemes, and, for this, we do not have to keep a distant

deadline. We have to make our resolutions come true within a few years.

Today, our country is working with speed on the Har Ghar Jal Mission. I am happy that in just two years of the Jal Jeevan Mission, more than four and a half crore families have started getting water from taps. They have started getting water from pipes. Receiving the blessings from crores of mothers and sisters, is our true capital. The biggest advantage of this 100 percent accomplishment rate is that no one remains deprived of the benefits of the government scheme. When the government operates with a target to reach the person in the last line, only then there is no discrimination and there is no scope for corruption.

My dear countrymen,

Providing nutrition to every poor person of the country is also a priority of this government. Malnutrition and lack of essential nutrients in poor women and poor children poses major obstacles in their development. In view of this, it has been decided that the government will fortify the rice given to the poor under its various schemes. Will give rice fortified with nutrition to the poor. Be it the rice available at the ration shop, the rice provided to the children in the mid-day meal, or the rice available through every scheme, it shall be fortified by the year 2024.

My dear countrymen,

Today, the campaign to provide better health facilities to every poor in the country is also going on at a fast pace. For this, important reforms have also been made in medical education. Equal attention has been paid to preventive healthcare. Simultaneously, there has been a substantial increase in the number of medical seats in the country. Under the Ayushman Bharat scheme, quality health services are being provided to every village in the country. Affordable medicines are being made available to the poor and middle class through Jan Aushadhi Yojana. So far, more than 75 thousand Health and Wellness centers have been set up. At the block level too,

modern health infrastructure is being exclusively set up on a network of good hospitals and modern labs. Very soon thousands of hospitals in the country will also have their own oxygen plants.

My dear countrymen,

To take India to new heights in the 21st century, the optimal utilisation of India's potential is the need of the hour.

This is extremely important. For this, we need to provide hand holding to the backward categories and sectors. Alongwith the concern of fulfilling the basic needs, reservation is being ensured for the Dalits, Backward classes, Adivasis and the poor people from general category. More recently, in the field of medical education, reservation has also been ensured for the OBC category in the All India quota. By formulating a law in Parliament, the right to make their own list of OBC has been given to the states.

My dear countrymen,

Just as we are making sure that no person or no class should be left behind in the development journey of society, similarly no part of the country, no corner of the country should be left behind. Development should be all-round, development should be all-pervasive, development should be all-inclusive. We are now accelerating the efforts that have been made in the last seven years to bring forward such backward areas of the country. Be it the eastern India, the North-east, Jammu-Kashmir, Ladakh including the entire Himalayan region, be it our coastal belt or the tribal region, these regions are going to turn into a major foundation for India's development in future, India's development journey.

Today a new history of connectivity is being written in the North-East. This is a

connectivity of both the hearts and the infrastructure. Very soon the work of connecting all the state capitals of the North-East with rail service is going to be completed. Under the Act-East Policy, today North-East, Bangladesh, Myanmar and South-East Asia are also being connected. Due to the efforts made in the past years, now the enthusiasm for the creation of Shreshtha Bharat and long lasting peace in the North-East has increased manifold.

There is a huge potential in the fields of tourism, adventure sports, organic farming, herbal medicine, and oil palm in the North East. We have to fully harness this potential and make it a part of the development journey of the country. And we have to complete this work within a few decades of the 'Amrit kaal'. Giving a fair opportunity to the capabilities of all is the true spirit of democracy. Be it Jammu or

Kashmir, the balance of development is now visible on the ground.

The Delimitation Commission has been constituted in Jammu and Kashmir and preparations are also going on for the assembly elections. Ladakh has also progressed towards its limitless possibilities of development. On one hand Ladakh is witnessing the creation of modern infrastructure, while on the other hand Sindhu Central University is also making Ladakh a center of higher education.

In this decade of the 21st century, India will further accelerate its efforts towards the Blue Economy. Along with aquaculture, we have to take full advantage of the new possibilities that are emerging in the cultivation of seaweed. The Deep Ocean Mission is the result of our ambition to explore the unlimited possibilities of the ocean. The mineral wealth which is hidden in the sea, the thermal energy which is in the sea water, can give new heights to the development of the country.

We have also awakened the aspirations of the districts of the country believed to have been left behind. Priority is being given to schemes related to education, health, nutrition, roads and employment in more than 110 aspirational districts in the country. Many of these districts are in our tribal areas. We have created a spirit of healthy competition for development among these districts. There is a strong competition going on in that direction so that these aspirational districts are at par with other districts of India.

My dear countrymen,

Capitalism and socialism are discussed a lot in the world of economics, but India also emphasizes cooperativism. Cooperativism is also compatible with our traditions and values. Cooperativism, in which the collective power of the masses becomes the driving force of the economy, is important for the country's grassroots level economy. Co-operatives are not just a system with a network of laws and rules, but co-operative is a spirit, culture, and a mindset of collective growth. We have

taken steps to empower them by forming a separate ministry. We have taken this step to empower the cooperative sector in the states.

My dear countrymen,

We will have to put all our efforts to build a new economy in the villages in this decade. Today we can see our villages changing rapidly. In the last few years, our government has provided roads and electricity to the villages. Now these villages have been strengthened with optical fibernetwork data and the Internet. Digital entrepreneurs are emerging in the villages also. The more than eight crore

sisters in the villages, who are associated with Self-Help Groups, design top-end products. Now the government will also prepare an e-commerce platform for their products so that get a big market in our country and abroad. Today, when the country is moving forward with the mantra of Vocal for Local, this digital platform will connect the products of women self-help groups with people across the length and breadth of the country as well as internationally. Their horizon shall thus get enhanced.

During Corona, the country has witnessed the power of technology, as well

as the commitment and capabilities of our scientists. The scientists of our country are working very diligently and strategically across the expanse of ?? the country. Now the time has come for us to integrate the capabilities of scientists and their suggestions in our agriculture sector as well. Now we cannot wait any longer. We have to leverage this strength. This will go a long way in increasing the production of fruits, vegetables and grains along with giving food security to the country. Thus we shall catapult ourselves strongly into the world orbit.

Amongst these concerted efforts, we need to take cognizance of a major challenge posed in our agriculture sector. Challenge of shrinking of land of villagers which is due to immense rise in population, and smaller land holdings due to the divisions happening in the family.

Farming land has shrunk alarmingly. More than 80 percent of the farmers of the country are those who have less than two hectares of land. If we see, 80 out of 100 farmers have less than two hectares of land i.e. the farmers of our country are practically in the small farmer category. Unfortunately, this segment remained eliminated from the benefits in our yesteryear's policies. They did not get their due importance. Now, keeping in mind these small farmers in the country, agricultural reforms are being undertaken, and critical decisions are being taken to benefit them.

Whether the improvement in the crop insurance scheme or important decision of increasing the MSP by one and a half times; a system to provide loans from banks at cheaper rates through Kisan Credit Card; taking the schemes related to solar power

to the farm, formulate a Farmer Producer Organization. All these efforts will increase the power of the small farmer. In the coming times, a campaign will also be launched to create a warehouse facility up to the block level.

Keeping in mind the small expenses of every small farmer, PM KisanSamman Nidhi Yojana is being run. So far, more than 1.5 lakh crores have been deposited directly into the bank accounts of more than ten crore farmer families. The small farmer is now our resolve and mantra for us. The small farmer becomes the country's pride.... the small farmer becomes the nation's pride. This is our dream. In the coming years, we will have to increase the collective power of the small farmers of the country. New facilities have to be

provided.

Today, Kisan Rail is plying on more than 70 rail routes of the country. Kisan Rail can help small farmers with this modern facility to reach far flung areas on a low cost of produce and transportation. Several products like Kamalam, Shahi litchi, BhutJolokiachillis, black rice or turmeric are being exported to different countries of the world. Today, the country feels delighted when the aroma of these products produced in the soil of India reaches different countries of the world. Today the world is developing a taste for the vegetables and food grains grown in the fields of India.

My dear countrymen,

Swamitva Yojana is an example of one of the initiatives taken to boost the capabilities of the villages today. We all know what happens to the price of land in villages. They do not get any loan from the banks on the basis of land, despite being the owners of the land because no work had been done in terms of documents of rural land for several years. People do not have this system. The Swamitva scheme attempted to change this situation. Today every village, every house, every land is being mapped through drones. The data and property papers of village lands are being uploaded online. With this, not only the disputes related to land in the villages are being ended, but a

system has also been created for the people of the village to get loans easily from the banks. The lands of village poor should be the foundation for development rather than disputes. And the country is moving in the same direction today.

My dear countrymen,

When Swami Vivekananda used to talk about the future of India, when he used to see the magnificence of Mother Bharati in front of his eyes, he used to say – Try to look into the past as far as possible. Drink the water of the ever new spring flowing back there, and after that, look ahead. Go ahead and make India brighter, greater & better than ever. In this 75th year of independence, it is our duty to move forward believing in the immense potential of the country. We have to work together for new generation infrastructure; we have to work together for world class manufacturing; we have to work together for cutting edge innovations; we have to work together for new age technology.

My dear countrymen,

The foundation of progress in the modern world lies on modern infrastructure. It also fulfills the needs and aspirations of the middle class. Weak infrastructure derails the pace of development and the urban middle class also suffers.

We have to work together for next generation infrastructure, for world class manufacturing, for cutting edge innovation and for New Age technology.

My dear countrymen,

Realizing this need, the country has demonstrated extraordinary speed and scale in every field from the seas, land to the skies. Rapid progress is underway whether it is development of new waterways or connecting new places with seaplanes. Indian Railways is also rapidly adapting to its modern avatar. The country has resolved to celebrate the Amrit Mahotsav of independence. You would know that we have decided to celebrate this Amrit Mahotsav of independence for 75 weeks. It started from 12th March and

will continue till 15th August, 2023. We have to move forward with new enthusiasm and, therefore, the country has made a very important decision.

During these 75 weeks of the Amrit Mahotsav of Independence, 75 Vande Bharat trains will connect every corner of the country. The pace at which new airports are being built in the country and the UDAN scheme connecting remote areas is unprecedented. We can see how better air connectivity gives new flights to people's dreams.

My dear countrymen,

Along with modern infrastructure, there is a great need for adopting a holistic and integrated approach in infrastructure construction. In the near future, we are going to launch the National Master Plan of Prime Minister 'Gati Shakti' which will be a huge scheme and fulfill the dreams of crores of countrymen. This scheme of more than 100 lakh crores rupees will result in new employment opportunities for lakhs of youth.

Gati Shakti will be a National Infrastructure Master Plan for our country which will lay the foundation of holistic Infrastructure and will lead to an integrated and holistic pathway to our economy. Right now, there is no coordination between our means of transport. Gati Shakti will break the silos, and will remove all these obstacles. This will reduce the travel time for the common man and the productivity of our industry will also increase. Gati Shakti will also go a long way in making our local manufacturers globally competitive and this will also develop new possibilities for

the creation of future economic zones. In this decade, the power of speed will form the basis of India's transformation.

My dear countrymen,

India will have to increase both its manufacturing and exports while moving ahead on the path of development.

My dear countrymen,

Treading ahead on the path of development, India will have to augment both its manufacturing and exports. You have witnessed, just a few days ago, India launched its first indigenous Aircraft Carrier INS Vikrant for trial in the sea. Today India is making its own indigenous fighter aircraft, its own submarine. Gaganyaan is also slated to hoist India's flag in space. This itself is evidential of our immense capabilities in indigenous manufacturing.

The country has also announced Production Linked Incentive to consolidate our Make in India campaign in the wake of the new economic conditions that have emerged due to Corona. The electronic manufacturing sector stands as an example of the change that is enforced through this scheme. Seven years ago we used to import mobile phones worth about eight billion dollars. However, now the import has reduced considerably, and today we are also exporting mobile phones worth three billion dollars.

Today, when our manufacturing sector is gaining momentum, our focus should be that whatever we make in India should be of highest quality standards so that we sustain in the global competition. Rather, if possible we should aim at going a step ahead and take proactive steps to

prepare ourselves for the global market. We have to target that. I want to say emphatically to all the manufacturers of the country, that you should never forget that the product you sell overseas is not just a product made by your company, it is the identity of our nation, India's prestige and the faith of all the citizens of our country.

My dear countrymen

That is why I tell all our manufacturers that each of your products is a brand ambassador of India. When someone will buy and use your product, the customer should say with pride- now "This is Made in India". That's the mindset we need. You all should now aspire to win over the global market. The government is fully with you in realising this dream.

My dear countrymen,

Today, several new start-ups are being formed in different sectors of the country and even in smaller tier 2, tier 3 cities of the country. They also have a big role to play in getting entry of their Indian products into the inter-state market. The government stands with all its might, with these start-ups. Whether it is giving them financial help, cash discounts, rules simplification for them, the government is fully with them. We have seen that thousands of new start-ups have emerged in this difficult period of Corona. They are moving forward with great success. Yesteryear's start-ups are becoming today's unicorns. Their market value is reaching thousands of crores of rupees.

These are new types of wealth creators in our country today. They are standing on their feet with the power of their unique

ideas, moving ahead and walking with the dream of conquering the world. They are new kinds of wealth creators. They are moving by the force of their unique ideas and a dream to win over the world. In this decade, we need to relentlessly work towards making India's Startups and the Startup Ecosystem the best in the whole world.

My countrymen,

Political will is needed to bring about major changes and reforms. Today the world is witnessing that there is no dearth of political will in India. Good and smart governance is required to implement the reforms. Today the world is also a witness to how India is writing a new chapter of governance here. In this decade of 'Amrit Kaal', we will give priority to Next Generation reforms... We will ensure that all the facilities like service delivery should reach citizens up to the last mile; it should reach the last person seamlessly, without hesitation or any kind of difficulty. For the overall development of the country, unnecessary interference by the government and the government processes in the lives of the people has to be ended.

Earlier, the government itself was on the driving seat. This might have been the demand of that time. But now the time has changed. In the last seven years, efforts have also intensified in the country to liberate the people of the country from the web of unnecessary laws and procedures. Till now hundreds of old laws of the country have been abolished. Even during this period of Corona pandemic, the government has abolished more than

15,000 compliances. Now you see, you might have experienced a lot of hassles and paperwork for a small government work. That has been the situation so far. We have ended 15,000 compliances.

Just imagine.....I want to give you an example. A law has been in place in India for over 200 years, 200 years i.e. even before 1857. As per this law, the citizens of the country did not have the right to create maps. Now imagine, it was in place since 1857. If you want to create a map, then seek permission from the government, if you want to print the map in a book, then seek permission from the government; there is a provision for arrest if the map is lost. Nowadays every phone has a Map app. Satellites have so much power! Then how will we take the country forward with a burden of such laws? It is very important to get rid of this burden of compliances. We have abolished several regulations in various sectors like mapping, space, information technology and BPO.

My dear countrymen,

Freedom from the clutches of unnecessary laws is very important for both Ease of Living as well as Ease of Doing Business. Our country's industries and businesses are experiencing this change today.

Today dozens of labor laws have been subsumed into just 4 codes. Tax related arrangements have also been made easy and become faceless now. We will have to work together so that such reforms are not limited to the government only, but percolate down to gram panchayats, municipal corporations and municipalities. I am calling upon, making

an earnest appeal to all the central and state departments to launch a campaign to review the existing rules and procedures. We have to get rid of every rule, every process which has become a hindrance and a burden for the people of the country. I know what has accumulated in 70-75 years will not go away in a day or in a year. But if we start working with a purpose, we will definitely be able to do this.

My dear countrymen,

Keeping this in mind, the government has also started Mission Karmayogi and Capacity Building Commission to increase people-centric approach in bureaucracy and improve their efficiency.

My dear countrymen,

Our education, education system, education tradition has a great role in preparing the youth, who are possessed with skill and ability, and who have the spirit to do something for the country. Today the country also has a new National Education Policy to meet the needs of the 21st century. Now our children will neither stop due to lack of skills nor will they be bound by language barriers. Unfortunately, there is a massive divide in our country regarding language. We have tied a huge talent of the country to the cage of language. One can find promising people in their mother tongue. If people from the vernacular medium come forward, their self-confidence will grow. Justice will be done to the potential of the poor children when they will become professionals by studying in their mother tongue.

I believe that language is the instrument of the fight against poverty in

the new National Education Policy. This new National Education Policy is also going to be a great tool to fight against poverty in a way. The basis of winning the war against poverty is also the education, prestige and importance of the vernacular language. The country has seen this in the playground... and we are experiencing that language has not become a barrier and as a result we have seen that the youth are playing and blossoming. Now the same thing will happen in other fields of life as well.

Another special feature of the new National Education Policy is that sports has been made a part of mainstream education instead of extra-curricular. Sports is also one of the most effective means of pursuing life. It is very important to have sports in life for perfection in life. There was a time when sports was not considered mainstream. Parents also considered indulging in sports as wastage of life. Now, there is a new awareness about fitness and sports. We have seen and felt this in the olympics. This change is a big turning point for us. That is why, we need to speed up and expand the campaign that is going on in the country for infusing talent, technology and professionalism in sports.

It is a matter of pride for the country that our daughters are performing in an unprecedented manner in the fields of education, sports, Boards results or olympics. Today daughters are raring to occupy their place. We have to ensure that women have equal partnership in every career and workspace. We have to ensure that they feel safe from roads to the

workplace and everywhere. There should be a feeling of respect for them and in this, the government, administration, police and justice system will have to perform their duty cent percent. We have to make this resolution, the resolution of the 75 years of Independence.

Today I am sharing good news with the countrymen. I used to get lakhs of messages from our daughters that they want to study in the Sainik Schools. The Doors of the schools should be opened for them. We did a pilot project in the Sainik School of Mizoram two-two and half years ago by giving admission to our daughters. Now the Government has decided that all the Sainik Schools will be open for the girls. Daughter too will study in all the Sainik Schools of the Country.

Environmental security is getting the same importance in the world as national security. Today India is a vibrant voice of environmental security, whether it is biodiversity or land neutrality, climate change or waste recycling, organic farming or biogas, energy conservation or clean energy transition. India's efforts in environment are giving results today. Increase in forest cover, number of national parks, increase in number of tigers and Asiatic lions are a matter of happiness for the countrymen.

Among all these successes one truth needs to be understood. India is not yet energy independent. India today spends more than 12 lakh crore rupees annually for importing energy. For India's progress and to build a self-reliant India, India's energy independence is the need of the hour! Therefore today, India has to make a

resolution to make India energy independent before the completion of 100 years of independence and our roadmap is very clear for the same. It should be a gas based economy. There should be a network of CNG & PNG across the country. There should be a target of 20 percent ethanol blending. India is moving ahead with a set goal. India has also made a move towards Electric Mobility and the work on 100% electrification of Railways is also progressing at a fast pace. Indian Railways has set a target of becoming Net Zero Carbon Emitter by 2030. Besides these efforts, the country is also emphasizing on Mission Circular Economy. Our Vehicle Scrap Policy is a great example of the same. Today, India is the only country in the group of G-20 countries, which is moving fast towards achieving its climate goals.

India has set a target of 450 GW of renewable energy by the end of this decade - 450 GW by 2030. Of this, the target of 100 GW has been achieved by India ahead of schedule. These efforts are also instilling confidence in the world. The formation of the International Solar Alliance on the Global State is a great example of the same.

Of every effort being made by India today, the thing that is going to help India with a quantum leap in terms of climate is the field of ?? Green Hydrogen. To achieve the goal of Green Hydrogen, I am announcing the National Hydrogen Mission today with this tricolour as a witness. We have to make India a Global Hub for Green Hydrogen Production and Export in the 'Amrit Kaal'. This will not only help India to make a new progress in the field of energy self-reliance but will

also become a new inspiration for Clean Energy Transition all over the world. New opportunities from Green Growth to Green Job are opening up today for our start-ups & youth.

My dear countrymen,

Today, the 21st century India has the ability to create and achieve big goals as well. Today India is also solving those subject areas, which were hanging fires for decades and centuries. Be it a historic decision to abrogate Article 370, introduction of GST, a system that frees the country from the web of taxes, a decision regarding 'One Rank-One Pension' for our military friends, a peaceful solution to the Ram Janmabhoomi issue, we have seen it come true in a few years

India's willpower is realizing all the resolutions whether it is the Bru-Reang agreement in Tripura after decades, constitutional status to the OBC commission or the BDC and DDC elections in Jammu and Kashmir for the first time since independence.

Even in this period of Corona, record foreign investment is coming to India. India's foreign exchange reserves are also at an all-time high. India has also given the message of the might of New India to the enemies of the country by carrying out surgical and air strikes. It shows that India is changing. India can change. India can take the toughest decisions and it does not hesitate and stop in taking even the toughest decisions.

My dear countrymen,

The nature of global relations has changed after the Second World War. There is a possibility of a new world order

post Corona. The world has seen and appreciated India's efforts during Corona. Today the world is looking at India from a new perspective. There are two important aspects of this perception -- one is terrorism and the other is expansionism. India is fighting both these challenges and is also responding strongly in a restrained manner. Our defense preparedness has to be equally strong if India has to fulfil its obligations properly.

We are making constant efforts to provide new opportunities to our hardworking entrepreneurs and to encourage Indian companies to make the country self-reliant in the field of defence. I assure the country that we will leave no stone unturned to strengthen the hands of our forces engaged in the defense of the country.

My dear countrymen,

Today is also the birth anniversary of the great thinker of the country, Sri Aurobindo. His 150th birth anniversary will be celebrated in 2022. Sri Aurobindo was a visionary of India's bright future. He used to say that we have to be as powerful as we were never before. We have to change our habits. We have to re-awaken ourselves. These words of Sri Aurobindo remind us of our duties. We also have to think about what we are giving to the country as a citizen and as a society. We have always given importance to rights. They were needed during that period, but now we have to make duties paramount. Everybody will have to contribute in fulfilling the resolutions of the country. Every citizen will have to own this up.

Our country has initiated a campaign

of water conservation, so it is our duty to include saving water in our habits. If the country is emphasizing on digital transactions, then it is also our duty to do minimum cash transactions. The country has started the campaign of Local for Vocal, so it is our duty to buy as many local products as possible. To strengthen our vision of a plastic-free India of the country, it is our duty to completely stop the use of single use plastic. It is our duty not to throw dirt in our rivers, keep our sea shores clean. We also have to take the Swachh Bharat Mission to another new level.

Today, when the country is celebrating the Amrit Mahotsav on the occasion of 75 years of independence, it is the duty of all of us to join this event, participate in it enthusiastically, and keep kindling our resolutions again and again. Keeping freedom struggle in mind, whatever little you do... whatever... will be pure like a drop of nectar, and this Amrit Kumbh made by the pure efforts of many Indians will inspire the entire nation for years to come.

My dear countrymen,

I am not a fortune teller, I believe in action. I have faith in the youth of my country, I trust the sisters of the country, the daughters of the country, the farmers of the country, and the professionals of the country. This 'CAN DO' generation can achieve every goal imaginable.

I believe that in 2047, on the occasion of celebrating 100 years of independence... whoever will be the Prime Minister... whoever will be the Prime Minister after 25 years from today, when he will be

unfurling the flag... I say this with confidence today that he or she shall be chronicling those accomplishments in his speech about which the country has taken a vow today... This is my firm belief of victory.

Today whatever I am speaking of in the form of a resolution, whoever hoists the flag after 25 years, shall be speaking of the same in the form of accomplishments. The country would be singing its glory in the form of these accomplishments. Youth of the country of today, shall also see at that time how the country has achieved this glory.

In the 21st century, no obstacle can stop us from fulfilling the dreams and aspirations of India. Our strength is our vitality, our strength is our solidarity, our vitality is the spirit of nation first - always first. This is the time for shared dreams, this is the time for shared resolve, this is the time for shared efforts... and this is the time to move towards victory.

And so I say once again-

This is the time,

This is the time.. the right time!

India's precious time!

This is the time, the right time! India's precious time!

The power of countless arms,

The power of countless arms,

There is patriotism everywhere!

There is the power of innumerable arms, there is patriotism everywhere...

Come, rise and unfurl the Tricolour!

Come, rise and unfurl the Tricolour!

Turn the fate of India,

Turn the fate of India,

This is the time, the right time! India's precious time!

There is nothing..

There is nothing you cannot do,

There is nothing you cannot achieve,

You Rise...

You Rise and Begin,

Recognize your abilities,

Recognize your abilities,

Understand all your duties,

Understand all your duties!

This is the time, the right time! India's precious time!

When the country completes 100 years of independence, the goals of the countrymen must be turned into reality; that is my desire. With my best wishes, I once again congratulate all the countrymen on the 75th Independence Day! Say aloud with your fists up -

Jai Hind,

Jai Hind,

Jai Hind!

VandeMatram,

VandeMatram,

VandeMatram!

Long live Mother India,

Long live Mother India,

Long live Mother India!

Thanks a lot!

Pariivaarvaad & Corruption India's 2 Big Challenges: PM Narendra Modi

Best wishes to my dear countrymen on the momentous occasion of completion of 75 years of Independence. Many congratulations to all! It is heartening to see our tricolor being unfurled with pride, honor and glory, not only in all the corners of India, but also worldwide by Indians who love their country immensely. I extend my heartiest congratulations to all the people spread across the globe who love India. My heartfelt greetings to all my dear Indians on this Amrit Mahotsav festival of celebrating our freedom. This is a day of historic importance. This is an auspicious occasion to step forward on a new path, with a new resolution and a new strength.

In the pursuit of Independence, the entire period of slavery was spent in struggle. No part of India or any time period remained untouched by the freedom struggle against several centuries of slavery and marked by people

sacrificing themselves facing torture and making supreme sacrifice. Today is an opportunity for all of us countrymen to bow down and salute all such brave hearts, the legends of every sacrifice made by every great soul. This is an opportunity to also solemnly acknowledge their debt and pledge to fulfil their dreams at the earliest with deep resolve. All the countrymen are deeply indebted to Pujya Bapu, Netaji Subhash Chandra Bose, Babasaheb Ambedkar, Veer Savarkar, who devoted all their life on the path of duty towards the nation. The path of obligation has been their sole life path. This country is grateful to Mangal Pandey, Tatya Tope, Bhagat Singh, Sukhdev, Rajguru, Chandrashekhar Azad, Ashfaqulla Khan, Ram Prasad Bismil and countless such revolutionaries of ours who shook the foundations of British rule. This nation is grateful to those brave women, be it Rani Lakshmibai, Jhalkari Bai, Durga Bhabhi, Rani Gaidinliu,

Rani Chennamma, Begum Hazrat Mahal, Velu Nachiyar, who showed the mettle of women power of India. What is the resolve of India's 'Nari Shakti'? Every Indian is filled with pride while remembering the countless brave women who achieved the pinnacle of sacrifice.

Today is an opportunity to pay homage to countless such great men like Dr. Rajendra Prasad ji, Nehru ji, Sardar Vallabhbhai Patel, Shyama Prasad Mookerjee, Lal Bahadur Shastri, Deendayal Upadhyay, Jai Prakash Narayan, Ram Manohar Lohia, Acharya Vinoba Bhave, Nanaji Deshmukh, Subramania Bharati who fought the war of independence and built the country after independence.

When we talk about the freedom struggle, we cannot forget to acknowledge our tribal society living in forests. There are countless names like Bhagwan Birsa

Munda, Sidhu-Kanhu, Alluri Sitarama Raju, Govind Guru, who became the voice of freedom movement and inspired my tribal brothers and sisters, mothers and youth in the remotest jungles to live and die for the motherland. It has been the good fortune of the country that there have been many aspects of the freedom struggle. And one such aspect was when many such great men like Narayana Guru, Swami Vivekananda, Maharishi Aurobindo, Gurudev Rabindranath Tagore kept awakening the consciousness of India in every corner and every village of India, and kept this consciousness alive.

For the last year, we are witnessing how the country (is celebrating) the 'Amrit Mahotsav'. It all began with Dandi Yatra in 2021. The people held programs in every district, every corner, of India to enlarge the scope of goals of the 'Amrit Mahotsav' of Independence. This was perhaps for the

first time in history that such a huge and comprehensive festival for a single purpose was celebrated. An attempt was made in every corner of India to remember all those great men who did not find mention in history for some reasons or who were forgotten. Today, the nation sought out all such heroes and great men, selfless, brave men from every corner of the country and paid tributes to them. It was an opportunity to pay tributes to all these great men during the 'Amrit Mahotsav'.

Yesterday on 14th August, India also remembered the deep wounds of Partition on 'Partition Vibhishika Memorial Day' with a heavy heart. Crores of such people had endured a lot for the glory of the tricolour. They had endured so much due to their love for the motherland and they did not lose patience. Their determination to start a new life with their love for India is inspirational and worth saluting.

Today, as we are celebrating the 'Azadi Ka Amrit Mahotsav', it is an opportunity to recall the contributions made by those who lived and died for the country, dedicated their lives for the country during the last 75 years, those who protected the country and fulfilled the country's resolutions; be it the army personnel, police personnel, bureaucrats, public representatives, administrators of the local self-government, state administration or central administration. Today we must also recall the contributions made by the crores of citizens of the country who have done everything possible to take the country forward despite various challenges in 75 years.

My dear countrymen,

This journey of 75 years has been full of ups and downs. Amidst the shadow of good and bad times our countrymen have

accomplished various achievements; they have made efforts and have not given up. They didn't let the resolutions fade away. It is true that the hundreds of years of colonial rule had inflicted deep wounds on India and the sentiments of the Indians, but the people were resilient and passionate. And that's why, Indians managed to revive the nation despite scarcity and denigration. When the freedom struggle was in its final stages, all measures were taken to frighten, disappoint and frustrate the country. There were apprehensions that after independence when the British would leave, the country would be scattered and in shambles; people would die fighting internal wars; India would plunge into a dark age.

But they were not aware that this is the soil of India. This country has the unlimited potential to survive across centuries and influence even beyond the powerful rulers. It is as a result of such

immense capabilities and resilience that our nation has emerged strong despite facing innumerable adversities be it food crisis or war. We have aborted challenges hurled at us by terrorist activities which killed our innocent countrymen. We endured proxy war, natural calamities, successes and failures, hopes and despair yet remained undaunted at all such junctures. But even in the midst of these abysmal stages, India has been relentlessly progressing. India's diversity, which others once thought was a burden to India, is proven to be the priceless power of India. A strong testimony of its power.

The world was not cognizant that India has an inherent potential of strong culture and values, a bond of thoughts deeply embedded in mind and soul; and that is - India is Mother of democracy. And when those who have democracy pulsating in their minds walk with determination and resolve, it augurs doom

for the most powerful sultanates of the world. This Mother of Democracy, our India has proven to all that we have this invaluable strength.

My dear countrymen,

In the journey of 75 years, in the midst of hopes, aspirations, ups and downs, it is with everyone's effort that we could reach this far. And when in 2014, my countrymen gave me this responsibility, I was the first Indian born in free India, who got the privilege to sing praises of glory to my dear countrymen from the ramparts of the Red Fort. But whatever I have learned today is from all of you. I have been able to understand your happiness and sorrows. I could sense your soul calling about the hopes and aspirations you have for your country. With whatever I could embrace of your dreams, I immersed myself fully in empowering those countrymen during my tenure who were left behind and deprived

from being a part of the mainstream. Be they the marginalised, outcast, exploited, victimized, deprived, tribals, women, youth, farmers, or the divyang people. From the farthest of India's east or west, north or south, ocean beds or Himalayan peaks, I have dedicated myself to fulfil Mahatma Gandhi's vision of inclusion. I have committed myself to his vision of empowering and uplifting the person sitting at the last mile. I can see the fruition of this mission in the past eight years because of the experience gained over several decades of independence. We are embarking on the glorious years of 75 years today on Amrit Mahotsav. On the first morning of this Amrit Kaal I am filled with pride to see such an immensely endowed nation.

Dear countrymen,

I am witnessing the biggest fortune today that Indians have emerged as an

Aspirational Society. Being an aspirational society is the biggest asset for any nation. And we are proud that today every corner of India, every section and strata of our society is brimming with aspirations.

Every citizen of the country wants to change things, wants to see things change, but is not ready to wait. He wants these things to happen in front of his eyes and wants to do it as part of his duty. He wants speed, he wants progress. He is eager and excited to fulfill all the dreams cherished in 75 years before his eyes. It may cause problems to some people. Because when there is an aspirational society, then even the governments have to walk on the edge of the sword and also have to charge with the times. And I believe whether it is the central government, state governments, institutions of local self-government, no matter what kind of governance system, everyone has to address this aspirational

society and we cannot wait longer for their aspirations. Our aspirational society has waited for a long time. But now they are not ready to force their future generations to live in wait and hence the first dawn of this 'Amrit Kaal' has brought a huge golden opportunity for us to fulfill the aspirations of that aspirational society.

My dear countrymen,

Recently, we have seen and experienced one such force and that is the renaissance of the collective consciousness in India. The renaissance of such collective consciousness, a nectar of so many struggles for freedom, is now being preserved and compiled. It is turning into a resolution, the culmination of effort is reckoned and the path of accomplishment is visible. I think that this awakening of consciousness, this renaissance, is our greatest asset.

Look at this renaissance. Until 10th

August, people would not even be aware of the power within the country. But for the last three days, the way the country has set about celebrating the journey of the Tricolour, even the leading experts of social science can't imagine the power within my country which has been shown by the Tricolor. This is the moment of re-consciousness and renaissance. People are still to understand this. One can experience this consciousness when every corner of India comes out to observe 'Janata Curfew'. There is a feeling of consciousness when the country stands shoulder to shoulder with the corona warriors by clapping and clanging utensils. This consciousness is felt when the country goes out to greet the corona warriors by lighting a lamp. During Corona, the world was grappling with the confusion whether to take vaccines or not or whether the vaccines are useful or not. At that time, even the poor people of my country's villages surprised the world with

the administration of 200 crore vaccine doses. This is consciousness; this is potential, which has given new strength to the country today.

My dear brothers and sisters,

I can see an important potential. Like an aspirational society, like renaissance the attitude of the whole world towards India has changed in the same way after so many decades of independence. The world is looking at India with pride and with anticipation. The world has started looking for solutions to the problems on the soil of India, friends. This change in the world, this change in the thinking of the world is the result of our experience and journey of the last 75 years.

The world is observing the way we have started moving ahead with the resolution, and ultimately the world too is living with a new hope. The world has started realising where the power to fulfil

the expectations actually lies. I see it as triple power or 'tri-shakti' i.e. aspiration, re-awakening and the world's expectations. We are fully cognisant of this, today, my countrymen have a major role in awakening. 130 crore countrymen after several decades of experience have shown the world the importance of a stable government, the power of political stability, policies and how trust develops in the policies. The world too is now realising it. And now when there is political stability, dynamism in policies, speed in decision making, ubiquity and universal trust, then everyone becomes a partner in development.

We started our journey with the mantra of 'Sabka Saath, Sabka Vikas', but gradually the countrymen have added more colours to it with 'Sabka Vishwas and Sabka Prayas'. So, we have seen our collective power and collective potential. 'Azadi Ka Amrit Mahotsav' is being celebrated with the campaign to build 75 Amrit Sarovars in every district today. People from every village are joining the campaign and offering their services. With their own efforts, the people are running a massive campaign for water conservation in their respective villages. Therefore brothers and sisters, whether it is a campaign for cleanliness or the work for the welfare of the poor, the country is moving ahead with full force today.

But brothers and sisters, if we continue to glorify our 75-years of journey in the 'Azadi Ka AmritKaal' and keep patting our own backs, then our dreams might be pushed far away. So, even if the past 75

years have been wonderful, full of various challenges and certain unfulfilled dreams, yet today when we are entering the 'Azadi Ka AmritKaal', the next 25 years are very significant for our country. And that's why today as I am talking about the strength of 130 crore countrymen, witnessing their dreams and feeling their resolutions from the ramparts of Red Fort, I believe we must focus our attention on the 'Panch Pran' for the coming 25 years. You have to concentrate on your resolve and strength. And we must take up the responsibility of fulfilling all the dreams of the freedom fighters by embracing those 'Panch Pran' by 2047 when the country celebrates 100 years of independence.

Speaking of 'Panch Pran', the first vow is for the country to move ahead with a big resolve. And that big resolution is of a developed India; and now we should not settle for anything less than that. Big resolution! The second *Pran* is that in no part of our existence, not even in the deepest corners of our mind or habits should there be any ounce of slavery. It should be nipped there itself. Now, 100 per cent this slavery of hundreds of years has kept us bound, has forced us to keep our emotions tied up, have developed distorted thinking in us. We have to liberate ourselves from the slavery mind set which is visible in innumerable things within and around us. This is our second Pran Shakti.

The third *Pran* is that we should feel proud of our heritage and legacy. Since it is this same legacy which had given India its golden period in the past. And it is this

legacy that has an innate capability of transforming itself with time. It is this rich heritage that transcends tests of tide and times. It embraces the new. And hence we should be proud of this heritage.

Fourth *Pran* which is equally important is unity and solidarity. Amongst 130 million countrymen when there is harmony and bonhomie, unity becomes its strongest virtue. "Ek Bharat Shreshtha Bharat" – is one of the unifying initiatives to actuate the dream of the fourth *Pran*.

Fifth *Pran* is the duty of the citizens, in which even the Prime Minister, Chief Minister cannot be an exclusion as they are also responsible citizens and have a duty towards the nation. This virtue is going to be the vital life force if we want to achieve the dreams we have for the next 25 years.

My dear countrymen

When your dreams are big, your resolve is big, and therefore endeavours should also be bigger. Strength also adds up to a great extent. Recall the period of 40-42, it is difficult to imagine now how the country emerged from the shackles of the treacherous British rule. Some hands picked up brooms, while some chose spindles, while several chose the path towards satyagrah, some chose to struggle while many treaded the path of bravery of revolution. But the resolve of each was big—that of Freedom. Just see the power of their big goal— they achieved freedom for us. We became independent. Had their resolution would have been small and limited, we would have prolonged our days of struggle and slavery, but kudos to their indomitable spirit and big dreams,

we could finally attained our freedom.

My dear countrymen,

As we wake up to this auspicious morning of 76th Independence, we must resolve to make India a developed nation in the next 25 years. The youth of today, all of 20-22-25 years, who I can see here shall be a witness to the glorious centennial celebrations of Independence. You will be 50-55 years old then, that means this golden period of your life, these 25-30 years of your age is the time to fulfill the dreams of India. Take a pledge and walk with me, friends, take the oath of the Tricolor and let us all join with full strength. This should be our great resolve that my country will be a developed country, we will develop a people-centric system in every parameter of development and we will have every human being and his hopes and aspirations at our center. We know that when India makes great resolutions, it also implements them.

When I first spoke about cleanliness during my first speech, the entire country embraced it. Everyone moved towards cleanliness as per his capacity and there is now antipathy towards filthiness. This is the country which has done it, is doing it and will continue to do so in future also. When the world was in a dilemma, this is the country which crossed the target of 200 crore vaccinations in a time-bound manner and broke all the previous records. We are dependent on the fuel from the Gulf. We had decided how to move towards bio-oil. The 10 percent ethanol blending seemed like a very big dream. Old experiences showed that it was not possible, but the

country has realized this dream of 10 percent ethanol blending before time.

Brothers and sisters,

Providing electricity connection to 2.5 crore people in such a short time was not a small task, but the country has done it. Today the country is rapidly providing 'water from tap' to the homes of lakhs of families. Freedom from open defecation has become possible in India today.

My dear countrymen,

Experience tells us that we can achieve our goals once we are determined. Be it the goal of renewable energy, the intention of building new medical colleges in the country or creating a workforce of doctors, the pace has increased a lot in every field. And that's why I say that the coming 25 years should be of huge resolutions, this should be our life and this should be our pledge.

The second thing that I have mentioned is the mentality of slavery and the attitude of the country. Brothers, how long will the world continue to give certificates to us? How long will we live on the certificates of the world? Shall we not set our own standards? Can a country of 130 crores not make an effort to exceed its standards? Under no circumstances should we try to look like others. It should be our temperament to grow with our own potential. We want freedom from slavery. The element of slavery should not remain in our mind even under the distant seven seas, friends. And I look with hope the way the new National Education Policy has been formulated with a lot of brainstorming, with the exchange of ideas

from various people and is at the root of the country's education policy. The skill that we have emphasized is such a power, which will give us the strength to be free from slavery.

We have seen that sometimes our talent gets tied in the shackles of language. This is the result of slave mentality. We should be proud of every language of our country. We may or may not know the language, but we should be proud that it is the language of my country and it is the language given to the world by our ancestors.

Friends,

Today we are witnessing the structure of Digital India. We are looking at start-ups. Who are these people? This is that pool of talent who lives in Tier-2 and Tier-3 cities, or in villages and belongs to poor families. These are our youngsters who are coming before the world today with new discoveries. We have to give up the colonial-era mentality. Instead, we must rely on our capabilities.

Secondly, we must feel proud of our heritage. Only when we connect with our land, we will be able to fly high, and when we fly high, we will be able to provide solutions to the world too. We have seen the impact when we take pride in our heritage and culture. Today the world is talking about holistic health care. But when it talks about holistic health care, it looks towards India's yoga, India's Ayurveda and India's holistic lifestyle. This is our legacy that we are providing the world with. The world is being influenced by it today. Now look at our strength. We are

the people who know how to live with nature. We know how to love nature. Today the world is facing environment related problems. We have that legacy and the solutions to the problems of global warming. Our ancestors have given us the same. When we talk about an environment-friendly lifestyle and LIFE mission, we attract the attention of the world. We have this power. Coarse paddy and millets are household items. This is our heritage. Due to the hard work of our small farmers paddy flourished on small pieces of land. Today the world is moving ahead to celebrate the millet year at the international level. That means our heritage is being appreciated around the world today. Let us learn to be proud of it. We have a lot to offer to the world.

When it comes to social stress, people talk of our family values; whenever it comes to personal stress, people talk of yoga. When it comes to collective tension, the people talk of the family system of India. The joint family system is an asset. Due to the sacrifices made by our mothers and sisters over the centuries, the 'joint family system' has evolved as a legacy. This is our legacy. How can we not be proud of this heritage? We are those people who see Shiva in every living being. We are those people who see Lord Narayana in every man. We are people who call women 'Narayani'. We are people who see the divine in the plants. We are the people who consider the rivers as mother. We are those people who see Shankar in every stone. This is our power. It is our potential to see every river as a form of mother. Such

enormity of the environment is our pride! When we are proud of such heritage, the world too will feel proud of it.

Brothers and sisters,

We are the people who have given the world the mantra of "Vasudhaiva Kutumbakam". We are the people who believe in "Ekam Sadvipra Bahudha Vadanti".

In the period of 'holier than thou' mentality, today the world is facing a severe crisis due to conflicts caused by the attitude of one upmanship- the reason for all tensions. We have the wisdom to resolve this. Our scholars have said "*Ekam Sat Vipra Bahudha Vadanti*" meaning that absolute Truth is one but it is manifested differently. This is our glory. We are the ones who say "*yat pinde tat brahmande*", such a wise thought that Whatever is in the universe is in every living being. We were the proponents of such human values.

We are the people who have seen the welfare of the world; we have been on the path of collective good and individual good, not only for our people but the whole world by believing in "*sarve bhavantu sukhina?, sarve santu nirāmayā?*". It is ingrained in our values that we will pray that may all be prosperous and happy, may all be free from illness, may all see what is auspicious, and may no one suffer. It is our heritage to care for the happiness and good health of all. Hence, we should learn to honour and feel proud of our heritage and value system. It is the strength of our resolve that will be crucial in achieving the dreams in the next 25 years.

In the same way, my dear

countrymen,

Another very important issue is Unity and solidarity. We need to celebrate the diversity of our huge country. The peaceful co-existence of innumerable traditions and creeds are our pride. For us all are equal. No one is inferior or superior; all are our own. This feeling of oneness is important for unity. The foundations of unity can be laid in every home only if son and daughter enjoy equality. If the family seeds gender discrimination across its generations then the spirit of Unity can never be woven in society. Gender equality is our first stipulation. When we talk of Unity, why not have only one parameter or standard—that of India First. All my endeavours, everything that I am thinking, saying, envisioning or visualising is in accordance with India First. This way the path to Unity can be opened for all of us my friend. This is the mantra we need to embrace to bind all of us in oneness. I have full faith that we can thus diminish the discrimination prevalent in our society. We endorse the value of *Shramev Jayate* which means that it should be in our nature to respect the labourer.

But my brothers and sisters

From the ramparts of Red Fort, I also want to share one of my enduring pains. I cannot hold myself from expressing my pain. I am mindful that it may not befit the podium of the Red Fort. But I will still express my deepest feelings of agony to my countrymen. If I do not open up in front of the countrymen, then where will I say it after all? What I wish to share is that it hurts me to say that we have witnessed a

perversion in our day-to-day speaking, behavior. We have been casually using language and words that are insulting to women. Can we not pledge to get rid of everything in our behavior, culture and everyday life that humiliates and demeans women? Women's pride is going to be a huge asset in fulfilling the dreams of the nation. I see this power and therefore I am insistent on it.

Dear countrymen,

I will now talk about the fifth life force – pran which is the duties of citizens. While trying to understand all the countries in the world that have made progress; every country that has achieved something, even in personal life, few things emerged. One is disciplined life, and the other is devotion to duty. There should be success in the life of the individual, of the society, of the family, of the nation. This is the fundamental path and the fundamental vital force.

It is the job of the government to make efforts to provide 24 hours electricity but it is the duty of the citizen to save as many units as he can. It is the responsibility and efforts of the government to supply water to every field, but a voice should come from each of my fields that we will move forward by saving water by focusing on 'per drop more crop'. It is our duty to do chemical free farming, organic farming and natural farming. Friends, whether it is police or people, ruler or administrator, no one can be untouched by this civic duty. If everyone performs the duties of a citizen, I am sure that we can achieve the desired goals ahead of time.

My dear countrymen,

Today is also the birth anniversary of Maharishi Aurobindo. I bow at the feet of that great man. But we need to remember the great man who gave a call for 'Swadeshi to Swaraj' and 'Swaraj to Suraj'. This is his mantra. We all need to think how long we will be dependent on other people of the world. Can we outsource when our country needs food grains? When the country decided that we will meet our food requirements, did the country demonstrate it or not? Once we take a resolution, it is possible. And, therefore, 'AatmaNirbhar Bharat' becomes the responsibility of every citizen, every government and every unit of society. 'AatmaNirbhar Bharat' is not a government agenda or a government programme. This is a mass movement of society, which we have to take forward.

My friends, today we heard this sound after 75 years of independence for which our ears were yearning to hear. For the first time after 75 years, the Made in India cannon has saluted the Tricolour from the Red Fort. Will there be any Indian who will not be inspired by this sound? My dear brothers and sisters, today I want to congratulate the soldiers of the army of my country from my heart. I salute the way the army jawans have shouldered this responsibility of self-reliance in an organized way and with courage. The soldier of the army carries death in his hands. He stands firmly in the middle when there is no gap between death and life. The resolution of our country is not small when the armed forces make a list and decide not to import 300 defence

products.

In this resolution, I can see the seed of a bright future of 'Atmanirbhar Bharat' that will convert this dream into a banyan tree. Salute! Salute! Salute to my army officers!

I also want to salute the little children between 5 and 7 years of age. The nation's consciousness has been awakened. I have heard from countless families that 5-7 year old children tell their parents that they do not want to play with foreign toys. When a 5-year-old child makes such a resolution, it reflects the spirit of self-reliant India in him.

Speaking of the PLI scheme, one lakh crore rupees, people from around the world are coming to India to try their luck. They are bringing new technology along with them. They are generating new employment opportunities. India is becoming a manufacturing hub. It is building a foundation for a Self-reliant India. Be it manufacturing of electronic goods or mobile phones, today the country is progressing at a very fast pace. Which Indian wouldn't be proud when our Brahmos is exported to the world? Today the Vande Bharat train and our metro coaches are becoming objects of attraction for the world.

My dear countrymen,

We have to become self-reliant in the energy sector. How long will we be dependent on others in the field of energy? We should be self-reliant in the fields of solar energy, wind energy, and various other renewable energy sources like Mission Hydrogen, bio fuel and electric

vehicles.

My dear countrymen,

Today natural farming is also a way of becoming self-reliant. Today the factories of Nano Fertilizer have brought a new hope in the country. But natural farming and chemical-free farming can give a boost to self-reliance. Today, new employment opportunities in the form of green jobs are opening up very fast in the country. India has opened up 'space' through its policies. India has come up with the most progressive policy regarding drones in the world. We have opened up new doors of opportunities for the youth of the country.

My dear brothers and sisters,

I also call upon the private sector to come forward. We have to dominate the world. One of the dreams of a self-reliant India is to ensure that India does not lag behind in fulfilling the needs of the world. Even if it is the MSMEs we have to take our products to the world with 'Zero Defect - Zero Effect'. We have to be proud of Swadeshi.

My dear Countrymen,

Till today we always remember our revered Lal Bahadur Shastri ji for his inspirational clarion call of *Jai Jawan Jai Kisan* meaning "Hail the Soldier, Hail the Farmer". Later Atal Bihari Vajpayee ji added a new link of *Jai Vigyan* which meant "hail science" and we gave it utmost importance. But in this new phase *Amrit Kaal* now it is imperative to add *jai anusandhaan* that is "hail innovation".

Jai Jawan Jai Kisan Jai Vigyan Jai Anusandhaan.

I repose my utmost faith in our youth of the nation. Witness the power of

indigenous innovations. Today we have many success stories to show to the world - UPI-BHIM, our digital payment, our compelling position in the domain of Fintech. Today in the world, 40 percent of real time digital financial transactions are happening in my country. India has shown innovation prowess to the world.

My dear Countrymen,

Today we are all set to enter the 5G era. You don't have to wait too long before we match the global steps. We are ensuring that optical fiber reaches each and every village until the last mile. I am fully informed that the dream of Digital India will be attained through rural India. Today I am happy that four lakh Common Service Centers of India are being developed in villages which are being managed by the youth of that village. Nation can take pride in the fact that four lakh Digital Entrepreneurs are being nurtured in the villages, and the rural population is becoming accustomed to benefit from all the services. Such is the power of India to become a technology hub in itself.

My dear countrymen,

This Digital India movement of developing semiconductors, entering the 5G era, spreading the network of optical fibres is not just to establish ourselves as modern and developed, but it is possible because of three intrinsic missions. The complete transformation of the education ecosystem, revolution in health infrastructure and improvement in the quality of agricultural life will be possible only through digitalisation.

Friends,

I can foresee that India will march

ahead phenomenally in this decade which is hailed as the techade for humanity. It is a decade of technology. In the field of IT india has become a force to reckon with globally. We have the competencies to contribute in this techade.

Our Atal Innovation Mission, our incubation centres, our startups are developing a whole new sector, opening up new opportunities for the younger generation. Whether it is a matter of space mission, whether it is about our Deep Ocean Mission, whether we want to go deep into the ocean or we have to touch the sky, these are new areas, by which we are moving forward.

My dear countrymen,

Let us not forget this and India has seen this for centuries, while some model works are needed in the country, some great heights must be achieved, but at the same time we should remain rooted and grounded while accomplishing heights as a nation.

Potential of the economic advancement of India is dependent on the strength of the grassroot. Hence, we must acknowledge and strengthen the potential of our small farmers, entrepreneurs, small and medium sized enterprises, cottage industries, micro industries, street vendors, domestic labourers, daily wagers, auto rickshaw drivers, bus service providers etc. These form the largest population who need to be empowered. Being able to do so shall guarantee India's potential and therefore our efforts are going in the direction of giving maximum emphasis to this strata which is the fundamental grass root force of our

economic development.

My dear Countrymen

We have 75 years of experience, and we have also achieved many accomplishments in these 75 years. We have cherished new dreams and taken new resolutions in 75 years of experience. But, what should be the optimum outcome of our human resources for the 'Amrit Kaal? How to get the optimum outcome of our natural wealth? We have to move forward with this goal. I want to say something from the experience of the last few years. You must have seen the power of 'Nari Shakti' in courts who are working in the field of Law. Look at the public representatives in the rural area. Our 'Nari Shakti' is devotedly engaged in solving the problems of our villages. Look at the field of knowledge or science, the 'Nari Shakti' of our country is visible right at the top. Even in the police force, our 'Nari Shakti' is taking the responsibility of protecting the people. In every walk of life, whether it is the playground or the battlefield, the 'Nari Shakti' of India is coming forward with a new strength and a new belief. I can see the manifold contribution of 'Nari Shakti', my mothers, sisters and daughters, in the next 25 years compared to the contribution in the last 75 years of India's journey. And hence, it is beyond assessment. Everything is beyond your parameters. The more we pay attention to this aspect, the more opportunities and facilities we provide to our daughters, they will return us much more than that. They will take the country to a new height. If the considerable efforts of our 'Nari Shakti' are added to the hard work that is required to fulfill the dreams

in this 'Amrit Kaal', then it will take less hard work and our time limit will also be reduced. Our dreams will be more intense, vivacious and resplendent.

Therefore, friends, let's move ahead with our responsibilities. Today I also want to thank the framers of the Constitution of India for giving us the federal structure. Our dreams are bound to be realized if we walk shoulder to shoulder by maintaining this spirit and respecting its sentiments in this 'Amrit Kaal'. Programs may differ, working styles may differ, but resolutions can't differ, dreams for a nation cannot be different.

Let us move towards such an era. I remember the government at the Centre did not belong to our ideology when I was the Chief Minister of Gujarat. But I used to follow the same mantra that the progress of Gujarat is for the progress of India. India's progress should be at the core of our heart wherever we are. There are many states of our country, which have played a great role in taking the country forward, have led and worked as examples in many fields. This gives strength to our federalism. But today the need of the hour is that we need cooperative federalism as well as cooperative competitive federalism. We need competition for development.

Every state should feel that it is moving ahead, that it will race ahead by toiling hard. If a particular state has done 10 good tasks, others shall do 15 good tasks. If a state has completed a job in three years, others should complete the same job in two years. There should be an atmosphere of competition between the

states and all the units of the government which should strive to take us to new peaks of development.

My dear countrymen,

When we talk of the 25 years of Amrit Kaal, I know that there would be many challenges, limitations and problems. We do not underestimate these. We keep on looking for ways and are constantly striving but I wish to discuss two things here. There may be many issues to discuss but considering the time constraint, I would like to talk about two things right now. And I believe that because of all these challenges and problems if we do not take corrective steps while there is still time during 25 years of 'Amrit Kaal', then it could take a turn for the worse. So, I do not want to discuss everything but would definitely want to focus on two issues. One is corruption and the other is nepotism and the dynasty system. In a democracy like India where people are struggling with poverty and do not have a place to live, there are people who do not have a place to keep their ill-gotten money. This is not an ideal situation. So we have to fight against corruption with all our might. In the last eight years, we have been successful in working for the betterment of the country by saving two lakh crore rupees which used to go into the wrong hands, using all the modern systems like Direct Benefit Transfer, Aadhaar and Mobile. Those who fled the country after looting banks during the tenure of the previous government, we have seized their property and are trying to get them back. Some have been forced to go behind the bars. We are trying to ensure that those who looted the country are

compelled to return.

Brothers and sisters,

I can clearly see that we are entering a crucial period against corruption. Even the big ones will not be able to escape. With this spirit, India is now stepping into a decisive period against corruption. And I am saying this with a great responsibility from the ramparts of the Red Fort. Brothers and sisters, the corrupt are eating away the country like termites. I have to fight against it, intensify the fight and have to take it to a decisive point. So, my 130 crore countrymen, please bless me and support me! Today I have come to seek your support and cooperation so that I can fight this battle. I hope the country becomes victorious in this war. The lives of the ordinary citizens have been ruined by corruption. So, I want to make sure that the ordinary citizens are once again able to live with dignity. My dear countrymen, it is a matter of great concern that although abhorrence of corruption in the country is visible and expressed, sometimes the generosity towards the corrupt is shown which is not acceptable in any country.

And many people have gone so shameless that despite being convicted in court, having been proved corrupt, having been sentenced for imprisonment, while still serving in jail, they continue to glorify, take pride and continue to elevate their status. Unless there is hatred towards filth in the society, the consciousness for cleanliness does not arise, unless we develop hatred towards the corrupt and corruption, until we relegate these people to social shaming, such mentality will not change. And that's why we need to be very

aware of corruption and corrupt people.

Another point to highlight is rampant nepotism. And whenever I talk about nepotism or dynasty, people think I am talking only in the context of politics. Not at all. Unfortunately, it is being nourished in other Indian institutions as well. Family bias Nepotism has gripped many of our institutions today. This is sadly harming the immense talent pool of our country. The future potential of my country is suffering. Those who are legitimate contenders of these opportunities and are genuinely eligible get sidelined due to nepotism. This is a good reason for corruption. Since they feel that they stand no chance to avail opportunities as per norms, these potential and deserving candidates resort to paying bribes to get a job. All of us have to work hard on fighting Nepotism by becoming more aware and creating an antipathy for this. Only such efforts can save our institutions and ingrain ethical behaviour in our future generations. This is mandatory to ensure a bright future of our institutions. Similarly, in politics too, family bias or dynasty has done the most injustice to the country's strength. It becomes a way to benefit only the family and has no connection towards the national good.

And therefore, while remembering the Constitution of India, standing under the tricolor from the ramparts of the Red Fort, I want to say with an open heart to all the countrymen- let us all join hands for the purification and cleansing of Indian politics and for the cleansing of all the institutions of India, we have to liberate the country from this family mentality and

move towards taking the country forward on the basis of merit. It is more imperative now than ever. Otherwise, everyone will carry heavy resentment that s/he was deserving but could not succeed as there was no family member vouching for them in the ecosystem. Such a mentality is not good for any country.

Dear youth of my country, for your bright future, for your dreams, I seek your support in the fight against nepotism. I want your support in the fight against dynastic politics. I consider this as my constitutional responsibility. The responsibility of a democracy. I believe in the power of words spoken from the ramparts of this Red Fort. And hence I request you to support this opportunity. We have noticed this in the accolades we received at the sports world in the last few days. It's not that we did not have such great talent in the past. It is not that our sons and daughters, the youth of India, are not achieving anything in the world of sports. But sadly they have been pushed out due to the nepotism channel. The ones that qualified to reach the competition in other countries were least bothered about winning medals for the country. But when transparency was reinstated, selection was on the merit of the sportsperson and the talent was honoured on the playgrounds. It is a moment of pride today to see the tricolor flying high and the national anthem reverberating at the stadiums globally.

One feels proud when there is freedom from dynasty and nepotism, and such results come along. My dear countrymen, there are many challenges no doubt. But if there are crores of problems before this country, then there are also

crores of solutions and I have faith in 130 crore countrymen. When 130 crore countrymen take one step ahead with a set goal and the commitment to resolve, India moves 130 steps forward. We have to move forward with this capability. This is the first dawn of the 'Amrit Kaal' and we should not forget a single moment for the next 25 years. To live for the motherland each day, every moment of time and every particle of life will be our true tribute to the freedom fighters. Only then, the virtuous remembrance of all those who contributed in taking the country to this point in the last 75 years will be of use.

I urge the countrymen to start the 'Amrit Kaal' today by nurturing new possibilities, realizing new resolutions and moving ahead with confidence. The 'Amrit Mahotsav' of freedom has turned in the direction of 'Amrit Kaal' and, therefore, 'Sabka Prayas' is necessary in this 'Amrit Kaal'. 'Sabka Prayas' is going to yield this result. The spirit of Team India is going to take the country forward. This Team India of 130 crore countrymen will realize all the dreams by moving forward as a team. With this belief, speak with me,

Jai Hind!

Jai Hind!

Jai Hind!

Bharat Mata ki – Jai!

Bharat Mata ki – Jai!

Bharat Mata ki – Jai!

Bharat Mata ki – Jai!

Vande Mataram!

Vande Mataram!

Vande Mataram!

Thanks a lot!

Prime Minister Shri Narendra Modi from the ramparts of Red Fort on the occasion of 77th Independence Day

My beloved 140 crore family members,

World's biggest democracy and in the context of population as well, we are trusted for being number one. Such a humongous nation is today celebrating the festival of independence with its 140 crore brothers and sisters and all family members. On this momentous and sacred occasion, I extend my greetings to each and every citizen of the country, to each one who loves, respects and takes pride in our nation India.

My dear family members,

The Non-cooperation / Civil Disobedience and Satyagraha Movement under the leadership of our 'pujyaBapu' revered Mahatma Gandhi ji, bravehearts like Bhagat Singh, Sukhdev and Rajguru, and their generation, there will hardly be any person who has not contributed to the

independence of the country. Today I respectfully pay homage to all those who contributed and sacrificed their lives during our freedom movement. I humbly bow down to their penance in giving us a free nation.

Today, 15th August, is also the 150th birth anniversary of Sri Aurobindo, the great revolutionary and pioneer of spiritual life. It is also the 150th birth anniversary of Swami Dayanand Saraswati ji. This year our nation is going to celebrate with great fervor, the 500th birth anniversary of the iconic women warrior Rani Durgawati. We will also be remembering the premier of 'bhakti and yog' Meerabai, on the occasion of 525th years of her life immersed in spiritualism. Our country will be celebrating a milestone of 75th year on next 26th January which is our Republic Day. There will not be a

bigger day to commit to national development, with new inspirations, new consciousness, new resolutions, as the country opens up immense possibilities and opportunities.

My dear family members,

Unfortunately, this time the natural calamity created unimaginable distress in many parts of the country. I express my condolences to all the families who have suffered in this crisis and assure that the state in tandem with the central government will leave no stone unturned to stand by you and resolve all those troubles at the earliest.

My dear family members,

In the past few weeks, particularly in Manipur in the North-East, and in some other parts of India, there has been a spell of violence, where many people lost their lives, and the dignity of mothers and daughters was violated. However, in the

last few days, we have been hearing continuous reports of peace, and the entire nation stands with the people of Manipur. The people of Manipur have maintained peace in the past few days, and they should continue to foster that peace, as it is the path to resolution. Both the state and central governments are working together to find solutions to the issues and will continue to do so.

My dear family members,

When we look back at history, there are moments that leave an indelible mark, and their impact lasts for centuries. Sometimes, these events might seem small and insignificant at the beginning, but they lay the roots for numerous problems. We all know that our country was invaded 1000-1200 years ago. A small kingdom and its king were defeated. However, we couldn't have known that this event would lead India into a thousand years of

subjugation. We got ensnared in slavery, and whoever came, looted us, and ruled over us. What an adverse period it must have been, that thousand-year span.

My dear family members,

An event might seem small, but its effects can persist for a thousand years. Today, I want to mention this because during this phase, India's brave souls from across the country continued to keep the flame of freedom burning, and establish a tradition of sacrifice. Mother India stood up to break chains, to shatter shackles, and the women power, youth power, farmers, and people from villages, workers and every Indian who lived, breathed, and strived for the dream of freedom was ready. A formidable force was ready for sacrifices to attain freedom. Numerous great souls, who spent their youth in prisons, were relentlessly striving to break

the chains of slavery and for the freedom of the country.

My dear family members,

That widespread consciousness, the all-encompassing form of sacrifice and penance, instilled a new belief in the hearts of the masses, and in 1947, the country finally achieved independence, fulfilling the dreams nurtured during a thousand years of subjugation.

Friends,

I am talking about the events of a thousand years ago for a reason. I am witnessing another opportunity before our country, a time when we are living in such a period, when we have entered such an era. It is our good fortune that either we are living in youth or we have taken birth in the lap of Mother India in the first year of 'Amrit Kaal'. And mark my words, my dear family members, the actions we take,

the steps we take, the sacrifices we make, the penance we undertake in this era will define our legacy.

Sarvajan Hitay, Sarvajan Sukhay; We will take decisions one after the other, and the golden history of the country for the next 1000 years is going to emerge from it. The events taking place in this period are going to impact the next 1000 years. The country, which has come out of the slave mentality and is dedicated to the 'Panch-

which a new trust, a new hope and a new attraction has emerged all over the world towards India, towards the potential of India, and the world can see a spark for itself in this beam of light that is emanating from India. A new trust is growing around the world.

We are fortunate that we have inherited certain things from our ancestors and even the present era has created certain other things. Today we have

Pran' or the five resolutions, is moving forward today with a new self-confidence. The nation is working wholeheartedly to fulfil the new resolutions. My Mother India which was once a powerhouse of energy, but was buried underneath a pile of ashes, has been awakened once again by the efforts, consciousness and energy of 140 crore countrymen. Maa Bharti has been awakened and we have experienced in the last 9-10 years that this is the period in

demography; we have democracy; we have diversity. This trinity of demography, democracy and diversity has the potential to fulfill every dream of India. Today, while the countries around the world are witnessing an age structure that is growing old, India is moving energetically towards its youthful age structure. It is a period of great pride because today India has the highest population under the age of 30. This is what we have in my country, the

youth below the age of 30 years; my country has crores of hands, crores of brains, crores of dreams, crores of resolutions! So, my brothers and sisters, my family members, we can get the desired results.

My dear family members,

Such incidents change the fate of the country. This power changes the destiny of the country. We are at the milestone between 1000 years of slavery and 1000 years of grand future that is about to come. We are at this crossroads and hence we cannot stop, nor shall we live in a dilemma anymore.

My dear family members,

Taking pride in the heritage that was

once lost, gaining back the lost prosperity, let us once again believe that whatever we do, whatever step we take, whatever decision we make, will determine our direction for the next 1000 years and will write the fate of India. Today I would like to tell the youth of my country, to the sons and daughters of my country, you are fortunate. People hardly get the kind of opportunity that our youngsters are getting now, and so we don't want to lose it. I have utmost faith in our youth power. There is huge potential/capability in our youth power and our policies as well as our ways provide an enabling environment to strengthen it.

Today my youth have propelled

India to a certain position in the world's first three startup economy systems. The youth of the world are amazed to see this power of India. Today the world is technology driven and the coming era is going to be influenced by technology. This gives a platform to showcase the prowess of India's talent in technology who is going to play a new key role.

Friends,

Recently, I went to Bali for the G-20 Summit and there the premiers of the most prosperous and developed countries of the world showed immense curiosity and were so eager to learn about the nuances and the success of our Digital India. They were in awe of our talent when I shared that this wonder that India has achieved was not limited to the efforts made by youth of Delhi, Mumbai, Chennai but also by the youth of my Tier-2, Tier-3 cities. Today they are shaping the fate of my country. Today my youth from even small places, and I say this with great confidence today, that this new potential of the country is visible. That is why I say that our small cities can be smaller in size and population but the hope and aspirations, effort and impact they have demonstrated are second to none. They have novel ideas to develop apps, provide solutions and design technological devices. Just look how our sports world has evolved. The children who came out of the slums are showing might in the world of sports today. The youth of small villages, small towns, our sons and daughters are achieving wonders today in this arena. Now see, there are 100 schools in my

country where children are making satellites and also aspiring to release them one day. Today thousands of tinkering labs are conceiving new scientists. Today, thousands of tinkering labs are inspiring millions of children to take up the path of science and technology.

I want to tell the youth of my country that today there is no dearth of opportunities, as many opportunities as you want, this country is capable of creating more opportunities. Sky's the limit.

Today, from the ramparts of the Red Fort, I want to heartily congratulate the mothers, sisters and daughters of my country. Our country has reached a level today due to the special prowess and competence of my mothers and sisters. Today the country is on the path of progress, so I want to also congratulate my farmer brothers and sisters. Today I bow down to the laborers of my country, my laborers who are my dear family members and all the several crores who belong to these fraternities. Today, the country which is moving towards modernity, is seen with a power comparable to the world. This could not be possible without the huge contribution of the laborers of my country. Today is the opportune time to hail their tireless efforts from the ramparts of the Red Fort. I truly congratulate all of them.

I honor my family members, the 140 crore citizens of my country, these laborers, these street vendors and those who sell fruits and vegetables.

Professionals play a significant role in moving my nation forward, in taking India to new heights of progress. Whether they are scientists, engineers, doctors, nurses, teachers, scholars, universities, gurukuls, everyone is contributing their utmost to brighten the future of Mother India.

My dear family members,

National consciousness is the term that is liberating us from worries. And today, this national consciousness is proving that India's greatest strength is trust. India's greatest strength is trust, our trust in each individual, trust of each individual in government, trust of each

one in a bright future for the nation, and the world's faith in India as well. This trust is for our policies and practices. This trust is because of the determined steps with which we are moving forward, towards a brighter future for India.

Brothers and sisters,

My dear family members, it is certain that India's capabilities and possibilities are set to traverse new heights of belief, and this new belief in abilities and new strengths should be nurtured. Today, the country has got the opportunity to host the G-20 summit. And the way various G-20 events and programs have been organized in every corner of India since the past year, they have showcased the abilities of common people to the world. These events have introduced the diversity of India. The world is observing India's diversity with amazement, and as a result,

the attraction towards India has also increased. There is a growing desire to know and understand India. Similarly, India's export is growing rapidly. And I want to say that experts from around the world, based on all these criteria, are saying that India will not stop now. There is hardly any rating agency in the world which is not praising India.

The world has begun to think in a new way after the corona period. And I firmly believe that just as after the Second World War, the world formed a new world order, I can clearly see that a new world order, a new global order, a new geo-political equation is rapidly progressing after corona. All interpretations of the geo-political equation are changing, definitions are changing. My dear family members, you will take pride that the world is seeing the capabilities of my 140 crore fellow citizens in shaping the changing world. You are standing at a turning point.

And during the corona period, the world has seen our capabilities in the way India has propelled the country forward. When the world's supply chains were disrupted, when there was pressure on big economies, even at that time, we had said that we have to see the development of the world. It should be human centric and humane; that is when we will be able to find the right solutions to the problems. And Covid has taught us or has forced us to realize that we cannot do the welfare of the world by leaving human sensibilities.

Today India is becoming the voice of the Global South. India's prosperity and heritage are turning into opportunities for the world today. Friends, with India's participation in the global economy and the global supply chain and with the place that India has earned for itself, I can say with full confidence that the current scenario in India today has brought a guarantee of stability in the world. There are no 'ifs' or 'buts' now in our minds, or in the minds of my 140 crore family members, or in the mind of the world. There is complete trust.

My dear countrymen,

Now the ball is in our court; we should not let the opportunity go; we should not miss the opportunity. I also congratulate my countrymen in India because my countrymen have the ability to

understand the roots of the problems and therefore in 2014, after an experience of 30 years, my countrymen decided that in order to take the country forward, a stable and a strong government was needed; a government with full majority was needed. So, the countrymen formed a strong and stable government. And the country was freed from the three-decades of uncertainty, instability and political compulsions that were gripping the nation.

My dear family members,

The country has such a government today which is devoting every moment of the time and every penny of the people's money for the balanced development of the country; for Sarvajan Hitaya: Sarvajan Sukhaya. The pride of my government and my countrymen is connected to one thing,

that our every decision, our every direction is linked to just one yardstick, that is, 'Nation First'. And 'Nation First', is going to produce far-reaching and positive results. Work is being done on a large scale in the country. But I would like to say that in 2014 as well as in 2019 you formed a strong government, and that is why Modi got the courage to bring reforms. You formed such a government that instilled courage in Modi to bring reforms. And when Modi brought reforms one after the other, the people of my bureaucracy, my crores of hands and feet, who are working as part of the government in every corner of India, 'performed to transform'. They fulfilled the responsibility very well and when the public joined in, we could see the transformation very clearly. And that's why this period of 'reform, perform, transform' is now shaping the future of India. And we are promoting those forces within the country, which are going to

strengthen the foundation of the coming thousand years.

The world needs youth power, youth skills. We have created a separate ministry for skill development. It will not only fulfill the needs of India, but will also fulfill the needs of the world.

We created the Ministry of Jal Shakti. If one analyzes the composition of the ministry, then you will be able to understand the mind and brain of this government in a very good way. The Ministry of Jal Shakti is laying emphasis on ensuring pure drinking water to reach each and every citizen of our country. We are reiterating and focusing on development of sensitive systems to protect the environment. After our country braved Corona, the world is looking for holistic health care; this is the need of the hour. We created a separate Ministry of AYUSH and today Yoga and AYUSH are making waves in the world. Because of our

commitment towards the world, the world is looking up to us. If we ourselves undermine this ability of ours, then how will the world acknowledge it? But when this ministry was formed, the world also understood its value. We are not ignoring the Fisheries and our big beaches. We are cognizant of ensuring welfare of our crores of fishermen brothers and sisters. They are in our heart and that is why we have created a separate ministry for fisheries, animal husbandry and dairy so that we can support those sections of the society and the class who have been left behind.

There are parts of the government economy in the country, but a large part of the society's economy is the cooperative movement. Cooperative Ministry has also been created which is spreading its network through our cooperative

institutions so that the poorest of the poor are heard, their needs are met and they too can contribute in an organized way towards the development of the nation by being a part of a small unit. We have adopted the path of prosperity through cooperation.

My dear family members,

When we came in 2014, we were at number 10 in the global economy, and today the persistent efforts of 140 crore countrymen have finally paid off as we have reached the rank of number 5 in the world economy. And this has not happened just like that at a time when the nation was in the shackles of corruption had gripped the country, scams worth lakhs of crores were wreaking havoc on the economy, the country was being recognized in the governance and fragile file, we stopped leakages, created a strong

economy; we tried to spend more and more money for the welfare of the poor. And today, I want to tell the countrymen that when the country is economically prosperous, it does not just fill the coffers; it builds the capability of the citizens and the nation. If there is a government that takes a pledge to spend this honestly for the welfare of its citizens, then, what outcomes could be achieved.

I am giving the account of 10 years to my countrymen from the ramparts of this Red Fort to which our tricolor stands a witness. The figures that you hear tell a compelling story of change, and you may wonder how this was achieved, how powerful is our capability to facilitate such a transformation. 10 years ago, 30 lakh

crore rupees used to go to the states from the Government of India. In the last 9 years, this figure has reached 100 lakh crores. Earlier, 70 thousand crore rupees were spent from the treasury of the Government of India for the development of local bodies, today it is going to more than 3 lakh crores. Earlier, 90 thousand crore rupees were spent to build the houses of the poor; today it has increased 4 times and more than 4 lakh crores are being spent to build the houses of the poor.

First the poor should get cheap urea. The bags of urea that are sold for 3,000 rupees in some global markets, we provide to our farmers for 300 rupees, and hence the government is providing a subsidy of 10 lakh crore rupees on urea for our

farmers. The Mudra Yojana, with a budget of over 20 lakh crore rupees, has provided opportunities for self-employment, businesses, and ventures for the youth of our country. About eight crore people have started new businesses, and it's not just eight crore people who started their businesses; each entrepreneur has provided employment to one or two individuals. The capability to provide employment to 8-10 crore new individuals has been achieved through the Mudra Yojana availed by eight crore citizens.

During the Corona crisis, MSMEs were supported with nearly 3.5 lakh crore rupees, preventing them from sinking and providing them strength. Under the "One Rank One Pension" initiative, which was a

tribute to our soldiers, 70,000 crore rupees from India's treasury has reached them. The families of our retired soldiers have got this money. These are just a few examples and I don't want to take more time. There are many more initiatives that have significantly contributed to the country's development, generating employment in various corners of the nation as the budget has been increased manifold across categories as compared to before.

And my dear loved ones,

But that's not all; the result of all these efforts is that in my first five-year term, 13.5 crore of my fellow poor brothers and sisters have broken free from the chains of poverty and entered the new

middle class. There can be no greater satisfaction in life than this.

My dear family members,

The various schemes from housing schemes, providing 50,000 crore rupees to street vendors through the PM SVANidhi scheme, and many more have aided these 13.5 crore people to rise above the hardships of poverty. In the days to come, we will launch a scheme on the occasion of Vishwakarma Jayanti, benefiting individuals skilled in traditional craftsmanship, particularly from the OBC community. Weavers, goldsmiths, blacksmiths, laundry workers, barbers, and such families will be empowered through the Vishwakarma Yojana, which will begin with an allocation of around 13-15 thousand crore rupees. We have directly deposited 2.5 lakh crore rupees into the accounts of our farmers through the PM Kisan Samman Nidhi. We have spent 2 lakh crore rupees on the Jal Jeevan Mission, ensuring pure water to every household. We have eased the burden of the poor visiting hospitals during illness under the Ayushman Bharat Yojana. We have spent 70,000 crore rupees under the Ayushman Bharat Yojana ensuring they have access to medicine, treatment, and quality hospital care. The country is aware that we spent 40,000 crore rupees to provide free vaccines during the Corona crisis. But you will be happy to know that we invested nearly 15,000 crore rupees for vaccination of livestock to save them.

My dear citizens, my dear family members,

Jan Aushadhi Kendras have

provided new strength to senior citizens and middle-class families in our nation. In a joint family, if someone has diabetes, it's quite natural to get a medical bill of Rs 2000-3000. We provide medicines which cost Rs 100 in the market for just Rs.10, Rs.15, Rs.20 through Jan Aushadhi Kendras . And today, with 10,000 Jan Aushadhi Kendras across the country, about Rs 20 crore have been saved by these people who needed medicines for these kinds of diseases. And these are mostly people who belong to middle-class families. But looking at its success today, I want to tell the countrymen that we are about to touch that section of the society with the Vishwakarma scheme. At the same time, we are also going to work on the target of 25,000 Jan Aushadhi Kendras across the country in the coming days from the present 10,000 Jan Aushadhi Kendras.

My dear family members,

When poverty reduces in the country, the power of the middle-class section of the country increases manifold. And I assure you that in the coming five years, Modi guarantees that the country will be among the top three world economies; it certainly will be. Today the 13.5 crore people who have come out of poverty have in a way become the middle-class. When the purchasing power of the poor increases, the power of the middle class to carry out business grows too. When the purchasing power of the villages increases, the financial system of the town and city runs at a faster pace. And our economic cycle is interconnected. We want to move ahead by strengthening it.

My dear family members,

The weaker sections who live in the cities face a lot of problems. Middle-class families are dreaming of buying their own houses. We are coming up with a new scheme in the coming years that will benefit those families that live in cities but are living in rented houses, or slums, or chawls and unauthorized colonies. If they want to build their own houses, we will assist them with a relief in interest rates and loans from banks that will help them save lakhs of rupees. If the income tax bracket for my middle-class families is raised from Rs 2 lakh to Rs 7 lakh, it benefits the salaried class, the middle class the most. Internet data was very expensive before 2014. Now we have the world's cheapest internet data. Every family's money is being saved.

My family members,

The world has not yet come out of the adverse impacts of Corona; the war has again created an additional problem. Today the world is facing the crisis of inflation. Inflation has gripped the economy of the whole world. We also import some goods from around the world. Unfortunately, we have to import at inflated prices. So, this whole world has been gripped by inflation.

But my dear family members,

India has tried its best to control inflation. Compared to the previous period, we have also had some success, but we cannot be complacent with that. We should not be complacent that our things are better than that of the world. I have to

take more steps in this direction to minimize the burden of inflation on my countrymen. And we will continue to take that step. My efforts will continue.

My dear family members,

Today the country is moving forward with various capabilities. The country is working to move towards modernity. Today the country is working in the area of renewable energy; today the country is working on green hydrogen; the country's capability in the space sector is increasing.

So the country is moving ahead successfully in the deep sea mission as well. Rail is getting modernized in the country. Vande Bharat Bullet Train is also now successfully plying inside the country today. Concrete roads are being built in every village. Electric buses and metro rails are also being built in the country today. Today the internet is reaching the last mile in every village as we also aspire to go for quantum computers. On the one hand Nano Urea and Nano DAP are being worked upon while on the other side we are also emphasizing on organic farming. Today the Farmers Producers Association app is being built while we aspire to build semiconductors as well.

As we work towards building an accessible and inclusive India for our specially-abled citizens Divyangjan, we are also enabling my Divyangjan to proudly unfurl our tricolor flag of India in Paralympics. We are providing special training to these players. Today, leaving the old thinking, the old scope, India is moving forward with a view to achieve

these futuristic goals. And I say, when the foundation stone is laid by our government, it gets inaugurated within our regime too. I feel blessed that I was the chosen one and it was in my destiny to inaugurate and lay the foundation stones of so many projects.

Our work culture of aspirational mindset, thinking big, farsightedness, Sarvajan Hitaya: SarvajanSukhaya: Such has been our working style. And with this energy we work on how to achieve beyond and more than a resolution. We had resolved to make 75 thousand Amrit Sarovar in the Amrit Mahotsav of independence. At that time, we had resolved to make 75 Amrit Sarovar in every district. Around 50-55 thousand Amrit Sarovars were conceived. But today the work of construction of about 75 thousand Amrit Sarovar is going on. This in itself is a humongous task. This strength of manpower and water power is also going to be useful in safeguarding India's environmental wealth. Providing electricity to 18 thousand villages, opening bank accounts for the masses, building toilets for daughters, all the targets will be accomplished with full force ahead of time.

And when India takes a decision, it achieves it. This is what our track record says. Accomplishing 200 crore vaccinations successfully was an eyeopener for the world. A 200 crore figure leaves them flabbergasted. My country's Anganwadi workers, our Asha workers, and our health workers have made this possible. This is the strength of my country. We rolled out 5-G. My country is

the fastest in the world to roll out 5-G. We have reached more than 700 districts. And now we are already preparing for 6-G also.

We have made a task force. In the renewable energy sector we have surpassed our set target. The target which we had set for renewable energy by 2030 was completed in 2021-22. We had talked about 20 percent blending in ethanol, that as well we have completed five years ahead of time. The same was true about exports of 500 billion dollars, which was accomplished ahead of time and was increased to more than 500 billion dollars.

We had a resolve to accomplish something which was being discussed in our country for 25 years, that our country needs a new parliament; now it is ready. There has never been a session of the Parliament like this that there should be a new Parliament. It is Modi who has made sure the new Parliament was ready ahead of time, my dear brothers and sisters. This is a government that works, a government that surpasses the set targets, this is a new India, this is an India full of self-confidence, this is an India that is working hard to make its resolutions a reality.

And so this India is unstoppable, this India is tireless, this India does not gasp and this India does not give up. And that's why, my dear family members, with economic prowess our labor force has got new strength, our borders have become more secure than before and the soldiers are minding the borders.

On this auspicious occasion of Independence Day, I extend heartfelt

congratulations to my soldiers who are safeguarding the borders of our nation and the uniformed forces responsible for our internal security as I move forward with the address. Our military must be modernized, be empowered, remain youthful, battle-ready, and prepared for war, which is why continuous reforms are taking place within our armed forces.

My dear family members,

We used to hear every day about bomb blasts happening here and there. Everywhere, there were signs cautioning people not to touch suspicious bags and announcements were made frequently. Today, the nation is experiencing a sense of security and when the nation is secured, peace is established that helps us realize new dreams of progress. The era of serial bomb blasts is now in the past and the innocent deaths as a result are now part of history. The country has witnessed a significant reduction in terrorist attacks. In Naxal-affected areas too, there has been a major transformation, creating a conducive environment for a major change.

My dear family members,

In every aspect of progress, when we move forward with the dream of a developed India by 2047, it's not just a dream but a resolve of 1.4 billion citizens. To fulfill that resolve, hard work is essential, but our national character is the most significant force. The countries that have progressed, the ones that have overcome challenges, all of them have had a crucial catalyst – their national character. We must further strengthen our national

character and move forward. It is our collective responsibility that our nation, our national character, should be vigorous, dynamic, hardworking, valiant, and outstanding. For the coming 25 years, we should follow only one mantra which should be the pinnacle of our national character. We should move forward with the message of living the unity of India and refrain from any language or step which will cause any harm to the unity of India. Every moment, I will continue my efforts to ensure the unity of the country. India's unity gives us strength.

Be it North or South, East or West, village or city, male or female – all of us contribute to the strength of our country with the spirit of unity and diversity. The second important aspect that I am observing is that if we want to see our country as a developed India by 2047, we must live by the mantra of 'Shreshtha Bharat' and characterize it. Now talking about our production, I had said in 2014, "Zero Defect, Zero Effect." If there's a "Made in India" product on any table in the world, the world should have confidence that there is nothing better than this. This will be ultimate. Be it our produce, our services, our words, our institutions, or our decision-making processes, everything will be supreme. Only then can we carry forward the essence of excellence.

The third point is that the additional power of women-led development will take the country towards further progress. Today, India can proudly say that if any country in the world has the highest number of women pilots in civil aviation,

it's our nation. Whether it's the progress of Chandrayaan or the moon missions, many women scientists are at the forefront.

Today with the aim of creating a base of 2 crore Lakshpati Didis, we are working on women self-help groups. We, while promoting the potential of our women power, we are focusing on women-led development. When I put forward the matter of women-led development in the G-20, the whole G-20 group acknowledged its importance. And by acknowledging its importance, they are giving a lot of emphasis on it. Similarly, India is a country full of diversities. We have been a victim of imbalanced development. Some parts of our country have been victims of alienation. Now we must lay emphasis upon regional aspirations for balanced development and give due respect to that spirit regarding regional aspirations. If any part of our Mother India, or our body remains under-developed, then our body will not be considered fully developed. If any part of our body remains weak, then we will not be considered healthy. Similarly, if any part of my Mother India, or even a section of the society remains weak, then we cannot consider my Mother India as healthy and capable. And that's why we need to address regional aspirations and that's why we want to move forward in the direction of all-round development of the society, all-round development of every region and to ensure that every region gets an opportunity to reach its potential.

My dear family members,
India is a mother of democracy;

India is also a model of diversity. There are several languages, several dialects, various costumes, and diversity. We have to move forward on the basis of all.

My dear family members,

When I talk about unity, and an incident happens in Manipur, the pain is felt in Maharashtra; if floods grip Assam, Kerala becomes restless. If anything unpleasant happens in any part of India, we feel the pain akin to organ donation. It is our social responsibility to make sure that the daughters of my country are not oppressed. It is our familial responsibility as well as a responsibility of all of us as a country. When copies of Guru Granth Sahib are brought back from Afghanistan, the whole country feels proud. When in any country of the world, during the time of Covid, a Sikh brother of mine sets up langar, feeds the hungry, and the whole world applauds, then India feels proud.

My dear family members,

Speaking of women's respect, recently, I visited a country where a very senior minister asked me a question – “Do your daughters study science and engineering subjects?” I told him that today in my country more daughters than boys are taking up STEM i.e. Science, Technology, Engineering and Maths. It was surprising for him to know that my daughters are taking maximum part in it. This capability of our country is visible today.

My dear family members,

Today 10 crore women are involved in women self-help groups and if you go to

a village with women self-help groups, you will find bank didis, Anganwadi didis with and didis who distribute medicines. And now my dream is to create a base of 2 crore lakhpati didis in the villages. And now we have new options for the same i.e. science and technology. I can see the potential of the women in our villages and that's why I am thinking of a new scheme. That will provide training to the sisters of Women Self Help Group with the integration of technology in our agriculture sector thereby strengthening our agritech. We will give skill training to women and train them to operate as well as repair drones. The Government of India will provide drones to thousands of such Women Self Help Groups. We will initiate making drone services available for our agricultural work. To begin with, we will start building 15 thousand Women Self Help Groups which will give flight to the dream of enabling a robust drone training mission.

My beloved family members,

Today the country is advancing towards modernity. Be it Highway, Railway, Airway, I-Ways or Information Ways, Water Ways, there is no such area in which the country is not progressing today. In the last 9 years, we have given a lot of emphasis on development in the coastal areas, tribal areas as well as our hilly areas. We have given strength to these sections of the society by introducing schemes like Parvat Mala, Bharat Mala. We have ensured the work of mainstreaming our rich eastern India with gas pipelines. We have expanded the health

infrastructure by sanctioning an increase in the number of hospitals. We have also announced an increase in the number of MBBS seats in medical colleges so that our children can fulfill their dream of serving the nation as doctors. We have laid emphasis on making education accessible to all by recommending imparting education in mother tongues. I sincerely appreciate the stance of the Supreme Court of India who will now be making it possible for the people who go to court to hear the judgment and receive the operative part in their respective mother tongues. The importance of mother tongue is growing in today's times.

My dear family members,

For those villages which are known as Border villages of our country today, we have introduced a program called Vibrant Border Village. The Border Villages of our country were considered as the last village of the country until now. We have transformed the entire thought process. It is not the last village of the country. Those visible on the border are the first village of my country. When the sun rises in the east, the village on this side receives the first ray of sunlight. When the sun sets, the village reaps the benefit of the last ray. This is my frontline village and I am happy that today my special guests in this program are 600 headmen who have come today to be a part of this important program at this historic Red Fort from these first villages, border villages. They have traveled so far for the first time and have joined with new resolve, prowess, vigor and determination.

My beloved family members,

We envisioned Aspirational District and Aspirational Block to reinstate balanced development and its positive results can be seen today. Today, with the normal parameters of the states, these Aspirational Districts, which were once far behind, have shown better performance. I am positive that in the coming days, our aspirational districts and our aspirational blocks will definitely move forward. As I was speaking about India's character- first I mentioned India's unity; secondly, I mentioned that India should focus on excellence, thirdly, I spoke about women development. And today, I want to reiterate one more thing, fourthly Regional aspiration and the fifth important thing is India's national character and we are moving forward in that direction. Our national character should think about the betterment of the world. We have to make the country so strong that it can play its role for the welfare of the world. And after handling a global crisis like Corona, and the way we stood up as a country to help the world, the result is that our country has now taken the form of a friend of the world.

As an unwavering ally of the world, India has established its identity today. When we talk about global welfare, India's fundamental idea is to carry that thought forward. I am pleased that on this occasion of August 15th, several esteemed representatives from the US Congress are present among us.

What is India's perspective, and how do we advance the idea of global welfare? Now, when we think, what do we say? We have presented this vision to the world,

and the world is joining us with this vision. We said "One Sun, One World, One Grid" in the field of renewable energy. This is a significant statement from us, and today the world is acknowledging it. After COVID, we told the world that our approach should be "One Earth, One Health". Solutions to problems will arise only when humans, animals, and plants are equally addressed during times of illness.

We have put forth the concept of "One World, One Family, One Future" for the G20 summit and are working in that direction. As the world grapples with climate crises, we have shown the way and launched the LifeStyle for Environment – Mission LiFE initiative. We formed the International Solar Alliance in collaboration with the world and many countries are now part of the International Solar Alliance. We have emphasized the importance of biodiversity and advanced the establishment of the "Big Cat Alliance".

For the damage caused to infrastructure due to global warming from natural disasters, there is a need for long-term arrangements. Therefore, we have introduced the Coalition for Disaster Resilient Infrastructure (CDRI) as a solution. While the world is currently witnessing conflicts in the oceans, we have provided the world with the concept of the "Sagar Platform" which can guarantee global maritime peace. Emphasizing the need for traditional medical practices in mind, we have worked towards establishing a global-level center of the World Health Organization (WHO) in

India. Through yoga and Ayurveda, we have worked for global well-being and health. Today, India is laying a strong foundation for global welfare. It is our collective responsibility to build upon this strong foundation.

My dear family members,

We have many dreams, clear resolutions, and definite policies. There is no questioning the intention. However, we must accept some truths and work towards their solutions. Therefore, my dear family members, I have come to the Red Fort today to seek your help and blessings, because in recent years, I have understood the nation's needs and assessed its necessities. Based on my experience, I am saying that we must now address these matters with seriousness. During the 'Amrit Kaal' of independence, when the nation celebrates 100 years of freedom in 2047, at that time, the Tricolour should be of a developed India in the world. We must not pause even for a moment, nor should we step back. For this, awareness, transparency, and impartiality are the necessary strengths. We have to provide as much nourishment to this strength as possible.

It should be our collective responsibility to ensure that we can provide it through institutions as a citizen and as a family. And that's why if we look at the history of the last 75 years, there was no dearth in India's potential. And why can't this country, which was once called the 'golden bird', rise again with that same potential? Friends, my dear family members, I have an unwavering belief that

in 2047, when the country celebrates 100 years of independence, my country will be a developed India. And I am saying this on the basis of the strength of my country, our available resources and particularly trusting the power of youth, of those under 30 years of age. Moreover, I am saying this on the basis of the strength of my mothers and sisters. However, there are certain obstacles in front of it because in the last 75 years certain bad elements have crept into the society and have become a part of our social system so much so that sometimes we even turn a blind eye toward these. Now is not the time to shut your eyes.

If the dreams are to be fulfilled, the resolutions are to be achieved, then it is the need of the hour to fight the three evils by holding the bull by its horns. Corruption is at the root of all the problems of our country. Like a termite, it has completely eaten away all the systems of the country, and all the capabilities of the country. Freedom from corruption, fight against corruption in every area and in every sector is the need of the hour. And countrymen, my dear family members, this is Modi's commitment; it is my personal commitment that I will continue to fight against corruption. Secondly, dynastic politics has destroyed our country. This dynastic system had gripped the country and snatched away the rights of the people of the country.

The third evil is appeasement. This appeasement has also stained the original thinking of the country, our harmonious national character. These people destroyed

everything. And therefore, my dear countrymen, my dear family members, we must fight against these three evils with all our might. Corruption, nepotism and appeasement; these challenges have flourished which has suppressed the aspirations of the people of our country. These evils rob our country of whatever abilities some people have. These are the things that put a question mark on the hopes and aspirations of our people. Be it our poor, be it Dalit, be it backward, be it Pasmada communities, be it our tribal brothers and sisters, or be it our mothers or sisters, we all have to get rid of these three evils for their rights. We must create an atmosphere of aversion towards corruption. Just as dirt creates aversion in our minds because we do not like dirt, there can be no bigger filth than this in public life.

And that's why we must give a new twist to our cleanliness campaign and cleanse our system of corruption. The government is making a lot of efforts to get rid of corruption with the use of technology. You would be surprised to know what was achieved on the ground in the last 9 years in this country. If you listen to the alarming figures, you will realize that Modi takes such steps. I stopped the unfair advantage that nearly ten crore people used to take. Some of you might claim that severe injustice was done to these people; But no, who were these 10 crore people? Alarming, these 10 crore people were those who were not even born, and yet many falsely identified themselves as their widows and divyangs

and reaped the benefits. Such women upon getting old often became disabled, and thus continued to take false benefits of government schemes. This is the pious task where we were able to stop 100 million such benami activities that had been going on since decades. The property of the corrupt that we have seized is 20 times more than before.

My dear family members,

These people absconded after robbing your hard earned money. We confiscated 20 times more property, and hence people's resentment towards me is very natural. But I have to intensify this fight against corruption. Due to our faulty government system, even if something happened in the eye of the camera, it used to get stuck afterwards. Compared to earlier times, we have now filed many more chargesheets in the court and getting bails is not easy. We are progressing by building such a firm system, because we are earnestly and honestly fighting against corruption.

Today, nepotism and appeasement have brought big misfortune to the country. Now how can this happen in democracy that a political party, and I am giving special emphasis on 'political party', has brought such a distortion in the democracy of my country. It can never strengthen India's democracy. What is that disease: familial politics. And what is their mantra? Party of the family, by the family and for the family. Their life mantra is that their political party belongs to the family, through the family and for the family, Nepotism and partisanship are the

enemies of our talent pool. These parties deny capabilities and refuse to accept their competence. And therefore, for the strengthening of the democracy of this country we must liberate ourselves from nepotism. Sarvajan Hitaya Sarvajan Sukhay! Everyone deserves to get their rights. Hence, it is very important to reinstate social justice as well. Appeasement has done the biggest harm to social justice. If someone has destroyed social justice, then this appeasement thinking, appeasement politics. Government schemes for appeasement have indeed killed social justice. And that's why we realize appeasement and corruption are the biggest enemies of development. If the country wants development, the country aspires to fulfill the dream of 2047 of a developed India, then it is necessary for us that we refuse to tolerate corruption in the country under any circumstances. We should walk forward and onward with this mood.

My beloved family members,

We all have a very important responsibility. Forcing our next generation to live the way you have lived, is a crime. It is our responsibility to give a prosperous and a balanced nation to our future generation. We should aim to provide a country steeped in social justice, so that our future generations do not have to struggle for small things. It is the duty of all of us, the duty of every citizen, and this era - Amrit Kaal is Kartavya Kaal –an era of duty. We cannot lag behind in our responsibilities; we have to build the India that was dreamt by Mahatma Gandhi, the

India that was the dream of our freedom fighters, the India that was the dream of our brave martyrs, our brave women, who sacrificed their lives for the motherland.

My dear family members,

When I came in 2014, I came with a promise of change. In 2014. I made a promise to you that I will bring about change. And the 140 crore members of my family placed their trust in me, and I made every effort to fulfill that trust. The promise of Reform, Perform, Transform changed into belief because I had promised change. Through Reform, Perform, Transform, I have turned this promise into belief. I have worked tirelessly, I have worked for the country, I have worked with pride, and I have done it with the spirit of "Nation First." Based on my performance, you blessed me once again in 2019 and the promise of change brought me here. The next five years will be the years of unprecedented development. The next five years are the golden moments to realize the dream of 2047. And next time, on the 15th of August, from this very Red Fort, I will present to you the achievements of the country, your capabilities, the progress made by you, the successes achieved with even greater self-confidence.

My dear loved ones,

I come from amongst you, within your midst and I live for you. If I have a dream, it is for you. If I sweat, it is for you. Not because you have entrusted me with this responsibility, but because you are my family. As a member of your family, I cannot bear witness to any of your

sorrows, I cannot bear to see your dreams shattered. I am here to fulfill your resolutions, to stand by you as a companion, to serve you, to be connected with you, to live with you, and to fight for you. I am a person who has embarked on this journey with determination, and I believe that the struggles undertaken by our ancestors for independence and the dreams they had are with us today. The blessings of those who made sacrifices during the struggle for independence are with us. An opportunity has come for the 140 crore citizens of our country, and this opportunity has come with great potential and strength for us.

And therefore, my dear loved ones,

Today, as I converse with you in this 'Amrit Kaal', in the first year of the 'Amrit Kaal', I want to tell you with complete confidence -

As the wheel of time keeps turning,

The ever revolving cycle of the Amrit Kaal,

Everyone's dreams are my own dreams,

Nurturing all the dreams, moving steadily, bravely marching, our youth in stride,

With the right principles, forging a new way, setting the right pace, a new path,

Embrace challenges with steadfast courage, elevate the name of the nation in the world.

My dear family members,

My family members in every corner

of India, my family members in every corner of the world, I once again extend my best wishes to all of you on the auspicious festival of Independence Day! And this Amrit kaal is the time of duty for all of us. This Amrit Kaal is the period for all of us to do something for Maa Bharati. During the war of independence, the generation that was born before 1947 got the opportunity to sacrifice their lives for the country. They did not leave any opportunity to die for the country. But we do not have the opportunity to die for the country. But there cannot be a greater opportunity than this for us to live for the country! We must live every moment for the country and with this resolution, we need to frame a new resolve for fulfilling the dreams of 140 crore countrymen in this 'Amrit Kaal'. The resolution of 140 crore countrymen needs to be accomplished and when the tricolor will be hoisted in 2047, then the world will be praising a developed India. With this belief, with this determination, my best wishes to all of you. My heartiest congratulations!

Jai Hind, Jai Hind, Jai Hind!

Bharat Mata ki Jai, Bharat Mata ki Jai, Bharat Mata ki Jai!

Vande Mataram! Vande Mataram!
Vande Mataram!

Thank you very much!

I live for you, I live for your future, I live for the
bright future of Mother India : PM Narendra Modi

Bharat Mata Ki Jai!

Bharat Mata Ki Jai!

Bharat Mata Ki Jai!

Bharat Mata Ki Jai!

My dear countrymen, my family members!

Today is that auspicious moment when we pay our respects to the innumerable revered brave freedom fighters who sacrificed their lives for the country and committed themselves for the freedom of the country; who struggled throughout their lives, embraced the gallows bravely with slogans of Bharat Mata ki Jai. It is a festival to remember their grit, resolve and patriotic virtues. It is due to these bravehearts that we have the good fortune of breathing freely on this festival of independence. The country is deeply indebted to them. We express our

reverence towards every such great personality.

Dear Countrymen,

Today I extend my deep respect to all those who are protecting the country with full dedication with commitment for nation building; and are also trying to take the country to new heights. Be it our farmers, the high morale of the youth, the contributions of our mothers and sisters; or the dalits, oppressed, exploited, deprived; today their patriotic zeal and faith in democracy have become an inspiration for the world. I salute all such people with deep respect.

Dear Countrymen,

This year as well as for a few years in the past, natural disasters are becoming a huge cause of concern for us. Many people have lost their family and property, the nation has also incurred huge losses

several times. Today I express my deepest condolences to all of them and assure that the nation stands with them in this hour of crisis.

Dear Countrymen,

Let us now recall the days of pre independence. During the hundreds of years of slavery, every period has been a struggle. Be it our youth, older people, farmers, women, or tribals, they have continuously fought against slavery. History is proof that even before the much-remembered Revolt of 1857, there were many tribal areas in our country where battles for independence were fought.

Friends,

Before independence, 40 crore countrymen showed immense spirit and capability. They marched forward with a dream, a resolution, and fought tirelessly. There was only one voice—"Vande Mataram," and only one dream—Bharat's freedom. We are proud that their blood runs in our veins today. They were our ancestors. They were just 40 crore. Just 40 crore people uprooted a global power and broke the shackles of slavery. If our

ancestors, whose blood flows in our veins, could achieve this, then today we are a country of 140 crore people. If 40 crore people could break the shackles of slavery, if 40 crore people could fulfill the dream of achieving freedom, then 140 crore citizens of my country, 140 crore of my family members, if they set out with a resolution, determine a direction and march forward step by step, shoulder to shoulder, no

matter how great the challenges, how intense the scarcity or the struggle for resources, we can overcome every challenge and build a prosperous Bharat. We can achieve the goal of a 'Viksit Bharat' by 2047. If 40 crore countrymen could give us freedom with their hard work, dedication, renunciation and sacrifice, then 140 crore countrymen can also build a prosperous Bharat with the same spirit.

Friends,

There was a time when people were committed to die for the country, and we achieved freedom. Today is the time to commit to living for the country. If the commitment to die for the country could bring us freedom, then the commitment to live for the country can also create a prosperous Bharat.

Friends,

Viksit Bharat 2047 is not just a phrase for speeches. There is hard work going behind it. Suggestions are being taken from many people across the country and we have sought suggestions from the citizens. I am pleased that crores of citizens have given countless suggestions for a Viksit Bharat 2047. Every citizen's dream is reflected in this. Every citizen's resolution is evident in this. Be it the youth, the elderly, villagers, farmers, dalits, tribals, people living in the mountains, forests or cities, everyone has given valuable suggestions to build a Viksit Bharat by 2047 when the country celebrates 100 years of its Independence.

I was immensely pleased to read these suggestions. What did they write? Some people proposed making Bharat the skill capital of the world. For a Viksit

Bharat 2047, some suggested transforming the country into a global manufacturing hub. Some suggested that our universities should achieve global status. There were also those who questioned why our media shouldn't be global after so many years of independence. Others expressed the belief that our skilled youth should become the first choice of the world. Some suggested that Bharat should become self-reliant in every aspect of life as soon as possible. Many advocated that the coarse grains produced by our farmers, which we call Shri Anna, these superfoods should reach every dining table across the globe. We must strengthen the nutrition of the world and also support the small farmers of India. Several people highlighted the need for governance reforms in various entities in the country, including local self-government institutions. Concerns about delays in the judicial system were also frequently expressed along with the need for judicial reforms. Many wrote that it's the need of the hour to build many greenfield cities. One individual suggested launching a campaign for capacity building among the Government and administration in the face of increasing natural disasters. Others envisioned that Bharat's own space station should be established as soon as possible. Some emphasized that Bharat should develop into a hub for traditional medicine and

wellness as the world embraces holistic healthcare. Yet another remarked that there should be no delay in Bharat becoming the world's third-largest economy.

Friends,

I was reading these suggestions because they have been provided by my fellow citizens. These are suggestions from the common citizens of my country. I believe that when the people of this nation possess such big thoughts and grand dreams, when their resolve is reflected in these words, it strengthens a new resolve within us. Our self-confidence reaches new heights, and this belief of people is not just an intellectual debate; it has emerged from experiences. This belief is the result of long-term hard work. Therefore, when the common man hears from the ramparts of the Red Fort that electricity will be provided to 18,000 villages in Bharat within a specific timeframe and that promise is fulfilled, their confidence is strengthened. When it is said that even after so many years of independence, there are still 2.5 crore families living in darkness without electricity, and when 2.5 Crore

homes receive electricity, then the confidence of the common man increases. When we talk about 'Swachh Bharat' clean Bharat, from affluent sections of society to rural families, people living in poor colonies or small children, every family today is embracing a clean environment and encouraging dialogue on cleanliness. Every citizen is behaving responsibly and checking on each other to ensure a social change towards clean habits and environment. I believe this is a true reflection of a new consciousness that has come within the country.

When it is announced from the ramparts of Red Fort that three crore families today receive clean drinking water from their taps, it is essential that all our families receive pure and clean drinking water. Through the Jal Jeevan Mission, 12 crore families are receiving hygienic tap water supply in a short duration. Today 15 crore families are the beneficiaries of this scheme. Who among our people were deprived of these facilities? Who was left behind? The forward strata of

for Local. Today I am happy that it has become a new mantra for economic development. Every district is now taking pride in their produce. One District One Product is the new wave now. Every district has now started thinking in the direction of exporting the product under One District One Product. The districts had taken the resolve of Renewable energy. India has achieved more in this sector than G 20 Nations collectively. India is working hard to become self-reliant in the energy sector and to resolve the challenges caused by Global warming.

Friends,

Our nation feels immensely proud of our success in Fintech which even the world wants to learn from us. This makes us feel even more proud of our abilities.

Friends,

How can we forget the crisis faced during the corona pandemic? It was in our own country that the fastest vaccination drive in the world was carried out. Now when our own army conducts surgical strikes and air strikes, the hearts of the youth are filled with pride and heads are held high. It is because of these that 140

millions also starts enabling and ensuring robust implementations. And when every citizen starts participating actively towards achieving these dreams then the desirable outcomes are bound to be achieved.

My dear countrymen,

Let us not forget that we as a nation have been facing tough situations even after several decades of freedom. This is because of our attitude of 'chalta hai' and accepting the status quo. We do not believe or participate in actuating the change. We do not challenge the status quo and do nothing new thinking that it will create more problems. There was an environment of status Quo, to make do with what is available, people believed that nothing is going to happen. We had to break this mentality; we had to fill ourselves with confidence, and we made efforts in that direction. Many people would say, "Why should we work for the next generation now? Let's focus on the present." But the ordinary citizens of the country did not want that; they were waiting for change, they desired change, they were eager for it. But no one gave importance to their dreams, hopes and aspirations. As a result, they continued to struggle through

hardships. They waited for reforms. We were given the responsibility and we implemented significant reforms. Be it the poor, the middle class, the underprivileged, our growing urban population, the dreams and resolutions of the youth, their aspirations, we chose the path of reforms to bring about change in their lives. And I want to assure the citizens of the country that our commitment to reforms is not limited to the editorials of pink papers. Our commitment to reforms is not for a few days of applause. Our process of reforms is not driven by compulsion but by the intention to strengthen the nation. Therefore, today, I can say that our path of reforms has become a blueprint for growth. Our reforms, this growth, the change, these are not just topics for debate clubs, intellectual society or experts.

Friends,

We have not done this due to political compulsions. Whatever we do, we do not think by calculating political gains and losses. Our only resolution is—Nation First, Nation First, the nation's interest is supreme. We take steps with the resolution that my India should become great.

Friends,

There is a long story when it comes to reforms and it might take hours. If I go into its discussion. But I want to give a small example. The reforms in the banking sector—Think about the state of the banking sector—there was neither development, nor expansion, nor trust. Not only that, the kind of activities that were going on led our banks into crises. We implemented multiple reforms to strengthen the banking sector. And today, as a result, our banks have secured their place among the selected strong banks in the world. And when banks become strong, the power of the formal economy is also strengthened. When a banking system is established, it becomes the greatest strength to meet the needs of the common poor, especially middle-class families.

Whether it's a home loan, a vehicle loan, a loan for my farmer to buy a tractor, a loan for my youth to start a start-up, a loan for education for the youth, or a loan to go abroad—these are all made possible through banks. I am happy that even my cattle rearers and my brothers and sisters

involved in fisheries are benefiting from banks today. I am happy that millions of my street vendors are now connecting with banks, achieving new heights, and becoming partners in the path to development. Banks are the biggest support for our MSMEs and our small industries. They need money for daily expenses to progress further, and that has become possible today because of our strong banks.

Friends,

Although our country gained independence, a "Maai-Baap" culture took root unfortunately, where people were forced to constantly plead with the government, seek favors, and rely on references or recommendations. Today, we have transformed that model of

governance. Now, it is the government that reaches out to the beneficiaries; it is the government that delivers gas stoves to their homes, brings water supply to their households, provides electricity, and offers financial assistance to encourage them to touch new heights of development. The government is actively taking steps to promote the skill development of our youngsters.

Friends,

Our government is deeply committed to major reforms, and through these efforts, we aim to set the country on a path of progress.

Friends,

New systems are being established in the country. To advance the nation, numerous financial policies are being continuously developed, and the country's

trust in these new systems is steadily growing. Those who are 20-25 years old today, and who were only 12-15 years old a decade ago, have witnessed this transformation taking place before their eyes. In just 10 years, their dreams have taken shape, sharpened, and ignited a new sense of self-confidence, which is now emerging as a formidable strength of the nation. Today, Bharat's reputation has enhanced globally, and the world's

perception of Bharat has changed.

The doors of opportunities are now wide open for our youth around the world. Countless new employment opportunities, which had eluded us for so many years after independence, are now at their doorstep. Possibilities have expanded, and new opportunities are being created. The youth of my country no longer wish to move slowly. They do not believe in incremental progress. Instead, they are in the mood to take leaps, to achieve new milestones by making bold strides. I would like to say that this is a Golden Era for Bharat. Compared to global conditions also this is indeed our golden period.

My dear countrymen,

We must not let this opportunity slip away. If we seize this moment and move forward with our dreams and resolutions, we will fulfill the nation's aspirations for a 'Swarnim Bharat' (Golden India) and achieve our goal of a developed Bharat by

2047. We have broken free from the shackles of centuries.

Today, whether it is the tourism sector, MSMEs, education, healthcare, transport, agriculture, or the farming sector, a new and modern system is being established in every field. We aim to advance in line with our country's unique conditions while adopting the best practices from around the world. Every sector requires modernization and innovation, with an emphasis on integrating technology. Thanks to our new policies in every sector, these fields are gaining new support and strength. We must remove all obstacles, overcome any downturns, and move forward with full vigor, blossoming, achieving our dreams, and realizing success. We must internalize this vision and move decisively in that direction.

Now you can witness the massive change that is happening. I am throwing light on the changes happening at the grassroots through the women self-help groups. In the past decade, 10 crore sisters

have become a part of these women self-help groups. 10 crore new sisters. I am feeling proud that 10 crore women from ordinary rural families are now becoming economically independent and self-reliant. When women become financially independent, they start contributing in important decision making in their families. They become guarantors and custodians of social transformation. I am equally proud of several CEOs from India who are playing compelling roles at the global level today. It is indeed fulfilling to see that while on the one hand our CEOs are dominating the global business landscape, on the other hand one crore mothers and sisters joined women self-help groups and are becoming 'lakhpati didis'. This is a matter of immense pride for me as well. We have now decided to increase the fund allocated to women self-help groups from 10 lakhs to 20 lakhs. Until now, a total of nine lakh crore funds have been channeled via banks to these self-help groups which is enabling them to further their various works.

My friends,

My young minds kindly be mindful of the fact that the space sector is opening up new future for us. This is a very important aspect of development which we shall pay more emphasis on. We have introduced several new reforms in this sector. We have removed several restrictions that were gripping the growth of this sector. India is seeing a surge in startups in the space sector. This sector is now becoming very vibrant and is going to play a crucial role in making our country a powerful nation. We are futuristic in our vision while strengthening the sector. We feel proud that today private satellites and rockets are being launched in our own country. I can vouch for this fact that if policies are right, intentions are true with complete commitment towards national development then we are bound to achieve great outcomes.

My dear Countrymen,

Today our nation has opened up immense possibilities and new opportunities. We need to focus on two more advancements which have catapulted our economic growth and development. First is the development of modern infrastructure in which we have grown leaps and bounds. Second is Ease of Living. The common people should also have access to an affordable dignified lifestyle and basic amenities.

In the past decade we have witnessed humongous infrastructure development by providing state of art railways, airport, ports, robust roadways, broadband connectivity so that

facilities reach the last mile such as ensuring every village and even forest zones get a school, modern hospitals and Arogya mandirs are built in faraway places to provide affordable healthcare to the marginalized through Ayushman Bharat schemes. Several medical colleges and hospitals are being built. Sixty thousand ponds 'Amrit Sarovars' have been revived and replenished. Optical fiber networks have already been installed in Two lakhs Panchayats. Many farmers are benefitting now due to the huge network of canals. Four crore pukka homes have given a new lease of life to the poor. Three crore new homes have been promised in an effort to further this national agenda.

Our North East India is now a hub for medical infrastructure and this transformation has helped us touch the lives by delivering accessible healthcare till the last mile. We have constructed roads connecting the remotest of villages and borders to bring these regions to the mainstream. Through these robust infrastructure networks, we have been able to fulfill the needs of the Dalits, exploited, deprived, backward, tribals, indigenous and inhabitants of forests, hills and far flung border areas. It has been a pivotal agenda while designing reforms to ensure holistic schemes for our citizens engaged in fisheries, animal husbandry.

Fulfilling the needs of our fisherfolk brothers and sisters, transforming the lives of our livestock keepers, striving for comprehensive development—this has been a part of our policies, our

intentions, our reforms, our

programs, and our work style. And my young people get the greatest benefit due to these efforts. They get new opportunities, new possibilities arise for them to step into new areas, and this is what is providing the most employment, they have had the most opportunities to gain employment during this period.

Our middle-class families naturally have expectations of a quality life. They contribute significantly to the country, so it is the country's responsibility to fulfill their expectations of quality life. We continuously strive to free them from bureaucratic hurdles. And I have envisioned that by 2047, when the dream of a Viksit Bharat will be realized, a component of this dream will be that there will be less government interference in the lives of ordinary citizens. We are committed to the kind of system where governance is not missing where it is necessary and where there is no impact due to delays caused by the government.

My dear fellow citizens,

We pay attention to even the smallest of needs. We focus on even the smallest necessities and work accordingly. Whether it is ensuring that the stove in our poor households keeps burning or ensuring that a poor mother does not have to go to sleep with worries in her mind, we are running a free healthcare plan. (Free) electricity, water, and gas (connections) are now in saturation mode, and when we talk about saturation, it means 100%. When saturation occurs, it does not carry the color of casteism and that of leftist ideology. When the mantra of saturation is

embraced, the true essence of "Sabka Saath, Sabka Vikas" is realized.

We have taken steps to reduce government interference in people's lives. The government used to burden ordinary citizens with thousands of compliances. We have eliminated over 1,500 laws so that citizens are not trapped in a web of legal complexities. There were laws created for small mistakes that could send people to jail. We have abolished the practice of imprisonment for minor offenses and removed provisions in the law that sent people to jail. Today, as we talk

about the legacy of taking pride in our freedom, we have replaced the centuries-old criminal laws with new criminal laws known as (Bharatiya) Nyaya Sanhita. At the core of this is not punishment but the idea of ensuring justice for citizens.

We are working on a nationwide mission to create Ease of Living. I emphasize this at every level of government. I urge all elected representatives, regardless of party or state, to take steps on a mission mode for Ease of Living. I request our youth, professionals, and everyone to keep writing to the government about the trivial issues they face with their solutions. They should inform the government. There is no harm in removing unnecessary difficulties. I firmly believe that today's governments are sensitive. Whether it is local self-governance, state governments, or the central government, they will give importance to this issue.

Reforms in governance are essential

for the dream of a Viksit Bharat by 2047. We must push forward with these reforms so that opportunities are created in the lives of ordinary citizens, and obstacles are eliminated. Citizens should experience dignity in their lives, and no one should ever have to say, "This was my right, and I did not get it." People should not have to look for what they deserve. Therefore, the delivery system in governance needs to be strengthened further. Look at what happens when we talk about reforms in the country. Today, there are approximately 3 lakh institutions operating across the country. Whether it's Panchayats, Nagar Panchayats, Nagar Palikas, Mahanagar Palikas, Union Territories, States, Districts, or the Centre, these 3 lakh small units are active. I appeal to these units today: If each of you undertake just two reforms per year at your level, reforms that directly benefit the common man, I am not asking for much, my friends. Whether it's a Panchayat, a State Government, or any department, simply implement two reforms a year and put them into practice. Imagine the impact—this could result in around 25-30 lakh reforms annually. When 25-30 lakh reforms are made, the confidence of the common man will soar. This newfound confidence will be instrumental in elevating our nation to new heights. That is why we must step forward to initiate changes within our own spheres, break free from outdated systems, come forward to create the change, and act courageously. The needs of the common man are often small, but they can face challenges even at the Panchayat level. If we can address these issues, I am certain

that we can realize our dreams.

My dear countrymen,

Today, our nation is brimming with aspirations. The youth of our country are eager to soar new heights and achieve greatness. Therefore, our aim is to accelerate progress in every sector, focusing on three key areas. Firstly, we must create new opportunities across all sectors. Secondly, we should work towards strengthening the supporting infrastructure required for evolving systems. And thirdly, we must prioritize and enhance the basic amenities for our citizens. These three aspects have fostered an aspirational society in Bharat, resulting in a society that is brimming with confidence. We are moving forward with immense passion by combining the aspirations of our citizens with the energy of our youth and the strength of our nation. I believe we have made significant strides in setting new records in employment and self-employment. Today, we have successfully doubled the per capita income. Bharat's contribution to global growth is substantial, our exports are continuously rising, our foreign exchange reserves have doubled, and global institutions have increasingly placed their trust in Bharat. I believe that Bharat is on the right path, advancing at a fast pace, and that our dreams have great power. Alongside all this, our path of sensitivity energizes us and awakens a new consciousness. Compassion is central to our approach. And we are moving forward with both equality and compassion at the core of our work.

Friends,

When I think of the Corona period, if there is any country that has swiftly improved its economy amidst the global pandemic, it is Bharat. This reassures me that we are on the right path. When the Tricolour is proudly fluttered at every house, transcending caste and creed, it affirms that the country is moving in the right direction. Today, the entire nation is united under the Tricolour — every house is adorned with it, with no distinctions of caste, creed, higher-class, or lower-class; we are all Indians. This unity is a testament to the strength of our direction. When we lift 25 crore people out of poverty, it reinforces our belief that we have maintained our momentum, and our dreams will soon be fulfilled. When more than 100 aspiring districts are competing with the best districts in their respective states, we feel that both our direction and momentum of growth are certainly strong. Our tribal population is small but dispersed in really small groups across the country in remote locations and the government is concerned about their well-being and development. To ensure that the benefits of PM Jan Mann schemes reach each of them at various remote settlements in villages, hills and forests is a challenge for the government but we are not leaving any stone unturned. It gives fulfillment when you work compassionately. We should not only regard and respect women but we should make decisions with empathy for their wellness. In this earnest, we have extended paid maternity leave from 12 weeks to 26 weeks for working

women. We are responsible for the child in her lap who will become a good citizen only if the mother is taken care of. This motivates us to make compassionate decisions for the females of our country.

When my specially-abled brothers and sisters start communicating in the Indian sign language, or benefit from the campaign of inclusive and accessible nation through 'Sugamya' (accessible) Bharat, s/he feels respected and enjoys dignity as a citizen of the country. It is amazing to see our sportspersons come out in flying colors in paralympics. They draw strength from our compassion. We are making equitable decisions with high sensitivity towards our ostracized transgender society by bringing amendments and introducing new laws for their incursion into the mainstream and ensuring dignity, respect and equality for all. Thus, we are moving in the right direction of change. We have embarked onto the 'Trividh Marg' (three-way route) and are seeing a direct benefit of the spirit of service to all.

After 60 years, we have been chosen to serve the nation for the third consecutive time. In response to the blessings that 140 crore countrymen have given to me, I have only one message: We are here to serve each of you, every family and every region. With this power of your blessings, we aspire to achieve new heights of development. To pursue the dream of a developed India, from the ramparts of the Red Fort today, I bow my head in gratitude and thank the crores of countrymen for blessing us and choosing us to serve the

nation. And I assure you all that we have to move forward to new heights, with a new zeal. We are not amongst those who watch from the sides and revel in the glory of small achievements. We are from a culture of seekers of new knowledge and resilience; the go-getters who relentlessly aspire for higher achievements. We want to scale newer heights of development and we wish to inculcate this habit among our citizens.

My dear countrymen,

Today, through the new education policy, we want to transform the current education system in line with the requirements of the 21st century. We have to prepare future ready skilled resources in India to meet the expectations of the fast paced development. The new education policy has a huge role to play in retaining new talent in India. I do not want the youth of my country to be forced to study abroad. A middle-class family spends lakhs and crores of rupees to send their children to study abroad. We want to develop an education system so that the youth of our country do not need to go abroad. Our middle-class families need not spend lakhs and crores of rupees. Not only that, we also want to create such institutions that attract people from abroad to come to Bharat instead. Recently, we have revived the pride of Bihar's glorious history by reconstructing Nalanda University. Nalanda University has resumed its operations once again. However, we must once again, in the field of education revive that centuries-old Nalanda spirit, live that Nalanda spirit, and with great confidence,

work towards bringing new consciousness to the world's traditions of knowledge in the field of education. I firmly believe that the new education policy emphasizes the importance of the mother tongue. I urge the state governments and all institutions in the country that the country's talent should not be hindered because of language. Language should not be a barrier. The strength of the mother tongue empowers even the poorest child in our country to fulfill their dreams. Therefore, we must emphasize the importance of studying in the mother tongue, the role of the mother tongue in life, and its place in the family.

My dear fellow citizens,

As we witness the changes in the world today, the importance of skills has greatly increased. Therefore, we want to give new impetus to skills. Keeping Industry 4.0 in mind, we aim for skill development. We also want skill development for capacity building in every sector of life, including in the agricultural sector. We want to focus on developing new skills even in our sanitation sector. Therefore, we have come out with the Skill India Programme on a much broader scale this time. We have earmarked a large fund in this year's Budget for this purpose. In the Budget, we have also emphasized internships, so that our youth can gain experience, develop their capacity building and showcase their skills in the market. I want to prepare skilled youth in this manner. And friends, observing the global situation today, I can clearly see that Bharat's skilled manpower,

our skilful youth will be making their mark in the global job market, and we are moving forward with that dream.

Friends,

The world is changing rapidly and the importance of science and technology is increasing in every aspect of life. We need to place significant emphasis on science. I have noticed that there has been a new atmosphere of interest in science and technology in our schools and colleges after the success of Chandrayaan mission. This new enthusiasm must be nurtured by our educational institutions. The Government of India has also increased support for research. We have established more chairs. We have created the National Research Foundation providing it with a legal framework to develop a permanent system that continuously strengthens research. This research foundation will carry out that work. It is a matter of great pride that we have decided to allocate one lakh crore rupees for research and innovation in the Budget so that the ideas of our country's youth can be realized.

Friends,

Even today, our children are going abroad for medical education. Most of them come from middle-class families, and they spend a huge amount of money. Over the last 10 years, we have increased the number of medical seats to nearly one lakh. Approximately 25,000 young people go abroad each year for medical education. Sometimes, I get surprised to hear about the countries they have to visit to pursue medical education. Therefore, we have decided that 75,000 new seats will be

created in the medical field in the next five years.

My dear countrymen,

A Viksit Bharat of 2047 must also be a healthy Bharat. To ensure this, we must focus on the nutrition of children starting today as they are the first generation of a developed Bharat. That is why we have launched a nutrition campaign paying special attention to their well-being. We have initiated the National Nutrition Mission (POSHAN Abhiyaan), prioritizing nutrition.

My dear countrymen,

Transforming our agricultural system is crucial and the need of the hour. We must break free from the age-old traditions that have held us back for centuries, and we are actively supporting our farmers in this endeavor. We have been continuously working towards this transformation. Today, we provide farmers with easy access to loans and assist them with the latest technology. We are assisting the farmers to ensure value addition to their produce. We are also making comprehensive arrangements for marketing their produce so that the farmers have end to end assistance, and we are committed to moving forward in this direction.

Today, as the entire world is concerned about Mother Earth, we see the health of our soil deteriorating day by day due to the use of fertilizers. The productivity of our Mother Earth (soil) is also depleting and declining. At this critical time, I want to express my gratitude

to the lakhs of farmers in our country who have chosen the path of organic farming and have taken on the responsibility of nurturing and protecting our Mother Earth. In this year's budget, we have also made significant provisions and introduced substantial schemes to promote and support organic farming.

My dear countrymen,

When I observe the state of the world today, I see that the entire world is turning towards holistic healthcare where organic food has emerged as the preferred choice. If there is any nation that can create a global food basket of organic food, it is my country and its farmers. This is why we aspire to move forward with this vision in the coming days, so that our nation can become the organic food basket for the world as it increasingly demands organic food.

We are striving to ensure that the lives of farmers are made easier, villages have top-class internet connectivity, farmers have access to healthcare facilities and their children get access to smart schools as well as employment opportunities. Given the challenges of sustaining an entire family on small plots of land, we are making comprehensive efforts to equip the youth with the skills needed to secure new jobs and create additional sources of income.

In recent years, we have focused on a women-led development model. Be it innovation, employment or entrepreneurship, women are making significant strides in every sector. It's not just about increasing participation, women

are also taking on leadership roles. Today, in many areas—be it our defence sector, the Air Force, the Army, the Navy, or our space sector—we are witnessing the strength and capabilities of our women.

On the other hand, there are some pressing concerns which bring me a lot of trauma, hence, I once again wish to highlight them from the ramparts of the Red Fort. As a society we should seriously dwell upon the atrocities being meted out to our mother, sisters and daughters. The outrage is visible in the nation and among the citizens. I can feel this outrage. The states, society and the nation have to take serious cognizance of this malefaction. Crimes against women should be investigated without any delay. Those committing such demonic acts must be booked prima facie to reinstate the trust on the government, judiciary and civil society. I also want to mention that the rape victims - our mothers and daughters are highlighted all over the media and discussed in society, however the rapist does not make the news. Now the need of the hour is that there should be a wide discussion about the criminals who get punished so that even those who commit such sins fear the consequences including hanging to death. I feel that it is very important to create this fear.

My dear countrymen,

We have a habit of downsizing our own efforts and achievements as a nation. We unfortunately have stopped taking pride in our nationality for whatever reason. It was humiliating many times to hear 'being late' as a typical Indian

mindset. We have worked hard to improve the perception of Indians at the global level. In the past even toys were imported in India. We have witnessed such days too. But today we are proud that our toy industry has also become a name to reckon with in the global market. We have started exporting toys. There was a time when mobile phones were being imported, but today India has a large hub of manufacturing ecosystem of mobile phones and we have started exporting them all over the world. Such is the prowess of India.

Friends,

Future of the world is connected with semiconductors, modern technology and AI. We have embarked on the semiconductor mission and aspire to have Made In India products which are available at competitive rates for the world. We have great talent pools and our youth should dream big in this sector. India has been into research and now we should move towards manufacturing as well. We have the capability and prowess to provide end to end solutions to the world in this sector.

Friends,

We have also seen the days when we had to struggle even for 2G. Today we can see the meteoric scaling up and Roll Out of 5G across the latitude and longitude of the country. Friends, we are not going to stop anywhere soon. We shall not agree to stop at 5G only. We are already working in the mission mode for 6G and we shall surprise the world with our progress. I can say this with full confidence.

My dear friends,

Talking about the Defence Sector, we were in the habit of questioning any increase in the Defence Budget. No one ever tried to know where the funds were utilized. The Defence Budget was spent on imports from other countries. I am deeply grateful to our Defence Forces as we see their promise in becoming self-reliant in this sector as well. They have shared a list of things that they have resolved not to import any more. We should learn true patriotism from our army. With this spirit we are becoming self-reliant in the defence sector. In the field of Defence Manufacturing India has also marked its presence. I am elated to say that our defence sector which was dependent on importing even small items, has gradually emerged and is establishing itself as exporter and manufacturer of various Defence Equipment.

We want to promote the manufacturing sector because it is crucial for addressing unemployment. Today, the Production-Linked Incentive (PLI) scheme has been a great success. Foreign Direct Investment (FDI) reforms have also given us significant strength. MSMEs (Micro, Small, and Medium Enterprises) have gained considerable momentum. A new system has been developed, and as a result, our manufacturing sector is on the path to becoming a global manufacturing hub. With a country that has such a large youth population and the capability to harness it, we aim to advance in the world of manufacturing with great strength, especially in Industry 4.0. We have also

focused on the necessary skill development for this. We have introduced new models in skill development. We have encouraged public participation so that we can quickly develop skills according to immediate requirements. As I speak from the ramparts of the Red Fort, I am confident that the day is not far when Bharat will become an industrial manufacturing hub and the world will look up to it.

Today, many of the world's leading companies want to invest in Bharat. I have observed this after the elections, and the majority of people requesting to meet with me in my third term are investors. These are global investors who want to come to Bharat and invest here. This is a

huge golden opportunity. I urge state governments to establish clear policies to attract investors. Provide assurance of good governance and build their confidence in the law and order situation. Every state should engage in healthy competition to attract investors. This competition will bring investment to their states, providing local youth with opportunities and creating jobs.

If policies need to be changed, states should adapt them according to global requirements. If land is required, states should create a land bank. The more proactive the states are in working towards good governance with a single-point focus and make efforts in this regard, the more likely it is that these investors will stay for the long term. This cannot be done by the central government alone; state governments play a crucial role because

the projects will be implemented in the states. Daily interaction with state governments is essential for the projects to succeed. Therefore, I urge the states that as the world is increasingly attracted to Bharat and is committed to investing in Bharat, it is our responsibility to move forward with clear policies, leaving behind old habits. You will see the results in your state, and I assure you that your state will shine.

Friends,

It is important for Bharat to be recognized for its best quality. For the world, we now need to focus on the field of design and emphasize "Design in India." We must strive to make Indian Standards synonymous with International Standards. When Indian Standards become International Standards, it will make it easier for our products to receive global acceptance. This will depend on the quality of our production, the quality of our services, and the quality of our approach. Therefore, we must focus on quality as we move forward. We have the talent. We can offer many new things to the world in the field of design. We must embrace the call of "Design in India" and move forward with the dream of "Design in India and Design for the World."

I see a vast market emerging in the world of gaming. However, even today, the influence of gaming and the profits from creating these games are primarily held by foreign companies. Bharat has a rich heritage and we can bring new talent into the world of gaming. We can attract children worldwide to games made in our

country. I want the children of Bharat, the youth of Bharat, Bharat's IT professionals, and Bharat's AI professionals to lead the world of gaming. In the gaming world, our products should make an impact globally. Our animators have the potential to work globally. We can establish a strong presence in the animation industry and should strive to work in that direction.

My dear countrymen,

Today, global warming and climate change are pressing issues and are being discussed across various sectors worldwide. Bharat has undertaken numerous initiatives in this regard. We have demonstrated our commitment through tangible actions, not mere words, and have achieved results that have astonished the world. We were pioneers in banning single-use plastics and have significantly advanced our renewable energy efforts, infusing new strength in this field. We are moving towards a net-zero future in the coming years and I remember the targets set in the Paris Accord. From the ramparts of the Red Fort, I wish to highlight the achievements of my countrymen. What the G-20 nations could not accomplish, our citizens have achieved. If any G-20 country has met its Paris Accord targets ahead of time, it is only my country, my Bharat. I take immense pride in this accomplishment. We have met our renewable energy targets and are ambitiously working towards reaching the target of 500 GW of renewable energy by 2030. It's indeed a massive goal! The world may be astonished by this goal, but I confidently assure my fellow

countrymen that we will achieve it. This will benefit humanity, secure our future, and ensure a bright future for our children. We are also committed to making our railways net-zero carbon emitter by 2030.

Friends,

The PM Surya Ghar Free Electricity Scheme is set to provide new strength, and its benefits will be felt by the average families in our country, particularly the middle class, when their electricity bills become free. The demand for electric vehicles is on the rise. Those who generate electricity from solar energy under the PM Surya Ghar Yojana, can also reduce their fuel costs.

Friends,

We aim to become a global hub through the Green Hydrogen Mission. Policies have been rapidly formulated, and their implementation is progressing swiftly. Bharat is committed to advancing green hydrogen as a new energy source. These efforts address concerns about climate change and global warming, while also opening up significant opportunities for green jobs. Thus, as the importance of green jobs expands in the near future, to seize this opportunity and provide employment for our youngsters, we must focus on promoting and expanding the green job sector.

My dear countrymen,

Today, under this tricolor flag, we are joined by the young athletes who have proudly represented Bharat on the global Olympic stage. On behalf of 140 crore fellow countrymen, I extend my

congratulations to all the athletes and players of our nation. I also offer my best wishes with the hope that we will continue to strive towards new goals with renewed dreams, resolutions, and unwavering effort. In a few days, a large Indian delegation will depart for Paris for the Paralympics. I also convey my heartfelt best wishes to all our Paralympic athletes.

Friends,

India hosted the G-20, and it was organized across various cities in our country. More than 200 events were conducted! G-20 was never held in such a grand manner before, this was a first. This proves that Bharat has the capability to organize major international events and possesses unparalleled hospitality. With this established, our goal is clear: to host the 2036 Olympics on Indian soil. We are preparing for this and making significant progress towards it.

Friends,

It is our social responsibility to support the most disadvantaged members of society. If we leave anyone behind, it hampers our collective progress. Therefore, we can only truly advance if we uplift those who are lagging behind. It is our duty to make every effort to include the neglected regions, the marginalized communities, our small farmers, tribal brothers and sisters in the forests, our mothers and sisters, our laborers, and our workers, ensuring they are brought up to our level. The pace of this effort has already accelerated, and we will soon see these communities catch up with us, thereby strengthening our collective power. We

must approach this task with great sensitivity and seize the significant opportunity that lies ahead.

What could be a more significant occasion for fostering sensitivity than this? Even before the 1857 freedom struggle, a tribal youth in our country stood firm against the British. At the age of 20-22, he challenged them fiercely, and today, he is revered as Bhagwan Birsa Munda. As we approach the 150th birth anniversary of Bhagwan Birsa Munda, let us draw inspiration from his legacy. Who could serve as a greater inspiration than Bhagwan Birsa Munda, exemplifying how even an individual of modest means can exhibit profound patriotism? As we celebrate Bhagwan Birsa Munda's birth anniversary, let our sensitivity and compassion for society deepen. Let us commit to including every member of our community—the poor, the Dalits, the backward, the tribals—and advance together with this resolution.

My dear countrymen,

We are moving forward with determination and making significant progress. However, it is also true that there are some individuals who are unable to appreciate this progress. There are those who cannot think beyond their own welfare and do not care about the well-being of others. Such individuals, with their distorted mindset, are a concern. The country must avoid these people, who are mired in despair. When a handful of such individuals, consumed by their own negativity, spread this kind of toxicity, it leads to anarchy, destruction, chaos, and

severe setbacks that necessitate immense efforts to rectify. These pessimistic elements are not merely hopeless; they are nurturing a negative mindset that dreams of destruction and seeks to undermine our collective progress. The country needs to recognize this threat. Nonetheless, I want to assure my fellow citizens that with our good intentions, integrity, and dedication to the nation, we will win over even those who oppose us. We will not waver from our commitment to advance our country, and I pledge to uphold this resolve.

Friends,

Challenges are abundant, both internal and external. As we grow stronger and gain more attention, these challenges are bound to increase. External challenges, in particular, are likely to escalate, and I am well aware of this. However, I want to convey to such forces that the development of Bharat does not mean a threat to anyone. Even in the past, when we were prosperous, we never dragged the world into wars. We are the land of Buddha, and war is not our path. Therefore, the world need not worry. As Bharat progresses, I urge the global community to understand Bharat's values and its thousands of years of history. Do not perceive us as a threat. Do not resort to strategies that might make it harder for a land capable of contributing to the welfare of all humanity. But I also want to tell my fellow citizens that no matter how many challenges we face, confronting challenges is in Bharat's nature. We will not waver, tire, stop, or bow down. We will leave no stone unturned in fulfilling our commitments,

changing the destiny of 140 crore citizens, securing their future, and realizing the nation's dreams. I assure you that we will triumph over every ill-intent with our good intentions.

My dear countrymen,

Changes in the social fabric can sometimes lead to significant challenges. Every citizen has been troubled by the termite of corruption. Corruption at all levels has shattered the common man's faith in the system. The anger caused by the injustice to one's abilities and potential harms the nation's progress. That is why I have launched a widespread war against corruption. I know this battle comes at a price; it costs me my reputation. But no reputation can be more important than the nation, and no dream of mine can be bigger than the nation's dreams. Hence, my fight against corruption will continue with complete sincerity and at a fast pace, and action will be taken against the corrupt. I want to create an environment of fear for the corrupt, so the tradition of looting the common citizen comes to an end. However, the biggest new challenge is not just dealing with the corrupt but also the high-level societal change that has emerged. This has become a significant challenge and a grave concern for society. We have a great Constitution. Can anyone imagine that some people in our own country are glorifying corruption? They are openly celebrating corruption. The attempt to sow such seeds in society, the glorification of corruption, and the continuous efforts to increase the acceptance of the corrupt have become a

significant challenge for a healthy society and a matter of great concern. By distancing ourselves from corrupt individuals in society, we can create an environment where those who are corrupt will fear taking that path. However, if corruption is glorified, even those who are currently honest may begin to see it as a mark of prestige leading them to believe that engaging in such behavior is acceptable.

My dear countrymen,

I understand the concerns regarding recent events in Bangladesh, especially given our proximity as a neighboring country. I hope that the situation there soon returns to normalcy. The primary concern of our 140 crore citizens is to ensure the safety of Hindus, the minorities in Bangladesh. Bharat has always desired that our neighboring countries pursue a path of contentment and peace. Our commitment to peace is deeply rooted in our culture. In the days to come, our positive thoughts will continue to accompany Bangladesh on its development journey because we are the people dedicated to the welfare of humanity.

My dear countrymen,

As we mark the 75th anniversary of our Constitution, it is important to reflect on its pivotal role in uniting and strengthening our nation. Over these 75 years, the Constitution has been instrumental in fortifying Bharat's democracy and safeguarding the rights of our dalits, the oppressed, the exploited and the deprived sections of the society. As we

celebrate 75 years of the Indian Constitution, it is crucial for citizens to focus on the duties enshrined in the Constitution, and when I talk about duty, I do not just want to put a burden on the citizens. This responsibility extends beyond just the citizens to the Central Government, its employees, State Governments, State Government employees, and every local self-governing institution, whether it be a Panchayat, Municipalities, Municipal Corporations, Tehsil, or District. However, it is also essential that all 140 crore citizens recognise their duties. When we all fulfill our responsibilities collectively, we naturally become guardians of each other's rights. By performing our duties, we inherently protect these rights without needing any additional effort. I hope we will embrace this mindset which will not only strengthen our democracy but also enhance our collective strength, propelling us forward with renewed power.

My dear countrymen,

In our country, the Supreme Court has repeatedly addressed the issue of the Uniform Civil Code. Numerous orders have been issued, reflecting the belief of a significant portion of our population—and rightly so—that the current Civil Code resembles a Communal Civil Code, one that is discriminatory. As we celebrate 75 years of the Constitution, we must hold extensive discussions on this subject as the Supreme Court advocates for this change. And it is our collective responsibility to realize the vision of the framers of our Constitution. We should welcome diverse

opinions and perspectives. Laws that divide our nation based on religion and foster discrimination have no place in modern society. Therefore, I assert that it is time for the country to demand a Secular Civil Code. After 75 years of a Communal Civil Code, it is crucial to move towards a Secular Civil Code. Once this shift takes place, it will eliminate religious discrimination and will bridge the gap felt by ordinary citizens.

My dear countrymen,

When I always talk about the concern of dynastic politics and casteism in the country, I believe they are causing significant harm to the democracy of Bharat. We need to free the country and politics from dynastic politics and casteism. Today, I see that the young people in front of me are associated with the "MY Bharat" organization. It is written very well. "MY Bharat" has several missions. One of the missions is to bring one lakh young people into political life as representatives as soon as possible. Initially, we want to bring forward one lakh young people whose families have no political background—those whose parents, siblings, uncles, aunts have never been involved in politics, in any generation. We want fresh blood, one lakh such talented young people, whether they come into the panchayat, municipal corporations, district councils, state assemblies, or the Lok Sabha. We want new young people with no previous political history in their families to enter politics so that we can be freed from casteism and dynastic politics thereby

enriching democracy. It is not necessary that they join a particular party; they should join whichever party they prefer and become representatives. The country should decide that if one lakh such young people whose families are far removed from politics enter the system in the near future, it will lead to new thinking and new capabilities while also enriching democracy. Therefore, we need to move in this direction. I would also like to say that frequent elections are becoming a hindrance to the country's progress, creating obstacles. Today, it has become easy to link any scheme with elections, because elections are happening somewhere in the country every three or six months. Whenever you announce any scheme, you see in the media that it is linked to elections. Every scheme is coloured by the hue of elections. Hence, there has been extensive discussion in the country. All political parties have expressed their views. A committee has prepared a very good report. The country needs to come forward to embrace the concept of "One Nation One Election". From the ramparts of the Red Fort with the Tricolor as witness, I urge the political parties and those who understand the Constitution of the country, to come forward to make the dream of "One Nation One Election" a reality for the progress of Bharat and the maximum utilization of its resources for the common people.

My dear countrymen,

This is the golden period of Bharat. Viksit Bharat 2047 awaits us. This country is committed to moving forward with a

firm resolution by overcoming obstacles, hurdles and challenges. And friends, I see clearly, there is no hesitation in my thoughts. There is no veil in front of my dreams. I can see clearly that the blood of our ancestors is in the veins of the 140 crore people. If those 40 crore people could fulfill the dreams of independence, then 140 crore citizens can realize the dream of a prosperous Bharat. 140 crore citizens can realize the dream of a Viksit Bharat. As I have said before, the country is bound to become the third-largest economy during my third term, and that I will work three times harder, at three times the speed and with three times the scale so that the dreams we have for the nation are realized sooner. Every moment of mine is for the nation; every second is dedicated to the country; every bit of my being is solely for Maa Bharati. Therefore, with the commitment of working 24x7 and with the vision of a Viksit Bharat by 2047, I call upon my fellow citizens: Let us make the dreams of our forefathers a resolution, connect our dreams to them and add our efforts to them. Let us align our aspirations and our efforts to ensure that the 21st century, which is destined to be the century of Bharat, becomes a 'Swarnim Bharat' (Golden India), and make 'Viksit Bharat' in this century and advance towards fulfilling those dreams. As an independent Bharat is reaching new milestones after 75 years of its journey, let us not leave any stone unturned. And I assure you that I will leave no stone unturned in the wake of the responsibility you have entrusted in me. I will never shy away from hard work. I never back down in courage; I never fear

facing challenges. Why? Because I live for you, I live for your future, I live for the bright future of Mother India. Let us move forward with firm resolve under the shadow of the national flag, under the shadow of the Tricolour, to realize those dreams. Speak with me:

Bharat Mata Ki Jai!
Bharat Mata Ki Jai!
Bharat Mata Ki Jai!

Vande Mataram!
Vande Mataram!
Vande Mataram!
Vande Mataram!

Jai Hind!
Jai Hind!
Jai Hind!

A Vision for Reform, Self-Reliance, and Empowering Every Indian: PM Shri Narendra Modi

My dear countrymen,

This grand festival of Independence is a celebration of the 140 crore resolutions of our people. This festival of Independence is a moment of collective achievements, a moment of pride, and our hearts are filled with joy. The nation is continuously strengthening the spirit of unity. Today, 140 crore Indians are adorned in the colours of the Tricolour. 'Har Ghar Tiranga' is fluttering, whether from the deserts, the Himalayan peaks, the seashores, or densely populated regions and everywhere there is one echo, one cheer: the praise of our motherland, dearer to us than life itself.

My dear countrymen,

In 1947, with endless possibilities and the strength of millions of arms, our country became free. The aspirations of the nation were taking flight, but the challenges were even greater. Following the principles of revered Bapu, the members of the Constituent

Assembly fulfilled a most important responsibility. For 75 years, the Constitution of Bharat has been guiding us like a lighthouse. The makers of our Constitution—many learned and great leaders like Dr. Rajendra Prasad, Babasaheb Ambedkar, Pandit Nehru, Sardar Vallabhbhai Patel, Dr. Sarvepalli Radhakrishnan played a vital role. Our women too made significant contributions. Scholars like Hansa Mehta and Dakshayani Velayudhan played their part in strengthening the Constitution of Bharat. Today, I bow with respect to these makers of the Constitution, who guided and gave direction to the country, from the ramparts of the Red Fort.

My dear countrymen,

Today, we are also celebrating the 125th birth anniversary of Dr. Syama Prasad Mookerjee. Dr. Syama Prasad Mookerjee was the first great personality of the nation to sacrifice his life for the Constitution of Bharat. His sacrifice for the

Constitution, the removal of the wall of Article 370, and the realization of the mantra of “One Nation, One Constitution” have been our true tribute to Dr. Syama Prasad Mookerjee. Today many distinguished guests are present at the Red Fort, members of village panchayats from far-flung areas, representatives of “Drone Didis,” “Lakhpatis Didis,” sportspersons, and other eminent personalities who have contributed to the life of the nation. In a way, I am experiencing a mini Bharat before my eyes. And the vast Bharat is also connected to the Red Fort through technology. On this grand festival of independence, I extend my heartfelt greetings to my fellow countrymen, to lovers of Bharat spread across the world, and to our friends everywhere.

Friends,

Nature is testing us all. In the past few days, we have faced many natural disasters—landslides, cloudbursts, and countless other calamities. Our sympathies are with the victims. The state governments and the central government,

working together, are fully engaged in rescue operations, relief efforts, and rehabilitation work.

Friends,

I see a special significance in today's 15th August. I feel great pride that today I have the opportunity to salute the brave warriors of Operation Sindoor from the ramparts of the Red Fort. Our courageous soldiers punished the enemies beyond anything they could have imagined. On 22nd April, terrorists crossed the border and committed a massacre in Pahalgam, killing people after asking their religion, shooting husbands in front of their wives, and executing fathers in front of their children. The entire nation was filled with outrage, and the

whole world was shocked by such a massacre.

My dear countrymen,

Operation Sindoor was the expression of that outrage. After the events of the 22nd, we gave our army complete freedom—let them decide the strategy, choose the targets, and select the timing. And our army accomplished something that had not happened in decades. Penetrating hundreds of kilometres into enemy territory, they reduced terrorist headquarters to dust and turned terrorist headquarters into ruins. Pakistan is still sleepless. The devastation in Pakistan has been so huge that every day brings new revelations and fresh information.

My dear countrymen,

Our nation has endured terrorism for many decades. The heart of the country has been pierced time and again. Now, we have established a new normal: those who nurture and harbour terrorism, and those who empower terrorists, will no longer be seen as separate. They are all

equal enemies of humanity, with no distinction between them. Bharat has now decided that we will no longer tolerate these nuclear threats. The nuclear blackmail that has gone on for so long will no longer be endured. If our enemies continue this attempt in the future, our army will decide on its own terms, at the time of its choosing, in the manner it deems fit, and target the objectives it selects and we will act accordingly. We will give a fitting and crushing response.

My dear countrymen,

Bharat has now decided—blood and water will not flow together. The people of the country now fully understand how unjust and one-sided the Indus Waters Treaty has been. The waters of rivers originating from Bharat are irrigating the fields of our enemies, while the farmers and the soil of our own nation remain thirsty. This was an agreement that has caused unimaginable loss to our farmers for the past seven decades. Now,

the water that rightfully belongs to Bharat will be reserved solely for Bharat, solely for the farmers of Bharat. The form of the Indus Agreement that Bharat has endured for decades will not be tolerated any longer. This agreement is unacceptable to us in the interest of our farmers, and in the interest of the nation.

My dear countrymen,

Countless people sacrificed their lives for freedom, they dedicated their entire youth, spent their lives in prisons, and embraced the gallows, not for personal gains but for the honour of Maa Bharati, for the freedom of crores of people, to break the chains of slavery, and with one emotion in their hearts—Dignity.

Friends, slavery made us impoverished, and it also rendered us dependent. Our reliance upon others kept increasing. We all know that after independence, feeding crores of people was a

formidable challenge. And it was none other than the farmers of my country who, by toiling hard, filled the granaries of the nation. They made the country self-reliant in foodgrain production. For a nation, the greatest measure of self-respect even today is its self-reliance.

And my dear countrymen, The bedrock of a Viksit Bharat is also a self-reliant Bharat. The greater a

nation's reliance on others, the more its freedom comes into question. Misfortune arises when dependency becomes a habit, when we do not even realise when we abandon self-reliance and become dependent on others. This habit is fraught with danger, and hence one must remain vigilant every moment to be self-reliant.

And my dear countrymen,

Self-reliance is not confined merely to imports and exports, or to rupees, pounds, and dollars. Its meaning is not so limited. Self-reliance is

in India' in our hands, in the hands of our armed forces, they carried out their valour without concern, without interruption, and without hesitation. The results we see today are the outcome of our consistent mission over the past ten years towards self-reliance in the field of defence.

Friends,

I wish to draw your attention to another subject. None can deny that the 21st century is a technology-driven century. And when it is technology-driven, a

linked to our capability, and when self-reliance begins to diminish, capability too continually declines. Therefore, to preserve, maintain, and enhance our capability, it is imperative to be self-reliant.

Friends,

We witnessed in Operation Sindoor the marvel of 'Made in India'. The enemy had no inkling of what weapons and capabilities we possessed, what power was destroying them in the blink of an eye. Imagine if we were not self-reliant, could we have executed Operation Sindoor with such swiftness? We would have been plagued by worries over who might supply us, whether or not we would get the required equipment, and so on. But because we held the strength of 'Made

glance at history tells us that every nation which mastered technology scaled the heights of development, reached the pinnacle, and attained new dimensions of economic power. When we speak of various dimensions of

technology, I wish to draw your attention to semiconductors. I do not stand here at the ramparts of the Red Fort to criticise any person or government, nor do I wish to. But it is equally important for the youth of our country to know. In our country, files related to semiconductors started moving 50–60 years ago. The idea of a semiconductor factory began then. My young friends will be shocked to know that today, semiconductors have become a global force—but 50–60 years ago, the idea was stalled, delayed and shelved. The very conception of semiconductors was aborted. We lost 50–60 years. Meanwhile, many countries mastered semiconductors and established their strength in the world.

Friends,

Today we have freed ourselves from that burden and advanced the work on semiconductors in mission mode. Six different semiconductor units are taking shape on the ground, and we have already given the green signal to four new units.

And to my fellow countrymen, especially the youth, and to those across the world

who understand the strength of Bharat's technology, I say this—by the end of this very year, 'Made in India' chip, manufactured in Bharat by the people of Bharat, will be available in the market. Let me give another example. In the energy sector, we all know that we are dependent on many countries for petrol, diesel, and gas, we are spending lakhs of crores

of rupees to procure them. It is essential to make the country self-reliant in energy. We took up this resolve, and in the last 11 years, solar energy has seen a thirtyfold increase. We are building new dams to expand hydropower so that we may obtain clean energy. With Mission Green Hydrogen, Bharat is today investing thousands of crores of rupees. Keeping in mind the future of energy, Bharat is also undertaking major initiatives in nuclear energy. In the field of nuclear energy, 10 new reactors are progressing rapidly. By 2047, when the nation will complete 100 years of independence—the year we have set as the target for achieving the goal of a 'Viksit Bharat'—we are moving forward with the resolve to increase our nuclear energy capacity more than tenfold.

My dear countrymen,

Reform is a continuous process; reforms must be undertaken as per the demands of the times and prevailing circumstances. In the field of nuclear energy, we have introduced major reforms. We have now opened the doors of

nuclear energy to the private sector as well; we want to combine our strengths.

My dear countrymen,

When the world today expresses concern over global warming, I wish to tell the world that Bharat had resolved to achieve 50% clean energy by 2030. That was our target for 2030.

Look at the capability of my countrymen, look at their determination to fulfil the resolve of making Bharat developed—we achieved the 50% clean energy target in 2025 itself, five years ahead of schedule. This is because we are as sensitive towards the world as we are responsible towards nature.

My dear countrymen,

A huge part of the budget was spent on bringing petrol, diesel, gas etc. Lakhs of crores of rupees were wasted. If we were not dependent on energy, that money would have been used for the future of the youth of my country, that

money would have been used to help the poor of my country fight against poverty, that money would have been used for the welfare of the farmers of my country, that money would have been used to change the conditions of the villages of my country, but we had to give it to foreign countries. Now we are working towards becoming self-reliant. To make the country developed, we are now moving towards 'Samudra Manthan' (churning of the ocean). Taking forward our Samudra Manthan, we want to work in a mission mode towards finding oil reserves, gas reserves under the sea and hence India is going to start the National Deep Water Exploration Mission. This is our important announcement to become energy independent.

My dear countrymen,

Today the whole world has become very cautious about critical minerals, people have started understanding their potential very well. The thing which did not receive much attention till yesterday has come to the centre stage today. Self-reliance in critical minerals is very essential for us too. Be it the energy sector, industry sector, defence sector or any other

technology sector, today critical minerals play a very important role in technology and hence we have launched the National Critical Mission, exploration campaigns are underway in more than 1200 locations and we are moving towards becoming self-reliant in critical minerals as well.

My dear countrymen,

Every citizen of the country is seeing the wonders of the space sector and is filled with pride. And our Group Captain Shubhanshu Shukla has returned from the space station. He is also coming to India in a few days. We are also preparing for Aatmanirbhar Bharat Gaganyaan on our own in space. We are working

towards building our own space station on our own. And I am very proud of the reforms done in space recently, more than 300 startups of my country are now working only in the space sector and thousands of youth are working with full potential in those 300 startups. This is the strength of the youth of my country and this is our trust in the youth of our country.

My dear countrymen,

140 crore Indians are working with full potential to fulfill the resolution of a developed India in 2047, when we will celebrate 100 years of independence. To fulfil this resolve, India is today creating a modern ecosystem in every sector and the modern ecosystem will make our country self-reliant in every field. Today, from the ramparts of the Red Fort, my appeal is to the young scientists of my country, to my talented youth, to my engineers and professionals, and also to every department of the government. Should the jet engine for our Made in India fighter jets be ours or not? We are considered the Pharma of the World. We are setting new records in the field of vaccines, but isn't it the need of the hour that we put more energy into research and development, we should have our own patents, we should research the cheapest

and most effective medicines for the welfare of mankind, and in times of crisis, these should be useful for the welfare of mankind without any side effects. The Government of India has formulated the BioE3 policy. I request the youth of the country to come and study the BioE3 policy and take steps. We have to change the fate of

the country and we need your support.

My dear countrymen,

Today is the era of IT, we have the power of data, isn't it the need of the hour? From operating systems to cyber security, from deep tech to artificial intelligence, everything should be our own, on which the strength of our own people is concentrated, we should introduce the power of their capabilities to the world.

Friends,

Today, be it social media or any other platform, we are working on the world's platforms. We have shown the world that our own UPI platform is surprising the world today. We have the capability; India alone is doing 50% of the real time transactions through UPI. This means power. Be it the creative world, social media or any of these platforms, I challenge the youth of my country, come, why don't we have our own platforms, why should we depend on others, why should India's wealth go out and I have faith in your capability.

My dear countrymen,

Just like we are dependent on the world for energy, it is the misfortune of the country that we have to depend on the world for fertilizers as

well. The farmers of my country can also serve Mother Earth by using fertilizers properly. We are causing a lot of harm to Mother Earth by using it indiscriminately. But at the same time, I want to tell the youth of the country, the industry of the country, the private sector of the country, let us fill the reserves of fertilizers, let us find new ways and prepare our own fertilizers as per the requirement of India, let us not depend on others.

Friends,

The coming era is of EVs (electric vehicles). Now if we don't make EV batteries, we will be dependent. Be it solar panels or all the things required for electronic vehicles, we should have our own.

Friends,

I dare to say this because I have faith in the capabilities of the youth of the country and the faith is not just because they are the youth of my country, during Covid we were dependent on many things, when the youth of my country were told that we need our own vaccine, the country showed it by doing it. The Co-Win platform should be our own, the country has shown it by doing it. We have done the work of saving the lives of crores of people. The same

spirit, the same passion we must give our all to become self-reliant in every sphere of life, to give our very best.

Friends,

In the last 11 years, entrepreneurship has gained tremendous strength. Today, lakhs of start-ups in Tier-2 and Tier-3 cities are strengthening the country's economy and innovation. In the same way, crores of our youth including many of our daughters have taken loans through the Mudra Yojana to start their own businesses. They have not only stood on their own feet, but are also empowering others to do the same. This, too, in a way is giving every individual the opportunity to become self-reliant.

My friends

Earlier, no one paid much attention to women's self-help groups. But in the last 10 years, women's self-help groups have done wonders. Today, their products are reaching markets across the world. Our women's self-help groups are doing business worth lakhs and crores of rupees. I once spoke about toys in Mann Ki Baat. We used to import toys worth crores of rupees from abroad. I casually said in Mann Ki Baat, "My young friends, will we even keep bringing toys from abroad?" And today I

proudly say that my country has started exporting toys. This means that if the country gets every possible opportunity and is freed from all obstacles, it can achieve great things. It should be inspired to do its utmost and the country can do it. I say to the youth of the nation: bring forward your innovative

ideas, do not let your ideas die, my friends. Today's idea could shape the future of generations to come. I stand with you. I am ready to work for you. I am ready to be your partner in this journey. Come forward, gather courage, take the initiative. To the youth who are thinking about manufacturing, come and take the lead. Tell me, if we need to change government rules. The country does not want to stop now. 2047 is not far away — every moment is precious, and friends, we do not want to waste even a single moment.

Friends,

This is an opportunity to move forward, an opportunity to dream big, an opportunity to dedicate ourselves to our resolutions. When the government is with you and I myself am with you, we can now create a new history.

Friends,

Today, the National Manufacturing Mission is progressing at great speed. Our MSMEs are recognized and respected by the world. There is always some tool or component that comes from our country's MSMEs in the making of some of the biggest products globally. These are exported with a sense of pride. But we want

to move towards a path of comprehensive and integrated development. That is why we must strengthen their capabilities. I had once said from the Red Fort — Zero Defect, Zero Effect. Today I want to reiterate that if we want the world to recognize our strength in the global market, we must constantly scale new heights in quality. The world accepts quality. Our quality must be the best, and the government's efforts will also be there to ensure the availability of raw materials and to find ways to reduce our production costs.

And friends,

For all of us engaged in the field of manufacturing, our mantra should be: “Lower price, but higher value.” Every product of ours should have higher value, but cost less. It is with this spirit that we must move forward.

My dear countrymen,

Countless people sacrificed their lives for the country's freedom. I have said before — they gave their youth; they went to the gallows, why? For an independent Bharat. Think back to that period 75–100 years ago, when the entire nation lived with the mantra of a free Bharat. Today, the demand of the time is this: those who

lived by the mantra of an independent Bharat gave us freedom. Now, the mantra for 140 crore Indians should be a prosperous Bharat. If the sacrifices of millions could bring us freedom, then with the resolutions, hard work, self-reliance, promotion of “Vocal for Local,” and the chanting of the mantra of Swadeshi by

millions, we can also create a prosperous Bharat. That generation dedicated itself to a free Bharat; this generation must take bold new steps for a prosperous Bharat, that is what the times demand. That is why I keep urging again and again, and I want to tell all the influencers of the country — help me in spreading this mantra. I appeal to all political parties, politicians, everyone: come, this is not the agenda of any one political party. Bharat belongs to all of us. Together, let us make “Vocal for Local” the mantra of every citizen's life.

We should buy and use only those products made in Bharat, made with the sweat of Indian citizens, that carry the fragrance of our soil and strengthen our resolve for self-reliance. Let this be our collective pledge, and in no time, friends, we will change the world. Today, I want to appeal to every small trader and shopkeeper, you too have a responsibility. In our childhood, we used to see shops simply labelled as “Ghee Shop,” but over time people began writing “Pure Ghee Shop.” In the same way, I want traders and shopkeepers across the country to put up boards saying: “Swadeshi goods sold here”. Let us take pride in Swadeshi. We should use it not out of compulsion, but with strength,

for our own strength and if needed, even to compel others to use it. That should be our power. This should be our guiding mantra.

My dear countrymen,

For a very long time, I have had the opportunity to serve in government. I have witnessed many ups and downs. I am familiar with the challenges faced by governments, as well as with the limitations of administrative systems. Yet, despite all this, it remains our responsibility not to waste our energy on diminishing someone else's achievements. From my vast experience, I say this let us not expend our energy in undermining others; instead, we must devote our entire energy to improving our own abilities and achievements. When we grow and excel, the world will acknowledge our worth. Today, when economic self-interest is growing across the globe, the demand of the hour is that we must not sit lamenting over crises. With courage, we must strive to enhance our own strength and standing. And from my 25 years of administrative experience, I can say this—if we choose this path, and if everyone chooses it, then no selfish interest will ever be able to entrap us.

My dear countrymen,

The past decade has been one of Reform, Perform, and Transform. But now, we must add new strength to our efforts. In recent times, we have undertaken many reforms—whether in the field of FDI, in the insurance sector, in allowing global universities to establish campuses in Bharat. We have abolished more than 40,000 unnecessary compliances. Not only that, we have also scrapped over 1,500 obsolete laws. We have gone to Parliament to amend dozens of laws to simplify them, always placing the interests of the public first. This time too, amidst the ruckus, the news may not have reached people about a very significant reform that has taken place in the Income Tax Act. We have decided to abolish more than 280 sections. And friends, our reforms are not limited to the economic front alone—we have also implemented reforms to make life easier for citizens. The promptness of income tax refunds is a result of reforms. Cashless assessments are a result of reforms. Exempting income up to Rs 12 lakh from income tax—this has brought great joy to my middle-class families, who are eager to contribute to nation-building. Never before did anyone imagine that income up to Rs 12 lakh could be entirely tax-free, but we have made it a reality today.

When the strength of the nation increases, its citizens reap the benefits. Since the days of British rule, we were bound under the penal code, living under the constant fear of punishment. Seventy-five years of independence passed in this manner. We have abolished the penal code and brought in Bharatiya Nyaya Sanhita. It embodies trust in the citizens of Bharat, a sense of belonging, and is filled with sensitivity. We have resolved to accelerate the journey of reform, and we wish to

advance rapidly. I wish to tell my countrymen—everything I am doing, I am doing for the country, not for myself, not to harm anyone. I invite the political parties, my competitors, and all fellow leaders to come forward for the sake of the nation's bright future and join us. Whether it is structural reforms, regulatory reforms, policy reforms, process reforms, or the need for constitutional reforms, we have made every kind of reform our mission today.

And my dear countrymen,

For the next generation reforms, we have decided to constitute a task force. This task force will complete its work within a set timeframe. Current rules, laws, policies, and procedures must be re-drafted to suit the 21st century, to fit the global environment, and to align with the vision of making Bharat a developed nation by 2047. The task force has been created to accomplish this within the prescribed period.

Friends,

These reforms will give courage to all those who wish to shape their future. Be it our start-ups, our small industries, or our cottage industries, entrepreneurs will see a significant reduction in their compliance costs, which in turn will give them new strength. In the field of exports too, changes in logistics and systems will give them a major advantage.

Friends,

There are laws in our country, astonishing as it may sound that provide for imprisonment over trivial matters, and no one ever paid attention to them. I have taken it upon myself to ensure that such unnecessary laws, which place Indian citizens behind bars, are abolished. We had introduced a bill in Parliament earlier; we have

brought it again this time.

Friends,

This Diwali, I am going to make it a double Diwali for you. This Diwali, you fellow countrymen are going to get a very big gift. In the last 8 years, we have done a big reform of GST, reduced the tax burden across the country, simplified the tax regime and after 8 years, the need of the hour is that we should review it once. We started the review by setting up a high-power committee and also held discussions with the states.

My dear countrymen,

We are coming with the next generation of GST reforms, this will be a gift for you this Diwali, taxes needed by the common man will be reduced substantially, a lot of facilities will be increased. Our MSMEs, our small entrepreneurs, will get a huge benefit. Everyday items will become very cheap and that will also give a new boost to the economy.

My dear countrymen,

Today the country is moving at a fast pace towards becoming the third largest economy. We are knocking at the doors and we will achieve it very fast and there will be a day when I will go amongst you and share this news from the ramparts of the Red Fort. Today the entire world is confident about India's economy and economic condition. Amidst so much instability, India's financial discipline, the energy of India's finance, remains a ray of hope. When the economy is in the grip of crisis, the belief that India is the only one to get out of it has grown in the world. Today inflation is under control, our forex exchange reserves are very strong, our macroeconomic indicators are very strong, global rating agencies also constantly

praise India, expressing more and more confidence in the Indian economy. We are making new efforts in this direction so that the benefits of this growing economy reach the poor of my country, the farmers of my country, the women power of my country, the middle class of my country, and it becomes a source of strength for the development of my country.

Today, opportunities are being created for our youth in new sectors. A massive campaign is going on for skill development, self-employment, internships in big companies and hence, youth of the country. Today I have brought good news for you too, for the youth of my country. Today is the 15th of August. Today, on August 15th, we are launching and implementing a scheme worth Rs 1 lakh crore for the youth of my country. The Pradhan Mantri Viksit Bharat Rojgar Yojana is being implemented today on August 15th, this is very good news for you. Under this scheme, the government will give Rs. 15000 to the youth, to every son or daughter who gets a job in the private sector. Companies which generate more opportunities for providing new employment will also be given incentives. Pradhan Mantri Vikas Bharat Rojgar Yojana will create new employment opportunities for approximately 3.5 crore youth. I congratulate all the young people for this.

My dear countrymen,

Today, everyone has started acknowledging the power of women in India. Our women are the beneficiaries of the growing economy, but our women have also contributed a lot in accelerating the growing economy, our mother power has contributed, our women power has contributed. Our daughters are dominating from startups to the space sector. They are

dominating the sports field, shining in the army, today with pride they are participating in the country's development journey by standing shoulder to shoulder. The nation was filled with pride when the first NDA women candidates passed out. The whole country was filled with pride, all the TV channels were following her. What a moment of great pride it was. Self Help Group, the sisters of 10 crore Self Help Groups, are doing such amazing things. Namo Drone Didi Nari Shakti became a new identity. I met a sister in the village, she says that now the villagers call her Pilot. She was saying it with great pride that she was not very educated but she had achieved status.

Friends,

We had pledged to make 3 crore women Lakhpati Didi and I am satisfied that we are working at a fast pace. We will achieve the target of 3 crore before time and today I want to happily tell the country, see the power of my Nari Shakti, two crore women have become Lakhpati Didi in no time. Today some Lakhpati Didi are sitting in front of us. This is my strength, and I believe friends, this will increase their participation in India's development journey.

My dear countrymen,

The farmers of my country have a huge contribution to the economy of India. The hard work of the farmers of India is paying off. Last year, the farmers of my country broke all previous records in the production of grains, this is the potential of my country. The same amount of land, but the systems have changed, water has started reaching, good seeds have started becoming available, farmers have started getting better facilities, so they are increasing their strength for the country. Today

India is number one in the world in the production of milk, pulses and jute. Today we are the second largest fish producer in the world. Look at the power of my fisherman brothers and sisters. We have reached the second position in the world in fish production. Today India has also reached the second position in the world in the production of rice, wheat, fruits and vegetables.

Friends,

You will be happy that the produce of my country's farmers is reaching the global markets today. Agro products worth 4 lakh crore rupees have been exported. The farmers of my country have shown us their strength. Whether they are small farmers, cattle rearers, fishermen, we are providing them the benefits of the country's development schemes. Whether it is PM Kisan Samman Nidhi, rain water harvesting, irrigation schemes, quality seeds, fertilizer requirement, in every sector today farmers have a trust in crop insurance. He is becoming courageous, the country is getting its results too. Earlier this was a matter of imagination, today it has become a reality.

Countrymen,

To save the livestock of our country, we remember that we got a Covid vaccine for free, but we have also administered 125 doses for free to the animals so far. In order to get rid of foot and mouth disease, which is called 'Khurpaka' disease here in North India, we have administered 125 crore doses and that too for free. In terms of agriculture, those districts of the country where farmers have lagged behind others, due to some reason or the other, there are 100 such districts where there is relatively less agriculture and hence we have identified 100 districts from across the country and have

launched a campaign to empower the farmers there, to help the farmers, and for this we have started the PM Dhan-Dhanya Krishi Yojana. PM Dhan-Dhanya Krishi Yojana will provide a little help to those 100 districts of the country, then the farmers there will also be able to compete with other farmers of India.

My dear countrymen,

India's farmers, India's cattle rearers, India's fishermen, these are our biggest priorities. Modi is standing like a wall against any harmful policy related to the farmers of India, the fishermen of India and the cattle rearers of India. India will never accept any compromise regarding its farmers, its livestock farmers, its fishermen.

Dear countrymen,

I have not had to read in books what poverty is. I know it, I have been in the government too and hence my endeavour has been that the government should not be confined to files. The government should be in the lives of the citizens of the country.

Whether they are Dalits, the oppressed, the exploited, or the deprived, the governments should be proactively positive for them, the governments should be pro-people. We are making continuous efforts in that direction. For every person in need in society, some people think that government schemes used to be earlier as well — no, we are implementing government schemes on the ground. We emphasize saturation, because if there is any true execution of social justice, it is in saturation where no eligible person is left out, where the government goes to the eligible person's home, and ensures they get what is rightfully theirs. We are working towards that.

When Jan Dhan accounts were opened, it wasn't just about opening a bank account — it gave people self-respect, the feeling that the doors of the bank are open for me too, that I too can walk into the bank, put my hands on the table, and talk. This confidence is what we have instilled. Ayushman Bharat freed people from the habit of silently enduring illness, and helped them get good healthcare. When we help senior citizens with more than 5,00,000 rupees for their health needs, it shows our concern for their well-being. Today, with PM Awas, 4 crore poor people have received houses — meaning new dreams take root in their lives. Those are not just four walls, friends. For street vendors, there is the PM SVANidhi scheme, for those who once remained trapped in the cycle of paying high interest, this scheme has now enabled them to do business freely. You must have seen that today even street vendors accept and make payments through UPI. This change shows that the government should be present in the lives of even the last person in society. That is why these grassroots schemes are designed, implemented, and when they take root, they become a powerful medium to bring transformation in people's lives. There was a time when the poor, the oppressed, the tribal communities, the deprived, the differently abled, and our widowed mothers and sisters had to wander from place to place for their rights, spending their whole lives going from one government office to another. Today, the government comes to your doorstep with a saturation approach. Crores of beneficiaries are receiving the benefits of government schemes, and Direct Benefit Transfer has been a truly revolutionary step.

Friends,

The country has heard the slogan of “Garibi Hatao” (Eradicate Poverty) many times, even from the Red Fort, and the nation grew tired of hearing it over and over. People had accepted that poverty could not be removed. But when we take schemes directly to the homes of the poor, when we instil confidence in their hearts, then 25 crore poor people of my country defeat poverty, rise above it, and create a new history. Today, over 25 crore poor people in the last 10 years — have overcome poverty and stepped out of it, creating a new “neo-middle class.”

My friends,

This neo-middle class and the existing middle class form a partnership filled with both aspirations and efforts, and this is going to become a great strength in taking the country forward.

My dear countrymen,

In the very near future, we will be marking the 200th birth anniversary of the great social reformer Mahatma Jyotiba Phule. We are going to begin the celebrations for this anniversary. Mahatma Jyotiba Phule's principles and the mantras he gave us carry inspiration for us — the mantra of “priority to the backward.” By giving priority to the backward, we want to reach the heights of transformation. We want to put in our utmost effort for this. Through transparent policies, we wish to make “priority to the backward” a reality on the ground, bringing it into the life of every backward person.

Friends,

Whether it is the PM SVANidhi scheme for street vendors, the Vishwakarma scheme for our skilled artisans, the PM Jan Man scheme for

those who remain disadvantaged even among the tribal communities, or our efforts to bring Eastern Bharat on par with the rest of the country in development and give it leadership opportunities — we are not concerned only with socially backward groups, we also want to give priority to backward regions. We want to prioritize the districts that have lagged behind. We want to prioritize the blocks that have been left behind as well. We have worked with the same mission for 100 Aspirational Districts and 500 Aspirational Blocks. We have emphasized infrastructure projects worth thousands of crores of rupees for the development of Eastern Bharat, with the aim of transforming lives there and making the region an active participant in the nation's journey of development.

My dear countrymen,

There should be development in every field of life. Sports too have an important role in development. There was a time when parents frowned upon children spending time in play; today, the situation has been entirely reversed. If children come forward in sports, take interest in them, parents are filled with pride. I see this as an auspicious sign. When I see an environment of encouragement for sports within the families of my country, my heart swells with pride. I regard this as a most auspicious indication for the nation's future.

And friends,

To promote sports, we have brought forth the National Sports Policy—after several decades, we have introduced the 'Khelo India policy' in the country, so that there may be a comprehensive effort for the development of the sports sector. From school to the Olympics, we wish to develop an entire ecosystem - whether in coaching, in matters of fitness, in

sports grounds, in facilities for sports, in providing the necessary equipment for games, or in assisting small industries to manufacture sports goods. In other words, we wish to take this entire ecosystem to children even in the remotest areas.

But friends,

When I speak of fitness, when I speak of sports, I also wish to place before you a matter of concern. Every family in our country should take it seriously—obesity is becoming a very grave crisis for our nation. Experts say that in the coming years, one in every three people will suffer from obesity. We must protect ourselves from obesity. And therefore, while many steps will have to be taken, I had made one small suggestion—that every family should resolve that when cooking oil comes into the house, it should be 10% less than usual, and its use should also be 10% less. By doing so, we shall make our contribution towards winning the fight against obesity.

My dear countrymen,

Our nation is fortunate—we are heirs to a heritage thousands of years old, from which we constantly draw energy, inspiration, and a path of sacrifice and penance. This year marks the 350th martyrdom anniversary of Guru Tegh Bahadur Ji, who sacrificed everything for the protection of our culture and values. Today, I bow in reverence to him.

Friends,

The strength of our culture lies in our diversity. We wish to celebrate diversity, to cultivate the habit of celebrating diversity. It is our pride that Bharat Maa, like a magnificent garden, is adorned with flowers of countless kinds, each adding to her rich diversity. This diversity is our

great inheritance and our great pride. We have seen at the 'Maha Kumbh' in Prayagraj how Bharat's diversity is lived—crores of people, united in one emotion, one spirit, one endeavour—something that appears truly wondrous to the world. The success of the 'Maha Kumbh' is a resounding testament to Bharat's unity and strength.

Friends,

Our country is richly endowed with linguistic diversity. That is why we have accorded classical language status to Marathi, Assamese, Bangla, Pali, and Prakrit. In my view, the more our languages develop, the more enriched they become, the stronger our entire knowledge system will grow. This is our strength—and in today's age of data, it can also become a great strength for the world, for such is the power of our languages. We must be proud of all our languages, and everyone should contribute to their development.

Friends,

Our manuscripts hold vast treasures of knowledge, yet there has been indifference towards them. Under the Gyan Bharatam Mission, we are now working across the nation to locate handwritten texts, manuscripts, and centuries-old documents, and to use today's technology to preserve their wealth of knowledge for future generations.

My dear countrymen,

Our clear belief is that this country is not built by governments alone; it is not built only by those who hold the reins of state power; it is not built solely by those who administer governance. This nation is built by the toil of crores of people—by sages, saints, scientists, teachers, farmers, soldiers, workers,

labourers—everyone's efforts contribute to nation-building. Contributions come from individuals and from institutions alike. Today, with great pride, I wish to mention one such institution. One hundred years ago, the Rashtriya Swayamsevak Sangh was founded. These 100 years of service to the nation constitute a proud and golden chapter. With the resolve of nation-building through character-building, with the aim of serving Maa Bharati, the swayamsevaks have, for a century, dedicated their lives to the welfare of the motherland. Service, dedication, organisation, and unmatched discipline—these have been its hallmarks. In a sense, the Rashtriya Swayamsevak Sangh is the world's largest NGO, with a century-long history of devotion. Today, from the ramparts of the Red Fort, I salute all the swayamsevaks who have contributed to this century-long journey of national service, and the nation takes pride in this grand and dedicated journey of the Rashtriya Swayamsevak Sangh, which will continue to inspire us.

My dear countrymen,

We are moving towards prosperity, but the road to prosperity passes through security. Over the past 11 years, we have worked with full dedication for national security, defending the nation, and for the safety of its citizens. We have succeeded in bringing about change. The country knows that vast tribal areas of our nation had, for many decades, been blood-soaked in the grip of Naxalism and Maoism. The greatest suffering was endured by my tribal families—tribal mothers and sisters lost their bright, promising children; young sons were lured onto the wrong path, misled, and their lives destroyed. We took firm and decisive

action. There was a time when Naxalism had taken root in more than 125 districts. Our tribal areas and youth were caught in the clutches of Maoism. Today, we have reduced that number from over 125 districts to merely 20. This is the greatest service we have rendered to our tribal communities. There was a time when the name of Bastar evoked the sounds of Maoist and Naxalite bombs and guns. Today, after being freed from Maoism and Naxalism, Bastar's youth participate in the Olympics; thousands of young people, shouting “Bharat Mata Ki Jai”, enter the sports field, and the entire atmosphere brims with enthusiasm. The nation is witnessing this transformation. Regions once known as the “Red Corridor” are now becoming corridors of green development. This is a matter of pride for us. In those parts of Bharat's map once stained red with blood, we have now hoisted the tricolour of the Constitution, the rule of law, and development.

My dear countrymen,

This is the 150th birth anniversary of Bhagwan Birsa Munda. By freeing these tribal areas from Naxalism and saving the lives of the youth of my tribal families, we have paid him a true tribute.

My dear countrymen,

Today, I wish to warn the nation of a grave concern and challenge. As part of a deliberate conspiracy, the demography of the country is being altered. Seeds of a new crisis are being sown. These infiltrators are snatching away the livelihoods of our youth. These infiltrators are targeting our sisters and daughters. This will not be tolerated. These infiltrators are misleading innocent tribals and seizing their lands. The nation will not endure this. When demographic change occurs, particularly in

border areas, it creates a crisis for national security. It threatens the unity, integrity, and progress of the country. It sows the seeds of social tension. No country can hand itself over to infiltrators. No nation in the world does so—how then can we allow Bharat to do so? Our forefathers attained freedom through sacrifice; they gave us a free Bharat. It is our duty towards those great souls that we do not accept such acts within our nation. This will be their true tribute. Therefore, today from the ramparts of the Red Fort, I announce that we have decided to launch a High-Power Demography Mission. Through this mission, the severe crisis now looming over Bharat will be addressed in a deliberate and time-bound manner. We are moving forward in this direction.

My dear countrymen,

Tomorrow is the auspicious festival of Janmashtami, celebrated across the nation as the birth anniversary of Lord Shri Krishna.

Friends,

When I remember Lord Shri Krishna, we are seeing that the methods of warfare are changing all over the world today. We have seen that India is capable of handling every new method of warfare. We have shown in Operation Sindoor, whatever expertise we had in technology. Pakistan has attacked our military bases, our airbases, our sensitive places, our places of worship, our citizens with missiles and drones in countless numbers. The country has seen it, but the efforts made in the last 10 years to keep the country safe, the result of that power was that their every attack was scattered like straw by our brave soldiers and our technology. They could not cause even the slightest damage and hence, when technology

is expanding in the battlefield, technology is becoming dominant, then for the protection of the nation, for the safety of the citizens of the country, we also need to further expand the expertise that we have gained today. The mastery we have achieved today needs to be continuously upgraded. And so, friends, I have taken a pledge. I need your blessings, I need the blessings of crores of countrymen, because no matter how much prosperity there is, if there is indifference towards security, then even prosperity is of no use and therefore the importance of security is very great.

And that is why I am saying today from the ramparts of the Red Fort that in the coming 10 years, by 2035, all the important places of the nation, which include strategic as well as civilian areas, like hospitals, railways, any centre of faith, will be given complete security cover through new platforms of technology. This security shield should keep expanding, every citizen of the country should feel safe, Whatever technology comes to attack us, our technology should prove to be better than that and hence, in the coming 10 years, till 2035, I want to expand this national security shield, strengthen it, modernize it and hence, taking inspiration from Lord Shri Krishna, we have chosen the path of the Sudarshan Chakra of Shri Krishna. Many of you might remember that when the battle of Mahabharat was going on, Shri Krishna had blocked the sunlight with his Sudarshan Chakra and made it dark during the day. Sunlight was blocked with Sudarshan Chakra and Arjuna was able to fulfill the oath he had taken to kill Jayadratha. This is the result of the might and strategy of Sudarshan Chakra. Now the country will launch Sudarshan Chakra Mission. This mission Sudarshan Chakra, a

powerful weapon system, will not only neutralize the enemy's attack but will also hit back at the enemy many times more.

We have also decided some basic points for this Sudarshan Chakra mission of India; we want to take it forward with great intensity in the coming 10 years. Firstly, this entire modern system, its research, development, its manufacturing should be done in our country itself, it should be done with the talent of the youth of our country, it should be made by the people of our country. Secondly, there will be a system which will calculate the possibilities of the future in terms of warfare and work out the strategy of Plus One. And the third thing was the power of the Sudarshan Chakra, it was very precise, it went wherever it had to go and came back to Shri Krishna. We will move forward towards developing a system for targeted precise action through this Sudarshan Chakra and therefore, I pledge to take this work forward with great commitment for the security of the nation and the safety of citizens in the changing ways of warfare.

My dear countrymen,

When we talk about democracy, independent India, then our constitution is the best lighthouse for us, our centre of inspiration, but 50 years ago, the Constitution of India was strangled. The Constitution of India was stabbed in the back, the country was turned into a prison, an emergency was imposed, a state of emergency was imposed. It has been 50 years since the Emergency, no generation of the country should ever forget this sin of murdering the Constitution. The sinners who killed the constitution should not be forgotten and we should move forward by strengthening our dedication towards the Constitution of India, it

is our inspiration.

My dear countrymen,

I had spoken about Panch Prana from this Red Fort. Today, I want to remind my countrymen once again from the Red Fort. To build a developed India, we will neither stop nor bow down, we will keep working hard and we will build a developed India before our eyes in 2047.

My dear countrymen,

Our second pledge is that we will not allow even a single particle of slavery to remain in our lives, in our systems, in our rules, laws and traditions. We will not rest until we are free from all forms of slavery.

My dear countrymen,

We will be proud of our heritage. The biggest ornament, the biggest jewel, the biggest crown jewel of our identity is our heritage, we will be proud of our heritage.

My dear countrymen,

Unity is the most powerful mantra among all these and hence it will be our collective resolve that no one should be able to break the thread of unity.

My dear countrymen,

Fulfilling our duty towards Maa Bharati is no less than worship, no less than penance, no less than adoration, and with the same feeling, for the welfare of the motherland, while putting in our utmost hard work, we will devote ourselves to achieving the target of developed India by 2047, we will not leave any opportunity with whatever capability we have, not only that, we will create new opportunities and after creating them, we will keep moving ahead with the strength of 140 crore countrymen, keep moving ahead, keep moving ahead.

My dear countrymen,

We have to remember, 140 crore countrymen have to remember, the one who has toiled hard, the one who has toiled hard, is the one who has created history. The one who has worked hard, is the one who has created history. The one who has broken the steel rocks, the one who has broken the steel rocks, is the one who has bent the time. The one who has broken the steel rocks, is the one who has bent the time. And this is the time to bend the time, this is the right time.

My dear countrymen,

Once again, I extend my best wishes to all of you on this great festival of Independence. I extend my heartiest congratulations to you. Will you say with me,

Jai Hind! Jai Hind! Jai Hind!

Bharat Mata ki Jai! Bharat Mata ki Jai!
Bharat Mata ki Jai!

Vande Mataram! Vande Mataram! Vande Mataram!

Thank you very much!

Editor's Note : On the 79th Independence Day, PM Shri Narendra Modi delivered his longest and most decisive address from the Red Fort, lasting 103 minutes, charting a bold roadmap for a Viksit Bharat by 2047. With a sharp focus on self-reliance, innovation, and citizen empowerment, the Prime Minister Shri Narendra Modi Ji highlighted India's journey from a nation dependent on others to a globally confident, technologically advanced, and economically resilient country.

Jai Hind! Bharat Mata ki Jai! Vande Mataram!
